THE INSTITUTION OF ELECTRICAL ENGINEERS

Electronics Letters

THE INSTITUTION OF ELECTRICAL ENGINEERS

ELECTRONICS LETTERS (ISSN 0013–5194) is published fortnightly (biweekly) except for one issue in December (total of 25 issues), by the IEE, Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom. 1991 annual subscription price £280·00, or overseas £335·00. Single copy £17·00. Available also in a concurrent microfiche edition at the same subscription rate as for the printed edition. Air mail service direct to subscribers an additional £52·00.

All subscriptions inquiries and orders should be sent to IEE Publication Sales, PO Box 96, Stevenage, Herts. SG1 2SD, United Kingdom. Telephone number (0438) 313311.

Contributions should be addressed to the Executive Editor, *Electronics Letters*, Publishing Department, Institution of Electrical Engineers, Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom.
There is no page charge.

All other correspondence, including advertisements, should be sent to: IEE Publishing Department, Michael Faraday House, Six Hills Way, Stevenage, Herts. SG1 2AY, United Kingdom. Telephone Stevenage (0438) 313311, Telex 825578 IEESTV G, Facsimile 0438 313465. The telephone number of the London Office is 071 240 1871, Telex 261176 IEELDNG, Facsimile 071 240 7735.

The advantages of rapid publication given by *Electronics Letters* are nullified if subscribers are subject to excessive delays in the receipt of the journal. The Executive Editor would be grateful to learn of any difficulties subscribers may experience.

Copyright and copying

This publication is copyright under the Berne Convention and the International Copyright Convention. All rights reserved. Apart from any copying under the UK Copyright, Designs and Patents Act 1988, Part 1, Section 38, whereby a single copy of an article may be supplied, under certain conditions, for the purposes of research or private study, by a library of a class prescribed by The Copyright (Librarians and Archivists) (Copying of Copyright Material) Regulations 1989: SI 1989/1212, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means without the prior permission of the copyright owners. Permission is, however, not required to copy abstracts of papers or articles on condition that a full reference to the source is shown.

Single copies may be made for the purpose of research or private study.

Authorisation to photocopy items for internal or personal use, or for the internal or personal use of specific clients, is granted by the Institution of Electrical Engineers for libraries and other users registered with the Copyright Clearance Center Transactional Reporting Service, provided that the base fee of $3·00 per copy is paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA. 0013–5194/90 $3·00 + 0·00. This authorisation does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works or for resale. Payment is also required for copying of articles published before 1978.

Multiple copying of the content of this publication without permission is always illegal.

The IEE is not as a body responsible for the opinions expressed by individual authors in *Electronics Letters*.

The IEE is a member of the Association of Learned & Professional Society Publishers.

Subject index

ACOUSTIC DELAY LINES

Acoustic plate mode touch screen. E. Dieulesaint, D. Royer, O. Legras and A. Chaabi p49

ACOUSTIC DEVICES

Acoustic plate mode touch screen. E. Dieulesaint, D. Royer, O. Legras and A. Chaabi p49
Noncontact AE measurement system using acoustic microscope. N. Chubachi and H. Kanai p2104
Tapered acoustic buffer rods. C.K. Jen, Z. Wang, C. Neron, A. Miri and K. Abe p1877

ACOUSTIC MICROSCOPY

Acoustic microscopy investigations of nonplanar surfaces. Z. Hadjoub, A. Doghmane, R. Caplain, J.M. Saurel and J. Attal p537 e1112
Acoustic microscopy skimming mode generation using small aperture lenses. Z. Hadjoub, K. Alami, A. Doghmane, J.M. Saurel and J. Attal p981
Noncontact AE measurement system using acoustic microscope. N. Chubachi and H. Kanai p2104
Shear wave imaging for deep nondestructive evaluation. D. Zhang and G.M. Crean p2248

ACOUSTICS

Acoustic microscopy skimming mode generation using small aperture lenses. Z. Hadjoub, K. Alami, A. Doghmane, J.M. Saurel and J. Attal p981
Demonstration of birefringent optical fibre frequency shifter employing torsional acoustic waves. M. Berwick, C.N. Pannell, P. St. J. Russell and D.A. Jackson p713 e1219
Exact acoustic leaky wave solutions for single-mode fibres. K. Tajima p251

ACOUSTO-OPTICS

Integrated acousto-optic collinear *TE–TM* mode convertors for 0·8 μm optical wavelength range. I. Hinkov and V. Hinkov p1211
Switching speed of integrated acoustically-tunable optical filter. D.A. Smith and J.J. Johnson p2102

ACTIVE FILTERS

Adaptive filtering using modified Fermat number transform. A.O. Ogunfunmi p282
CAD technique for designing microwave transistor active filters. S. Udomchokpaiboon and J.C. Mollier p1694
DFB active filter/detector for multichannel FSK optical transmission. R. Hui, N. Caponio, P. Gambini, M. Puleo and E. Vezzoni p2016
Harmonic characterisation of feedback systems incorporating saturation nonlinearities. P. Bowron, M.R.J. Motlagh and A.A. Muhieddine p1865
High frequency saturated CMOS floating resistor for fully-differential analogue signal processors. M. Steyaert, J. Silva-Martinez and W. Sansen p1609
Linear transconductor based on crosscoupled CMOS pairs. S. Szczepanski, R. Schaumann and P. Wu p783
Universal active current filters using single second-generation current conveyor. C-M. Chang p1614

ACTIVE NETWORKS

Analogue fault diagnosis of active networks via bias modulation. A. Walker, P.K. Lala and W.E. Alexander p2279
Current-mode allpass filter using FTFN with grounded capacitor. M. Higashimura p1182
Realisation of current-mode transfer function using four-terminal floating nullor. M. Higashimura p170
Universal network realising basic piecewise-linear I/V characteristics. J. Brzobohatý and J. Pospíšil p402 e1393

ADAPTIVE FILTERS

Block implementation of forward–backward line enhancer. B. Farhang-Boroujeny and Y.C. Lim p728
Easy and effective stabilisation measure for fast recursive least squares algorithms for adaptive transversal filters. H. Schütze and Z. Ren p1397

ADAPTIVE SYSTEMS AND CONTROL

Adaptive Marple spectrum estimation. P.-Y. Zhao and D.-R. Yu p91
Automatic adjustment of quadrature modulators. M. Faulkner, T. Mattsson and W. Yates p214 e392
Block implementation of forward–backward line enhancer. B. Farhang-Boroujeny and Y.C. Lim p728
Fast tracking RLS algorithm using novel variable forgetting factor with unity zone. D.-J. Park, B.-E. Jun and J.-H. Kim p2150
Improving performance of adaptive array in presence of pointing errors using new zero-correction method. K.W. Lo p443
Selftuning robot control laws. C. Vibet p1323
Training binary node feedforward neural networks by back propagation of error. D.J. Toms e101

ADDERS

Ultrafast pipelined adders using RTTs. S. Mohan, P. Mazumder, R.K. Mains, J.P. Sun and G.I. Haddad p830

ALGORITHMS

Adaptive Marple spectrum estimation. P.-Y. Zhao and D.-R. Yu p91
Algorithm for creating (M-1) selfsynchronising M-ary variable length codes. W.-F. Yen p740
Analogue fault diagnosis of active networks via bias modulation. A. Walker, P.K. Lala and W.E. Alexander p2279
Analysis of LMS algorithm with inputs from cyclostationary random processes. D.C. McLernon p136
Backoff considerations in CSMA/CD LAN with single time-varying channel. K.C. Chua and K.M. Lye p747
Backward predictive block matching algorithm for low bit rate video coding. S.-H. Jang and S.-D. Kim p1674
Beamforming in presence of element failure. M.H. Er and S.K. Hui p273
Class of constrained ARMA models for line enhancement using real-time QR implementation. W.J. Fitzgerald and R. Geere p2230
Comparative analysis between noncanonical LMS and LMS adaptive filtering. W.S. Gan, J.J. Soraghan, R.W. Stewart and T.S. Durrani p947
Convolution-based DCT algorithm. Y.-M. Chin and J.-L. Wu p1834
Cryptanalysis of Okamoto cryptosystems with continued fraction algorithm. D.X. Li and D.W. Li p2014
Direction finding in a multipath environment. D. Madurasinghe p61
Direction-of-arrival estimation by using generalised minimum-norm approach. A.B. Gershman p1485
Easy and effective stabilisation measure for fast recursive least squares algorithms for adaptive transversal filters. H. Schütze and Z. Ren p1397
Edge-based combination algorithm applied to multiple restored images. V.J. Stanger p1638
Efficient approximation of continuous wavelet transforms. D.L. Jones and R.G. Baraniuk p748
Efficient input-reordering algorithms for fast DCT. A.N. Skodras and A.G. Constantinides p1973
Efficient pulse compressor for Golay complementary sequences. S.Z. Budišin p219
Efficient realisation of alternating projection algorithm for maximum likelihood direction finding. S.K. Oh and C.K. Un p2290
Fast calculation of Kalman signal smoother gains. S. Hausman and J. Dunlop p2240
Fast computation of two-dimensional discrete cosine transforms using fast discrete Radon transform. N. Ta, Y. Attikiouzel and G. Crebbin p82
Fast frame-to-frame interpolation technique for scenes containing moving objects. J.H. Kim and C.M. Kyung p1788
Fast tracking RLS algorithm using novel variable forgetting factor with unity zone. D.-J. Park, B.-E. Jun and J.-H. Kim p2150
Fast vicinity-upgrade algorithm for rectilinear Steiner trees. J.K. Chua and Y.C. Lim p1139
Frequency assignment for satellite multilevel SCPC systems. Yuk-Hong Lau and D.J. Skellern p294
Further results for evaluation of even order elliptic filter functions using the Darlington algorithm. D.J.M. Báez-López p1797
High-resolution direction finding using eigendecomposition based estimators and joint estimation strategy. A.B. Gershman p2308
Iterative autoregressive parameter estimation in presence of additive white noise. W.G. Chung and C.K. Un p1800
Maximum descent method for image vector quantisation. C.-K. Ma and C.-K. Chan p1772
Median approximating algorithm. S. Fotopoulos and G. Economou p1441
Module orientation algorithm using reconstruction of nets and mean field annealing. S.-S. Kim and C.-M. Kyung p1198
New algorithm for closed-loop model matching. L.A. Aguirre p2260
New algorithm for testing random access memories. R. Rajsuman p574
New fast discrete Hartley transform algorithm. Y.-H. Chan and W.-C. Siu p347
New performance function and variable step size LMS algorithm derived by Karni and Zeng. D.J. Park p2182
New two-dimensional approach for determining depletion layer profile in field-effect transistors. B. Marir, M. Benabbas, D. Bajon and H. Baudrand p1765
O(n) matrix multiplication algorithm for hypercube machines. C.H. Chang p2398
Optimising computation of hexagonal differential gradient edge detector. E.R. Davies p1526
Overflow controller in copy network of broadband packet switch. C.-J. Chang and C.-J. Ling p937
Parallel FFT algorithms for MIMD computers. M.K. Fung and A.K. Nandi p286
Performance analysis of channel identification algorithm with SVD prefiltering. M. Barton p1858
Predictive partial search algorithm for vector quantisation. J. Ngwa-Ndifor and T. Ellis p1722
Prefolding in FHT algorithms. K.M.M. Prabhu and N. Anupindi p940
Preprocessing of line codes for online recognition purposes. A. Nair and C.G. Leedham p1
Radix-2 SRT division algorithm with simple quotient digit selection. N. Burgess p1910
Reduced broadcast algorithm for source routing. R. Ahmad and F. Halsall p2288
Reducing unstable linear control systems via real Schur transformation. C.S. Hu and D. Hou p984
Relation of CLSS algorithm to KT and MUSIC methods. X. Yang and M.H. Er p1348
Relationship between two algorithms for discrete cosine transform. Z. Wang and G.A. Jullien p1114
State recovery techniques for (M, L) algorithm. S. Benedetto and M. Mondin p576
Tracking multiple targets in 2-D angular space using sensor array. K.W. Lo p1478
Tracking performance of digital chip synchronisation algorithms for bandlimited direct-sequence spread-spectrum communication. M. Moeneclaey and G. De Jonghe p1147

AMPLIFIERS

18·5 GHz bandwidth monolithic preamplifier using AlGaAs/GaAs ballistic collection transistors. E. Sano, M. Nakamura, Y. Imai, Y. Matsuoka and T. Ishibashi p2093
1·3 μm MQW semiconductor optical amplifiers with high gain and output power. G. Sherlock, C.P. Seltzer, D.J. Elton, S.D. Perrin, M.J. Robertson and D.M. Cooper p165
20 dB gain thulium-doped fluorozirconate fibre amplifier operating at around 0·8 μm. R.G. Smart, J.N. Carter, A.C. Tropper, D.C. Hanna, S.F. Carter and D. Szebesta p1123
23 dB gain upconversion pumped erbium doped fibre amplifier operating at 850 nm. T.J. Whitley, C.A. Millar, M.C. Brierley and S.F. Carter p184
38·2 dB amplification at 1·31 μm and possibility of 0·98 μm pumping in Pr^{3+}-doped fluoride fibre. Y. Miyajima, T. Sugawa and Y. Fukasaku p1706
5 Gbit/s soliton propagation over 350 km with large periodic dispersion coefficient perturbations using erbium doped fibre amplifier repeaters. A.D. Ellis, J.D. Cox, D. Bird, J. Regnault, J.V. Wright and W.A. Stallard p878
9 dB gain improvement of 1300 nm optical amplifier by amplified spontaneous emission suppressing fibre design. A. Bjarklev, T. Rasmussen, J.H. Povlsen, O. Lumholt, K. Rottwitt, S.D. Petersen and C.C. Larsen p1701
All-optical remote gain switching in Er-doped fibre amplifiers. M. Zirngibl

p1164
Amplification and lasing at 1·3 μm in praseodymium-doped fluorozirconate fibres. Y. Durteste, M. Monerie, J.Y. Allain and H. Poignant p626
Amplification at 1·3 μm in a Pr^{3+}-doped single-mode fluorozirconate fibre. S.F. Carter, D. Szebesta, S.T. Davey, R. Wyatt, M.C. Brierley and P.W. France p628
Amplifier gain insensitive SC integrators with 'same-sample correction' of both gain and phase errors for singlepath and multipath circuits. A.K. Betts, J. Shafeeu and J.T. Taylor p1424
Amplitude and phase modulation of a laser amplifier using travelling wave model. D. Bakewell p329
Automatic gain control in cascaded erbium doped fibre amplifier systems. A.D. Ellis, R.M. Percival, A. Lord and W.A. Stallard p193
Automatic gain controlled oscillating amplifier. P.M. Smith, P.J. Edmonson and C.K. Campbell p1919
Automatic optical-loss compensation with Er-doped fibre amplifier. H. Okamura p2155
BiCMOS operational amplifier with precise and stable DC gain for high-frequency switched capacitor circuits. A. Baschirotto, R. Alini and R. Castello p1338
Bit error rate measurements of 14000 km 5 Gbit/s fibre-amplifier transmission system using circulating loop. N.S. Bergano, J. Aspell, C.R. Davidson, P.R. Trischitta, B.M. Nyman and F.W. Kerfoot p1889
Calculation of optimum fibre lengths for EDFAs at arbitrary pump wavelengths. F.F. Rühl p1443 e1989
Carrier-induced group-velocity dispersion and pulse compression in semiconductor laser amplifiers. G.P. Agrawal p620
Chirp compensation capability of a semiconductor laser amplifier. C.R. Medeiros and J.J. O'Reilly p649 e1112
Coherent operation of 2-D monolithically integrated master oscillator power amplifier. R. Parke, D.F. Welch and D. Mehuys p2097
Complementary CMOS current gain cell. E.A.M. Klumperink and H.J. Janssen p38
Cross-phase modulation in semiconductor optical amplifier. R.S. Grant, G.T. Kennedy and W. Sibbett p801
Current conveyor based EMG amplifier with shutdown control. E. Bruun and E.-U. Haxthausen p2172
Design and performances of 20 dB gain two-tier matrix distributed amplifier. S. D'Agostino, G. D'Inzeo, G. Grifoni, P. Marietti and G. Panariello p506
Design of erbium doped fibre amplifiers for 980 nm or 1480 nm pumping. B. Pedersen, A. Bjarklev and J.H. Povlsen p255
Design of monolithically integrated single frequency laser and booster amplifier. J.E.A. Whiteaway, G.H.B. Thompson, A.R. Goodwin and M.J. Fice p2250
Distortion-free amplification of high-speed test patterns up to 100 Gbit/s with erbium-doped fibre amplifiers. H. Izadpanah, D. Chen, Chinlon Lin, M.A. Saifi, W.I. Way, A. Yi-Yan and J.L. Gimlett p196
Effect of amplifier spacing on four-wave mixing in multichannel coherent communications. D.G. Schadt p1805
Er^{3+}-doped multicomponent glass core fibre amplifier pumped at 1·48 μm. M. Ohashi and K. Shiraki p2143
Erbium-doped fibre amplifier with constant gain for pump wavelengths between 966 AND 1004 nm. R.M. Percival, S. Cole, D.M. Cooper, S.P. Craig-Ryan, A.D. Ellis, C.J. Rowe and W.A. Stallard p1266
Erbium-doped fibres pumped in 800 nm band. B. Pedersen, S. Zemon and W.J. Miniscalco p1295
Evaluation of chromatic dispersion in erbium doped fibre amplifiers. F. Matera, M. Romagnoli, M. Settembre, M. Tamburrini and M. Peroni p1867 e2197
Experimental gain and saturation performance of GaAs/AlGaAs SCH quantum well travelling wave optical amplifier. C. Tombling, T. Saitoh, Y. Suzuki and H. Tanaka p1374
Extended transconductance adjustment/linearisation technique. W.J. Adams and J. Ramírez-Angulo p842
Femtosecond soliton transmission in 18 km erbium-doped fibre amplifier with different pumping configurations. K. Kurokawa and M. Nakazawa p1765
Figures of merit for doped fibre amplifiers in 1300 nm and 1550 nm windows. F.F. Rühl p1605
Filter characteristics of DBR amplifier with index and gain coupling. J. Willems, K. David, G. Morthier and R. Baets p831
Four-wave mixing in semiconductor optical amplifier under CW operation and with FSK modulation at 155 Mbit/s. H. Inoue, W.B. Sessa, R.E. Wagner and S. Tsuji p462
Gain and noise characterisation of erbium doped fibre amplifiers. G.R. Walker p744
Gain and noise performance of fibre amplifiers operating in new pump configurations. V. Lauridsen, R. Tadayoni, A. Bjarklev, J.H. Povlsen and B. Pedersen p327
Gain control in erbium-doped fibre amplifiers by an all-optical feedback loop. M. Zirngibl p560
Gain-switched laser-amplifier photonic integrated circuit generating 590 mW peak power optical pulses. P.B. Hansen, G. Raybon, U. Koren, B.I. Miller, M.G. Young, R.M. Jopson, J.D. Evankow and C.A. Burrus p1778
Gallium arsenide solid state travelling wave amplifier at 8 GHz. J.J. Thompson, M.R.S. Taylor, A.M. Thompson, S.P. Beaumont and N. Apsley p516
Harmonic characterisation of feedback systems incorporating saturation nonlinearities. P. Bowron, M.R.J. Motlagh and A.A. Muhieddine p1865
High gain (21 dB) packaged semiconductor optical amplifiers. R. Boudreau, R. Morrison, R. Sargent, R. Holmstrom, W. Powazinik, E. Meland, E. Wilmot and J. LaCourse p1845
High gain limiting erbium-doped fibre amplifier with over 30 dB dynamic range. W.I. Way, D. Chen, M.A. Saifi, M.J. Andrejco, A. Yi-Yan, A. Von Lehman and C. Lin p211
High performance 10 Gbit/s optical transmission system using erbium-doped fibre preamplifier. B.L. Patel, E.M. Kimber, M.G. Taylor, A.N. Robinson, I. Hardcastle, A. Hadjifotiou, S.J. Wilson, R. Keys and J.E. Righton p2179
High performance W-band low-noise pseudomorphic InGaAs HEMT MMIC amplifiers. K.L. Tan, H. Wang, D.C. Streit, P.H. Liu, R.M. Dia, A.C. Han, D. Garske, S. Bui, J.K. Liu, T.S. Lin, G.S. Dow, P.D. Chow and J. Berenz p1166
High power, compact 1·48 μm diode-pumped broadband superfluorescent fibre source at 1·55 μm. H. Février, J.F. Marcerou, P. Bousselet, J. Auge and M. Jurczyszyn p261
High power, diffraction-limited emission from monolithically integrated active grating master oscillator power amplifier. D. Mehuys, D.F. Welch, R. Parke, R.G. Waarts, A. Hardy and D. Scifres p492
High sensitivity 10 Gbit/s optical receiver using two cascaded EDFA preamplifiers. L.T. Blair and H. Nakano p835
High sensitivity fibre preamplifier receiver for multichannel applications. C.G. Joergensen, B. Mikkelsen, T. Durhuus, K.E. Stubkjaer, J.A. van den Berk, C.F. Pedersen and C.C. Larsen p2153
High speed synchronously pumped Raman fibre amplification. K.C. Byron, D. Burns, R.S. Grant, G.T. Kennedy, C.I. Johnston and W. Sibbett p597
High voltage distributed amplifier. D. Willems, I. Bahl and K. Wirsing p2369
High-drive CMOS buffer for large capacitive loads. A. Nosratinia, M. Ahmadi, G.A. Jullien d M. Shridhar p1044
High-efficiency Ku-band HBT amplifier with 1 W CW output power. P. Bartusiak, T. Henderson, T. Kim, A. Khatibzadeh and B. Bayraktaroglu p2189
Highly efficient Er-doped fibre amplifiers pumped in 660 nm band. M. Horiguchi, M. Shimizu, M. Yamada, K. Yoshino and H. Hanafusa p2319
Highly efficient optical fibre amplifier pumped by a 0·8 μm band laser diode. M. Horiguchi, M. Shimizu, M. Yamada, K. Yoshino and H. Hanafusa e478
Highly improved fibre amplifier for operation around 1300 nm. M. Øbro, B. Pedersen, A. Bjarklev, J.H. Povlsen and J.E. Pedersen p470
Impact of laser linewidth on performance of heterodyne single filter FSK system with optical preamplifier. R. Gangopadhyay and S.P. Majumder p1927
Impact of stimulated Brillouin scattering on fibre Raman amplifiers. M.F. Ferreira, J.F. Rocha and J.L. Pinto p1576
Improved common-mode feedback circuit suitable for operational transconductance amplifiers with tuning. P. Wu and R. Schaumann p117 e787
Influence of residual facet reflectivity on nonlinearities in semiconductor optical amplifiers. T. Durhuus, B. Mikkelsen and K.E. Stubkjaer p310
Investigations on forward pumped two-step Raman amplification in optical fibre. K.C. Byron p756
Ka-band monolithic amplifier using 0·5 μm gate length ion-implanted GaAs/AlGaAs heterojunction FET technology. T. Hwang, M. Feng and C.L. Lau p2121
Lanthanum codoped erbium fibre amplifier. M. Nakazawa and Y. Kimura p1065
Laser diode pumped Pr^{3+}-doped and Pr^{3+}-Yb^{3+}-codoped fluoride fibre amplifiers operating at 1·3 μm. Y. Ohishi, T. Kanamori, J. Temmyo, M. Wada, M. Yamada, M. Shimizu, K. Yoshino, H. Hanafusa, M. Horiguchi and S. Takahashi p1995
Linearised high-efficiency power amplifier for PCN. M. Johansson and T. Mattsson p762
MOS amplifier gain-bandwidth enhancement using body signals. F.S. Shoucair p1029
MQW amplifier optical bistability. D.A.H. Mace, M.J. Adams and C. Seltzer p1363
Measurement of pump induced refractive index change in erbium doped fibre amplifier. S.C. Fleming and T.J. Whitley p1959 e2197
Minimisation of total harmonic distortion in active-loaded differential BJT amplifiers. H. Kuntman and S. Özcan p2381
Nd^{3+}-doped glass waveguide amplifier at 1·054 μm. H. Aoki, E. Ishikawa and Y. Asahara p2351
New high-speed analogue max and min circuits using OTA-based bounded-difference operations. T. Inoue, F. Ueno, T. Motomura, O. Setoguchi and R. Matsuo p1034
Noise figure characteristics of Er^{3+}-doped fibre amplifier pumped in 0·8 μm band. Y. Kimura, K. Suzuki and M. Nakazawa p146
Noise performance of distributed fibre amplifiers. G.R. Walker, D.M. Spirit, D.L. Williams and S.T. Davey p1390
Observation of nonlinear interactions in 20 Gbit/s soliton transmission over 500 km using erbium-doped fibre amplifiers. M. Nakazawa, K. Suzuki, E. Yamada and H. Kubota p1662
Opening the 1·5 μm window in 1·3 μm regenerated systems. J.M. Boggis, A. Lord, W.A. Stallard and P. Cochrane p129
Optical differential amplification in nonlinear fibre ring resonator. J. Capmany, M.A. Muriel and F.J. Fraile-Pelaez p1810
Packaged double-pass travelling-wave semiconductor laser amplifiers. D. Huang, D. Liu, S. Yu, M. Zhou, X. Liu and J. Huang p571
Phase dependent forward three wave amplification in photorefractive BSO. D.J. Webb, K.H. Ringhofer and L. Solymar p889
Polarisation insensitive 1·55 μm semiconductor integrated optical amplifier with access waveguides grown by LP-MOCVD. G. Glastre, D. Rondi, A. Enard and R. Blondeau p899
Prediction of optimum fibre lengths for erbium doped fibre amplifiers. F.F. Rühl p769
Pump wavelength optimisation of erbium-doped fibre amplifier in 800 nm band. E. Delevaque, T. Georges and J.-F. Bayon p1421
Push–pull current circuit for biasing CMOS amplifiers with rail-to-rail input common-mode range. J.F. Duque-Carillo, R. Pérez-Aloe and A. Morillo p2122
Realisation of monolithically integrated single frequency MQW laser and booster amplifier at 1·5 μm wavelength. M.J. Fice, A.R. Goodwin, G.H.B. Thompson and J.E.A. Whiteaway p2305
Simple method to improve dynamic range of optical amplifiers in coherent optical communication systems with heterodyne receivers. B.F. Jørgensen, B. Mikkelsen, C.J. Mahon and S. Saito p611
Speed optimisation of class AB CMOS opamp using doublets. D.-D. Shulman p1795
Square pulse amplification using nonlinear loop mirror incorporating saturable gain. K. Smith, E.J. Greer and N.J. Doran p2046
System characterisation of high gain and high saturated output power, Pr^{3+}-doped fluorozirconate fibre amplifier at 1·3 μm. R. Lobbett, R. Wyatt, P. Eardley, T.J. Whitley, P. Smyth, D. Szebesta, S.F. Carter, S.T. Davey, C.A. Millar and M.C. Brierley p1472
Technique for measuring facet reflectivity and effective index of laser diode amplifiers. L. Goldberg, M. Tamburrini and D. Mehuys p1593
Transmission length improvement in 2·5 Gbit/s direct detection system with Er-doped fibre amplifiers by efficient remote pumping. T. Rasmussen, A. Bjarklev, J. Hedegaard Povlsen, O. Lumholt and K. Rottwitt p1537
Tunable operational transconductance amplifier with extremely high linearity over very large input range. P. Wu and R. Schaumann p1254
Ultrawideband biasing of MMIC distributed amplifiers using improved active load. I.D. Robertson and A.H. Aghvami p1907
Yb^{3+} sensitised Er^{3+} doped silica optical fibre with ultrahigh transfer efficiency and gain. J.E. Townsend, W.L. Barnes, K.P. Jedrzejewski and S.G. Grubb p1958

AMPLITUDE MODULATION

Interleaved 5B2O code for insertion of carrier and clock pilots in 64-QAM systems. S.-K. Hyun and J.-K. Kim p1635

ANALOGUE-DIGITAL CONVERSION

Bandpass ΔΣ A/D convertor using two-path multibit structure. Z.X. Zhang, G.C. Temes and Z. Czarnul p2008
Concurrent error detection in current-mode A/D convertors. C.-L. Wey p2370
Models of round-off noise in second-order sigma–delta modulators. J.H. Blythe p673
Multibit oversampled Σ-Δ A/D convertor with nonuniform quantisation. Z. Zhang and G.C. Temes p528
Reliability of code density test for high resolution ADCs. B. Ginetti and P. Jespers p2231

ANNEALING

AuBe ohmic contacts to *p*-InGaAlAs formed by rapid thermal annealing. T.C. Shen, J. Reed, Z.F. Fan, G.B. Gao and H. Morkoç p2187
Electrical properties of thin oxynitrided SiO_2 films formed by rapid thermal processing in an N_2O ambient. H. Fukuda, M. Yasuda and S. Ohno p440
Thermal stability of Pd–In ohmic contacts to *n*-GaAs formed by scanned electron beam and rapid thermal annealing. K. Prasad, L. Faraone and A.G. Nassibian p149
Thermal stress and defect reduction in undercut GaAs on Si substrate. S. Sakai, K. Kawasaki, M. Okada, N. Wada and Y. Shintani p1371

ANTENNA ARRAYS

Alternative approach to designing array pattern with controlled mean-square sidelobe level. M.H. Er p435
Broadband active microstrip array elements. H. An, B. Nauwelaers and A. Van de Capelle p2379
Broadside printed antenna arrays built with dissymmetrical subarrays. E. Motta Cruz, M. Himdi and J.P. Daniel p425
Convoluted dipole array elements. E.A. Parker and A.N.A. El Sheikh p322
Low sidelobe arrays of parallel dipoles with finite reflector. W. Chen and S.-M. Zhang p2103
Yagi–Uda array for millimetre-wave imaging. K. Mizuno, K. Uehara, H. Nishimura, T. Yonekura and T. Suzuki p108

ANTENNA FEEDERS

Compact dual-frequency feed for prime-focus paraboloid. P.K. Trikha, T.L. Landecker, D. Routledge and J.F. Vaneldik p1682
Reduction of coaxial feed between two parallel conductors into finite number of voltage sources. G.A.E. Vandenbosch and A.R. Van de Capelle p2387

ANTENNA PHASED ARRAYS

Effects of amplitude and phase errors on performance of symmetric-pair arrays. W. Titze p1557
Experimental evaluation of optical signal distribution for phased array antenna. E. Pansini, F. Testa and R. Norbiato p404 e1310

ANTENNA RADIATION PATTERNS

Alternative approach to designing array pattern with controlled mean-square sidelobe level. M.H. Er p435
Hybrid approach to compute radiation pattern of finite microstrip antennas. S.A. Bokhari, J.R. Mosig and F.E. Gardiol p2091
Low sidelobe arrays of parallel dipoles with finite reflector. W. Chen and S.-M. Zhang p2103
Radiation characteristics of dipole-excited dielectric-disk antenna: application of field compensation theorem. H. Helmken, L.A. Ponce de Leon and P.S. Neelakanta p1277
Thin wire antennas in chiral media. D.L. Jaggard, J.C. Liu, A. Grot and P. Pelet p243
Transformation-based synthesis technique for planar arrays with contoured beams. D.A. McNamara and E. Botha p1502

ANTENNA THEORY

Nonlinear beamforming. T. Lo, H. Leung and J. Litva p350
Reduction of coaxial feed between two parallel conductors into finite number of voltage sources. G.A.E. Vandenbosch and A.R. Van de Capelle p2387

ANTENNAS

35 GHZ integrated circuit rectifying antenna with 33% efficiency. T.-W. Yoo and K. Chang p2117
Active patch antenna element with diode tuning. P.M. Haskins, P.S. Hall and J.S. Dahele p1846
Active quarter-wavelength dielectric radiator with circularly polarised radiation pattern. T.-B. Ng, Y.-O. Yam and M.-L. Lam p1758
Alternative approach to designing array pattern with controlled mean-square sidelobe level. M.H. Er p435
Analysis of cylindrical arrays of microstrip rectangular patches. C.M. da Silva, F. Lumini, J.C. da S Lacava and F.P. Richards p778
Application of novel method for surface-ray tracing over hyperboloidal scatterers. R.M. Jha, D.J. Edwards and R. Bhakthavathsalam p1501
Backfire/endfire radiation performance of quadrifilar helical antennas. N. Terada and K. Kagoshima p1108
Balanced directional loop receiving antenna. P.V. Brennan and Y. Valverde p1320
Beamforming in presence of element failure. M.H. Er and S.K. Hui p273
Broadband active microstrip array elements. H. An, B. Nauwelaers and A. Van de Capelle p2379
Broadside printed antenna arrays built with dissymmetrical subarrays. E. Motta Cruz, M. Himdi and J.P. Daniel p425
Compact dual-frequency feed for prime-focus paraboloid. P.K. Trikha, T.L. Landecker, D. Routledge and J.F. Vaneldik p1682
Convoluted dipole array elements. E.A. Parker and A.N.A. El Sheikh p322
Design and characteristics of ring-slot type FSS. A. Kondo p240
Direction finding in multipath environment using method of alternating projection. D. Madurasinghe p1326
Edge effects for resonance frequency of covered rectangular microstrip patch antenna. S.M. Vaitheeswaran Iyer and R.N. Karekar p1509
Effect of dielectric protecting superstrate on radiation pattern of microstrip patch antenna. R. Afzalzadeh and R.N. Karekar p1218
Effect of random errors in antenna cylindrical near-field measurements. J. Romeu and L. Jofre p338
Effects of amplitude and phase errors on performance of symmetric-pair arrays. W. Titze p1557
Efficient design of shaped reflectors using successive projections. G.T. Poulton and S.G. Hay p2156
Experimental analysis of corner-fed printed square patch antennas. E. Motta Cruz and J.P. Daniel p1410
Experimental evaluation of optical signal distribution for phased array antenna. E. Pansini, F. Testa and R. Norbiato p404 e1310
Experimental investigation of three-layer electromagnetically coupled circular microstrip antennas. U.K. Revankar and A. Kumar p1187
Experimental verification of electronically controlled reconfigurable reflector antenna. Zhou Hai, P.J.B. Clarricoats and A. Monk p64
Full wave analysis of an aperture-coupled patch antenna. A.K. Bhattacharyya, Y.M.M. Antar and A. Ittipiboon p153
High efficiency and low sidelobe shaped Cassegrain twist reflector antenna with four-horn triple-mode monopulse feed. D.C. Chang, Y.C. Chen and M.S. Yuan p284
Hybrid approach to compute radiation pattern of finite microstrip antennas. S.A. Bokhari, J.R. Mosig and F.E. Gardiol p2091
Improved coupling for aperture coupled microstrip antennas. D.M. Pozar and S.D. Targonski p1129
Improving performance of adaptive array in presence of pointing errors using new zero-correction method. K.W. Lo p443
Input impedance of hemispherical dielectric resonator antenna. K.W. Leung, K.M. Luk, K.Y.A. Lai and D. Lin p2259
Integrated uniplanar antenna mixer and local oscillator. A. Nešić p56
Leaky-wave antenna for square radiation pattern. K.K. Narayanan, P. Mohanan, K. Vasudevan and K.G. Nair p356
Loaded bifilar helical antenna with small radius and large pitch angle. H. Nakano, H. Mimaki and J. Yamauchi p1568
Low loss waveguide four-port crossover circuit and its application for cross-slot antenna feed. K. Chang, M. Li, K.A. Hummer and R.A. Speciale p997
Low sidelobe arrays of parallel dipoles with finite reflector. W. Chen and S.-M. Zhang p2103
Low-loss Ka-band frequency selective subreflector. K. Ueno, H. Kumazawa and I. Ohtomo p1155
Magnetic field probe for measuring surface current distributions on millimetre wave microstrip antennas. R.R. Grzybowski and R. Bansal p71
Matching network design of microstrip antennas with simplified real frequency technique. H. An, B. Nauwelaers and A. Van de Capelle p2295
Minimisation of reflection coefficient at feed of radome-covered reflector antenna by chiral device. H. Cory and I. Rosenhouse p2345
Modelling of coaxial-fed microstrip patch antenna by finite difference time domain method. C. Wu, K.-L. Wu, Z. Bi and J. Litva p1691
Modified Wolff model for determination of resonance frequency of dielectric covered circular microstrip patch antenna. A.K. Verma and Z. Rostamy p2234
Modified Wolff model for resonance frequency of covered rectangular microstrip patch antenna. A.K. Verma and Z. Rostamy p1850
Mutual coupling between electromagnetically coupled rectangular patch antennas. R.Q. Lee, T. Talty and K.F. Lee p532
New coplanar waveguide/stripline feed network for seven patch hexagonal CP subarray. R.N. Simons, R.Q. Lee and G.R. Lindamood p533
New technique for estimation of farfield from near-zone phaseless data. T. Isernia, R. Pierri and G. Leone p652
Nonlinear beamforming. T. Lo, H. Leung and J. Litva p350
Novel frequency-selective twist polariser. W.M. Shi, W.X. Zhang and M.G. Zhao p2110
Novel leaky-wave antenna for millimetre waves based on V-groove guide. Z.-X. Shen p1573
Null synthesis for shaped reflector antennas. A.D. Monk, P.J.B. Clarricoats and Zhou Hai p291
Numerical analysis of collinear monopole antennas with coils. H. Nakano, N. Chiba and J. Yamauchi p1103 e1781
Point-matching method for reduction of anomalous radiation of log-periodic dipole array. M.A. Hassan, A. Al Jabri and K. Al-Hakbani p1315
Radiation characteristics of dipole-excited dielectric-disk antenna: application of field compensation theorem. H. Helmken, L.A. Ponce de Leon and P.S. Neelakanta p1277
Reduction of coaxial feed between two parallel conductors into finite number of voltage sources. G.A.E. Vandenbosch and A.R. Van de Capelle p2387
Reduction of surface waves in chirostrip antennas. N. Engheta and P. Pelet p5
Reflections in anechoic chambers in 100–200 GHz range. A. Lehto, J. Tuovinen and A. Räisänen p1708
Reflectivity of absorbers in 100–200 GHz range. A. Lehto, J. Tuovinen and A. Räisänen p1699
Rigorous modelling of receiving active microstrip antenna. R. Gillard, H. Legay, J.M. Floc'h and J. Citerne p2357
Simple high-frequency diffraction analysis of microstrip antenna on large cylinder. C.-F. Huang p1161
Thin wire antennas in chiral media. D.L. Jaggard, J.C. Liu, A. Grot and P. Pelet p243
Transformation-based synthesis technique for planar arrays with contoured beams. D.A. McNamara and E. Botha p1502
Yagi–Uda array for millimetre-wave imaging. K. Mizuno, K. Uehara, H. Nishimura, T. Yonekura and T. Suzuki p108

ARTIFICIAL INTELLIGENCE

Circuit verification based on diagnostic expert system methodology. K. Wawryn and A. Guzinski p958
MOS implementation of winner-take-all network with application to content-addressable memory. L.G. Johnson and S.M.S. Jalaleddine p957
Switched-capacitor realisations of artificial neural network learning schemes. B. Maundy and E.I. El-Masry p85

ATMOSPHERIC PROPAGATION

New prediction method of cloud attenuation. E. Salonen and S. Uppala p1106

ATTENUATION

Alternative computation of attenuation in microstrip. J. Svačina p847
Effects of incoherent scattering on microwave and millimetre wave communications through rain. T. Oguchi p759
New prediction method of cloud attenuation. E. Salonen and S. Uppala p1106
Rain attenuation statistics on 30 GHz terrestrial link. A. Aresu, F. Barbaliscia, A. Martellucci and P. Migliorini p2168
Year-to-year variability and worst-month statistics of long-term rain rate measurements in Germany. F. Dintelmann and H. Trommer p617

AUTOMATA THEORY

Matching network design of microstrip antennas with simplified real frequency technique. H. An, B. Nauwelaers and A. Van de Capelle p2295

AUTOMATIC CONTROL

Automatic frequency control for 636 Mbit/s SF-FSK coherent optical field trial. B. Hoffmann, B. Christensen, E. Bødtker, N.G. Jensen and H. Thomsen p1975
Automatic gain control in cascaded erbium doped fibre amplifier systems. A.D. Ellis, R.M. Percival, A. Lord and W.A. Stallard p193
Automatic gain controlled oscillating amplifier. P.M. Smith, P.J. Edmonson and C.K. Campbell p1919

AUTOMATIC TESTING

500 MHz programmable pulse-train generator. O. Saether, B.E. Flaten and O. Aaserud p1227

AVALANCHE DIODES

InP/InGaAsP/InGaAs SAGM avalanche photodiode with delta-doped multiplication region. R. Kuchibhotla, J.C. Campbell, C. Tsai, W.T. Tsang and F.S. Choa p1361
Planar InP/InGaAs avalanche photodetector with gain-bandwidth product in excess of 100 GHz. L.E. Tarof p34 e478

BANDPASS FILTERS

Design of symmetrical polylithic crystal filters having equal motional inductances. S.K.S. Lu p1456

BINARY ARITHMETIC

Summary of perfect $s \times t$ arrays, $1 \leq s \leq t \leq 100$. W.-K. Chan and M.-K. Siu p709 e1112

BINARY SEQUENCES

New signature code sequence design techniques for CDMA systems. T. O'Farrell p371

BIOMEDICAL ELECTRONICS

Current conveyor based EMG amplifier with shutdown control. E. Bruun and E.-U. Haxthausen p2172
Iterative determination of complex permittivity and SAR distribution of two-dimensional biological body. J. Wang and T. Takagi p112
Optical trapping and rotational manipulation of microscopic particles and biological cells using higher-order mode Nd : YAG laser beams. S. Sato, M. Ishigure and H. Inaba p1831

BIPOLAR DEVICES

10 Gbit/s bipolar laser driver. M. Banu, B. Jalali, R. Nottenburg, D.A. Humphrey, R.K. Montgomery, R.A. Hamm and M.B. Panish p278
11 Gbit/s master-slave D flipflop IC in silicon bipolar technology. A. Felder, P. Weger, K. Ehinger and L. Treitinger p388
1·5 μm lithography Si- and Si/SiGe-bipolar transistors for ICs operating at 15 Gbit/s and above. H.-U. Schreiber and J.N. Albers p1465 e1888
24 Gbit/s regenerating demultiplexer IC in silicon bipolar technology. J. Hauenschild, H.-M. Rein, W. McFarland and D. Pettengill p502 e787
25 GHz f_t/27 GHz f_{max} transistors for C-bipolar technology. S. Ratanaphanyarat, J.B. Kuang, S.F. Chu, W. Rausch, M.J. Saccamango and M. Smadi p1224
Accurate measurement technique for base transit time in heterojunction bipolar transistors. S. Lee, A. Gopinath and S.J. Pachuta p1551
Analytical modelling of two-dimensional effects on current gain in small-geometry bipolar transistors. N. Rinaldi, A.G.M. Strollo and P. Spirito p1744
Base transit time for SiGe-base heterojunction bipolar transistors. G.-B. Gao and H. Morkoç p1408
Carbon and tin doped *npn* and *pnp* AlGaAs/GaAs HBTs grown by MOMBE. F. Ren, C.R. Abernathy, S.J. Pearton, T.R. Fullowan, J.R. Lothian, P.W. Wisk, Y.K. Chen, W.S. Hobson and P.R. Smith p2391
Cryogenic operation of GaAs bipolar transistors with inverted base doping. P.E. Dodd, M.L. Lovejoy, M.R. Melloch and M.S. Lundstrom p860 e1219
First microwave characterisation of LP-MOCVD grown GaInP/GaAs self-aligned HBT. S.L. Delage, M.A. di Forte-Poisson, H. Blanck, C. Brylinski, E. Chartier and P. Collot p253
Gilbert multiplier as an active mixer with conversion gain bandwidth of up to 17 GHz. P. Weger, G. Schultes, L. Treitinger, E. Bertagnolli and K. Ehinger p570
High performance hybrid circuit modules for lightwave systems operating at data rates of 10 Gbit/s and higher. K. Runge, M. Bagheri and J. Young p267
High power density pulsed X-band heterojunction bipolar transistors. M.G. Adlerstein, M.P. Zaitlin, G. Flynn, W. Hoke, J. Huang, G. Jackson, P. Lemonias, R. Majarone and E. Tong p148
High-performance carbon-doped base GaAs/AlGaAs heterojunction bipolar transistors grown by MOCVD. J.K. Twynam, H. Sato and T. Kinosada p141
Improved breakdown of AlInAs/InGaAs heterojunction bipolar transistors. T.R. Fullowan, S.J. Pearton, R.F. Kopf, Y.K. Chen and F. Ren p2340
Low noise, tunable GaAs bipolar oscillator. A. Dearn, G. Parkinson and P.J. Topham p1300
MBE grown *Npn* AlGaAs/GaAs bipolar transistors with C *p* doping by electron cyclotron resonance source activated methane. G. Liu, D. Mui, S. Fang, G. Gao and H. Morkoç p465
Minimisation of total harmonic distortion in active-loaded differential BJT amplifiers. H. Kuntman and S. Özcan p2381
Multiply-graded InGaAlAs heterojunction bipolar transistors. J.C. Vlcek and C.G. Fonstad p1213
Operation of submicrometre lateral bipolar transistors down to 10 K. T.S. Jayadev, J.C.S. Woo, S. Verdonckt-Vandebroek and S.S. Wong p998
Optimum germanium profile for SiGe base HBTs. S.S. Winterton, B.M. Manning, D.J. Walkey and N.G. Tarr p1337 e1781
Selfaligned AlGaAs/GaAs HBT grown by MOMBE. F. Ren, T.R. Fullowan, C.R. Abernathy, S.J. Pearton, P.R. Smith, R.F. Kopf, E.J. Laskowski and J.R. Lothian p1054
Selfaligned InGaAs/InP heterostructure bipolar transistors. A. Feygenson, H. Temkin, W.T. Tsang, L. Yang, R.D. Yadvish and P.F. Scortino, Jun p1116
Silicon bipolar chipset with maximum data rates from 10 to 23 Gbit/s for optical communications. J. Hauenschild, E. Bertagnolli, A. Felder, H.-M. Rein, H. Klose, L. Schmidt, L. Treitinger and P. Weger p2383
Simple determination of BJT extrinsic base resistance. T. Zünmer, A. Meresse, Ph. Cazenave and J.P. Dom p1895
Thermal parameter extraction for bipolar circuit modelling. R.M. Fox and S.-G. Lee p1719
Very high current gain InGaAs/InP heterojunction bipolar transistors grown by metalorganic chemical vapour deposition. C.S. Kyono, N.D. Gerrard, C.J. Pinzone, C.M. Maziar and R.D. Dupuis p40

BIREFRINGENCE

Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides. J. Aarnio, P. Heimala, M. Del Giudice and F. Bruno p2317

BOOLEAN ALGEBRA

Multiple fault detection using single-fault tests. T.-Y. Kuo, J.-F. Wang and J.-Y. Lee p1329

BROADCASTING

39·81 Gbit/s, 43·8 million-way WDM broadcast network with 527 km range. D.S. Forrester, A.M. Hill, R.A. Lobbett, R. Wyatt and S.F. Carter p2051
Reduced broadcast algorithm for source routing. R. Ahmad and F. Halsall p2288

CAPACITORS AND CAPACITANCE

Interpretation of quasi-static C-V characteristics of MOSOS capacitors on SOI substrates. D. Flandre, T. Loo, P. Verlinden and F. Van de Wiele p43
Properties of Si_3N_4/Si_xGe_{1-x} metal–insulator–semiconductor capacitors. J. Reed, D.S.L. Mui, W. Jiang and H. Morkoç p1826
Thickness measurement of thin oxide layers in MOS capacitors. S. Duzelier, G. Sarrabayrouse, J.L. Prom and G. Hollinger p1399

CELLS (ELECTRIC)

Complementary CMOS current gain cell. E.A.M. Klumperink and H.J. Janssen p38
Programmable memory cell using quantum confined Stark effect in multi-quantum well heterojunction bipolar transistor. W.-Q. Li, S. Goswami, P. Bhattacharya and J. Singh p31

CHANNEL CAPACITY

Demonstration of broadband-ISDN upgrade of fibre-in-loop system. T.H. Wood, G.E. Bodeep, T.E. Darcie, G. Raybon and P.P. Bohn p2275
Property of optimal resource sharing policy in systems with N types of competing customer. C.N. Stavropoulos and E.D. Sykas p1356

CIRCUIT THEORY AND DESIGN

10 Gbit/s low-power bit synchroniser with automatic retiming phase alignment. P. Wennekers, U. Nowotny, A. Huelsmann, G. Kaufel, K. Koehler, B. Raynor and J. Schneider p1529
18·5 GHz bandwidth monolithic preamplifier using AlGaAs/GaAs ballistic collection transistors. E. Sano, M. Nakamura, Y. Imai, Y. Matsuoka and T. Ishibashi p2093
AMI/NRZ line interface for basic access ISDN in indoor infra-red links. J. Gialelis, G. Karagianidis and C. Georgopoulos p2285
Accurate simulation of nonlinear switched capacitors and sampled circuits by harmonic balance and related techniques. J.C. Nallatamby, M. Bridier, M. Prigent and J. Obregon p2364
Alternative built-in self-test (BIST) structures for analogue circuit fault diagnosis. C.-L. Wey p1627
Amplifier gain insensitive SC integrators with 'same-sample correction' of both gain and phase errors for singlepath and multipath circuits. A.K. Betts, J. Shafeeu and J.T. Taylor p1424
Analogue CMOS time-measuring circuit for low frequency instrumentation. S. Siskos and Th. Laopoulos p2242
Analogue-digital window comparator with highly flexible programmability. J.E. Franca p2063
Analysis of nonlinear circuits with distributed elements using PSPICE. J. Borja, J.I. Alonso and F. Pérez p1651
Applications of composite BiCMOS transistors. J. Ramirez-Angulo, M. Deyong and W.J. Adams p2236
Automatic gain controlled oscillating amplifier. P.M. Smith, P.J. Edmonson and C.K. Campbell p1919
Bandpass $\Delta\Sigma$ A/D convertor using two-path multibit structure. Z.X. Zhang, G.C. Temes and Z. Czarnul p2008
BiCMOS operational amplifier with precise and stable DC gain for high-frequency switched capacitor circuits. A. Baschirotto, R. Alini and R. Castello p1338
CMOS mean field learning. C.R. Schneider and H.C. Card p1702
Class AB switched-current memory for analogue sampled data systems. N.C. Battersby and C. Toumazou p873
Clock-feedthrough compensated switched-capacitor circuits. S. Ogawa and K. Watanabe p2045
Concurrent error detection in current-mode A/D convertors. C.-L. Wey p2370
Constant-bandwidth current mode operational amplifier. E. Bruun p1673
Criteria for low-noise switched capacitor circuit design. R.M. Fox, C.M. Stillo and D.J. Ferris p1203
Current mode allpass/notch and bandpass filter using single CCII. C.-M. Chang p1812
Current multiplier/divider circuit. H. Wasaki, Y. Horio and S. Nakamura p504
Current-mode allpass filter using FTFN with grounded capacitor. M. Higashimura p1182
Current-mode oscillators using single current follower. J.-J. Chen, C.-C. Chen, H.-W. Tsao and S.-I. Liu p2056
Design and characterisation of pseudo-DTL CMOS gates. M. Grigoleit and M. Syrzycki p1577
Determination of minimal cost one-dimensional linear hybrid cellular automata. S. Zhang, D.M. Miller and J.C. Muzio p1625
Electronically tunable OTA-C mutually coupled circuit. M. Higashimura and Y. Fukui p1251
Equivalent circuit modelling of lossy coupled lines using SPICE software. T. Vu Dinh, B. Cabon and J. Chilo p710
Exact closed form aliasing probability in class of multiple input signature registers. G. Edirisooriya and J.P. Robinson p1590
Extended transconductance adjustment/linearisation technique. W.J. Adams and J. Ramirez-Angulo p842
Fast clock synchroniser using initial phase presetting DPLL (IPP-DPLL) for burst signal reception. K. Ohno and F. Adachi p1902
Fully monolithic 22 GHz-band AlGaAs/GaAs HBT oscillator. N. Hayama, J. Shimizu and K. Honjo p1862
Further results for evaluation of even order elliptic filter functions using the Darlington algorithm. D.J.M. Báez-López p1797
GaAS monolithic microwave floating active inductor. G.F. Zhang, C.S. Ripoll and M.L. Villegas p1860
High frequency saturated CMOS floating resistor for fully-differential analogue signal processors. M. Steyaert, J. Silva-Martinez and W. Sansen p1609
High voltage distributed amplifier. D. Willems, I. Bahl and K. Wirsing p2369
High-drive CMOS buffer for large capacitive loads. A. Nosratinia, M. Ahmadi, G.A. Jullien and M. Shridhar p1044
IGBT convertor with active snubber for soft switching. B.J. Masserant, J. Shriver and T.A. Stuart p2160
I_{dd_q} secondary components in CMOS logic circuits preceded by defective stages affected by analogue type faults. A. Rubio, J. Figueras, V. Champac, R. Rodriguez and J. Segura p1656
Integratable, high speed buried ridge DFB lasers fabricated on semi-insulating substrates. P.M. Charles, G.G. Jones, P.J. Williams, R.M. Ash, P.H. Fell and A.C. Carter p700

Integrated analogue voltage multiplier combining MOS and bipolar transistors. A.H. Bratt, D. King and M.J. Lysejko p1852
K-band suspended substrate stripline tapped combline filter. W.-T. Lo and C.-K.C. Tzuang p1389
Linear composite MOSFETs (COMFETs). M.C.H. Cheng and C. Toumazou p1802
Linear compound FET circuit using gallium arsenide MESFETs. D.G. Haigh and C. Toumazou p1494
Linear transconductor based on crosscoupled CMOS pairs. S. Szczepanski, R. Schaumann and P. Wu p783
Linear tunable resistance circuit using gallium arsenide MESFETs. C. Toumazou and D.G. Haigh p655
MOS amplifier gain-bandwidth enhancement using body signals. F.S. Shoucair p1029
MOS sine function generator using exponential-law technique. O. Ishizuka, Z. Tang and H. Matsumoto p1937
Microwave oscillator design with power prediction. V.M.T. Lam, P.C.L. Yip and C.R. Poole p1574
Module orientation algorithm using reconstruction of nets and mean field annealing. S.-S. Kim and C.-M. Kyung p1198
Multiplexed noise shaping structures for delta–sigma modulators. Z. Czarnul, A.G. Yesilyurt and G.C. Temes p2342
New high-speed analogue max and min circuits using OTA-based bounded-difference operations. T. Inoue, F. Ueno, T. Motomura, O. Setoguchi and R. Matsuo p1034
New insensitive notch and allpass filters with single current follower. S.-I. Liu, J.-J. Chen and J.-H. Tsay p1712
Novel CMOS linear OTA using feedback control on common source node. J. Sevenhans and M. Van Paemel p1873
Novel DC–DC convertor schemes obtained through duality principle and topological considerations. R. Rabinovici and B.Z. Kaplan p1948
Novel amplifier gain insensitive switched capacitor integrator with same sample correction properties. H. Shafeeu, A.K. Betts and J.T. Taylor p2277
Novel and accurate compact DC model of GaAs MESFET for large-signal computer calculations. S.A. Ibrahim, S. El-Rabaie and N.M. El-Rabaie p609
Novel four quadrant DC-link soft switching inverter generating sinusoidal waveforms. B.O. Woo and G.H. Cho p1732
Novel tunable GaAs MESFET OTA-C integrator suitable for high precision filtering applications. P. Visocchi, J. Taylor, A. Betts and D. Haigh p1671
Novel wideband 2–18 GHz clock extraction circuit for optical transmission systems. C.D. O'Shea p2324
Operational floating conveyor. C. Toumazou, A. Payne and F.J. Lidgey p651
Pipelined serial/parallel multiplier with contraflowing data streams. M.B. Tošić and M.K. Stojčev p2361
Precise frequency compensation of tunable active-RC integrator. R. Nandi and U.C. Sarker p751
Push–pull current circuit for biasing CMOS amplifiers with rail-to-rail input common-mode range. J.F. Duque-Carillo, R. Pérez-Aloe and A. Morillo p2122
Realisation of current-mode transfer function using four-terminal floating nullor. M. Higashimura p170
Realisation of switched capacitor delay lines and Hilbert transformers. S. Eriksson p2042
Realistion of voltage-mode biquads using CCIIs. M. Higashimura p1345
Reduction of FM threshold effect by inband noise cancelling. A.M. Pettigrew and T.J. Moir p1082
Saturation-mode CMOS transconductor with enhanced tunability and low distortion. G. Wilson and P.K. Chan p27
Simple CMOS transition accelerator circuit. P. Duchene, M.J. Declercq and S.M. Kang p300
Simple frequency/voltage convertor with low output ripple. W. Kiranon, P. Wardkein and C. Loescharataramdee p205
Small-range current copier cell. H. Gustat p1978
Speed optimisation of class AB CMOS opamp using doublets. D.-D. Shulman p1795
State variable sinusoidal switched-current oscillator. A. Kobayashi, Y. Horio and S. Nakamura p489
Switched-capacitor broadband noise generator for CMOS VLSI. A. Rodríguez-Vázquez, M. Delgado, S. Espejo and J.L. Huertas p1913
Switched-capacitor polyphase decimating circuits with reduced capacitance spread. J.E. Franca p2356
Synchronisation circuit for addition of two asynchronously changing digital values in digital motor control circuits. G.M. Brown and B. Szabados p1313
Systematic generation of OTA-C sinusoidal oscillators. R. Senani, M.P. Tripathi, D.R. Bhaskar and B.A. Kumar e100
Tunable differential-input gallium arsenide transconductors. D.G. Haigh and C. Toumazou p151
Tunable operational transconductance amplifier with extremely high linearity over very large input range. P. Wu and R. Schaumann p1254
Two quadrant analogue squarer circuit based on MOS square-law characteristic. M.P. Craven, B.R. Hayes-Gill and K.M. Curtis p2307
Ultrawideband biasing of MMIC distributed amplifiers using improved active load. I.D. Robertson and A.H. Aghvami p1907
Universal active current filters using single second-generation current conveyor. C-M. Chang p1614
Use of modified nodal analysis to write multiport hybrid matrix. J.A.S. Augusto and C.F.B. Almeida p1750
Wide-range oscillator with digital control for digital waveform generation. G.M. Brown and B. Szabados p1780
Winner-take-all neural network and its application to minimax optimisation problems. A. Cichocki and R. Unbehauen p2026

CLOSED LOOP SYSTEMS

Stabilisation of closed loop systems by time delays. J.-T. Lim p800

CLUTTER

Modelling spatially correlated K-distributed clutter. B.C. Armstrong and H.D. Griffiths p1355

CODE CONVERTORS

Product and interleaving of anticodes. V.C. da Rocha and M.M. Campello de Souza p634

CODES AND CODING

AMI/NRZ line interface for basic access ISDN in indoor infra-red links. J. Gialelis, G. Karagianidis and C. Georgopoulos p2285
Algorithm for creating (M-1) selfsynchronising M-ary variable length codes. W.-F. Yen p740
Ancillary channel of optical fibre communication systems based on 1B2B code redundancy. N. Stojanović and B.V. Vasić p1457
Applications of trellis coding to coherent optical communications employing polarisation shift keying modulation. S. Benedetto, A. Milanesi, G. Olmo and P. Poggiolini p1061
Arithmetic coding with limited past history. M. Ghanbari p1157
Backward predictive block matching algorithm for low bit rate video coding. S.-H. Jang and S.-D. Kim p1674
Banyan network nonblocking with respect to cyclic shifts. T.H. Lee and S.J. Liu p1474
Breaking public key cryptosystem based on systems of nonlinear equations over finite field. R.F. Sewell p1121
Burst error correction capability of square array codes. A.O. Mabogunje and P.G. Farrell p1215
Coding to alleviate intermodulation distortion in coherent optical FSK single-octave SCM systems. J.-H. Wu, J. Wu and Y.-H. Lee p438
Complementary sets of chirp-like polyphase sequences. B.M. Popović p254
Complexity of implementation for evaluating polynomials over $GF(2^m)$. Xu. Youzhi p1761
Computation of the right-inverse of $G(D)$ and the left-inverse of $H^t(D)$. L.H.C. Lee e100
Concatenated coding and interleaving for half-rate GSM digital mobile radio system. L.H.C. Lee and P.G. Farrell p1274
Cyclic square and its coding characteristics. X.-H. Peng and P.G. Farrell p1535
Decoding scheme for constant weight codes for optical and spread spectrum applications. M. Hussain and J.S. Bedi p839
Design and performance of robust embedded ADPCM coder. S. Zhang and G.B. Lockhart p1786
Design of a discrete cosine transform based speech scrambler. B. Goldburg, S. Sridharan and E. Dawson p613 e1006
Design of totally self-checking embedded two-rail code checkers. F. Özgüner p382
Differential encoder for QPSK systems. R. Gross p1256
ECG data compression by sub-band coding. M.C. Aydin, A.E. Çetin and H. Köymen p359
Efficient VLSI digital logarithmic codecs. B. Hoefflinger p1132
Efficient hardware decoding method for modified huffman code. S. Ho and P. Law p855 e1219
Error probability for noncoherent detection of continuous phase modulation on phase jittering channel. T. Palenius p1090
Facial feature estimation for model-based coding. V. Seferidis p2226
Forward link capacity limit of coded FFH/CDMA multiuser mobile radios. T. Kawahara and T. Matsumoto p1918
Frequency-hopped spread-spectrum random access with local adaptation. S.W. Kim p1893
Hierarchical image coding via MSE-minimising bilinear approximation. F.G.B. Denatale, G.S. Desoli and D.D. Giusto p2035
High quality multiband LPC coding of speech at 2·4 kbit/s. S. Yeldener, A.M. Kondoz and B.G. Evans p1287
Hybrid ARQ scheme using TCM and code combining. R.H. Deng p866
Hybrid image compression method based on fractal geometry. N. Zhang and H. Yan p406
Importance sampling techniques for efficient simulation of stack decoders. K. Ben Letaief and J.S. Sadowsky p593
Interleaved 5B2O code for insertion of carrier and clock pilots in 64-QAM systems. S.-K. Hyun and J.-K. Kim p1635
Limited moving boundary extension of Orwell protocol. M.E. Woodward and W.S.R. Lee p1542
Linear recurring sequences and the path weight enumerator of a convolutional code. P. Fitzpatrick and G.H. Norton p98
Low complexity soft decision decoding technique for T-user collaborative coding multiple-access channels. F. Ali and B. Honary p1167
Maximum distance of anticodes. V.C. da Rocha Jun and M.M.C. de Souza p1564
Neural net nonlinear prediction for speech data. R.M. Dillon and C.N. Manikopoulos p824
New 16-QAM trellis codes for fading channels. J. Du and B. Vucetic p1009
New EPL RLL(5, 16) code. M. Simić and R. Petrović p2100
New bit-serial systolic multiplier for GF(2^m) using irreducible trinomials. M. Diab and A. Poli p1183
New construction for classes of majority logic decodable codes with even minimum distances. Chen Zhi, Fan Pingzhi and Jin Fan p549
New family of binary one-step majority-logic decodable codes. Chen Zhi and I.F. Blake p1259 e1989
New linear phase QMF filter design for sub-band coding. J.-H. Jeon and J.-K. Kim p319
New signature code sequence design techniques for CDMA systems. T. O'Farrell p371
Optimum rate Reed Solomon codes for FFH/CDMA mobile radios. T. Kawahara and T. Matsumoto p2066
Parallel decoding of binary BCH codes. T. Hwang p2223
Performance of phase-invariant trellis coding for differentially-encoded coherent M-PSK signals on Rayleigh fading channels. L.H.C. Lee and P.G. Farrell p1051
Product and interleaving of anticodes. V.C. da Rocha and M.M. Campello de Souza p634
Reed–Solomon codes for land mobile satellite channels. C. Trabelsi and A. Yongaçoğlu p1518
Reverse Huffman tree for nonuniform traffic pattern. J.-H. Huang and Y.-C. Lai p1884
Selforthogonal convolutional codes derived from linear congruences. V.C. da Rocha Jun p526
Selfsynchronisable binary Reed–Solomon code. H. Inaba and M. Kasahara p1648
Socially secure cryptographic election scheme. P.H. Slessenger p955
Soft RS codes for half rate GSM channel. S.A. Atungsiri, P. Sweeney, R. Soheili, A.M. Kondoz and B.G. Evans p176
Spectral analysis of coded digital signals by means of difference equation systems. B. Vasić and M. Stefanović p2272
Threshold decoder and two feedback checkers for nonsystematic convolutional code (2, 1, 6). D. Randriananja p1111
Two interpolative BTC image coding schemes. B. Zeng p1126
Undetected error probabilities of codes for single-error correction and error detection. M.-C. Lin p2264
Using Reed–Muller coefficients to synthesise optimal prediction modules for concurrent testing. J. Ortega, A. Lloris, A. Prieto and F.J. Pelayo p1243

COHERENCE

Polarisation insensitive coherent transmission by synchronous intrabit polarisation spreading. N. Caponio, F. Delpiano, P. Gambini, M. Puleo, V. Seano and E. Vezzoni p337

COMMUNICATION NETWORKS

Backoff considerations in CSMA/CD LAN with single time-varying channel. K.C. Chua and K.M. Lye p747
Bandwidth allocation strategy with state-dependent Bernoulli access and pre-emptive priority. D.K. Kim and C.K. Un p2202
Comparison of indoor propagation channel characteristics at different frequencies. H. Zaghloul, M. Fattouche, G. Morrison and D. Tholl p2077
Congestion control for multipoint packet voice. Y.W. Leung p1392
Design of wormhole router for distributed memory multiprocessors. C.-Y. Chang, T.-W. Hou and C.-K. Shieh p2385
High speed synchronously pumped Raman fibre amplification. K.C. Byron, D. Burns, R.S. Grant, G.T. Kennedy, C.I. Johnston and W. Sibbett p597
Limited moving boundary extension of Orwell protocol. M.E. Woodward and W.S.R. Lee p1542
Low complexity soft decision decoding technique for T-user collaborative coding multiple-access channels. F. Ali and B. Honary p1167
Multigigabit per second subcarrier multiplexed optical fibre ring network. R. Olshansky p2098
Optimum rate Reed Solomon codes for FFH/CDMA mobile radios. T. Kawahara and T. Matsumoto p2066
Performance of Manhattan street network (MSN) architecture under zonal traffic distribution (ZTD) patterns. B. Khasnabish, M. Ahmadi and M. Shridhar p2165
Performance of common bank rate control throttle in ATM networks. K.C. Chua p1905
Performance of delta networks using multiple channels and output buffers. D. Ghosh and J.C. Daly p761
Performance of multichannel CSMA/CD network with channels susceptible to random noise. K.C. Chua and K.M. Lye p52
Phase error correcting vector modulator for personal communications network (PCN) transceivers. A.E. Jones and J.G. Gardiner p1230
Priority packet switching in multistage interconnection networks. Y.-W. Leung p1816
Probability density function of amplitude decay constant on meteor burst communication channel. A. Al Jabri p384
Protocol for token ring local computer networks and its performance. M.S. Obaidat and M.A. Al-Rousan p2393
Reed–Solomon codes for land mobile satellite channels. C. Trabelsi and A. Yongaçoğlu p1518
Reverse Huffman tree for nonuniform traffic pattern. J.-H. Huang and Y.-C. Lai p1884
Tandem banyan switching fabric with dilation. I. Widjaja p1770
Throughput analysis of channel load sense multiple access with overload detection protocol in spread spectrum packet radio networks. D.M. Lim and H.S. Lee p1809
Throughput performance of noisy ICMA/CD packet mobile radio network. K.C. Chua p1854
Tracking performance of digital chip synchronisation algorithms for bandlimited direct-sequence spread-spectrum communication. M. Moeneclaey and G. De Jonghe p1147

COMPARATORS (CIRCUITS)

Analogue-digital window comparator with highly flexible programmability. J.E. Franca p2063

COMPUTER SOFTWARE

Recursive construction of polynomial with prescribed phase on unit circle. S. Minocha, S.C. Dutta Roy and B. Kumar p224

COMPUTER-AIDED DESIGN

Circuit verification based on diagnostic expert system methodology. K. Wawryn and A. Guzinski p958
Experimental analysis of corner-fed printed square patch antennas. E. Motta Cruz and J.P. Daniel p1410
Finding optimal module orientations in macrocell placement. J.-C. Jeong and C.-M. Kyung p804

COMPUTERS

Fast digit-parallel conversion of signed-digit into conventional representations. T. Stouraitis and C. Chen p964

CONDUCTIVITY

Electro-optical measurement of high-field conductivity in δ-doped GaAs epitaxial layers. V. Balynas, A. Krotkus, T. Lideikis, A. Stalnionis and G. Treideris p2

CONTROL SYSTEMS

Applications of Routh–Hurwitz criterion to evaluation of phase margin and phase lead compensation. C.-F. Yung, Y.-W. Tsai and K.-K. Shyu p1000
Design of multivariable variable structure system for nonlinear time-varying systems using nonlinear switching surfaces. J.-J. Lee p2111

CONTROL THEORY

Applications of Routh–Hurwitz criterion to evaluation of phase margin and phase lead compensation. C.-F. Yung, Y.-W. Tsai and K.-K. Shyu p1000
Closed-loop balancing and singular perturbation: a new result. L. Fortuna, G. Muscato and G. Nunnari p1193
Design of multivariable variable structure system for nonlinear time-varying systems using nonlinear switching surfaces. J.-J. Lee p2111
Determination of system-matrices of linear continuous-time multivariable systems from discrete-time models. G.J. Lastman and N.K. Sinha p1696
Implementing steepest descent MRAC on robotic manipulators. Tan-Cheng Chou and Peng-Yung Woo p373
Impulse-response Grammian for discrete systems. V. Sreeram, D. Berinson and Y.H. Leung p1689
Iterative learning controller for linear systems with a periodic disturbance. H.S. Ahn and C.H. Choi e191
New algorithm for closed-loop model matching. L.A. Aguirre p2260
New optimal predictive current mode control technique for bilevel quantum series resonant convertors. J.H. Ko, S.S. Hong and M.J. Youn p412
New output voltage control technique using dynamic model for quantum series resonant convertor. S.S. Hong, J.H. Ko, K.Y. Cho, D.S. Oh and M.J. Yoon p545
Property of optimal resource sharing policy in systems with N types of competing customer. C.N. Stavropoulos and E.D. Sykas p1356
Reducing unstable linear control systems via real Schur transformation. C.S. Hu and D. Hou p984
Selftuning robot control laws. C. Vibet p1323
Switched optimal predictive current control technique for improved quantum boost SRC. H.B. Shin, J.H. Ko and M.J. Youn p2322
Variable structure observer of mismatched uncertain dynamical systems. H.B. Shin, K.Y. Cho and M.J. Youn p1798
Winner-take-all neural network and its application to minimax optimisation problems. A. Cichocki and R. Unbehauen p2026

CONTROLLERS

New algorithm for closed-loop model matching. L.A. Aguirre p2260
Synchronisation circuit for addition of two asynchronously changing digital values in digital motor control circuits. G.M. Brown and B. Szabados p1313

CONVERTORS

Chaotic behaviour in current-mode controlled DC–DC convertor. J.H.B. Deane and D.C. Hamill p1172
Concurrent error detection in current-mode A/D convertors. C.-L. Wey p2370
Current-mode cyclic ADC for low power and high speed applications. S.-W. Kim and S.-W. Kim p818
Design of high-performance sum-frequency upconvertor. Deng Shaofan, Wu Qun and Qiu Jinghui p2064
Efficient, narrowband $LP_{01} \leftrightarrow LP_{02}$ mode convertors fabricated in photosensitive fibre: spectral response. F. Bilodeau, K.O. Hill, B. Malo, D.C. Johnson and I.M. Skinner p682
IGBT convertor with active snubber for soft switching. B.J. Masserant, J. Shriver and T.A. Stuart p2160
Integrated acousto-optic collinear TE–TM mode convertors for 0·8 μm optical wavelength range. I. Hinkov and V. Hinkov p1211
Multibit oversampled Σ-Δ A/D convertor with nonuniform quantisation. Z. Zhang and G.C. Temes p528
Multibit sigma–delta modulator with reduced sensitivity to DAC nonlinearity. A. Hairapetian, G.C. Temes and Z.X. Zhang p990
Multiplexed noise shaping structures for delta–sigma modulators. Z. Czarnul, A.G. Yesilyurt and G.C. Temes p2342
New optimal predictive current mode control technique for bilevel quantum series resonant convertors. J.H. Ko, S.S. Hong and M.J. Youn p412
New output voltage control technique using dynamic model for quantum series resonant convertor. S.S. Hong, J.H. Ko, K.Y. Cho, D.S. Oh and M.J. Yoon p545
Novel DC–DC convertor schemes obtained through duality principle and topological considerations. R. Rabinovici and B.Z. Kaplan p1948
Novel four quadrant DC-link soft switching inverter generating sinusoidal waveforms. B.O. Woo and G.H. Cho p1732
Pseudo-natural pulse width modulation for high accuracy digital-to-analogue conversion. J.M. Goldberg and M.B. Sandler p1491
Realisation of highly linear MOS circuits using negative impedance convertors. K. Tabei, Z. Czarnul and S. Takagi p1416
Simple frequency/voltage convertor with low output ripple. W. Kiranon, P. Wardkein and C. Loescharataramdee p205
Switched optimal predictive current control technique for improved quantum boost SRC. H.B. Shin, J.H. Ko and M.J. Youn p2322

CONVOLUTION

Analysis of time response of nonuniformly coupled multiconductor transmission lines with frequency-dependent losses. J.-F. Mao and Z.-F. Li p1941
Linear recurring sequences and the path weight enumerator of a convolutional code. P. Fitzpatrick and G.H. Norton p98
Threshold decoder and two feedback checkers for nonsystematic convolutional code (2, 1, 6). D. Randriananja p1111

CORRELATION AND CORRELATORS

New fast GPS code-acquisition technique using FFT. D.J.R. van Nee and A.J.R.M. Coenen p158
New signature code sequence design techniques for CDMA systems. T. O'Farrell p371

COUNTING CIRCUITS

State assignment using programmable counters. M. Davio and M. Ciesielski p9

CROSSTALK

Cross-phase modulation in semiconductor optical amplifier. R.S. Grant, G.T. Kennedy and W. Sibbett p801

CRYSTAL FILTERS

Bandstop monolithic crystal filters having allpass response outside stopband. S.K.S. Lu p1890
Design of symmetrical polylithic crystal filters having equal motional inductances. S.K.S. Lu p1456

CRYSTALS

Excitation of surface acoustic waves in Rb : KTP. K.S. Buritskii, E.M. Dianov, A.B. Kiselev, V.A. Maslov and E.A. Shcherbakov p1896
Phase dependent forward three wave amplification in photorefractive BSO. D.J. Webb, K.H. Ringhofer and L. Solymar p889
Resistance to 515 nm Ar laser damage in rare-earth doped MgO : $LiNbO_3$ crystals. X.-Q. Feng, Q.-B. Zhu, P.J. Chandler, L. Zhang and P.D. Townsend p1504

CURRENT CONVEYORS

Constant-bandwidth current mode operational amplifier. E. Bruun p1673
Current mode allpass/notch and bandpass filter using single CCII. C.-M. Chang p1812
Operational floating conveyor. C. Toumazou, A. Payne and F.J. Lidgey p651
Realistion of voltage-mode biquads using CCIIs. M. Higashimura p1345

CYBERNETICS

Experimental determination of field strength and quality factor of heavily dampled accelerator cavities. P. Hülsmann, M. Kurz and H. Klein p1727

DATA COMPRESSION

ECG data compression by sub-band coding. M.C. Aydin, A.E. Çetin and H. Köymen p359
Hybrid image compression method based on fractal geometry. N. Zhang and H. Yan p406

DATA PROCESSING

Arithmetic coding with limited past history. M. Ghanbari p1157
Distinction between rain and ice depolarisation by calculation of differential attenuation and phase shift. R.A. Hogers, M.H.A.J. Herben and G. Brussaard p1752
Preprocessing of line codes for online recognition purposes. A. Nair and C.G. Leedham p1
Two-dimensional addressing scheme for digital signal processors. S. Srinivasan, A. Singh and S.S. Gill p677

DATA TRANSMISSION

10 Gbit/s single-pass soliton transmission over 1000 km. E. Yamada, K. Suzuki and M. Nakazawa p1289
10 Gbit/s soliton data transmission over one million kilometres. M. Nakazawa, E. Yamada, H. Kubota and K. Suzuki p1270
Bandwidth efficient operation of phase diversity reception compared with heterodyne reception. R. Langenhorst, W. Pieper, M. Eiselt, D. Rohde and H.G. Weber p1601
Bit error probability for fading DPSK signals in microcellular land mobile radio systems. A. Kegel, H.J. Wesselman and R. Prasad p1647
Demonstration of error-free soliton transmission at 2·5 Gbit/s over more than 14 000 km. L.F. Mollenauer, M.J. Neubelt, M. Haner and E. Lichtman p2055
Error ratio measurements over transoceanic distances using recirculating loop. T. Widdowson and D.J. Malyon p2201
Experimental HDTV CODEC with ATM cell loss compensation for B-ISDN. T. Kinoshita and T. Nakahashi p1830
Frequency planning for nonlinear distortion reduction in wideband transmission. L.K. Chen, K.Y. Lau and Y. Trisno p1293
Frequency-hopped spread-spectrum random access with local adaptation. S.W. Kim p1893
High quality multiband LPC coding of speech at 2·4 kbit/s. S. Yeldener, A.M. Kondoz and B.G. Evans p1287
Improving performance of multidestination ARQ schemes under high error rate conditions. T.-H. Lee p293
Interleaved 5B2O code for insertion of carrier and clock pilots in 64-QAM systems. S.-K. Hyun and J.-K. Kim p1635
Performance of new zero-crossing type n-averaging symbol synchroniser for PAM signals. E. Polat and F.R. Ergul p1010
Polarisation insensitive coherent transmission by synchronous intrabit polarisation spreading. N. Caponio, F. Delpiano, P. Gambini, M. Puleo, V. Seano and E. Vezzoni p337
Postdetection MRC diversity for $\pi/4$-shift QDPSK mobile radio. F. Adachi and K. Ohno p1642
Simulation of CDMA system performance with feedback power control. S. Ariyavisitakul and L.F. Chang p2127
Spectral structure of multitone pulse width modulation. B. Wilson, Z. Ghassemlooy and A. Lok p702
Teletext reception in mobile Rician fading channel with maximal ratio combining. R. Prasad, J.H. Bons and P.A.D. Spaargaren p1645
Video distribution system with 40 AM-VSB channels and 22 dB link budget. G.R. Joyce, R. Olshansky, R. Childs and T. Wei p1613

DECODING

AMI/NRZ line interface for basic access ISDN in indoor infra-red links. J. Gialelis, G. Karagianidis and C. Georgopoulos p2285
Efficient hardware decoding method for modified huffman code. S. Ho and P. Law p855 e1219
State recovery techniques for (M, L) algorithm. S. Benedetto and M. Mondin p576

DELAY LINES

Optoelectronic transversal filter. B.E. Swekla and R.I. MacDonald p1769

DELTA MODULATION

Nonlinear filtering of delta modulated signals. S.L. Horianopoulos, V. Anastassopoulos and T. Deliyannis p1078

DEMODULATORS AND DEMODULATION

Analysis of receiver using injection-locked semiconductor laser for direct demodulation of PSK optical signals. O. Lidoyne and P. Gallion p995
Demodulation techniques for two-mode elliptical-core fibre sensors. A.B. Wang, K.A. Murphy, A.M. Vengsarkar and R.O. Claus p1454
Digital frequency error detectors for OQPSK satellite modems. J. Ahmad, T.G. Jeans and B.G. Evans p1821
Highly sensitive frequency discriminator for wide IF linewidth FSK demodulation. E. Bødtker, R. Welter, W.B. Sessa and R.E. Wagner p767
Practical digital complex sampling scheme. E. Hermanowicz p460

DETECTORS AND DETECTOR CIRCUITS

1·5 μm compressive-strained multiple-quantum-well waveguide detectors for coherent polarisation-diversified receivers. C.E. Zah, K.W. Cheung, R. Bhat, N.C. Andreadakis, T.C. Wu, F.J. Favire, S.G. Menocal, M.A. Koza and T.P. Lee p838
8 × 8 flipchip assembled InGaAs detector arrays for optical interconnect. A.J. Moseley, M.Q. Kearley, R.C. Morris, J. Urquhart, M.J. Goodwin and G. Harris p1566
ARQ scheme with combined channel coding and modulation using noncoherent detection. G. Benelli p15
All-electronic free-space picosecond pulse generation and detection. D.W. Van Der Weide, J.S. Bostak, B.A. Auld and D.M. Bloom p1412
BiCMOS edge detector with correlated-double-sampling readout circuit for pattern recognition neural network. J.B. Kuo, T.L. Chou and E.J. Wong p1248
Channel glass waveguide detectors with grafted GaAs film in embedded configuration. W.K. Chan, A. Yi-Yan, T.J. Gmitter, L.T. Florez, N. Andreadakis and C.K. Nguyen p410
Coherent and limiter-discriminator detection of GMSK in interference limited conditions. L.B. Lopes p2313
Coherent detection of multiamplitude MSK under imperfect phase synchronisation. V. Gonçalves, A. Gusmão and N. Esteves p623
Colliding pulse phase detector for picosecond resolution timing measurement. A. Black, E. Ozbay, B.A. Auld and D.M. Bloom p1620
DFB active filter/detector for multichannel FSK optical transmission. R. Hui, N. Caponio, P. Gambini, M. Puleo and E. Vezzoni p2016
Differential frequency detection of narrowband Manchester coded FSK. P.B.T. Nyirenda p1470
Heterodyne detection at 4 Gbit/s using a simple *pin*-HEMT receiver. M.A.R. Violas, D.J.T. Heatley, Xuan Ye Gu, D.A. Cleland and W.A. Stallard p59
Optical FM and heterodyne detection of two-channel 560 Mbit/s subcarrier multiplexed ASK signal using 3-electrode DFB-LDs. S. Watanabe, I. Yokota, T. Naito, T. Chikama and H. Kuwahara p44
Oversampling applied to single tone detection. P. O'Leary and F. Maloberti p76
Resonant tunnelling microwave detector diode for power levelling and limiting applications. R.T. Syme, M.J. Kelly, A. Condie and I. Dale p2025

DIELECTRICS AND DIELECTRIC DEVICES

Accurate and simple design of cylindrical dielectric resonators for microwave integrated circuits. A.E. Centeno and G.B. Morgan p1753
Accurate determination of resonance frequency and intrinsic Q factor for optically-controlled dielectric resonators. A.S. Rong, Y. Cao and Z.L. Sun p1466
Active quarter-wavelength dielectric radiator with circularly polarised radiation pattern. T.-B. Ng, Y.-O. Yam and M.-L. Lam p1758
Broadband microwave dielectric properties of lithium niobate. W.M. Robertson, G. Arjavalingam and G.V. Kopcsay p175
Dielectric multilayered interference filters deposited on polyimide films. T. Oguchi, J. Noda, H. Hanafusa and S. Nishi p706
E-mode cutoff wave number of circular waveguide loaded with dielectric sector. T.S. Yeo p1071
Edge effects for resonance frequency of covered rectangular microstrip patch antenna. S.M. Vaitheeswaran Iyer and R.N. Karekar p1509
Effect of dielectric protecting superstrate on radiation pattern of microstrip patch antenna. R. Afzalzadeh and R.N. Karekar p1218
Extended spectral domain approach for analysis of lossy cylindrical dielectric resonators. Ao Sheng Rong and Cao Yang p486
Higher order modes in dielectric resonators. N. Loechel p1340
Input impedance of hemispherical dielectric resonator antenna. K.W. Leung, K.M. Luk, K.Y.A. Lai and D. Lin p2259
Nearly bird's beak-free local oxidation technology for controlled dielectric formation in deep silicon trenches. K. Shenai p637
Permittivity and permeability of chiralic mixture: application of logarithmic law of mixing. P.S. Neelakanta, K. Subramaniam and Chaoli Gu p496
Permittivity of orderly textured mixture dielectrics. K. Subramaniam, P.S. Neelakanta and V. Ungvichian p1534
Radiation characteristics of dipole-excited dielectric-disk antenna: application of field compensation theorem. H. Helmken, L.A. Ponce de Leon and P.S. Neelakanta p1277
Ultrathin stacked Si_3N_4/SiO_2 gate dielectrics prepared by rapid thermal processing. W. Ting, J.H. Ahn and D.L. Kwong p1046

DIFFERENTIAL ANALYSERS

Common path differential intensity and phase profilometer using time division multiplexing. M.S. Valera, M.G. Somekh and R.K. Appel p719

DIFFRACTION

Explicit multiple building diffraction attenuation function for mobile radio wave propagation. S.R. Saunders and F.R. Bonar p1276 e1599
Small dimension Bragg reflectors formed by air-isolated GaAs layers. C.A. Beyler, S.G. Hummel, N. Frateschi and P.D. Dapkus p588

DIFFUSION

Validity of TLM modelling of diffusion. R. Ait-Sadi and P. Naylor p2216
Void elimination by lateral gap diffusion in silicon direct bonding (SDB) technology. Q.-Y. Tong, H.-Z. Zhang and M. Qing p288

DIGITAL CIRCUITS

Determination of minimal cost one-dimensional linear hybrid cellular automata. S. Zhang, D.M. Miller and J.C. Muzio p1625
Exact closed form aliasing probability in class of multiple input signature registers. G. Edirisooriya and J.P. Robinson p1590
Oversampling applied to single tone detection. P. O'Leary and F. Maloberti p76
Pipelined serial/parallel multiplier with contraflowing data streams. M.B. Tošić and M.K. Stojčev p2361
Reliable method for delay-fault diagnosis. P. Girard, C. Landrault and S. Pravossoudovitch p1841
Synchronisation circuit for addition of two asynchronously changing digital values in digital motor control circuits. G.M. Brown and B. Szabados p1313

DIGITAL COMMUNICATION SYSTEMS

27 Gbit/s AlGaAs/GaAs HBT 1 : 2 regenerating demultiplexer IC. K. Runge, J.L. Gimlett, R.B. Nubling, K.C. Wang, M.F. Chang, R.L. Pierson and P.M. Asbeck p2389
AMI/NRZ line interface for basic access ISDN in indoor infra-red links. J. Gialelis, G. Karagianidis and C. Georgopoulos p2285
Analysis of SDH pointer corruption due to error activity. J.E. Deslandes, E.V. Jones and P. Cochrane p453
Bandwidth allocation strategy with state-dependent Bernoulli access and preemptive priority. D.K. Kim and C.K. Un p2202
Baseband processing frequency-drift-compensation for QDPSK signal transmission. M. Ikura, K. Ohno and F. Adachi p1521
Cell processing LSIs for 2·4 Gbit/s SDH-based ATM transmission system. H. Tatsuno, N. Tokura, Y. Maeda and K. Kikuchi p1222
Coherent and limiter-discriminator detection of GMSK in interference limited conditions. L.B. Lopes p2313
Coherent detection of multiamplitude MSK under imperfect phase synchronisation. V. Gonçalves, A. Gusmão and N. Esteves p623
Computation of the right-inverse of $G(D)$ and the left-inverse of $H^t(D)$. L.H.C. Lee e100
Concatenated coding and interleaving for half-rate GSM digital mobile radio system. L.H.C. Lee and P.G. Farrell p1274
Demonstration of broadband-ISDN upgrade of fibre-in-loop system. T.H.

Wood, G.E. Bodeep, T.E. Darcie, G. Raybon and P.P. Bohn p2275
Design and performance of robust embedded ADPCM coder. S. Zhang and G.B. Lockhart p1786
Design and test of novel integrate and dump filter (I&D) for optical Gbit/s system applications. B. Enning, E. Bødtker, G. Jacobsen and B. Jensen p2286
Design of wormhole router for distributed memory multiprocessors. C.-Y. Chang, T.-W. Hou and C.-K. Shieh p2385
Differential encoder for QPSK systems. R. Gross p1256
Double symbol error rate and block error rate of MDPSK. F. Adachi and T. Matsumoto p1571
Dynamic load sharing for asymmetrical microcellular teletraffic conditions. S.S. Kuek and W.C. Wong p765
Fast approximate analysis for token passing LAN protocol with asymmetrically distributed traffic loads. J.M. Senior, D.S. Rehal and A.N. Wiseman p1921
Fast clock synchroniser using initial phase presetting DPLL (IPP-DPLL) for burst signal reception. K. Ohno and F. Adachi p1902
Frequency-hopped spread-spectrum random access with local adaptation. S.W. Kim p1893
Highly integrated ATM/SONET user–network interface. G.R. Lalk, L. Gluck, T.C. Banwell, C.A. Johnston, T.J. Robe, K.A. Walsh and K.C. Young, Jun p2174
Interleaved 5B2O code for insertion of carrier and clock pilots in 64-QAM systems. S.-K. Hyun and J.-K. Kim p1635
Limited moving boundary extension of Orwell protocol. M.E. Woodward and W.S.R. Lee p1542
Multisignatures based on zero knowledge schemes. C. Boyd p2002
New collision-channel model for packet-switched CDMA networks. X.H. Chen and J. Oksman p1792
New concept of asynchronous multiplexing of digital signals. M.N. Smiljanić and M.R. Temerinac p1376
New low-complexity decision feedback equalisation technique for narrowband digital cellular systems. Y.-J. Liu p1180
New message based priority buffer insertion ring protocol. P.A. Pietrzyk and A. Shaout p2106
New simple method for solving first passage time problem. D. Bajić p1419
New traffic model for performance analysis of processor–memory multistage interconnection networks. S. Edirisooriya and G. Edirisooriya p1813
Overflow controller in copy network of broadband packet switch. C.-J. Chang and C.-J. Ling p937
Performance analysis of channel identification algorithm with SVD prefiltering. M. Barton p1858
Performance of antenna diversity and decision feedback equalisers in narrowband digital cellular systems. Y.-J. Liu and J. Ketchum p953
Performance of selfsynchronising direct conversion DECT receiver. G. Schultes, E. Bonek, A.L. Scholtz and W. Herzog p1715
Photonic packet switch using semiconductor optical amplifier gates. R. Fortenberry, A.J. Lowery, W.L. Ha and R.S. Tucker p1305
Postdetection selection diversity with unequal branch signal power compensation. F. Adachi p1588
Priority packet switching in multistage interconnection networks. Y.-W. Leung p1816
Reduced broadcast algorithm for source routing. R. Ahmad and F. Halsall p2288
Reverse Huffman tree for nonuniform traffic pattern. J.-H. Huang and Y.-C. Lai p1884
Synchronous CDMA for optical subscriber systems using 'block interleave'. T. Onoda and N. Miki p2219
Throughput analysis of CDMA with DPSK modulation and diversity in indoor Rician fading radio channels. H.S. Misser, C.A.F.J. Wijffels and R. Prasad p601
Traffic mixes on broadband ATM link. J.M. Pitts and L.G. Cuthbert p1350

DIGITAL CONTROL

Synchronisation circuit for addition of two asynchronously changing digital values in digital motor control circuits. G.M. Brown and B. Szabados p1313

DIGITAL FILTERS

Allpass expansions of digital transfer functions. X. Nie, D. Raghuramireddy and R. Unbehauen p1438
Constant bandwidth IIR lowpass filter for data sampled at nonuniform rate. B. Veidt p330 e685
Efficient systolic implementation of complex digital filters. D. Raghuramireddy and R. Unbehauen p666
Fast calculation of Kalman signal smoother gains. S. Hausman and J. Dunlop p2240
Functional approach to built-in selftest of integrated digital filters. C. Counil and G. Cambon p2326
Grid density for design of one- and two-dimensional FIR filters. R.H. Yang and Y.C. Lim p2053
IIR filtering on sigma–delta modulated signals. D.A. Johns and D.M. Lewis p307
Improved design procedure for multiplierless FIR digital filters. H. Shaffeu, M.M. Jones, H.D. Griffiths and J.T. Taylor p1142
Improved systolic realisation of second-order recursive digital filter. J. Huang p1299
Maximum flat digital differentiator. B. Carlsson p675
Multidimensional multirate filters derived from one dimensional filters. Tsuhan Chen and P.P. Vaidyanathan p225
New frequency transformations for complex digital filters. H. Iwakura p2083
New linear phase QMF filter design for sub-band coding. J.-H. Jeon and J.-K. Kim p319
Orthonormal expansion of stable rational transfer functions. X. Nie, D. Raghuramireddy and R. Unbehauen p1492
Orthonormal minimal structure for *n*-dimensional denominator-separable digital filters for multiprocessor implementation. X. Nie, D. Raghuramireddy and R. Unbehauen p2206
Relation between impulse response moments and locations of poles and zeros of digital filter. A. Khare and T. Yoshikawa e1496
Relation between impulse response moments and locations of poles and zeros of digital filter. A. Khare and T. Yoshikawa p1084
Saturation circuitry for redundant number based IIR filters. R.F. Woods, O.C. McNally and S. McQuillan p1961
Stability and convergence behaviour of second-order LMS Volterra filter. P.M. Clarkson and M.V. Dokic p441 e890

DIGITAL INTEGRATED CIRCUITS

Subnanosecond 32 bit multiplier using negative differential resistance devices. S. Mohan, P. Mazumder and G.I. Haddad p1929
Ultralow dark current GaAlAs/GaAs MSM photodetector. A. Aboudou, J.P. Vilcot, D. Decoster, A. Chenoufi, E. Delhaye, P. Boissenot, C. Varin, F. Deschamps and I. Lecuru p793

DIGITAL SIGNALLING

Stabilising discrete polynomials using spectral factorisation. T.J. Moir p581

DIGITAL STORAGE

New EPL RLL(5, 16) code. M. Simić and R. Petrović p2100

DIGITAL SYSTEMS

Implementing nonlinear activation functions in neural network emulators. K.M. Sammut and S.R. Jones p1037
Practical digital complex sampling scheme. E. Hermanowicz p460
Summary of perfect $s \times t$ arrays, $1 \leq s \leq t \leq 100$. W.-K. Chan and M.-K. Siu p709 e1112

DIGITAL TRANSMISSION

Accuracy and dynamic range improvement of bandpass impulse response measurements using pseudorandom noise. P.C. Fannin and A. Molina p1755
Bandwidth efficient operation of phase diversity reception compared with heterodyne reception. R. Langenhorst, W. Pieper, M. Eiselt, D. Rohde and H.G. Weber p1601
Baseband processing frequency-drift-compensation for QDPSK signal transmission. M. Ikura, K. Ohno and F. Adachi p1521
Performance of antenna diversity and decision feedback equalisers in narrowband digital cellular systems. Y.-J. Liu and J. Ketchum p953
Postdetection MRC diversity for $\pi/4$-shift QDPSK mobile radio. F. Adachi and K. Ohno p1642
Tracking performance of digital chip synchronisation algorithms for bandlimited direct-sequence spread-spectrum communication. M. Moeneclaey and G. De Jonghe p1147

DIODES

-Simulations for improved heterostructure Gunn oscillator based on transit region doping variations. R. Vaidyanathan and R.P. Joshi p1555
10 Gbit/s, 50 km dispersive fibre transmission experiment using strained multiquantum-well DFB laser diode. Y. Miyamoto, K. Hagimoto, F. Ichikawa, M. Yamamoto and T. Kagawa p853
Amorphous carbon/crystalline silicon high voltage heterojunction diode prepared by photochemical vapour deposition. S.B. Hwang, Y.K. Fang, K.H. Chen, C.R. Liu and L.C. Kuo p2043
Autocorrelation measurements of picosecond laser-diode pulses by means of quasiphase-matching $LiNbO_3$ channel waveguides. A. Galvanauskas, J. Webjörn, A. Krotkus and G. Arvidsson p738
Barrier height enhancement of n-$In_{0.53}Ga_{0.47}As$ Schottky diodes grown by MOCVD technique. P. Kordoš, M. Marso, R. Meyer and H. Lüth p1759
Broadband receiver module for 10 Gbit/s optical transmission. K. Kitamura, K. Ito, H. Matsuda, T. Kaneko and M. Haneda p1435
Characteristics of laser-diode modules using thermally-diffused expanded core fibres. K. Yoshino, K. Kato, I. Nishi, H. Hanafusa and M. Horiguchi p796
Comparison of theoretical and experimental 60 GHz silicon IMPATT diode performance. J.P. Banerjee, J.F. Luy and F. Schäffler p1049
Design of high-performance sum-frequency upconvertor. Deng Shaofan, Wu Qun and Qiu Jinghui p2064
Double junction AlInAs/GaInAs multiquantum well avalanche photodiodes. Y. Le Bellégo, J.P. Praseuth and A. Scavennec p2228
Effect of photodecomposed-PH_3 treatment on PN/InP metal–insulator–semiconductor diodes. A. Uda, T. Sugino, H. Ito and J. Shirafuji p2315
Error-free operation of wavelength conversion laser for photonic crossconnect node at 125 Mbit/s. H. Rokugawa, N. Fujimoto, T. Nakagami and H. Nobuhara p393
Excitonic absorption in InGaP/GaAs multiquantum wells. G.A. Patrizi, H.Y. Lee, M.J. Hafich, P. Silvestre and G.Y. Robinson p2363
Fabrication of InP/InGaAs photodiodes for high bit rate communication by reactive ion etching. M. Seto, R.J. Deri, L.M. Schiavone, R. Bhat, J.B.D. Soole, H. Schumacher, N.C. Andreadakis and M. Koza p911
Flip-chip solder bond mounting of laser diodes. C. Edge, R.M. Ash, G.G. Jones and M.J. Goodwin p499
GaAs planar doped barrier diodes for millimetre-wave detector applications. M.J. Kearney, A. Condie and I. Dale p721
GaAs vertical *pin* diode using MeV implantation. M.V. Rao, W. Kruppa, H.B. Dietrich, S.C. Binari and J.B. Boos p2265
GaInAsSb/GaSb *pn* photodiodes for detection up to 2·4 μm. E. Tournié, J.-L. Lazzari, E. Villemain, A. Joullié, L. Gouskov, M. Karim and I. Salesse p1237
High performance planar $GaAs/Al_{0.3}Ga_{0.7}As$ Schottky barrier photodetector grown on Si substrates by molecular beam epitaxy. Y.C. Tzeng, S.S. Li, C.K. Peng and Y.C. Kao p2379
High-speed monolithic InP/InGaAs *pin*-photodiode array with small pitch. N. Emeis, W. Kunkel, L. Hoffmann and G. Ebbinghaus p1550
Hybrid integration of laser diode and monomode high contrast slab waveguide on silicon. J.L. Joppe, A.J.T. de Krijger and O.F.J. Noordman p162
InGaAs/InP-photodiodes with dark current limited by generation-recombination. F. Buchali, R. Behrendt and G. Heymann p235
InP/InGaAsP/InGaAs SAGM avalanche photodiode with delta-doped multiplication region. R. Kuchibhotla, J.C. Campbell, C. Tsai, W.T. Tsang and F.S. Choa p1361
Low threshold current density 1·5 μm GaInAs/AlGaInAs graded-index separate-confinement-heterostructure quantum well laser diodes grown by metal organic chemical vapour deposition. A. Kasukawa, R. Bhat, C.E. Zah, S.A. Schwarz, D.M. Hwang, M.A. Koza and T.P. Lee p1063
Measurement of negative differential conductance to 40 GHz for vertically integrated resonant tunnelling diodes. P. Mounaix, P. Bedu, D. Lippens and E. Barbier p1358
Microcavities with field emitters sealed by silicon wafer bonding. R. Stengl, H.W. Meul and W. Hönlein p2209
Narrow linewidth (85 kHz) operation in long cavity 1·5 μm-MQW DBR laser. T. Kunii, Y. Matsui, H. Horikawa, T. Kamijoh and T. Nonaka p691
Negative differential conductance in GaAs/AlAs superlattices. M. Hadjazi, A. Sibille, J.F. Palmier and F. Mollot p1101
Noise model for double barrier resonant tunnel diodes. T.G. Van de Roer, H.C. Heyker, J.J.M. Kwaspen, H.P. Joosten and M. Henini p2158
Raman amplification of gain switched laser diode signal at 1·35 μm to soliton power levels. E.J. Greer, J.M. Hickmann and J.R. Taylor p1171
Resonant tunnelling diode in MBE-grown delta-doped GaAs. Y.H. Wang, M.P. Houng, H.H. Chen and H.C. Wei p1667

Resonant tunnelling microwave detector diode for power levelling and limiting applications. R.T. Syme, M.J. Kelly, A. Condie and I. Dale p2025
Single-mode InGaAs–GaAs laser diodes operating at 980 nm. J.S. Major Jun, W.E. Plano, D.F. Welch and D. Scifres p539
Superluminescent diodes with angled facet etched by chemically assisted ion beam etching. C.-F. Lin p968
TEM observation of GaAs/GaAlAs laser diodes degraded in field operation. F. Magistrali, D. Sala, M. Vanzi, F. Fantini, F. Corticelli and A. Migliori p58
Technique for measuring facet reflectivity and effective index of laser diode amplifiers. L. Goldberg, M. Tamburrini and D. Mehuys p1593
Tunnel diode with asymmetric spacer-layers for use as microwave detector. R.T. Syme, M.J. Kelly, R.S. Smith, A. Condie and I. Dale p2192
Uniform high power nine and 18 element individually addressable laser diode arrays. D.W. Nam, R.R. Craig, D.G. Mehuys and D.F. Welch p464
Unique laser diode module using short tapered hemispherical-end fibre for optical hybrid integration. Y. Tachikawa and S. Kobayashi p884
Upside down silicon camel diodes fabricated by low pressure CVD. G. Schmidt and H. Beneking p1086
W-band monolithic frequency doubler using vertical GaAs varactor diode with n^+ buried layer. G. Hegazi, A. Ezzeddine, F. Phelleps, P. McNally, K. Pande, P. Rice and P. Pages p213

DIPOLE ANTENNAS

Low sidelobe arrays of parallel dipoles with finite reflector. W. Chen and S.-M. Zhang p2103
Point-matching method for reduction of anomalous radiation of log-periodic dipole array. M.A. Hassan, A. Al Jabri and K. Al-Hakbani p1315

DIRECTIONAL COUPLERS

Guided-wave directional couplers with polarisation maintaining fibre arrays. S. Sato, H. Wada, H. Hashizume, S. Kobayashi, M. Seki and K. Nakama p303
New application for nonlinear directional coupler: intensity controlled tunable optical filter. F. Farjady and M.G.F. Wilson p2218
Novel photonic device using nonlinear corner-bend structure. W.-C. Chang, S.-F. Liu and W.-S. Wang p2190
Polarisation insensitive $LiNbO_3$ optical devices with power splitting and switching functions. N. Kuzuta and K. Takakura p157
Three-guide directional coupler as polarisation independent optical switch. H. Okayama, T. Ushikubo and M. Kawahara p810
Ultrafast all-optical switching in $Al_{0\cdot18}Ga_{0\cdot82}As$ directional coupler in 1·55 μm spectral region. J.S. Aitchison, A.H. Kean, C.N. Ironside, A. Villeneuve and G.I. Stegeman p1709
Y-fed directional coupler with weighted coupling. H. Okayama and M. Kawahara p1947

DISCRETE-TIME SYSTEMS

Realisation of switched capacitor delay lines and Hilbert transformers. S. Eriksson p2042
Stray-insensitive switched-capacitor sample-delay-hold buffers for video frequency applications. J.J.F. Rijns and H. Wallinga p639

DISPERSION (WAVE)

Evaluation of chromatic dispersion in erbium doped fibre amplifiers. F. Matera, M. Romagnoli, M. Settembre, M. Tamburrini and M. Peroni p1867 e2197
Experimental comparison between two different methods for measuring polarisation mode dispersion in singlemode fibres. N. Gisin, R. Passy, B. Perny, A. Galtarossa, C. Someda, F. Bergamin, M. Schiano and F. Matera p2292
Wideband radio channel characteristics in Alpine regions. B. Nemsic, J.-P. de Weck, H. Bühler and T. Ergoth p717

DISPLAY SYSTEMS

Static scattering in filled nematic: new liquid crystal display technique. R. Eidenschink and W.H. de Jeu p1195

DISTORTION

DFB active filter/detector for multichannel FSK optical transmission. R. Hui, N. Caponio, P. Gambini, M. Puleo and E. Vezzoni p2016
Distortion analysis of semiconductor lasers: A caution. J.J. O'Reilly and H.M. Salgado p946
Electrical predistortion to compensate for combined effect of laser chirp and fibre dispersion. H. Gysel and M. Ramachandran p421
Frequency planning for nonlinear distortion reduction in wideband transmission. L.K. Chen, K.Y. Lau and Y. Trisno p1293
Reduction of distortion in analogue modulated semiconductor lasers by feedforward compensation. L.S. Fock and R.S. Tucker p669
Simultaneous reduction of intensity noise and distortion in semiconductor lasers by feedforward compensation. L.S. Fock and R.S. Tucker p1297

DISTRIBUTION NETWORKS

Video distribution system with 40 AM-VSB channels and 22 dB link budget. G.R. Joyce, R. Olshansky, R. Childs and T. Wei p1613

DOPING

Amplification and lasing at 1·3 μm in praseodymium-doped fluorozirconate fibres. Y. Durteste, M. Monerie, J.Y. Allain and H. Poignant p626
Amplification at 1·3 μm in a Pr^{3+}-doped single-mode fluorozirconate fibre. S.F. Carter, D. Szebesta, S.T. Davey, R. Wyatt, M.C. Brierley and P.W. France p628
New GaAs n^+-p-$\delta(n^+)$-i-$\delta(p^+)$-i-n^+ switching device grown by molecular beam epitaxy. W.-C. Liu and C.-Y. Sun p1704
Optimum germanium profile for SiGe base HBTs. S.S. Winterton, B.M. Manning, D.J. Walkey and N.G. Tarr p1337 e1781

ELECTRO-OPTICS

16 × 16 single chip optical switch array in lithium niobate. P.J. Duthie and M.J. Wale p1265
Electro-optical measurement of high-field conductivity in δ-doped GaAs epitaxial layers. V. Balynas, A. Krotkus, T. Lideikis, A. Stalnionis and G. Treideris p2
Guided wave switch array using electro-optic and carrier depletion effects in indium phosphite. P.J. Duthie, N. Shaw, M.J. Wale and I. Bennion p1747
High contrast, low-voltage, symmetric-selfelectro-optic effect device (S-SEED). R.J. Grindle, J.E. Midwinter and J.S. Roberts p2327
Optical fibre modulator using electro-optic polymer overlay. M. Wilkinson, J.R. Hill and S.A. Cassidy p979
Organic patch sensor for electro-optic measurement of electrical signals in integrated circuits. T. Nagatsuma, M. Yaita, M. Shinagawa, M. Amano and Y. Shuto p932
Parallel interconnection of two 64 × 32 symmetric selfelectro-optic effect device arrays. F.B. McCormick, F.A.P. Tooley, J.M. Sasian, J.L. Brubaker, A.L. Lentine, T.J. Cloonan, R.L. Morrison, S.L. Walker and R.J. Crisci p1869
Picosecond electro-optic probing of high-speed integrated circuits using external GaAs tip. T. Nagatsuma and M. Shinagawa p1904
Simultaneous achievement of low insertion loss, high contrast and low operating voltage in asymmetric Fabry–Perot reflection modulator. K.-K. Law, M. Whitehead, J.L. Merz and L.A. Coldren p1863 e1989

ELECTROMAGNETIC WAVES

Computation of susceptance for thick meander-line polariser. S. Uckun and T. Ege p2076
Correlation model for shadow fading in mobile radio systems. M. Gudmundson p2145
Developing experimental models for propagation and scattering of EM waves in electrically large ducts. R. Bansal, E. DiCarlo and D. Jordan p1951
Diffraction of VLF radio waves by polar ice caps. J.R. Wait e1496
Diffraction of VLF radio waves by polar ice caps. J.R. Wait p1030 e1496
Explicit expression for Brewster angles of isotropic-bi-isotropic interface. I.V. Lindell, A.-H. Sihvola and A.J. Viitanen p2163
Explicit finite difference vectorial beam propagation method. Y. Chung, N. Dagli and L. Thylén p2119
New method for scattering of electromagnetic waves from embedded conductive cylinder. J. Yang and Z. Wang p420
New technique for estimation of farfield from near-zone phaseless data. T. Isernia, R. Pierri and G. Leone p652
Novel frequency-selective twist polariser. W.M. Shi, W.X. Zhang and M.G. Zhao p2110
Prediction of diffracted field strength in the shadow of a flat roofed building. C.J. Haslett and M.O. Al-Nuaimi p950 e1496
Relations between generalised Gaussian beams. M. Yokota and O. Fukumitsu p366

ELECTROMAGNETISM

Analysis of arbitrarily shaped multiple-dielectric posts in rectangular waveguide by method of lines. X.-H. Jiang and S.F. Li p29
Application of novel method for surface-ray tracing over hyperboloidal scatterers. R.M. Jha, D.J. Edwards and R. Bhakthavathsalam p1501
Experimental determination of field strength and quality factor of heavily dampled accelerator cavities. P. Hülsmann, M. Kurz and H. Klein p1727
Finite element solution of time-harmonic modal fields in periodic structures. R.L. Ferrari p33
Multigrid transmission-line modelling method for solving electromagnetic field problems. J.L. Herring and C. Christopoulos p1794
New method for scattering of electromagnetic waves from embedded conductive cylinder. J. Yang and Z. Wang p420
Optical magnetic and electric field sensors based on surface plasmon polariton resonant coupling. B. Moslehi, M.W. Foster and P. Harvey p951
Prediction of diffracted field strength in the shadow of a flat roofed building. C.J. Haslett and M.O. Al-Nuaimi p950 e1496
Scattering by thin wire mesh using finite-difference time-domain method. J.J. Boonzaaier and C.W.I. Pistorius p1583
Selfguided beam interaction: method of invariants. D.J. Mitchell, A.W. Snyder and L. Poladian p848
Simple high-frequency diffraction analysis of microstrip antenna on large cylinder. C.-F. Huang p1161
Singularity exponents for complementary sectors. J. Boersma p1484
Three-dimensional analysis of arbitrarily shaped multiple-inductive posts in rectangular waveguide. X.-H. Jiang and S.-F. Li p960

ELECTRON DEVICES

Experimental study of InGaAs transferred-electron device as fast laser driver. D. Hahn, K. Hansen and A. Schlachetzki p2070
Mathematical approach to large-signal modelling of electron devices. F. Filicori and G. Vannini p357
Modelling degeneracy for Monte-Carlo simulation of electron transport in GaAs. Y. Yamada p679

ELECTRON MICROSCOPY

Cold field-emission from CVD diamond films observed in emission electron microscopy. C. Wang, A. Garcia, D.C. Ingram, M. Lake and M.E. Kordesch p1459
Time of flight spectrometer for scanning electron microscope. A. Khursheed, A.R. Dinnis and P.D. Smart p1507

EPITAXY AND EPITAXIAL GROWTH

$(InAs)_3/(GaAs)_4$ superlattice strained quantum well laser at 980 nm. N. Chand, N.K. Dutta, S.N.G. Chu and J. Lopata p2009
Conduction type control of Si-doped GaAs on (311)A oriented substrate by V/III flux ratio in MBE. T. Takamori, K. Watanabe and T. Fukunaga p729
Long incubation times for selective epitaxial growth of silicon using silane only. G.J. Parker, J.M. Bonar and C.M.K. Starbuck p1595
Low temperature growth of GaAs quantum well lasers by modulated beam epitaxy. S. Xin, K.F. Longenbach and W.I. Wang p1072
Microcavities with field emitters sealed by silicon wafer bonding. R. Stengl, H.W. Meul and W. Hönlein p2209
Selective area epitaxy and growth over patterned substrates by chemical beam epitaxy. W.T. Tsang, L. Yang, M.C. Wu and Y.K. Chen p3
State of the art 1·3 μm lasers by atmospheric pressure MOVPE using tertiary butylphosphine. A. Ougazzaden, R. Mellet, Y. Gao, C. Kazmierski, D. Robein and A. Mircea p1005
Upside down silicon camel diodes fabricated by low pressure CVD. G. Schmidt and H. Beneking p1086

EQUALISERS

Improving decision feedback equaliser performance using neural networks. K. Raivio, O. Simula and J. Henriksson p2151
New low-complexity decision feedback equalisation technique for narrowband digital cellular systems. Y.-J. Liu p1180
Optical equalisation with linearly tapered two-dissimilar-core fibre. F. Ouellette and Y. Duval p1668

EQUIVALENT CIRCUITS

Equivalent circuit modelling of lossy coupled lines using SPICE software. T. Vu Dinh, B. Cabon and J. Chilo p710

ERRORS

Analysis of SDH pointer corruption due to error activity. J.E. Deslandes, E.V. Jones and P. Cochrane p453
Bit error probability for fading DPSK signals in microcellular land mobile radio systems. A. Kegel, H.J. Wesselman and R. Prasad p1647
Bit error rate measurement with predetermined confidence. S. Berber p1205
Bit error rate measurements of 14 000 km 5 Gbit/s fibre-amplifier transmission system using circulating loop. N.S. Bergano, J. Aspell, C.R. Davidson, P.R. Trischitta, B.M. Nyman and F.W. Kerfoot p1889
Concurrent error detection in current-mode A/D convertors. C.-L. Wey p2370
Differential frequency detection of narrowband Manchester coded FSK. P.B.T. Nyirenda p1470
Double symbol error rate and block error rate of MDPSK. F. Adachi and T. Matsumoto p1571
Effect of random errors in antenna cylindrical near-field measurements. J. Romeu and L. Jofre p338
Error correction technique for multivalued MOS memory. E.K.F. Lee and P.G. Gulak p1321
Error probability of coherent PSK and FSK systems with multiple cochannel interferences. Chen Jinguang and Lin Sheng p640
Error rate prediction for PSK and QAM when affected by terrain multipath. E.J. Dutton p795
Error ratio measurements over transoceanic distances using recirculating loop. T. Widdowson and D.J. Malyon p2201
Errors in estimating local average power of multipath signals. A. Urie p315
Multichannel ASK system design influenced by significant laser phase noise. G. Jacobsen p1741
New EPL RLL(5, 16) code. M. Simić and R. Petrović p2100
Origin of error in calculation of dispersion of optical singlemode fibres using numerical approach. L.-P. Yuan p1489
Phase error correcting vector modulator for personal communications network (PCN) transceivers. A.E. Jones and J.G. Gardiner p1230
Trial results of novel bit error rate monitor scheme over skywave HF link. J.B. Scholz p1730

FARADAY EFFECT

Compensation for temperature dependence of Faraday effect in diamagnetic materials: application to optical fibre sensors. P.A. Williams, G.W. Day and A.H. Rose p1131
Current sensing by mode coupling in fibre via the Faraday effect. W. Chu, D. McStay and A.J. Rogers p207

FAST FOURIER TRANSFORMS

New fast GPS code-acquisition technique using FFT. D.J.R. van Nee and A.J.R.M. Coenen p158
Parallel FFT algorithms for MIMD computers. M.K. Fung and A.K. Nandi p286

FEEDBACK

Effect of self-feedback in dynamic neural networks. R. Perfetti p1367 e1888
Harmonic characterisation of feedback systems incorporating saturation nonlinearities. P. Bowron, M.R.J. Motlagh and A.A. Muhieddine p1865
Improved common-mode feedback circuit suitable for operational transconductance amplifiers with tuning. P. Wu and R. Schaumann p117 e787
InGaAs–GaAs–AlGaAs strained-layer distributed feedback ridge waveguide quantum well heterostructure laser array. L.M. Miller, K.J. Beernink, J.T. Verdeyen, J.J. Coleman, J.S. Hughes, G.M. Smith, J. Honig and T.M. Cockerill p1943
Optical feedback receiver with sensitivity of −55·2 dBm at 8 Mbit/s. C.A. Hunter, R.L. Calton, P.R. Sadd and S.D. Walker p886 e1219
Simple frequency/voltage convertor with low output ripple. W. Kiranon, P. Wardkein and C. Loescharataramdee p205

FIBRE OPTICS

Amplification and lasing at 1·3 μm in praseodymium-doped fluorozirconate fibres. Y. Durteste, M. Monerie, J.Y. Allain and H. Poignant p626
Amplification at 1·3 μm in a Pr^{3+}-doped single-mode fluorozirconate fibre. S.F. Carter, D. Szebesta, S.T. Davey, R. Wyatt, M.C. Brierley and P.W. France p628
Characterisation of surface plasmon wave polarising devices. S. Carey and W. Johnstone p988
Demonstration of birefringent optical fibre frequency shifter employing torsional acoustic waves. M. Berwick, C.N. Pannell, P. St. J. Russell and D.A. Jackson p713 e1219
Experimental investigation of polarisation-induced fading in interferometric fibre sensor arrays. A.D. Kersey, M.J. Marrone and A. Dandridge p562
Fabrication and assessment of a D-fibre polarisation splitter. F.A. Burton and T.K. White p657
Fibre-tip displacement sensor using sinusoidal FM-based technique. S. Venkatesh and W.V. Sorin p1652
Hollow sapphire waveguides for remote radiometric temperature measurements. S.J. Saggese, J.A. Harrington and G.H. Sigel, Jun p707
Long-working-distance expanded-beam fibre microlenses. J. Stone, C.A. Burrus and J.C. Centanni p592
Low coherence, interferometric fibre optic vibrometer using novel optical signal processing scheme. K. Weir, W.J.O. Boyle, A.W. Palmer, K.T.V. Grattan and B.T. Meggitt p1658
Miniature high performance fibre loop reflector. K.P. Oakley, N.M. O'Sullivan, C.D. Hussey and T.A. Birks p2334
Narrow-linewidth strained-layer 1·5 μm multiquantum well distributed feedback lasers. S.J. Wang, Y. Twu, T. Tanbun-Ek, R.A. Logan, N.K. Dutta and A.B. Piccirilli p625
Performance characteristics of CSMA/CD for fibre optic networks. J.-T. Lim p247
Performance characteristics of GaInAs/GaAs large optical cavity quantum well lasers. N.K. Dutta, J. Lopata, P.R. Berger, D.L. Sivco and A.Y. Cho p680
Polarisation-induced visibility limits in interferometric fibre-optic sensor arrays. Y.S. Boger and M. Tur p622
Polarisation-insensitive fibre optic Michelson interferometer. A.D. Kersey, M.J. Marrone and M.A. Davis p518
Scanning fibre-optic microscope. L. Giniūnas, R. Juškaitis and S.V. Shatalin p724
Variable-ratio, polarisation-insensitive, 3 × 3 fused biconical tapered couplers. K.A. Murphy, M.F. Gunther and A.M. Vengsarkar p1336
Visibility limits in fibre-optic Michelson interferometer with birefringence compensation. M.J. Marrone and A.D. Kersey p1422
Wide-angle fibre optic imaging arrays for vision and display system applications. B. Moslehi, W. Parkyn, P. Harvey, D. Zaleta and P. Soltan p1022

FIELD-EFFECT TRANSISTORS

14 GHz low-power highly sensitive static frequency divider using quantum well AlGaAs/GaAs/AlGaAs FET technology. P. Wennekers, A. Heulsmann, G. Kaufel, K. Koehler, B. Raynor and J. Schneider p1173
Accurate charge control model for MODFET including subthreshold region. K.Y. Tong p668
$Al_{0.25}Ga_{0.75}As/In_{0.25}Ga_{0.75}As$ pseudomorphic MODFET with high DC and RF performance. J. Dickmann, A. Geyer, H. Daembkes, H. Nickel, R. Lösch and W. Schlapp p501
Characteristics of floating gate device as analogue memory for neural networks. O. Fujita, Y. Amemiya and A. Iwata p924
Correlation between impact ionisation, recombination and visible light emission in GaAs MESFETs. E. Zanoni, S. Bigliardi, M. Manfredi, A. Paccagnella, P. Pisoni, P. Telaroli, C. Tedesco and C. Canali p770
Demonstration of high performance heterojunction field effect transistor in InAlAs/InGaAs/InAlGaAs/InP material system. R.S. Mand and J.G. Simmons p1453
Electron mobility and deep level trap profiles of MBE GaAs on Si MESFETs. J. Goostray, H. Thomas, J.M. Dumas, Z. Hatzopolos and D. Warner p84
GaAs vertical JFET operated in bipolar mode (GaAs BMFET). G. Schweeger, G. Cocorullo, F.G. Della Corte, H.L. Hartnagel, G. Vitale and P. Spirito p1097
High DC and microwave characteristics of subhalf-micrometre gate ion-implanted GaAs MESFETs using trilayer deep UV lithography. T. Hwang, M. Feng and C.L. Lau p929
High dynamic range microwave FET. P.K. Ikalainen and L.C. Witkowski p345
High temperature operation of α-silicon carbide buried-gate junction field-effect transistors. G. Kelner, S. Binari, M. Shur and J. Palmour p1038
Improved large-signal quasistatic MESFET model. B.A. Kramer and R.J. Weber p906
Interelectrode capacitance nonlinearities in vertical power DMOSFETs. K. Shenai p280
Linear compound FET circuit using gallium arsenide MESFETs. D.G. Haigh and C. Toumazou p1494
Measurement and analysis of small-signal drain admittance in SOS MOSFETs. R. Howes and W. Redman-White p2290
Mesa release and deposition used for GaAs-on-Si MESFET fabrication. J. De Boeck, G. Zou, M. Van Rossum and G. Borghs p22
Modular FET model with distributed source configuration for single and double side source grounded MESFET. G. Baumann and R. Hierl p1128
Monolithic integration of singlemode AlGaAs optical waveguides at 830 nm with GaAs E/D-MESFETs using planar multifunctional epistructure (PME) approach. S.D. Mukherjee, J.D. Skogen, M.K. Hibbs-Brenner, C.T. Sullivan, E.L. Kalweit and R.A. Walterson p2281
New method for extraction of effective channel length in submicron MOSFETs. K. Iniewski and C.A.T. Salama p508
New two-dimensional approach for determining depletion layer profile in field-effect transistors. B. Marir, M. Benabbas, D. Bajon and H. Baudrand p1765
Novel pseudomorphic InGaAs/AlGaAs SISFET and HIGFET structures for direct coupled FET logic. R.T. Carline, C.G. Morton and D.W.E. Allsopp p1617
Observation of ballistic transport in hot-electron vertical FET spectrometer using ultrathin planar-doped barrier launcher. T. Daniels-Race, K. Yamasaki, W.J. Schaff and L.F. Eastman p1144
Observation of reversible collapse phenomena in GaAs MESFETs at cryogenic temperatures. D.V. Camin, G. Pessina and E. Previtali p2297
Photovoltaic gate biasing edge effect in GaAs MESFETs. D. Abbott, S. Cui, K. Eshraghian and E. McCabe p1900
Problems in designing thin-film accumulation-mode *p*-channel SOI MOSFETs for CMOS digital circuit environment. D. Flandre p1280 e1599
Q and V band power InGaAs MESFETs. G.W. Wang and Y. Chang p488
Short channel effect in thin-film accumulation-mode *p*-channel SOI MOSFETs. P. Smeys, A. Clerix and J.-P. Colinge p970
Short-channels in sub-100 nm GaAs MESFETs. K. Nummila, A.A. Ketterson, S. Caracci, J. Kolodzey and I. Adesida p1519
Si/SiGe modulation doped field-effect transistor with two electron channels. U. König and F. Schäffler p1405
Strained multiquantum well double heterostructure optoelectronic switch and associated heterojunction FET. P.W. Cooke, P.A. Evaldsson, G.W. Taylor and B. Tell p1095
Suppression of latch in SOI MOSFETs by silicidation of source. L.J. McDaid, S. Hall, W. Eccleston and J.C. Alderman p1003
Threshold voltage adjustable GaAs FET for VLSI. C.G. Diskus, K. Lübke, H.W. Lettenmayr, L. Palmetshofer and H.W. Thim p418
Travelling Gunn domains in submicron GaAs MESFETs. P. Lugli, M. Grimm, M. Pabst and H. Lüth p398
Ultralow specific on resistance UMOSFET with trench contacts for source and body regions realised by selfaligned process. S. Matsumoto, T. Ohno and K. Izumi p1640
p-channel modulation-doped GaSb field-effect transistors. L.F. Luo, K.F. Longenbach and W.I. Wang p472

FILTERING AND PREDICTION THEORY

Experimental results on suboptimal filtering for optical digital pulse-position modulation. A.J. Massarella and M.J.N. Sibley p1953

FILTERS

1 GHz low loss coupled resonator filter using surface skimming bulk waves and Bleustein-Gulyaev waves. I.D. Avramov p414
Allpass expansions of digital transfer functions. X. Nie, D. Raghuramireddy and R. Unbehauen p1438
Application of rare-earth doped fibres as lowpass filters in passive optical networks. I.J. Wilkinson, T. Finegan and B.J. Ainslie p230
Bandstop monolithic crystal filters having allpass response outside stopband. S.K.S. Lu p1890
Birefringent photosensitivity in monomode optical fibre: application to external writing of rocking filters. K.O. Hill, F. Bilodeau, B. Malo and D.C. Johnson p1548
CAD technique for designing microwave transistor active filters. S. Udomchokpaiboon and J.C. Mollier p1694
Comparative analysis between noncanonical LMS and LMS adaptive filtering.

W.S. Gan, J.J. Soraghan, R.W. Stewart and T.S. Durrani p947
Constant bandwidth IIR lowpass filter for data sampled at nonuniform rate. B. Veidt p330 e685
Current mode allpass/notch and bandpass filter using single CCII. C.-M. Chang p1812
Design and test of novel integrate and dump filter (I&D) for optical Gbit/s system applications. B. Enning, E. Bødtker, G. Jacobsen and B. Jensen p2286
Design of symmetrical polylithic crystal filters having equal motional inductances. S.K.S. Lu p1456
Dielectric multilayered interference filters deposited on polyimide films. T. Oguchi, J. Noda, H. Hanafusa and S. Nishi p706
Doppler optimised mismatched filters. A.J. Zejak, E. Zentner and P.B. Rapajić p558
Easy and effective stabilisation measure for fast recursive least squares algorithms for adaptive transversal filters. H. Schütze and Z. Ren p1397
Fast, efficient median filters with even length windows. J.P. Havlicek, K.A. Sarkady, G.R. Katz and J.C. McKeeman e392
Filter characteristics of DBR amplifier with index and gain coupling. J. Willems, K. David, G. Morthier and R. Baets p831
Further results for evaluation of even order elliptic filter functions using the Darlington algorithm. D.J.M. Báez-López p1797
Grid density for design of one- and two-dimensional FIR filters. R.H. Yang and Y.C. Lim p2053
High frequency GaAs switched capacitor filter implemented with GaAs insulated gate FET switches. J.L. Luck, J.T. Taylor, J.G. Swanson and D.G. Haigh p1619
High frequency saturated CMOS floating resistor for fully-differential analogue signal processors. M. Steyaert, J. Silva-Martinez and W. Sansen p1609
IIR filtering on sigma–delta modulated signals. D.A. Johns and D.M. Lewis p307
Improved design procedure for multiplierless FIR digital filters. H. Shaffeu, M.M. Jones, H.D. Griffiths and J.T. Taylor p1142
Improved median filter for restoration of image corrupted with Gaussian noise. H. Tang and L.W. Cahill p1016
Improved systolic realisation of second-order recursive digital filter. J. Huang p1299
K-band suspended substrate stripline tapped combline filter. W.-T. Lo and C.-K.C. Tzuang p1389
Maximum flat digital differentiator. B. Carlsson p675
Median and mean filters produce similar shifts on curved boundaries. E.R. Davies p826
Median approximating algorithm. S. Fotopoulos and G. Economou p1441
Multidimensional multirate filters derived from one dimensional filters. Tsuhan Chen and P.P. Vaidyanathan p225
New CMOS NIC-based MOSFET-C filters. S.-I. Liu, H.-W. Tsao, J. Wu, M.-O. Yang and J.-H. Tsay p772
New frequency transformations for complex digital filters. H. Iwakura p2083
New insensitive notch and allpass filters with single current follower. S.-I. Liu, J.-J. Chen and J.-H. Tsay p1712
New linear phase QMF filter design for sub-band coding. J.-H. Jeon and J.-K. Kim p319
Nonlinear filtering of delta modulated signals. S.L. Horianopoulos, V. Anastassopoulos and T. Deliyannis p1078
Novel CMOS linear OTA using feedback control on common source node. J. Sevenhans and M. Van Paemel p1873
Optical layout for single-transverse-mode operation of 2-D arrays of vertical cavity surface-emitting lasers. R.R.A. Syms and E.M. Yeatman p349
Orthonormal expansion of stable rational transfer functions. X. Nie, D. Raghuramireddy and R. Unbehauen p1492
Orthonormal minimal structure for n-dimensional denominator-separable digital filters for multiprocessor implementation. X. Nie, D. Raghuramireddy and R. Unbehauen p2206
Pseudo-N-path switched capacitor filters with out-of-band noise peaks. Z. Czarnul, G.C. Temes and A.G. Yesilyurt p1137
Realisation of highly linear MOS circuits using negative impedance convertors. K. Tabei, Z. Czarnul and S. Takagi p1416
Relation between impulse response moments and locations of poles and zeros of digital filter. A. Khare and T. Yoshikawa e1496
Relation between impulse response moments and locations of poles and zeros of digital filter. A. Khare and T. Yoshikawa p1084
Saturation circuitry for redundant number based IIR filters. R.F. Woods, O.C. McNally and S. McQuillan p1961
Selectivity-improved E-plane filter for millimetre-wave applications. J. Bornemann p1891
Stability and convergence behaviour of second-order LMS Volterra filter. P.M. Clarkson and M.V. Dokic p441 e890
Tunable SAW comb filter. V. Ermolov and M. Luukkala p1670
Two interpolative BTC image coding schemes. B. Zeng p1126
Universal active current filters using single second-generation current conveyor. C-M. Chang p1614
Vector median deblurring filter for colour image restoration. F. Argenti, M. Barni, V. Cappellini and A. Mecocci p1899
Wave analogue filters using switched-current techniques. A. Rueda, A. Yúfera and J.L. Huertas p1482

FLIP-CHIP DEVICES

8 × 8 flipchip assembled InGaAs detector arrays for optical interconnect. A.J. Moseley, M.Q. Kearley, R.C. Morris, J. Urquhart, M.J. Goodwin and G. Harris p1566

FLIP-FLOPS

10 Gbit/s D flipflop using AlInAs/InGaAs HBTs. B. Jalali, P.R. Smith, R.N. Nottenburg, M. Banu, D.A. Humphrey, R.K. Montgomery, D. Sivco and A.Y. Cho p1314
Hybrid higher radix JK flipflop sequencer with ASIC implementation potential. J.A.C. Webb, S.M.N. Forbes, J. Wilson and S.J. Laverty p1933

FLUORESCENCE

Fluorescence lifetime studies of MeV erbium implanted silica glass. A. Lidgard, A. Polman, D.C. Jacobsen, G.E. Blonder, R. Kistler, J.M. Poate and P.C. Becker p993

FOURIER TRANSFORMS

Analysis of samples of wideband signals taken at irregular, sub-Nyquist, intervals. P.C. Bagshaw and M. Sarhadi p1288
Analysis of time response of nonuniformly coupled multiconductor transmission lines with frequency-dependent losses. J.-F. Mao and Z.-F. Li p1941
Hexagonal discrete cosine transform for image coding. H.-S. Wu p781
Recursive construction of polynomial with prescribed phase on unit circle. S. Minocha, S.C. Dutta Roy and B. Kumar p224
Simulation of the RF performance of AlGaAs/GaAs heterojunction bipolar transistors: application of fast Fourier transform. L.L. Liou, A. Ezis, K. Ikossi-Anastasiou and C.I. Huang p523

FREQUENCY CONVERTORS

1·5 Gbit/s transmission system using all optical wavelength convertor based on tunable two-electrode DFB laser. P. Pottier, M.J. Chawki, R. Auffret, G. Claveau and A. Tromeur p2183
Demonstration of birefringent optical fibre frequency shifter employing torsional acoustic waves. M. Berwick, C.N. Pannell, P. St. J. Russell and D.A. Jackson p713 e1219

FREQUENCY MULTIPLIERS

Characterisation of frequency doubling in Eu^{2+} doped aluminosilicate fibres. T.J. Driscoll, N.M. Lawandy, A. Killian, L. Rienhart and T.F. Morse p1729
Erasure of frequency doubling gratings in optical fibres by ultraviolet light excitation. I.C.S. Carvalho, W. Margulis and B. Lesche p1497
Observation of frequency doubling in tantalum doped silica fibres. T.J. Driscoll, N.M. Lawandy, A. Killian, L. Rienhart and T.F. Morse p2088
Quasi-phase-matched frequency doubling over 5 mm in periodically poled polymer waveguide. R.A. Norwood and G. Khanarian e100
W-band monolithic frequency doubler using vertical GaAs varactor diode with n^+ buried layer. G. Hegazi, A. Ezzeddine, F. Phelleps, P. McNally, K. Pande, P. Rice and P. Pages p213

FREQUENCY SHIFT KEYING

1·5 Gbit/s FSK transmission system using two-electrode Fabry–Perot buried heterostructure laser. M.J. Chawki, R. Auffret, L. Berthou and L. Demeure p417
Error probability of coherent PSK and FSK systems with multiple cochannel interferences. Chen Jinguang and Lin Sheng p640
Error probability of optical heterodyne MSK communication system with limiter–discriminator–integrator detector. X. Zhang and P. Jiang e100
Phase noise insensitive coherent optical heterodyne CPFSK receiver with limiter discriminator detector. X. Zhang and P. Jiang p684

FREQUENCY-DOMAIN ANALYSIS

Linear estimation of frequencies of multiple sinusoids with least-absolute error criterion. Z. Liu and Y.-H. Gong p386
Single frequency efficient estimator. A. Ferrari, J. Menez and G. Alengrin p1939

FUNCTION GENERATORS

MOS sine function generator using exponential-law technique. O. Ishizuka, Z. Tang and H. Matsumoto p1937

GALLIUM ARSENIDE

Electrolytic processes for etching and metal deposition towards nanometre quantum structures. A. Grüb, R. Richter and H.L. Hartnagel p306
GaAs planar doped barrier diodes for millimetre-wave detector applications. M.J. Kearney, A. Condie and I. Dale p721
Linear compound FET circuit using gallium arsenide MESFETs. D.G. Haigh and C. Toumazou p1494
Linear tunable resistance circuit using gallium arsenide MESFETs. C. Toumazou and D.G. Haigh p655
Modelling degeneracy for Monte-Carlo simulation of electron transport in GaAs. Y. Yamada p679
Photovoltaic gate biasing edge effect in GaAs MESFETs. D. Abbott, S. Cui, K. Eshraghian and E. McCabe p1900
Threshold voltage adjustable GaAs FET for VLSI. C.G. Diskus, K. Lübke, H.W. Lettenmayr, L. Palmetshofer and H.W. Thim p418
Tunable differential-input gallium arsenide transconductors. D.G. Haigh and C. Toumazou p151
Ultralow dark current GaAlAs/GaAs MSM photodetector. A. Aboudou, J.P. Vilcot, D. Decoster, A. Chenoufi, E. Delhaye, P. Boissenot, C. Varin, F. Deschamps and I. Lecuru p793

GRAPHS AND GRAPH THEORY

Uniformly random tree generation. J.J. Narraway p2012

GYRATORS

Realisation of highly linear MOS circuits using negative impedance convertors. K. Tabei, Z. Czarnul and S. Takagi p1416

HARMONIC GENERATION

Ferroelectric-domain inversion induced by SiO_2 cladding for $LiNbO_3$ waveguide SHG. M. Fujimura, T. Suhara and H. Nishihara p1207
Observation of frequency doubling in tantalum doped silica fibres. T.J. Driscoll, N.M. Lawandy, A. Killian, L. Rienhart and T.F. Morse p2088
Photoelectric instability in optical fibre resulting in spontaneous second harmonic generation. M.I. Dyakonov and A.S. Furman p1429
Quasiphase-matched second harmonic generation of blue light in electrically periodically-poled lithium tantalate waveguides. S. Matsumoto, E.J. Lim, H.M. Hertz and M.M. Fejer p2040
Surface emitting second harmonic generation in vertical resonator. R. Lodenkamper, M.M. Fejer and J.S. Harris p1882
Tensor properties of optically encoded second-harmonic generation in semiconductor-microcrystallite-doped glasses. R.L. MacDonald and N.M. Lawandy p2331

IMAGE PROCESSING

2-D DCT systolic array implementation. W. Ma p201
Arithmetic coding with limited past history. M. Ghanbari p1157
BiCMOS edge detector with correlated-double-sampling readout circuit for pattern recognition neural network. J.B. Kuo, T.L. Chou and E.J. Wong p1248
Directionally classified image vector quantisation using Walsh Hadamard subspace distortion. L.M. Po and C.K. Chan p1964
Edge-based combination algorithm applied to multiple restored images. V.J.

Stanger p1638
Facial feature estimation for model-based coding. V. Seferidis p2226
Fast frame-to-frame interpolation technique for scenes containing moving objects. J.H. Kim and C.M. Kyung p1788
Fast weight-ordered search algorithm for image vector quantisation. S.-W. Ra and J.-K. Kim p2081
Focusing criterion. M. Charfi, A. Nyeck and A. Tosser p1233
Hexagonal discrete cosine transform for image coding. H.-S. Wu p781
Hierarchical image coding via MSE-minimising bilinear approximation. F.G.B. Denatale, G.S. Desoli and D.D. Giusto p2035
Hybrid image compression method based on fractal geometry. N. Zhang and H. Yan p406
Improved block truncation coding using Hopfield neural network. G. Qiu, M.R. Varley and T.J. Terrell p1924
Improved median filter for restoration of image corrupted with Gaussian noise. H. Tang and L.W. Cahill p1016
Insight into operation of Kulpa boundary distance measure. E.R. Davies p1178
Maximum descent method for image vector quantisation. C.-K. Ma and C.-K. Chan p1772
Median and mean filters produce similar shifts on curved boundaries. E.R. Davies p826
Modelling low bit rate video traffic as switched-fractal source. D.L. McLaren and D. Thong Nguyen p745
Moving object extraction from unregistered image sequence. L.L. Le Roux and J.J.D. Van Schalkwyk p2225
New linear phase QMF filter design for sub-band coding. J.-H. Jeon and J.-K. Kim p319
Optimising computation of hexagonal differential gradient edge detector. E.R. Davies p1526
Predictive partial search algorithm for vector quantisation. J. Ngwa-Ndifor and T. Ellis p1722
Spatio-temporal visibility function for image sequences. J.H. Ahn and J.-K. Kim p585
Two interpolative BTC image coding schemes. B. Zeng p1126
VLSI architecture for 2-D Daubechies wavelet transform without multipliers. A.S. Lewis and G. Knowles p171
Vector median deblurring filter for colour image restoration. F. Argenti, M. Barni, V. Cappellini and A. Mecocci p1899

INDIUM COMPOUNDS

Semi-insulating layers in InP obtained by Co or Fe Ion implantation. F. Vidimari, M. Caldironi, A. Di Paola, R. Chen and S. Pellegrino p817 e1219

INFORMATION THEORY

A. Brinton Cooper, III:. p2090
Burst error correction capability of square array codes. A.O. Mabogunje and P.G. Farrell p1215
Convolution-based DCT algorithm. Y.-M. Chin and J.-L. Wu p1834
Cryptanalysis of Okamoto cryptosystems with continued fraction algorithm. D.X. Li and D.W. Li p2014
Cyclic square and its coding characteristics. X.-H. Peng and P.G. Farrell p1535
Decoding scheme for constant weight codes for optical and spread spectrum applications. M. Hussain and J.S. Bedi p839
Efficiency of asynchronous CDMA systems. R. Giubilei p343
Efficient hardware decoding method for modified huffman code. S. Ho and P. Law p855 e1219
Equivalence of approximation techniques for solution of multidimensional Markov chains in network modelling. M.E. Woodward p1019
Error probability for noncoherent detection of continuous phase modulation on phase jittering channel. T. Palenius p1090
Hybrid ARQ scheme using TCM and code combining. R.H. Deng p866
Improved median filter for restoration of image corrupted with Gaussian noise. H. Tang and L.W. Cahill p1016
Improving performance of multidestination ARQ schemes under high error rate conditions. T.-H. Lee p293
Increasing the rate of output for m-sequences. M.J.B. Robshaw p1710
Maximum distance of anticodes. V.C. da Rocha Jun and M.M.C. de Souza p1564
Merit factor of Chu and Frank sequences. M. Antweiler and L. Bömer d777
Multisignatures based on zero knowledge schemes. C. Boyd p2002
New EPL RLL(5, 16) code. M. Simić and R. Petrović p2100
New bit-serial systolic multiplier for GF(2^m) using irreducible trinomials. M. Diab and A. Poli p1183
New construction for classes of majority logic decodable codes with even minimum distances. Chen Zhi, Fan Pingzhi and Jin Fan p549
New family of binary one-step majority-logic decodable codes. Chen Zhi and I.F. Blake p1259 e1989
New policy for multiqaeue systems with finite queue size. Y.H. Fan p1434
Nonexistence of perfect binary arrays. J. Jedwab p1252
Parallel decoding of binary BCH codes. T. Hwang p2223
Perfect energy efficient sequences. L. Bömer and M. Antweiler p1332
Radix-2 SRT division algorithm with simple quotient digit selection. N. Burgess p1910
Selforthogonal convolutional codes derived from linear congruences. V.C. da Rocha Jun p526
Selfsynchronisable binary Reed–Solomon code. H. Inaba and M. Kasahara p1648
Socially secure cryptographic election scheme. P.H. Slessenger p955
Specialised attack on Chor–Rivest public key cryptosystem. K. Huber e2399
Spectral analysis of coded digital signals by means of difference equation systems. B. Vasić and M. Stefanović p2272
Sporadic partitions of binomial coefficients. N. Jefferies p1334
State-space approach to decentralised detection. H. Delic p2353
Undetected error probabilities of codes for single-error correction and error detection. M.-C. Lin p2264
Uniformly random tree generation. J.J. Narraway p2012

INFRA-RED DETECTORS

Bolometric $YBa_2Cu_3O_{7-x}$ infra-red detector. T.Y. Tseng, C.Y. Chang, C.J. Haung and M.C. Chen p1724

INSTRUMENTATION

Acoustic microscopy skimming mode generation using small aperture lenses. Z. Hadjoub, K. Alami, A. Doghmane, J.M. Saurel and J. Attal p981
Analogue CMOS time-measuring circuit for low frequency instrumentation. S. Siskos and Th. Laopoulos p2242
Current conveyor based EMG amplifier with shutdown control. E. Bruun and E.-U. Haxthausen p2172
OTDR calibration device based on recirculating optical delay line. D.J. Ives, R.L. Palmer and B. Walker p342
Optical sampling oscilloscope using nonlinear fibre loop mirror. B.P. Nelson and N.J. Doran p204
Picosecond optical fibre sampling oscilloscope. D.U. Noske and J.R. Taylor p1739
Precise determination of open circuit capacitance of coplanar probes for on-wafer automatic network analyser measurements. P. Crozat, J.C. Hénaux and G. Vernet p1476
Reflectometer calibration using load, short and offset shorts with unknown phase. W. Sigg and J. Simon p1650

INSULATING MATERIALS AND INSULATORS

-Fibre optic pH sensors prepared by sol-gel immobilisation technique. J.Y. Ding, M.R. Shahriari and G.H. Sigel, Jun p1560
AlF_3-based glass fibres with enhanced optical transmission. T. Iqbal, M.R. Shahriari, P. Foy, R. Ulbrich and G.H. Sigel, Jun p110
Application of Nicollian–Reisman model to negative point-to-plane corona oxidation of silicon. M.R. Madani and P.K. Ajmera p1352
Buried stacked insulator: new SOI-structure formed by ion beam synthesis. W. Skorupa, J. Schöneich, A. De Veirman and J. Albrecht p202
Optical waveguide sensor using evanescent wave excitation of fluorescent dye in sol–gel glass. B.D. MacCraith, V. Ruddy, C. Potter, B. O'Kelly and J.F. McGilp p1247
Second harmonic generation in ion-exchanged waveguides of semiconductor microcrystallite-doped glasses. R.L. MacDonald, T.J. Driscoll and N.M. Lawandy p1717
Shear wave imaging for deep nondestructive evaluation. D. Zhang and G.M. Crean p2248
Tensor properties of optically encoded second-harmonic generation in semiconductor-microcrystallite-doped glasses. R.L. MacDonald and N.M. Lawandy p2331

INTEGRATED CIRCUITS

10 Gbit/s AlGaAs/GaAs HBT driver IC for lasers or lightwave modulators. R.K. Montgomery, F. Ren, C.R. Abernathy, T.R. Fullowan, R.F. Kopf, P.R. Smith, S.J. Pearton, P. Wisk, J. Lothian, R.N. Nottenburg, T.V. Nguyen and F. Bosch p1827
10 Gbit/s high sensitivity-low error rate decision circuit implemented with C-doped AlGaAs/GaAs HBTs. R.K. Montgomery, P.R. Smith, F. Ren, T.R. Fullowan, C.R. Abernathy, R.F. Kopf, S.J. Pearton, J. Lothian, P. Wisk and R.N. Nottenburg p976
11·6 Gbps 1 : 4 demultiplexer using double pulse doped quantum well GaAs/AlGaAs transistors. M. Lang, U. Nowotny and M. Berroth p459
1·5 μm lithography Si- and Si/SiGe-bipolar transistors for ICs operating at 15 Gbit/s and above. H.-U. Schreiber and J.N. Albers p1465 e1888
20 Gbit/ AlGaAs/GaAs HBT decision circuit IC. K. Runge, J.L. Gimlett, R.B. Nubling, K.C. Wang, M.F. Chang, R.L. Pierson and P.M. Asbeck p2376
20 Gbit/s exclusive OR/NOR IC using AlGaAs/GaAs HBTs. H. Ichino, Y. Yamauchi and T. Nittono p180
23 Gbit/s Si bipolar decision circuit consisting of 24 Gbit/s MUX and DEMUX ICs. H.-M. Rein, J. Hauenschild, W. McFarland and D. Pettengill p974
27 Gbit/s AlGaAs/GaAs HBT 1 : 2 regenerating demultiplexer IC. K. Runge, J.L. Gimlett, R.B. Nubling, K.C. Wang, M.F. Chang, R.L. Pierson and P.M. Asbeck p2389
Accurate and simple design of cylindrical dielectric resonators for microwave integrated circuits. A.E. Centeno and G.B. Morgan p1753
Analogue fault diagnosis of active networks via bias modulation. A. Walker, P.K. Lala and W.E. Alexander p2279
Applications of composite BICMOS transistors. J. Ramirez-Angulo, M. Deyong and W.J. Adams p2236
Boron redistribution during RTP formation of tungsten disilicide. A. Essaadani, J.C. Dupuy and M. Marjan p1916
Buried stacked insulator: new SOI-structure formed by ion beam synthesis. W. Skorupa, J. Schöneich, A. De Veirman and J. Albrecht p202
Capacitive-access CAM cell and its read/write circuit implementation. S.M.S. Jalaleddine and L.G. Johnson p876
Demonstration of retiming capability of silicon bipolar time-division multiplexer operating up to 24 Gbit/s. J. Hauenschild, H.-M. Rein, W. McFarland, J. Doernberg and D. Pettengill p978 e1311
Design and fabrication of integrated-optic 8 × 8 star coupler. K. Okamoto, H. Takahashi, S. Suzuki, A. Sugita and Y. Ohmori p774
Four-quadrant multiplier combining sigma–delta and multirate processing techniques. J. Grilo and J.E. Franca p2146
Full integration of extremely large time constants in CMOS. M. Steyaert, P. Kinget, W. Sansen and J. Van der Spiegel p790
Functional approach to built-in selftest of integrated digital filters. C. Counil and G. Cambon p2326
Gilbert multiplier as an active mixer with conversion gain bandwidth of up to 17 GHz. P. Weger, G. Schultes, L. Treitinger, E. Bertagnolli and K. Ehinger p570
High performance VLSI architecture for division and square root. S.E. McQuillan, J.V. McCanny and R.F. Woods p19
High performance hybrid circuit modules for lightwave systems operating at data rates of 10 Gbit/s and higher. K. Runge, M. Bagheri and J. Young p267
Integrated analogue voltage multiplier combining MOS and bipolar transistors. A.H. Bratt, D. King and M.J. Lysejko p1852
Ka-band monolithic amplifier using 0·5 μm gate length ion-implanted GaAs/AlGaAs heterojunction FET technology. T. Hwang, M. Feng and C.L. Lau p2121
Low cost miniature thermoelectric generator. J.H. Kiely, D.V. Morgan, D.M. Rowe and J.M. Humphrey p2332
Microcavities with field emitters sealed by silicon wafer bonding. R. Stengl, H.W. Meul and W. Hönlein p2209
Organic patch sensor for electro-optic measurement of electrical signals in integrated circuits. T. Nagatsuma, M. Yaita, M. Shinagawa, M. Amano and Y. Shuto p932
Picosecond electro-optic probing of high-speed integrated circuits using external GaAs tip. T. Nagatsuma and M. Shinagawa p1904
Silicon bipolar chipset with maximum data rates from 10 to 23 Gbit/s for optical communications. J. Hauenschild, E. Bertagnolli, A. Felder, H.-M. Rein, H. Klose, L. Schmidt, L. Treitinger and P. Weger p2383
Subnanosecond 32 bit multiplier using negative differential resistance devices. S. Mohan, P. Mazumder and G.I. Haddad p1929
Supply current testing of mixed analogue and digital ICs. I.M. Bell, D.A. Camplin, G.E. Taylor and B.R. Bannister p1581
Switched-capacitor broadband noise generator for CMOS VLSI. A. Rodríguez-Vázquez, M. Delgado, S. Espejo and J.L. Huertas p1913

Threshold voltage adjustable GaAs FET for VLSI. C.G. Diskus, K. Lübke, H.W. Lettenmayr, L. Palmetshofer and H.W. Thim p418
Two quadrant analogue squarer circuit based on MOS square-law characteristic. M.P. Craven, B.R. Hayes-Gill and K.M. Curtis p2307
Ultrawideband biasing of MMIC distributed amplifiers using improved active load. I.D. Robertson and A.H. Aghvami p1907

INTEGRATED OPTICS

Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides. J. Aarnio, P. Heimala, M. Del Giudice and F. Bruno p2317
Design and fabrication of silica-based integrated-optic 1 × 128 power splitter. H. Takahashi, Y. Ohmori and M. Kawachi p2131
Design of fibre-matched InP waveguides by scalar transverse field formulation. B. Sauer, R. Kunesch and G. Müller p643
Design of monolithically integrated single frequency laser and booster amplifier. J.E.A. Whiteaway, G.H.B. Thompson, A.R. Goodwin and M.J. Fice p2250
Direct comparison of hydrogen depth distributions and refractive index profiles in annealed proton-exchanged z-cut $LiNbO_3$ waveguides. A. Loni, R.M. De La Rue, J.M. Zavada, R.G. Wilson and S.W. Novak p1245
Efficient TM-pass multilayer planar optical waveguide polariser. A. Yu Agapov, A.P. Gorobetz, V.M. Shevtsov and P.M. Zhitkov p1804
Electro-optically tunable wavelength demultiplexer using depressed index waveguides. M. López-Amo, R. Subías, J.M. López-Higuera and M.A. Muriel p195
Explicit formulas for cutoff values of TE modes on symmetric dielectric slab waveguide with Kerr-like permittivity. Z. Chen, H. Lai and X. Chen p21
Ferroelectric-domain inversion induced by SiO_2 cladding for $LiNbO_3$ waveguide SHG. M. Fujimura, T. Suhara and H. Nishihara p1207
GaAlAs/GaAs active filter based on vertical cavity surface emitting laser. F. Koyama, S. Kubota and K. Iga p1093
Gain-switched laser-amplifier photonic integrated circuit generating 590 mW peak power optical pulses. P.B. Hansen, G. Raybon, U. Koren, B.I. Miller, M.G. Young, R.M. Jopson, J.D. Evankow and C.A. Burrus p1778
Guided wave switch array using electro-optic and carrier depletion effects in indium phosphite. P.J. Duthie, N. Shaw, M.J. Wale and I. Bennion p1747
Guided-wave laser based on erbium-doped silica planar lightwave circuit. T. Kitagawa, K. Hattori, M. Shimizu, Y. Ohmori and M. Kobayashi p334
High gain (21 dB) packaged semiconductor optical amplifiers. R. Boudreau, R. Morrison, R. Sargent, R. Holmstrom, W. Powazinik, E. Meland, E. Wilmot and J. LaCourse p1845
High-speed monolithic coherent optical receiver integrated on InP substrate. N. Yasuoka, T. Sanada, H. Hamaguchi, M. Makiuchi, T. Mikawa, A. Kuramata, O. Wada and R.J. Deri p2020
Hybrid integration of laser diode and monomode high contrast slab waveguide on silicon. J.L. Joppe, A.J.T. de Krijger and O.F.J. Noordman p162
Index profile of proton-exchanged waveguides in lithium niobate using cinnamic acid. E.Y.B. Pun, K.K. Loi and P.S. Chung p1282
Integrated Nd:MgO:$LiNbO_3$ FM mode-locked waveguide laser. E. Lallier, J-P. Pocholle, M. Papuchon, Q. He, M.De Micheli, D.B. Ostrowsky, C. Grezes-Besset and E. Pelletier p936
Integrated acousto-optic collinear *TE–TM* mode convertors for 0·8 μm optical wavelength range. I. Hinkov and V. Hinkov p1211
Low threshold ion-implanted Nd : YAG channel waveguide laser. S.J. Field, D.C. Hanna, A.C. Large, D.P. Shepherd, A.C. Tropper, P.J. Chandler, P.D. Townsend and L. Zhang p2375
Low-loss ring resonators fabricated from silicon based integrated optics technologies. J. Bismuth, P. Gidon, F. Revol and S. Valette p722
Millimetre wave phase reversal integrated optical modulator in fin line. C.D. Watson and M.G.F. Wilson p2059
Monolithic integration of GaAs MESFET and InP/InGaAsP 2 × 2 optical switch. I. Pollentier, L. Buydens, P. Demeester, P. Van Daele, A. Enard, E. Lallier, G. Glastre and D. Rondi p2339
Monolithic integration of photodetector with vertical cavity surface emitting laser. G. Hasnain, K. Tai, Y.H. Wang, J.D. Wynn, K.D. Choquette, B.E. Weir, N.K. Dutta and A.Y. Cho p1630
Monolithic integration of singlemode AlGaAs optical waveguides at 830 nm with GaAs E/D-MESFETs using planar multifunctional epistructure (PME) approach. S.D. Mukherjee, J.D. Skogen, M.K. Hibbs-Brenner, C.T. Sullivan, E.L. Kalweit and R.A. Walterson p2281
Monolithic resonant optical reflector laser diodes. T. Hirata, M. Suehiro, M. Maeda, M. Hihara and H. Hosomatsu p2050
Monolithically integrated four-channel receiver array using diffused InGaAs JFET technology. C. Mansfield, D.J. Newson, P. Birdsall, J.A. Quayle, R. Young, M.D.A. MacBean and R.P. Merrett p1632
New application for nonlinear directional coupler: intensity controlled tunable optical filter. F. Farjady and M.G.F. Wilson p2218
Novel densely packed laser diode array. C.H. Harding and R.G. Waters p2233
Novel structure MQW electroabsorption modulator/DFB-laser integrated device fabricated by selective area MOCVD growth. M. Aoki, H. Sano, M. Suzuki, M. Takahashi, K. Uomi and A. Takai p2138
Optical receiver array in silicon bipolar technology with selfaligned, low parasitic III/V detectors for DC–1 Gbit/s parallel links. J. Wieland, H. Melchior, M.Q. Kearley, C.R. Morris, A.M. Moseley, M.J. Goodwin and R.C. Goodfellow p2211
Photoinduced refractive-index changes in TiO_2-doped silica optical waveguides on silicon substrate. Y. Hibino, M. Abe, T. Kominato and Y. Ohmori p2294
Planar 1/8 splitter in glass by photoresist masked silver film ion exchange. P. Pöyhönen, S. Honkanen, A. Tervonen, M. Tahkokorpi and J. Albert p1319
Planar integration of joint transform correlators. A.K. Ghosh, M.B. Lapis and D. Aossey p871
Polarisation insensitive 1·55 μm semiconductor integrated optical amplifier with access waveguides grown by LP-MOCVD. G. Glastre, D. Rondi, A. Enard and R. Blondeau p899
Proton-exchanged waveguides in MgO : $LiNbO_3$ using phosphoric acid. E.Y.B. Pun, K.K. Loi and P.S. Chung p168
Realisation of monolithically integrated single frequency MQW laser and booster amplifier at 1·5 μm wavelength. M.J. Fice, A.R. Goodwin, G.H.B. Thompson and J.E.A. Whiteaway p2305
Silver-film ion-exchanged singlemode waveguides in Er doped phosphate glass. S. Honkanen, S.I. Najafi, P. Poyhonen, G. Orcel, W.J. Wang and J. Chrostowski p2167
Simple approach for monolithic integration of DFB laser and passive waveguide. V. Hornung, D. Remiens, D. Robein, A. Gloukhian and M. Carré p1683
Simple measurement of carrier induced refractive-index change in InGaAsP ridge waveguide structures. G. Schraud, G. Müller, L. Stoll and U. Wolff p297
Sixth-order generalised propagation techniques. M. Glasner, D. Yevick and B. Hermansson p475
Switching speed of integrated acoustically-tunable optical filter. D.A. Smith and J.J. Johnson p2102
Tapered InP/InGaAsP waveguide structure for efficient fibre-chip coupling. G. Müller, B. Stegmüller, H. Westermeier and G. Wenger p1836
Two-mode-interference Ti : $LiNbO_3$ electro-optic polarisation-independent switch or polarisation splitter. J. Čtyroký, J. Janta, J. Prokš and J. Schröfel p965
Vectorial beam-propagation method for integrated optics. R. Clauberg and P. Von Allmen p654
Y laser with 38 nm tuning range. W. Idler, M. Schilling, D. Baums, G. Laube, K. Wünstel and O. Hildebrand p2268

INTERFERENCE

Coherent and limiter-discriminator detection of GMSK in interference limited conditions. L.B. Lopes p2313
Error probability of coherent PSK and FSK systems with multiple cochannel interferences. Chen Jinguang and Lin Sheng p640
Observed negative correlation between an interfering signal on a transhorizon path and wanted signals on terrestrial line-of-sight paths. R.L. Olsen and C. Bilodeau p332
Simplified evaluation of outage probability for cellular mobile radio systems. G. Immovilli and M.L. Merani p1365 e1496

INTERFEROMETERS

Cellular telemetry by microwaves. A. Benlarbi, D. Matton and Y. Leroy p509
Common path differential intensity and phase profilometer using time division multiplexing. M.S. Valera, M.G. Somekh and R.K. Appel p719
Demonstration of a hybrid time/wavelength division multiplexed interferometric fibre sensor array. A.D. Kersey p554
Demonstration of laser-diode-pumped ultrafast all-optical switching in nonlinear Sagnac interferometer. M. Jinno and T. Matsumoto p75
Experimental investigation of polarisation-induced fading in interferometric fibre sensor arrays. A.D. Kersey, M.J. Marrone and A. Dandridge p562
Optical amplification in a nonlinear fibre interferometer. M.E. Marhic, C.H. Hsia and J.-M. Jeong p210
Polarisation-insensitive fibre optic Michelson interferometer. A.D. Kersey, M.J. Marrone and M.A. Davis p518
Silicon Mach–Zehnder waveguide interferometers operating at 1·3 μm. G.V. Treyz p118
Statistical modelling of polarisation induced fading in interferometric fibre sensors. A.D. Kersey, M.J. Marrone and M.A. Davis p481
Study of electronically-scanned optical-fibre white-light Fizeau interferometer. S. Chen, A.W. Palmer, K.T.V. Grattan, B.T. Meggitt and S. Martin p1032
Visibility limits in fibre-optic Michelson interferometer with birefringence compensation. M.J. Marrone and A.D. Kersey p1422
Wavelength-insensitive couplers in form of all-fibre Mach–Zehnder interferometer. K. Morishita and T. Tahara p1200

INTERMODULATION

Frequency assignment with minimum intermodulation noise for satellite SCPC systems. Y.-H. Lau and D.J. Skellern p79

INVERTERS

AlGaAs/GaAs based HEMTs, inverters and ring oscillators with InGaAs and AlGaAs etch-stop layers. F. Ren, S.J. Pearton, R.F. Kopf, S.N.G. Chu and S.S. Pei p1175
All-optical inverter with one picojoule switching energy. M.N. Islam, C.E. Soccolich, C.-J. Chen, K.S. Kim, J.R. Simpson and U.C. Paek p130
Crystalline *p*MOS inverter using amorphous thin film transistor as active load. H.-C. Lin, W.J. Sah and S.-C. Lee p2180
Integrated optical inverter using light amplifying optical switch (LAOS). F.R. Beyette Jun, S.A. Feld, X. An, K.M. Geib, M.J. Hafich, G.Y. Robinson and C.W. Wilmsen p497
Novel four quadrant DC-link soft switching inverter generating sinusoidal waveforms. B.O. Woo and G.H. Cho p1732

ION IMPLANTATION

Boron redistribution during RTP formation of tungsten disilicide. A. Essaadani, J.C. Dupuy and M. Marjan p1916
Complementary vertical bipolar transistor process using high-energy ion implantation. F.W. Ragay, A.A.I. Aarnink and H. Wallinga p2141
Enhanced oxygen plasma stripping of P^+-implanted negative resist by hydrogen plasma pretreatment: temperature effects. W-A. Loong and M.-S. Yen p1079
Independently addressable InGaAs/GaAs vertical-cavity surface-emitting laser arrays. A. Von Lehmen, C. Chang-Hasnain, J. Wullert, L. Carrion, N. Stoffel, L. Florez and J. Harbison p583
Lateral variance of implanted ions. D.G. Ashworth, R. Oven and M.D.J. Bowyer p1402
Semi-insulating layers in InP obtained by Co or Fe Ion implantation. F. Vidimari, M. Caldironi, A. Di Paola, R. Chen and S. Pellegrino p817 e1219

IONISATION

Temperature dependence of ionisation coefficients in silicon derived from physical model. J.S. Marsland p1997 e2399

ISOLATORS

New configuration of polarisation-independent isolator using a polarisation-independent one. K. Shiraishi p302

JITTER

Cyclic wavelength jitter in actively mode-locked semiconductor lasers. N. Onodera, A.J. Lowery and R.S. Tucker p220

JUNCTION STRUCTURES

Double heterojunction bipolar transistor in $Al_xGa_{1-x}As/GaAs_{1-y}Sb_y$ system. K. Ikossi-Anastasiou, A. Ezis, K.R. Evans and C.E. Stutz p142

LARGE-SCALE INTEGRATION

Analogue CMOS Hebbian synapses. C. Schneider and H. Card p785 e1311
CMOS mean field learning. C.R. Schneider and H.C. Card p1702
Cell processing LSIs for 2·4 Gbit/s SDH-based ATM transmission system. H. Tatsuno, N. Tokura, Y. Maeda and K. Kikuchi p1222
Control logic modelling scheme well suited to test problem. D. Crestani, L.

Eudeline, A. Aguila, P. Chardon, M.-H. Gentil and C. Durante p991
Efficient VLSI digital logarithmic codecs. B. Hoefflinger p1132
Fast digit-parallel conversion of signed-digit into conventional representations. T. Stouraitis and C. Chen p964
Fast vicinity-upgrade algorithm for rectilinear Steiner trees. J.K. Chua and Y.C. Lim p1139
Flexible modulus residue number system for complex digital signal processing. N.M. Wigley and G.A. Jullien p1436
Functional approach to built-in selftest of integrated digital filters. C. Counil and G. Cambon p2326
I_{ddq} secondary components in CMOS logic circuits preceded by defective stages affected by analogue type faults. A. Rubio, J. Figueras, V. Champac, R. Rodriguez and J. Segura p1656
Module orientation algorithm using reconstruction of nets and mean field annealing. S.-S. Kim and C.-M. Kyung p1198
Multiple fault detection using single-fault tests. T.-Y. Kuo, J.-F. Wang and J.-Y. Lee p1329
New family of binary one-step majority-logic decodable codes. Chen Zhi and I.F. Blake p1259 e1989
Novel high-speed flip-flop circuit with low power consumption using GaAs junction FETs. C. Takano, M. Wada and J. Kasahara p764

LASERS AND LASER APPLICATIONS

$(InAs)_1/(GaAs)_4$ superlattice strained quantum well laser at 980 nm. N. Chand, N.K. Dutta, S.N.G. Chu and J. Lopata p2009
10 Gbit/s MQW-DFB-SIBH lasers entirely grown by LPMOVPE. P. Speier, J. Bouayad-Amine, U. Cebulla, K. Dütting, M. Klenk, G. Laube, H.P. Mayer, R. Weinmann, K. Wünstel, E. Zielinski and O. Hildebrand p863
10 Gbit/s low chirp performance of strained layer multiquantum well DFB laser. Y. Hirayama, M. Morinaga, M. Tanimura, M. Onomura, M. Funemizu, M. Kushibe, N. Suzuki and M. Nakamura p241
10 Gbit/s, 50 km dispersive fibre transmission experiment using strained multiquantum-well DFB laser diode. Y. Miyamoto, K. Hagimoto, F. Ichikawa, M. Yamamoto and T. Kagawa p853
15 W CW monolithic AlGaAs laser diode arrays. M. Sakamoto, D.F. Welch, H. Yao, J.G. Endriz and D.R. Scifres p902
160 nm continuous tuning of an MQW laser in an external cavity across the entire 1·3 μm communications window. C.P. Seltzer, M. Bagley, D.J. Elton, S. Perrin and D.M. Cooper p95
1·2 ps pulses from passively mode-locked laser diode pumped Er-doped fibre ring laser. M. Zirngibl, L.W. Stulz, J. Stone, J. Hugi, D. DiGiovanni and P.B. Hansen p1734
1·3 μm InGaAsP ridge waveguide laser on GaAs and silicon substrates by thin-film transfer. C.L. Shieh, J.Y. Chi, C.A. Armiento, P.O. Haugsjaa, A. Negri and W.I. Wang p850
1·3 μm MQW semiconductor optical amplifiers with high gain and output power. G. Sherlock, C.P. Seltzer, D.J. Elton, S.D. Perrin, M.J. Robertson and D.M. Cooper p165
1·5 Gbit/s FSK transmission system using two-electrode Fabry–Perot buried heterostructure laser. M.J. Chawki, R. Auffret, L. Berthou and L. Demeure p417
1·5 Gbit/s transmission system using all optical wavelength convertor based on tunable two-electrode DFB laser. P. Pottier, M.J. Chawki, R. Auffret, G. Claveau and A. Tromeur p2183
1·5 W diffraction-limited-beam operation from resonant-optical-waveguide (ROW) array. L.J. Mawst, D. Botez, M. Jansen, T.J. Roth and J. Rozenbergs p369
1 Gbit/s injection-locked DPSK communication experiments for space applications. J.C. Livas, S.B. Alexander, R.S. Bondurant, J.E. Kaufmann and M.L. Stevens p1042
1 W CW, 672 nm visible laser diodes. H.B. Serreze, C.M. Harding and R.G. Waters p2245
200 Mbit/s DPSK heterodyne transmission experiment using colour centre lasers at 2·55 μm. T. Komukai and Y. Miyajima p572
200 kHz absolute frequency stability in 1·5 μm external-cavity semiconductor laser. O. Ishida and H. Toba p1018
320 fs soliton generation with passively mode-locked erbium fibre laser. D.J. Richardson, R.I. Laming, D.N. Payne, M.W. Phillips and V.J. Matsas p730
450 Mbit/s BPSK and 1 Gbit/s QPSK throughput subcarrier multiple-access networks using 790 nm selfpulsating laser transmitter network for computer applications. R.J.S. Bates and S.D. Walker p1014
82 nm of continuous tunability for an external cavity semiconductor laser. F. Favre and D. Le Guen p183
AlGaAs–GaAs–InGaAs strained layer laser structure with performance independent of AlGaAs layer quality. S. Xin, K.F. Longenbach and W.I. Wang p199
AlGaInAs/AlGaAs SSQW GRINSCH lasers for the wavelength region between 800 and 870 nm. L. Buydens, P. Demeester, M. Van Ackere and P. Van Daele p618
Analysis of below-threshold spectrum and linewidth of surface-emitting $\lambda/4$-shifted DFB lasers with DBR mirror. T. Makino p1120
Analysis of higher information density pregroove model by boundary element method. H. Ito and T. Kojima p1511
Analysis of modal chirp in Q-switched semiconductor lasers. N. Stelmakh and J.-M. Lourtioz p1856
Analysis of receiver using injection-locked semiconductor laser for direct demodulation of PSK optical signals. O. Lidoyne and P. Gallion p995
Anomalous temporal response of gain guided surface emitting lasers. N.K. Dutta, L.W. Tu, G. Hasnain, G. Zydzik, Y.H. Wang and A.Y. Cho p208
Asymmetric crosscorrelation from actively mode-locked semiconductor laser. N. Onodera, A.J. Lowery, A. Zaheer, C.N. Murtonen and R.S. Tucker p1982
Autocorrelation measurements of picosecond laser-diode pulses by means of quasiphase-matching $LiNbO_3$ channel waveguides. A. Galvanauskas, J. Webjörn, A. Krotkus and G. Arvidsson p738
Broadband measurements of frequency noise spectrum in two section DBR laser. E. Goobar and R. Schatz p289
Broadband surface emitting multilayers for visible lasers and wavelength division demultiplexers. R. Normandin, S. Létourneau, R.L. Williams and F. Chatenoud p125
CW room temperature upconversion lasing at blue, green and red wavelengths in infrared-pumped Pr^{3+}-doped fluoride fibre. R.G. Smart, D.C. Hanna, A.C. Tropper, S.T. Davey, S.F. Carter and D. Szebesta p1307
Carrier-induced group-velocity dispersion and pulse compression in semiconductor laser amplifiers. G.P. Agrawal p620
Characteristics of laser-diode modules using thermally-diffused expanded core fibres. K. Yoshino, K. Kato, I. Nishi, H. Hanafusa and M. Horiguchi p796
Chirp compensation capability of a semiconductor laser amplifier. C.R. Medeiros and J.J. O'Reilly p649 e1112
Codirectionally coupled twin-guide laser diode for broadband electronic wavelength tuning. S. Illek, W. Thulke and M.-C. Amann p2207
Comparison of bulk buried heterostructure and multiple quantum well laser amplifier switches. B.P. Cavanagh, I.W. Marshall, G. Sherlock and H. Wickes p263
Comparison of differential gain in single quantum well and bulk double heterostructure lasers. B. Zhao, T.R. Chen and A. Yariv p2343
Continuous wavelength tuning of Brewster angled semiconductor lasers. S.S. Rehman and J.I. Vukusic p23
Continuous wavelength tuning of two-electrode vertical cavity surface emitting lasers. C.J. Chang-Hasnain, J.P. Harbison, C.E. Zah, L.T. Florez and N.C. Andreadakis p1002
Continuous-wave erbium-diffused $LiNbO_3$ waveguide laser. R. Brinkmann, W. Sohler and H. Suche p415
Correlation between linewidth rebroadening and low-frequency RIN enhancement in semiconductor lasers. G.R. Gray and G.P. Agrawal p1150
Cyclic wavelength jitter in actively mode-locked semiconductor lasers. N. Onodera, A.J. Lowery and R.S. Tucker p220
Demonstration of laser-diode-pumped ultrafast all-optical switching in nonlinear Sagnac interferometer. M. Jinno and T. Matsumoto p75
Dependence of mode stability and linewidth of DFB lasers on facet reflectivity and coupling coefficient. D.V. Eddolls, C.A. Park and J. Buus p590
Design of monolithically integrated single frequency laser and booster amplifier. J.E.A. Whiteaway, G.H.B. Thompson, A.R. Goodwin and M.J. Fice p2250
Direct observation of shot noise in linewidth broadening of DBR lasers. H. Sundaresan and N.C. Fletcher e478
Discretely-tuned *N*-frequency laser for packet switching applications based on WDM. B. Glance, U. Koren, C.A. Burrus and J.D. Evankow p1381
Distortion analysis of semiconductor lasers: A caution. J.J. O'Reilly and H.M. Salgado p946
Dual wavelength pulse generation using mode-locked erbium-doped fibre ring laser. J.B. Schlager, S. Kawanishi and M. Saruwatari p2072
Dynamic spectral broadening in digitally modulated lasers. J. O'Gorman, A.F.J. Levi, T. Tanbuk-Ek, D.L. Coblentz and R.A. Logan p1239
Effect of nonlinear gain on intensity noise in single-mode semiconductor lasers. G.P. Agrawal p232
Electrically tunable, diode-pumped erbium-doped fibre ring laser with fibre Fabry–Perot etalon. J.L. Zyskind, J.W. Sulhoff, J. Stone, D.J. DiGiovanni, L.W. Stulz, H.M. Presby, A. Piccirilli and P.E. Pramayon p1950
Electro-optic sampling of optoelectronically phase-locked 10·0 GHz microwave signals using semiconductor laser diodes. H.-H. Wu, C.-S. Chang and C.-L. Pan p1622
Electrostatic activation of micromechanical resonators. R.M.A. Fatah p166
Energy transfer in Pr^{3+}/Yb^{3+}-doped fluorozirconate fibres. J.Y. Allain, M. Monerie and H. Poignant p1012
Error-free operation of wavelength conversion laser for photonic crossconnect node at 125 Mbit/s. H. Rokugawa, N. Fujimoto, T. Nakagami and H. Nobuhara p393
Evidence of gain enhancement in long wavelength strained quantum well laser diodes. J.S. Osinski, P. Grodzinski, Y. Zou and P.D. Dapkus p469
Experimental study of InGaAs transferred-electron device as fast laser driver. D. Hahn, K. Hansen and A. Schlachetzki p2070
Extremely reduced nonlinear *K*-factor in high-speed strained layer multiquantum well DFB lasers. Y. Hirayama, M. Morinaga, N. Suzuki and M. Nakamura p875
Fabrication of periodically reversed domain structure for SHG in $LiNbO_3$ by direct electron beam lithography at room temperature. M. Yamada and K. Kishima p828
Fast method for accurate prediction of fibre laser oscillation wavelength. A.O. Nielsen, J.H. Povlsen, A. Bjarklev, O. Lumholt, T.P. Rasmussen and K. Rottwitt p1644
Fibre compression of chirped optical pulses from tunable DBR laser diode. A. Galvanauskas, A. Krotkus, J.A. Tellefsen, Jun, M. Öberg and B. Broberg p2394
Fibre-tip displacement sensor using sinusoidal FM-based technique. S. Venkatesh and W.V. Sorin p1652
Filter characteristics of DBR amplifier with index and gain coupling. J. Willems, K. David, G. Morthier and R. Baets p831
First DFB GRIN-SCH GaInAs/AlGaInAs 1·55 μm MBE MQW active layer buried ridge structure lasers. M. Blez, C. Kazmierski, M. Quillec, D. Robein, M. Allovon, A. Gloukhian and B. Sermage p93
Flat surface circular buried heterostructure surface emitting laser with highly reflective Si/SiO_2 mirrors. M. Oshikiri, F. Koyama and K. Iga p2038
Flip-chip solder bond mounting of laser diodes. C. Edge, R.M. Ash, G.G. Jones and M.J. Goodwin p499
Frequency halving in harmonically-driven mode-locked semiconductor lasers. N. Onodera, A.J. Lowery and R.S. Tucker p1053
Frequency locking of semiconductor laser using PSK modulated signal. M. Levesque, N. Cyr, M. Têtu and P. Tremblay p2238
Frequency response and differential gain in strained and unstrained InGaAs/InGaAsP quantum well lasers. M.C. Tatham, C.P. Seltzer, S.D. Perrin and D.M. Cooper p1278
GaAlAs/GaAs active filter based on vertical cavity surface emitting laser. F. Koyama, S. Kubota and K. Iga p1093
GaAs/AlGaAs quantum well laser with monolithically integrated extended glass waveguide cavity. M.C. Wu, Y.J. Chen and P.-T. Ho p1954
Gain compression and phase-amplitude coupling in GaInAs quantum well lasers with three, five and seven wells. M. Cavelier, J.-M. Lourtioz, J.-M. Xie, L. Chusseau, B. de Cremoux, M. Krakowski and D. Rondi p513
Gain-switched laser-amplifier photonic integrated circuit generating 590 mW peak power optical pulses. P.B. Hansen, G. Raybon, U. Koren, B.I. Miller, M.G. Young, R.M. Jopson, J.D. Evankow and C.A. Burrus p1778
Growth of CeO_2 thin films by laser ablation. S. Amirhaghi, F. Beech, M. Vickers, P. Barnes, S. Tarling and I.W. Boyd p2304
Guided-wave laser based on erbium-doped silica planar lightwave circuit. T. Kitagawa, K. Hattori, M. Shimizu, Y. Ohmori and M. Kobayashi p334
High frequency modulation of strained layer multiple quantum well optical amplifiers. U. Koren, B.I. Miller, M.G. Young, T.L. Koch, R.M. Jopson, A.H. Gnauck, J.D. Evankow and M. Chien p62
High performance 634 nm InGaP/InGaAlP strained quantum well lasers. C.J. Chang-Hasnain, R. Bhat and M.A. Koza p1553
High performance of AlGaInP/GaInP visible lasers by strain induced effects. J. Hashimoto, T. Katsuyama, J. Shinkai, I. Yohsida and H. Hayashi p2028
High power 980 nm ridge waveguide lasers with etch-stop layer. B. Elman, W.F. Sharfin, F.D. Crawford, W.C. Rideout, J. LaCourse and R.B. Lauer p2032
High power continuous operation of laser diodes at 1064 nm. R.F. Murison, A.H. Moore, S.R. Lee, N. Holehouse, K.M. Dzurko, T.M. Cockerill and J.J. Coleman p1979
High power switching of multielectrode broad area lasers. J. O'Gorman, A.F.J. Levi and W.S. Hobson p13
High power, 8·5 W CW, visible laser diodes. D.F. Welch and D.R. Scifres p1915
High power, diffraction-limited emission from monolithically integrated active grating master oscillator power amplifier. D. Mehuys, D.F. Welch, R. Parke, R.G. Waarts, A. Hardy and D. Scifres p492

High power, high-efficiency quasi-CW two-dimensional laser diode arrays. G.L. Harnagel, M. Ahrabi, G.S. Browder, Jun, D.P. Worland, J.G. Endriz and D.R. Scifres p55

High speed and high density wavelength multichannel butt-jointed DBR lasers. F. Delorme, S. Slempkes, D. Mathoorasing and J.C. Bouley p1969

High speed operation of hybrid CMOS vertical cavity surface emitting laser array. A.C. Von Lehmen, T.C. Banwell, R. Cordell, C. Chang-Hasnain, J.W. Mann, J. Harbison and L. Florez p1189

High temperature and high frequency performance of gain-guided surface emitting lasers. G. Hasnain, K. Tai, N.K. Dutta, Y.H. Wang, J.D. Wynn, B.E. Weir and A.Y. Cho p915

High temperature operation of $\lambda = 1{\cdot}5\,\mu m$ tensile strained multiple quantum well SIPBH lasers. P.J.A. Thijs, J.J.M. Binsma, E.W.A. Young and W.M.E. van Gils p791

High temperature performance of three-quantum-well vertical-cavity top-emitting lasers. L.W. Tu, Y.H. Wang, E.F. Schubert, B.E. Weir, G.J. Zydzik and A.Y. Cho p457

High-efficiency CW thulium-sensitised holmium-doped fluoride fibre laser operating at $2{\cdot}04\,\mu m$. J.Y. Allain, M. Monerie and H. Poignant p1513

High-power (106 mW) CW operation of transverse-mode stabilised InGaAlP laser diodes with strained $In_{0{\cdot}62}Ga_{0{\cdot}38}P$ active layer. K. Nitta, K. Itaya, Y. Nishikawa, M. Ishikawa, M. Okajima and G. Hatakoshi p1660

High-power operation of 630 nm-band transverse-mode stabilised AlGaInP laser diodes with current-blocking region near facets. H. Hamada, M. Shono, S. Honda, R. Hiroyama, K. Matsukawa, K. Yodoshi and T. Yamaguchi p661

Highly reliable 100 mW operation of broad area InGaAlP visible light laser diodes. K. Itaya, N. Shimada and G. Hatakoshi p2257

Hybrid integration of laser diode and monomode high contrast slab waveguide on silicon. J.L. Joppe, A.J.T. de Krijger and O.F.J. Noordman p162

Improved performance due to suppression of spontaneous emission in tensile-strain semiconductor lasers. E.P. O'Reilly, G. Jones, A. Ghiti and A.R. Adams p1417

Improved threshold characteristics of air-post vertical-cavity surface-emitting lasers using unique etching process. E.M. Clausen Jun, A. Von Lehmen, C. Chang-Hasnain, J.P. Harbison and L.T. Florez p2243

In *situ* laser reflectometry applied to the growth of $Al_xGa_{1-x}As$ Bragg reflectors by metalorganic chemical vapour deposition. N.C. Frateschi, S.G. Hummel and P.D. Dapkus p155

InGaAs–GaAs–AlGaAs strained-layer distributed feedback ridge waveguide quantum well heterostructure laser array. L.M. Miller, K.J. Beernink, J.T. Verdeyen, J.J. Coleman, J.S. Hughes, G.M. Smith, J. Honig and T.M. Cockerill p1943

Independently addressable InGaAs/GaAs vertical-cavity surface-emitting laser arrays. A. Von Lehmen, C. Chang-Hasnain, J. Wullert, L. Carrion, N. Stoffel, L. Florez and J. Harbison p583

Injection-locking of Q-switched AlGaAs laser with fast saturable absorber. N. Stel'makh, J.-M. Lourtioz and F.H. Julien p160

Integratable, high speed buried ridge DFB lasers fabricated on semi-insulating substrates. P.M. Charles, G.G. Jones, P.J. Williams, R.M. Ash, P.H. Fell and A.C. Carter p700

Integrated Nd:MgO:$LiNbO_3$ FM mode-locked waveguide laser. E. Lallier, J-P. Pocholle, M. Papuchon, Q. He, M.De Micheli, D.B. Ostrowsky, C. Grezes-Besset and E. Pelletier p936

Interacting solitons in erbium fibre laser. R.P. Davey, N. Langford and A.I. Ferguson p1257

Interdigitated contact semiconductor laser as optoelectronic AND gate. S.J. Chua, S.H. Lim, R. Kanhere and G.F. Tua p1963

Laser diode pumped Pr^{3+}-doped and Pr^{3+}-Yb^{3+}-codoped fluoride fibre amplifiers operating at $1{\cdot}3\,\mu m$. Y. Ohishi, T. Kanamori, J. Temmyo, M. Wada, M. Yamada, M. Shimizu, K. Yoshino, H. Hanafusa, M. Horiguchi and S. Takahashi p1995

Laser linewidth with gain compression. J. Arnaud p2354

Laser torquemeter: a new instrument. T.H. Wilmshurst, S.J. Rothberg and N.A. Halliwell p186

Laser torquemeter: immunity to memory quantisation noise. T.H. Wilmshurst, S.J. Rothberg and N.A. Halliwell p2037

Linewidth rebroadening in DFB lasers due to bias dependent dispersion of feedback. G. Morthier, K. David and R. Baets p375

Linewidth rebroadening in semiconductor lasers due to lateral spatial holeburning. H. Wenzel, H.J. Wünsche and U. Bandelow p2301

Linewidth reduction in wavelength tunable laser diodes by voltage control. M.-C. Amann, S. Illek and H. Lang p531

Logarithmic gain/current-density characteristic of InGaAs/InGaAlAs/InP multi-quantum-well separate-confinement-heterostructure lasers. J.E.A. Whiteaway, G.H.B. Thompson, P.D. Greene and R.W. Glew p340

Long-term 60 mW operation of 780 nm AlGaAs lasers with extended beam by additional low-Al-content layer in *p*-type cladding layer. S. Nakatsuka, S. Yamashita, K. Uchida and T. Kajimura p900

Long-term bias stability of all-PANDA fibre gyroscope with Er-doped superfluorescent fibre laser. K. Iwatsuki p1092

Long-working-distance expanded-beam fibre microlenses. J. Stone, C.A. Burrus and J.C. Centanni p592

Low ($2{\cdot}0\,kA/cm^2$) threshold current density operation of 629 nm GaInP/AlInP multiquantum well lasers grown by gas source molecular beam epitaxy on 15° off (100) GaAs substrates. A. Kikuchi, K. Kishino and Y. Kaneko p1301

Low temperature growth of GaAs quantum well lasers by modulated beam epitaxy. S. Xin, K.F. Longenbach and W.I. Wang p1072

Low threshold $1{\cdot}5\,\mu m$ tensile-strained single quantum well lasers. C.E. Zah, R. Bhat, B. Pathak, C. Caneau, F.J. Favire, N.C. Andreadakis, D.M. Hwang, M.A. Koza, C.Y. Chen and T.P. Lee p1414

Low threshold current density $1{\cdot}5\,\mu m$ GaInAs/AlGaInAs graded-index separate-confinement-heterostructure quantum well laser diodes grown by metal organic chemical vapour deposition. A. Kasukawa, R. Bhat, C.E. Zah, S.A. Schwarz, D.M. Hwang, M.A. Koza and T.P. Lee p1063

Low threshold current density of 620 nm band MQW-SCH AlGaInP semiconductor lasers with Mg doped AlInP cladding layer. H. Murata, Y. Terui, M. Saitoh, Y. Satoh and R. Terasaki p1569

Low threshold current laser emitting at 637 nm. D.F. Welch, T. Wang and D.R. Scifres p693

Low threshold current lateral injection lasers on semi-insulating substrates fabricated using Si impurity-induced disordering. C.A. Beyler, S.G. Hummel, Q. Chen, J.S. Osinski and P.D. Dapkus p1372

Low threshold ion-implanted Nd:YAG channel waveguide laser. S.J. Field, D.C. Hanna, A.C. Large, D.P. Shepherd, A.C. Tropper, P.J. Chandler, P.D. Townsend and L. Zhang p2375

Low threshold, high power, vertical-cavity surface-emitting lasers. R.S. Geels and L.A. Coldren p1984

Low-loss lead fluoride-coated square waveguides for CO_2 laser light transmission. H. Machida, H. Ishikawa and M. Miyagi p2068

Low-threshold and high-speed $1{\cdot}5\,\mu m$ compressive-strained multiquantum well four-wavelength distributed-feedback laser arrays. C.E. Zah, K.W. Cheung, S.G. Menocal, R. Bhat, M.Z. Iqbal, F. Favire, N.C. Andreadakis, P.S.D. Lin, A.S. Gozdz, M.A. Koza and T.P. Lee p1040

Low-threshold and narrow-linewidth $1{\cdot}5\,\mu m$ compressive-strained multiquantum-well distributed-feedback lasers. C.E. Zah, R. Bhat, S.G. Menocal, F. Favire, P.S.D. Lin, A.S. Gozdz, N.C. Andreadakis, B. Pathak, M.A. Koza and T.P. Lee p1628

MQW amplifier optical bistability. D.A.H. Mace, M.J. Adams and C. Seltzer p1363

Matrix addressable vertical cavity surface emitting laser array. M. Orenstein, A.C. Von Lehmen, C. Chang-Hasnain, N.G. Stoffel, J.P. Harbison and L.T. Florez p437

Measurements of low frequency and high frequency relative intensity noise in DBR lasers. H. Sundaresan and N.C. Fletcher p1524

Measurements on competition between carrier-induced and thermally-induced wavelength tuning in ridge waveguide DBR lasers. H. Sundaresan and I.D. Henning p1897

Method of determining differential gain coefficient for bistable semiconductor laser diodes. J. Chen, P.E. Barnsley and H.J. Wickes p1745

Mode-locked erbium fibre laser with wavelength selection by means of fibre Bragg grating reflector. R.P. Davey, R.P.E. Fleming, K. Smith, R. Kashyap and J.R. Armitage p2087

Modelocked Cr^{3+} : $LiSr_{0{\cdot}8}Ca_{0{\cdot}2}AlF_6$ laser producing 150 fs pulses. P. Li Kam Wa, B.H.T. Chai and A. Miller p2350

Modified multiquantum barrier for 600 nm range AlGaInP lasers. T. Takagi, F. Koyama and K. Iga p1081

Monolithic integration of photodetector with vertical cavity surface emitting laser. G. Hasnain, K. Tai, Y.H. Wang, J.D. Wynn, K.D. Choquette, B.E. Weir, N.K. Dutta and A.Y. Cho p1630

Monolithic resonant optical reflector laser diodes. T. Hirata, M. Suehiro, M. Maeda, M. Hihara and H. Hosomatsu p2050

Multichannel ASK system design influenced by significant laser phase noise. G. Jacobsen p1741

Narrow line semiconductor laser using fibre grating. D.M. Bird, J.R. Armitage, R. Kashyap, R.M.A. Fatah and K.H. Cameron p1115

Narrow linewidth (85 kHz) operation in long cavity $1{\cdot}5\,\mu m$-MQW DBR laser. T. Kunii, Y. Matsui, H. Horikawa, T. Kamijoh and T. Nonaka p691

Narrow-linewidth strained-layer $1{\cdot}5\,\mu m$ multiquantum well distributed feedback lasers. S.J. Wang, Y. Twu, T. Tanbun-Ek, R.A. Logan, N.K. Dutta and A.B. Piccirilli p625

Nd^{3+}-doped glass waveguide amplifier at $1{\cdot}054\,\mu m$. H. Aoki, E. Ishikawa and Y. Asahara p2351

New method for generation of coherent ultrashort optical pulses. C. Liao, H.-Y. Zhang and Y.-Z. Gao p550

Novel densely packed laser diode array. C.H. Harding and R.G. Waters p2233

Novel structure MQW electroabsorption modulator/DFB-laser integrated device fabricated by selective area MOCVD growth. M. Aoki, H. Sano, M. Suzuki, M. Takahashi, K. Uomi and A. Takai p2138

Observation of power dependent linewidth enhancement factor in $1{\cdot}55\,\mu m$ strained quantum well lasers. H. Nakajima and J.-C. Bouley p1840

Optical fibre dispersion measurement using colour centre laser. A. Benner p1748

Optical layout for single-transverse-mode operation of 2-D arrays of vertical cavity surface-emitting lasers. R.R.A. Syms and E.M. Yeatman p349

Optical trapping and rotational manipulation of microscopic particles and biological cells using higher-order mode Nd:YAG laser beams. S. Sato, M. Ishigure and H. Inaba p1831

Optically pumped surface-emitting DFB GaInAsP/InP lasers with circular grating. C. Wu, M. Svilans, M. Fallahi, T. Makino, J. Glinski, C. Maritan and C. Blaauw p1819

Optimal transverse mode control of waveguide array lasers by discrete transform techniques. E.M. Yeatman and R.R.A. Syms p1461

Packaged double-pass travelling-wave semiconductor laser amplifiers. D. Huang, D. Liu, S. Yu, M. Zhou, X. Liu and J. Huang p571

Passive coupling of InGaAsP/InP laser array and singlemode fibres using silicon waferboard. C.A. Armiento, M. Tabasky, C. Jagannath, T.W. Fitzgerald, C.L. Shieh, V. Barry, M. Rothman, A. Negri, P.O. Haugsjaa and H.F. Lockwood p1109

Passively mode-locked erbium-doped fibre laser with nonlinear fibre mirror. S.J. Frisken, C.A. Telford, R.A. Betts and P.S. Atherton p887

Performance characteristics of GaInAs/GaAs large optical cavity quantum well lasers. N.K. Dutta, J. Lopata, P.R. Berger, D.L. Sivco and A.Y. Cho p680

Performance characteristics of strained layer InGaAs/GaAs broad area and ridge waveguide lasers. B. Saint-Cricq, S. Bonnefont, R. Azoulay and L. Dugrand p865

Photonic noise with nonlinear gain. J. Arnaud p1756

Picosecond optical sampling using four-wave mixing in fibre. P.A. Andrekson p1440

Picosecond pulses (2 ps) from hybrid mode-locked AlGaAs QW lasers with integrated active waveguide cavities. L.R. Brovelli and H. Jäckel p1104

Polarisation characteristics of quantum well vertical cavity surface emitting lasers. C.J. Chang-Hasnain, J.P. Harbison, L.T. Florez and N.G. Stoffel p163

Polarisation control for surface emitting lasers. M. Shimizu, T. Mukaihara, F. Koyama and K. Iga p1067

Polarisation insensitive $1{\cdot}55\,\mu m$ semiconductor integrated optical amplifier with access waveguides grown by LP-MOCVD. G. Glastre, D. Rondi, A. Enard and R. Blondeau p899

Polarisation-independent semiconductor optical amplifier module using twin GRIN rod lenses. T. Toyonaka, S. Tsuji, M. Haneda and Y. Ono p941

Pulse repetition rates in passive, selfstarting, femtosecond soliton fibre laser. D.J. Richardson, R.I. Laming, D.N. Payne, V.J. Matsas and M.W. Phillips p1451

Raman amplification of gain switched laser diode signal at $1{\cdot}35\,\mu m$ to soliton power levels. E.J. Greer, J.M. Hickmann and J.R. Taylor p1171

Realisation of monolithically integrated single frequency MQW laser and booster amplifier at $1{\cdot}5\,\mu m$ wavelength. M.J. Fice, A.R. Goodwin, G.H.B. Thompson and J.E.A. Whiteaway p2305

Red upconversion Yb-sensitised Pr fluoride fibre laser pumped in $0{\cdot}8\,\mu m$ region. J.Y. Allain, M. Monerie and H. Poignant p1156

Reduction of distortion in analogue modulated semiconductor lasers by feedforward compensation. L.S. Fock and R.S. Tucker p669

Reduction of spatial hole burning by singlephase modulator in linear Nd^{3+} fibre laser. H. Sabert, A. Koch and R. Ulrich p2176

Reliable InGaAs quantum well lasers at $1{\cdot}1\,\mu m$. S.L. Yellen, R.G. Waters, P.K. York, K.J. Beernink and J.J. Coleman p552

Room temperature photopumped $1{\cdot}5\,\mu m$ quantum well surface emitting lasers with InGaAsP/InP distributed Bragg reflectors. K. Tai, F.S. Choa, W.T. Tsang, S.N.G. Chu, J.D. Wynn and A.M. Sergent p1540

Room-temperature CW operation of $\lambda = 1{\cdot}55\,\mu m$ InGaAsP/InP ITG-DFB-BCRW lasers with contacted surface grating. A. Rast and A. Zach p808

Selective area epitaxy and growth over patterned substrates by chemical beam epitaxy. W.T. Tsang, L. Yang, M.C. Wu and Y.K. Chen p3

Selfaligned fibre pigtailed surface emitting lasers on Si submounts. K. Tai, J.D.

Wynn, Y.H. Wang and A.Y. Cho p2030
Selfpulsation operating regime for absorber of twin section laser diode. G. Farrell, P. Phelan and J. Hegarty p1403
Selfstarting, passively modelocked erbium fibre ring laser based on the amplifying Sagnac switch. D.J. Richardson, R.I. Laming, D.N. Payne, V. Matsas and M.W. Phillips p542
Semiconductor lasers fabricated by selective area epitaxy. Y.L. Wang, H. Temkin, R.A. Hamm, R.D. Yadvish, D. Ritter, L.H. Harriott and M.B. Panish p1324
Sensitivity of multiple-phase-shift distributed feedback semiconductor lasers to spatial hole burning. Y. Champagne and N. McCarthy p1987
Sensitivity to external feedback for gain-coupled DFB semiconductor lasers. F. Favre p433
Short pulse generation by electrical gain switching of vertical cavity surface emitting laser. J. Lin, J.K. Gamelin, S. Wang, M. Hong and J.P. Mannaerts p1956
Simple approach for monolithic integration of DFB laser and passive waveguide. V. Hornung, D. Remiens, D. Robein, A. Gloukhian and M. Carré p1683
Simulation of optical heterodyne single-filter FSK system with line coding. S.P. Majumder and R. Gangopadhyay p563
Simultaneous reduction of intensity noise and distortion in semiconductor lasers by feedforward compensation. L.S. Fock and R.S. Tucker p1297
Simultaneous two wave oscillation LD using biperiodic binary grating. T. Hidaka and H. Hatano p1075
Single quantum well strained InGaAs/GaAs lasers with large modulation bandwidth and low damping. R. Nagarajan, T. Fukushima, J.E. Bowers, R.S. Geels and L.A. Coldren p1058
Single-frequency travelling-wave erbium-doped fibre loop laser. G.J. Cowle, D.N. Payne and D. Reid p229
Single-mode InGaAs–GaAs laser diodes operating at 980 nm. J.S. Major Jun, W.E. Plano, D.F. Welch and D. Scifres p539
Singlemode diode-pumped tunable erbium-doped fibre laser with linewidth less than 5·5 kHz. J.L. Zyskind, J.W. Sulhoff, Y. Sun, J. Stone, L.W. Stulz, G.T. Harvey, D.J. DiGiovanni, H.M. Presby, A. Piccirilli, U. Koren and R.M. Jopson p2148
Small dimension Bragg reflectors formed by air-isolated GaAs layers. C.A. Beyler, S.G. Hummel, N. Frateschi and P.D. Dapkus p588
Spectral linewidth rebroadening with short wavelength detuning in external cavity lasers. M. Ferreira, X. Shan, A.S. Siddiqui and D. Simeonidou p323
Stable-locking bandwidth in sidemode injection locked semiconductor lasers. J.-M. Luo and M. Osiński p1737
State of the art 1·3 μm lasers by atmospheric pressure MOVPE using tertiary butylphosphine. A. Ougazzaden, R. Mellet, Y. Gao, C. Kazmierski, D. Robein and A. Mircea p1005
Stimulated Brillouin scattering ring resonator laser for SBS gain studies and microwave generation. D. Culverhouse, K. Kalli and D.A. Jackson p2033
Stimulated emission in Er : Ti : $LiNbO_3$ channel waveguides close to 1·53 μm transition. S. Helmfrid, G. Arvidsson, J. Webjörn, M. Linnarsson and T. Pihl p913
Subpicosecond all-fibre erbium laser. I.N. Duling, III p544
Subpicosecond pulse generation from erbium doped fibre laser. R.P. Davey, N. Langford and A.I. Ferguson p726
Subvolt operation of electroabsorption modulator integrated with λ/4-shifted DFB laser for 2·4 Gbit/s 135 km transmission. H. Tanaka, M. Suzuki, H. Taga, S. Yamamoto and Y. Matsushima p390
Suppression of leakage current in InGaAsP/InP buried heterostructure lasers by InAlAs strained current-blocking layers. T. Ohtoshi and N. Chinone p12
Synchronous pumping of picosecond dye laser using high efficiency sound harmonic generation from optical fibres. N.M. Lawandy, J.P. Bernardin, G. Demouchy and R.L. MacDonald p1264
Tailoring of quantum well laser emission wavelength by antireflection facet coating. J. Sacher, W. Elsäßer, E.O. Göbel and H. Jung p1463
Taper coupling of laser diode to singlemode fibre: influence of fibre field shape. Li Tong-Ning and W. Freude p1202 e1599
Technique for measuring facet reflectivity and effective index of laser diode amplifiers. L. Goldberg, M. Tamburrini and D. Mehuys p1593
Thermal characteristics of semiconductor laser phase-locked arrays with diamond film heatsink. Y. Lin and Z. Fang p18
Three-dimensional analysis of multiquantum well DFB lasers. T. Makino p1118
Thulium-doped monomode fluoride fibre laser broadly tunable from 2·25 to 2·5 μm. R.M. Percival, S.F. Carter, D. Szebesta, S.T. Davey and W.A. Stallard p1912
Totally integrated erbium fibre soliton laser pumped by laser diode. K. Smith, E.J. Greer, R. Wyatt, P. Wheatley, N.J. Doran and M. Lawrence p244
Tunable CW lasing around 610, 635, 695, 715, 885 and 910 nm in praseodymium-doped fluorozirconate fibre. J.Y. Allain, M. Monerie and H. Poignant p189
Tuneable multiwavelength semiconductor laser with single fibre output. M.C. Farries, A.C. Carter, G.G. Jones and I. Bennion p1498
Two-channel optical filtering of 1 Gbit/s signal with DBR filter. O. Sahlén, M. Öberg and S. Nilsson p578
Ultrafast polarisation switching in ridge-waveguide laser diodes. A. Klehr, A. Bärwolff, R. Müller, M. Voß, J. Sacher, W. Elsässer and E.O. Göbel p1680
Ultrahigh-speed 1·5 μm narrow-contact planar BH-DFB lasers with 16·5 GHz cutoff frequency. T. Matsuyama, H. Kobayashi, A. Makuta, K. Ohtsuka and J. Kinoshita p2262
Ultralow threshold strained InGaAs–GaAs quantum well lasers by impurity-induced disordering. W.X. Zou, J.L. Merz, R.J. Fu and C.S. Hong p1241
Uniform 64 × 1 arrays of individually-addressed vertical cavity top surface emitting lasers. R.A. Morgan, K.C. Robinson, L.M.F. Chirovsky, M.W. Focht, G.D. Guth, R.E. Leibenguth, K.G. Glogovsky, G.J. Przybylek and L.E. Smith p1400
Uniform high power nine and 18 element individually addressable laser diode arrays. D.W. Nam, R.R. Craig, D.G. Mehuys and D.F. Welch p464
Unique laser diode module using short tapered hemispherical-end fibre for optical hybrid integration. Y. Tachikawa and S. Kobayashi p884
Upconversion pumped green lasing in erbium doped fluorozirconate fibre. T.J. Whitley, C.A. Millar, R. Wyatt, M.C. Brierley and D. Szebesta p1785
Vertically compact 15 GHz GaAs/AlGaAs multiple quantum well laser grown by molecular beam epitaxy. J.D. Ralston, D.F.G. Gallagher, P.J. Tasker, H.P. Zappe, I. Esquivias and J. Fleissner p1720
Very low threshold 1·5 μm GaInAs/AlGaInAs BH GRINSCH strained-layer quantum well laser diodes grown by MOCVD. A. Kasukawa, R. Bhat, C. Caneau, N. Andreadakis, B. Pathak, C.E. Zah, M.A. Koza and T.P. Lee p1676
Wide bandwidth multiple quantum well 1·55 μm lasers. I.F. Lealman, M. Bagley, D.M. Cooper, N. Fletcher, M. Harlow, S.D. Perrin, R.H. Walling and L.D. Westbrook p1191
Wide-stripe AlGaInP laser diodes with current-blocking region near facets grown on misoriented substrates. H. Hamada, M. Shono, S. Honda, R. Hiroyama, K. Matsukawa, K. Yodoshi and T. Yamaguchi p1713
Widely tunable narrow linewidth erbium doped fibre ring laser. H. Schmuck, Th. Pfeiffer and G. Veith p2117
Y laser with 38 nm tuning range. W. Idler, M. Schilling, D. Baums, G. Laube, K. Wünstel and O. Hildebrand p2268
Zero-net-strain multiquantum well lasers. C.P. Seltzer, S.D. Perrin, M.C. Tatham and D.M. Cooper p1268

LENSES

Microlens arrays for interconnection of singlemode fibre arrays. J.S. Leggatt and M.C. Hutley p238

LIFE TESTING

TEM observation of GaAs/GaAlAs laser diodes degraded in field operation. F. Magistrali, D. Sala, M. Vanzi, F. Fantini, F. Corticelli and A. Migliori p58

LIGHT SOURCES

Novel structure MQW electroabsorption modulator/DFB-laser integrated device fabricated by selective area MOCVD growth. M. Aoki, H. Sano, M. Suzuki, M. Takahashi, K. Uomi and A. Takai p2138
Quasiphase-matched second harmonic generation of blue light in electrically periodically-poled lithium tantalate waveguides. S. Matsumoto, E.J. Lim, H.M. Hertz and M.M. Fejer p2040
Subvolt operation of electroabsorption modulator integrated with λ/4-shifted DFB laser for 2·4 Gbit/s 135 km transmission. H. Tanaka, M. Suzuki, H. Taga, S. Yamamoto and Y. Matsushima p390
Suppression of leakage current in InGaAsP/InP buried heterostructure lasers by InAlAs strained current-blocking layers. T. Ohtoshi and N. Chinone p12

LINEAR SYSTEMS

Model reduction by generalised least-squares method. T.N. Lucas and A.R. Munro p1383
New algorithm for closed-loop model matching. L.A. Aguirre p2260
Simplification of system model in time domain using continued fraction expansion in third Cauer form. K.J. Khatwani p396

LIQUID CRYSTALS

Performance characteristics of surface plasmon liquid crystal light valve. M.E. Caldwell and E.M. Yeatman p1471
Static scattering in filled nematic: new liquid crystal display technique. R. Eidenschink and W.H. de Jeu p1195

LITHOGRAPHY

Enhancement of CF_4 and O_2 reactive ion etching resistance of poly(butene-1 sulfone) by N_2 plasma pretreatment. W.-A. Loong and H.-W. Chang p541
Fabrication of periodic domain grating in $LiNbO_3$ by electron beam writing for application of nonlinear optical processes. H. Ito, C. Takyu and H. Inaba p1221
Fabrication of periodically reversed domain structure for SHG in $LiNbO_3$ by direct electron beam lithography at room temperature. M. Yamada and K. Kishima p828
High DC and microwave characteristics of subhalf-micrometre gate ion-implanted GaAs MESFETs using trilayer deep UV lithography. T. Hwang, M. Feng and C.L. Lau p929

LOGIC AND LOGIC DESIGN

Control logic modelling scheme well suited to test problem. D. Crestani, L. Eudeline, A. Aguila, P. Chardon, M.-H. Gentil and C. Durante p991
Hybrid higher radix JK flipflop sequencer with ASIC implementation potential. J.A.C. Webb, S.M.N. Forbes, J. Wilson and S.J. Laverty p1933
New construction for classes of majority logic decodable codes with even minimum distances. Chen Zhi, Fan Pingzhi and Jin Fan p549
State assignment using programmable counters. M. Davio and M. Ciesielski p9

LOGIC CIRCUITS

Design and characterisation of pseudo-DTL CMOS gates. M. Grigoleit and M. Syrzycki p1577
High-speed analogue neural-network LSI employing super-selfaligned Si bipolar process technology. M. Koga, T. Matsumoto, Y. Amemiya, A. Iwata and H. Miyao p1678
Reliable method for delay-fault diagnosis. P. Girard, C. Landrault and S. Pravossoudovitch p1841

LOGIC DEVICES

10 Gbit/s D flipflop using AlInAs/InGaAs HBTs. B. Jalali, P.R. Smith, R.N. Nottenburg, M. Banu, D.A. Humphrey, R.K. Montgomery, D. Sivco and A.Y. Cho p1314
11 Gbit/s master-slave D flipflop IC in silicon bipolar technology. A. Felder, P. Weger, K. Ehinger and L. Treitinger p388
All-optical inverter with one picojoule switching energy. M.N. Islam, C.E. Soccolich, C.-J. Chen, K.S. Kim, J.R. Simpson and U.C. Pack p130
BiCMOS DCVSL gate. S. Liang, D.H.K. Hoe and C.A.T. Salama p346
Cascadable laser logic devices: discrete integration of phototransistors with surface-emitting laser diodes. G.R. Olbright, R.P. Bryan, K. Lear, T.M. Brennan, G. Poirier, Y.H. Lee and J.L. Jewell p216
Design and characterisation of pseudo-DTL CMOS gates. M. Grigoleit and M. Syrzycki p1577
Function dependent fully testable programmable logic array. M.A. Mottalib, R.V.S.K. Prasad and P. Dasgupta p495
Novel high-speed flip-flop circuit with low power consumption using GaAs junction FETs. C. Takano, M. Wada and J. Kasahara p764
Novel pseudomorphic InGaAs/AlGaAs SISFET and HIGFET structures for direct coupled FET logic. R.T. Carline, C.G. Morton and D.W.E. Allsopp p1617

LOOP ANTENNAS

Balanced directional loop receiving antenna. P.V. Brennan and Y. Valverde p1320

LOSSES

Alternative computation of attenuation in microstrip. J. Svačina p847
Automatic optical-loss compensation with Er-doped fibre amplifier. H. Okamura p2155
Broadband microwave dielectric properties of lithium niobate. W.M. Robertson, G. Arjavalingam and G.V. Kopcsay p175
New measurement technique for waveguide losses based on photoluminescence. M.R. Amersfoort, D. Grützmacher, M.K. Smit and Y.S. Oei p1152
Path loss prediction in multifloored buildings at 914 MHz. S.Y. Seidel and T.S. Rappaport p1384
Polymer channel waveguides with low loss at 1·3 μm. S. Imamura, R. Yoshimura and T. Izawa p1342
Scattering losses in single and double heterostructure semiconductor optical rib waveguides. R.J. Deri, R.N. Thurston and R.J. Hawkins p483
Simple method for estimating useable bend radii of deeply etched optical rib waveguides. E.C.M. Pennings, R.J. Deri and R.J. Hawkins p1532

LUMINESCENCE

Ion beam milling-induced damage in AlGaAs/GaAs/AlGaAs single quantum well. V. Swaminathan, G.J. Przybylek, G. Guth and M.T. Asom p2320

LUMINESCENT DEVICES

Superluminescent diodes with angled facet etched by chemically assisted ion beam etching. C.-F. Lin p968

MAGNETIC DEVICES

Microchannel plate image intensifier electron dynamics in magnetic field. P.A. Ramos, S.W. Allison, G.T. Gillies and R.C. Ritter p1636
Novel operation of ferrite loaded coaxial lines for pulse sharpening applications. T.M. Benson, R. Pouladian-Kari and A.J. Shapland p861

MAGNETISM

Compensation for temperature dependence of Faraday effect in diamagnetic materials: application to optical fibre sensors. P.A. Williams, G.W. Day and A.H. Rose p1131
Novel operation of ferrite loaded coaxial lines for pulse sharpening applications. T.M. Benson, R. Pouladian-Kari and A.J. Shapland p861
Permittivity and permeability of chiralic mixture: application of logarithmic law of mixing. P.S. Neelakanta, K. Subramaniam and Chaoli Gu p496

MATHEMATICAL TECHNIQUES

A note on the Hankel matrix. V. Sreeram and A.Y. Zomaya p362
A. Brinton Cooper, III:. p2090
Amplitude and phase modulation of a laser amplifier using travelling wave model. D. Bakewell p329
Analysis of higher information density pregroove model by boundary element method. H. Ito and T. Kojima p1511
Characteristic impulse-response Grammians. V. Sreeram and F.K. Yap p1285
Complexity of implementation for evaluating polynomials over $GF(2^m)$. Xu. Youzhi p1761
Convolution-based DCT algorithm. Y.-M. Chin and J.-L. Wu p1834
Cryptanalysis of public key distribution systems based on Dickson polynomials. Da-xing Li p2042
Direction finding in multipath environment using method of alternating projection. D. Madurasinghe p1326
E-mode cutoff wave number of circular waveguide loaded with dielectric sector. T.S. Yeo p1071
Evaluation of Gram matrix diagonal elements using inners technique. V. Sreeram and K.S. Yong p1069
Evaluation of Gram matrix off-diagonal elements using system time moments. V. Sreeram and P. Goddard p277
Exact acoustic leaky wave solutions for single-mode fibres. K. Tajima p251
Exact resolution of coupled Schrödinger–Poisson equation: application to accurate determination of potential profile in HEMTs. M. Benabbas, B. Marir, D. Bajon and H. Baudrand p1848
Explicit finite difference vectorial beam propagation method. Y. Chung, N. Dagli and L. Thylén p2119
Fast algorithms for computing symmetric/Hermitian matrix–vector products. Z.-J. Mou p1272
Fast digit-parallel conversion of signed-digit into conventional representations. T. Stouraitis and C. Chen p964
Fast quantised estimator of spectral centroid. A. Laurenti and G. Scarano p324
Flexible modulus residue number system for complex digital signal processing. N.M. Wigley and G.A. Jullien p1436
Focusing criterion. M. Charfi, A. Nyeck and A. Tosser p1233
Hidden Markov models with duration-dependent state transition probabilities. S.V. Vaseghi p625
Identification of linear continuous-time multivariable systems using linear multistep methods. G.J. Lastman and N.K. Sinha p127
Implementing steepest descent MRAC on robotic manipulators. Tan-Cheng Chou and Peng-Yung Woo p373
Increasing the rate of output for m-sequences. M.J.B. Robshaw p1710
Insight into operation of Kulpa boundary distance measure. E.R. Davies p1178
Lateral variance of implanted ions. D.G. Ashworth, R. Oven and M.D.J. Bowyer p1402
Linear estimation of frequencies of multiple sinusoids with least-absolute error criterion. Z. Liu and Y.-H. Gong p386
Model reduction by generalised least-squares method. T.N. Lucas and A.R. Munro p1383
Modelling distributed parameter systems using Hermite polynomials. P.D. Olivier p352
New results in spectral estimation of decimated processes. A. Ouahabi and J.L. Lacoume p1430
New simple method for solving first passage time problem. D. Bajić p1419
Nonexistence of perfect binary arrays. J. Jedwab p1252
Numerical analysis of collinear monopole antennas with coils. H. Nakano, N. Chiba and J. Yamauchi p1103 e1781
Perfect energy efficient sequences. L. Bömer and M. Antweiler p1332
Prefolding in FHT algorithms. K.M.M. Prabhu and N. Anupindi p940
Probability density function of amplitude decay constant on meteor burst communication channel. A. Al Jabri p384
Recursive computation of polynomial transform coefficients. W. Philips p2337
Recursive state estimation for linear dynamic systems under algebraic constraints. M. Darouach and A. Bassong p803
Relations between generalised Gaussian beams. M. Yokota and O. Fukumitsu p366
Relationship between two algorithms for discrete cosine transform. Z. Wang and G.A. Jullien p1114
Rigorous analysis of circular disc resonators/radiators with imperfect conductors and substrates. K. Araki and M. Nagashima p2061
Simplification of system model in time domain using continued fraction expansion in third Cauer form. K.J. Khatwani p396
Simulation of the RF performance of AlGaAs/GaAs heterojunction bipolar transistors: application of fast Fourier transform. L.L. Liou, A. Ezis, K. Ikossi-Anastasiou and C.I. Huang p523
Single frequency efficient estimator. A. Ferrari, J. Menez and G. Alengrin p1939
Singularity exponents for complementary sectors. J. Boersma p1484
Solution of generalised multivariable noise cancelling problem. T.J. Moir and H.S. Dabis p1060
Sparse matrix eigenvalue solver for finite element solution of dielectric waveguides. F.A. Fernandez, J.B. Davies, S. Zhu and Y. Lu p1824
Specialised attack on Chor–Rivest public key cryptosystem. K. Huber e2399
Sporadic partitions of binomial coefficients. N. Jefferies p1334
Stabilising discrete polynomials using spectral factorisation. T.J. Moir p581
State-space approach to decentralised detection. H. Delic p2353
Tracking moving objects in noisy environments using Walsh transform. Y.-S. Huang and C.-Y. Hsu p2079
Use of modified nodal analysis to write multiport hybrid matrix. J.A.S. Augusto and C.F.B. Almeida p1750
Using quadratic residue arithmetic for computing skew cyclic convolutions. A. Skavantzos p2140
Vainberg method of construction of generalised energy functional in system theory. S.K. Krzeminski and M. Wasiluk p1089

MATRIX ALGEBRA

A note on the Hankel matrix. V. Sreeram and A.Y. Zomaya p362
Determination of system-matrices of linear continuous-time multivariable systems from discrete-time models. G.J. Lastman and N.K. Sinha p1696
Evaluation of Gram matrix diagonal elements using inners technique. V. Sreeram and K.S. Yong p1069
Evaluation of Gram matrix off-diagonal elements using system time moments. V. Sreeram and P. Goddard p277
Fast algorithms for computing symmetric/Hermitian matrix–vector products. Z.-J. Mou p1272
Impulse-response Grammian for discrete systems. V. Sreeram, D. Berinson and Y.H. Leung p1689
Infinite series for logarithm of matrix, applied to identification of linear continuous-time multivariable systems from discrete-time models. G.J. Lastman and N.K. Sinha p1468
Simplification of system model in time domain using continued fraction expansion in third Cauer form. K.J. Khatwani p396
Sparse matrix eigenvalue solver for finite element solution of dielectric waveguides. F.A. Fernandez, J.B. Davies, S. Zhu and Y. Lu p1824
Use of modified nodal analysis to write multiport hybrid matrix. J.A.S. Augusto and C.F.B. Almeida p1750

MEASUREMENT

Alternative built-in self-test (BIST) structures for analogue circuit fault diagnosis. C.-L. Wey p1627
Analogue CMOS time-measuring circuit for low frequency instrumentation. S. Siskos and Th. Laopoulos p2242
Autocorrelation measurements of picosecond laser-diode pulses by means of quasiphase-matching $LiNbO_3$ channel waveguides. A. Galvanauskas, J. Webjörn, A. Krotkus and G. Arvidsson p738
Bit error rate measurement with predetermined confidence. S. Berber p1205
Colliding pulse phase detector for picosecond resolution timing measurement. A. Black, E. Ozbay, B.A. Auld and D.M. Bloom p1620
Comparison between free space and in-waveguide power measurement standards at 94 GHz. D.G. Moss, J.R. Birch, D.B. Adamson, B. Lunt, T. Hodgetts and A. Wallace p1134
Current conveyor based EMG amplifier with shutdown control. E. Bruun and E.-U. Haxthausen p2172
Differential scanning calorimetry studies on eutectic (Sn63/Pb37) solder paste and powder for surface mount technology. A.C.T. Tang and P.M. Sargent p2018
Effect of random errors in antenna cylindrical near-field measurements. J. Romeu and L. Jofre p338
Electro-optical measurement of high-field conductivity in δ-doped GaAs epitaxial layers. V. Balynas, A. Krotkus, T. Lideikis, A. Stalnionis and G. Treideris p2
Experimental determination of field strength and quality factor of heavily dampled accelerator cavities. P. Hülsmann, M. Kurz and H. Klein p1727
Frequency response and path loss measurements of indoor channel. H. Zaghloul, G. Morrison and M. Fattouche p1021
High-resolution pressure sensors fabricated by silicon wafer direct bonding. G.S. Chung, S. Kawahito, M. Ishida and T. Nakamura p1098
Hollow sapphire waveguides for remote radiometric temperature measurements. S.J. Saggese, J.A. Harrington and G.H. Sigel, Jun p707
Measurement method of pn junction depth using light spectrum response. H. Yie p2196
Measurement of field-induced refractive index variation in GaAs/AlGaAs superlattice using monolithic Fabry–Perot etalon. K.-K. Law, R.H. Yan, L.A. Coldren and J.L. Merz p105
Measurement of surface resistance of high-T_c superconductor by use of dielectric resonator. C.J. Edgcombe p815 e1219
Microwave noise of DBRT diode over full bias voltage range. J.I.M. Demarteau, H.C. Keyker, J.J.M. Kwaspen, T.G. van de Roer and L.M.F. Kaufmann p7
New de-embedding method for millimetre-wave bipolar transistor S-parameter measurement. N.L. Wang, W.J. Ho and J.A. Higgins p1611
New measurement technique for waveguide losses based on photoluminescence. M.R. Amersfoort, D. Grützmacher, M.K. Smit and Y.S. Oei p1152
OTDR calibration device based on recirculating optical delay line. D.J. Ives, R.L. Palmer and B. Walker p342
Optical fibre dispersion measurement using colour centre laser. A. Benner p1748
Organic patch sensor for electro-optic measurement of electrical signals in integrated circuits. T. Nagatsuma, M. Yaita, M. Shinagawa, M. Amano and Y. Shuto p932
Picosecond electro-optic probing of high-speed integrated circuits using external GaAs tip. T. Nagatsuma and M. Shinagawa p1904
Picosecond lifetime measurement in semiconductor by optoelectronic autocorrelation. K. Grigoras, A. Krotkus and A. Deringas p1024
Precise determination of open circuit capacitance of coplanar probes for on-wafer automatic network analyser measurements. P. Crozat, J.C. Hénaux and

G. Vernet p1476
Reflections in anechoic chambers in 100–200 GHz range. A. Lehto, J. Tuovinen and A. Räisänen p1708
Simple method for correction of reflection values by means of coaxial quarter wavelength air line impedance standards. W. Peinelt and U. Stumper p400
Supply current testing of mixed analogue and digital ICs. I.M. Bell, D.A. Camplin, G.E. Taylor and B.R. Bannister p1581
Tapered acoustic buffer rods. C.K. Jen, Z. Wang, C. Neron, A. Miri and K. Abe p1877
Technique for measuring facet reflectivity and effective index of laser diode amplifiers. L. Goldberg, M. Tamburrini and D. Mehuys p1593
Technique of measuring sound velocity in liquid and solid materials using frequency multiplication type ultrasonic correlation system. K. Imano, D. Okuyama and N. Chubachi p1562
Three-probe microstrip measuring system for *S*-parameter measurements. M.Y. Li and K. Chang p836
Trial results of novel bit error rate monitor scheme over skywave HF link. J.B. Scholz p1730
Two-mode Fabry–Perot optical fibre sensors for strain and temperature measurement. G.Z. Wang, A.B. Wang, K.A. Murphy and A.M. Vengsarkar p1843
Using cold FET to check accuracy of microwave noise parameter test set. L. Escotte, R. Plana, J. Rayssac, O. Llopis and J. Graffeuil p833

MEMORIES

BER measurements in random access fibre loop optical memory. E. Dietrich, G. Großkopf, L. Küller, R. Ludwig, W. Pieper and H.G. Weber p1585
Capacitive-access CAM cell and its read/write circuit implementation. S.M.S. Jalaleddine and L.G. Johnson p876
Characteristics of floating gate device as analogue memory for neural networks. O. Fujita, Y. Amemiya and A. Iwata p924
Class AB switched-current memory for analogue sampled data systems. N.C. Battersby and C. Toumazou p873
Error correction technique for multivalued MOS memory. E.K.F. Lee and P.G. Gulak p1321
GaAs/AlGaAs dynamic random access memory cell. C.L. Chen, W.D. Goodhue and L.J. Mahoney p1330
Inexact match associative memory cell. W.R. Daasch p1623
MOS implementation of winner-take-all network with application to content-addressable memory. L.G. Johnson and S.M.S. Jalaleddine p957
Modified intraconnected bidirectional associative memory. Y.-J. Jeng and C.-C. Yeh p1818
New algorithm for testing random access memories. R. Rajsuman p574
Perfect auto-associators using RAM-type nodes. J. Lucy p799
Programmable memory cell using quantum confined Stark effect in multi-quantum well heterojunction bipolar transistor. W.-Q. Li, S. Goswami, P. Bhattacharya and J. Singh p31
Selfrefreshing analogue memory cell for variable synaptic weights. R. Castello, D.D. Caviglia, M. Franciotta and F. Montecchi p1871
Storage of optical pulse data sequences in loop memory using multistable oscillations. T. Aida and P. Davis p1544

METAL-INSULATOR-SEMICONDUCTOR STRUCTURES AND DEVICES

Properties of Si_3N_4/Si_xGe_{1-x} metal–insulator–semiconductor capacitors. J. Reed, D.S.L. Mui, W. Jiang and H. Morkoç p1826

METAL-OXIDE-SEMICONDUCTOR STRUCTURES AND DEVICES

Analytical expressions for subthreshold charges and currents in thin-film SOI MOSFETs. C. Mallikarjun and K.N. Bhat p431
BiCMOS DCVSL gate. S. Liang, D.H.K. Hoe and C.A.T. Salama p346
Calculation of lateral distribution of interface traps along MIS channel. A.K. Henning and J.A. Dimauro p1445
Electrical properties of thin oxynitrided SiO_2 films formed by rapid thermal processing in an N_2O ambient. H. Fukuda, M. Yasuda and S. Ohno p440
Electron mobilities in MOS channels formed along anisotropically dry etched ⟨110⟩ silicon trench sidewalls. K. Shenai p715
Error correction technique for multivalued MOS memory. E.K.F. Lee and P.G. Gulak p1321
Full integration of extremely large time constants in CMOS. M. Steyaert, P. Kinget, W. Sansen and J. Van der Spiegel p790
Gate-drain capacitance compensation technique for triode MOS transconductors. E.A.M. Klumperink p113
Interpretation of quasi-static C-V characteristics of MOSOS capacitors on SOI substrates. D. Flandre, T. Loo, P. Verlinden and F. Van de Wiele p43
Latch up in physically merged bipolar-MOS BICMOS structures. S. Liang, L.Z. Hou, T. Gu and C.A.T. Salama p1124
Linear composite MOSFETs (COMFETs). M.C.H. Cheng and C. Toumazou p1802
MOS sine function generator using exponential-law technique. O. Ishizuka, Z. Tang and H. Matsumoto p1937
New method for assessment of depletion charge dependence of mobility in short-channel silicon MOS transistors. A. Emrani, G. Ghibaudo and F. Balestra p467
Novel electronically-controlled floating resistors using MOS transistors operating in saturation. Z. Wang p188
Realisation of highly linear MOS circuits using negative impedance convertors. K. Tabei, Z. Czarnul and S. Takagi p1416
Simulation of substrate current characteristics of submicron MOSFETs. M. Takeda, J. Frey, Z. Peng and N. Goldsman p144
Thickness measurement of thin oxide layers in MOS capacitors. S. Duzelier, G. Sarrabayrouse, J.L. Prom and G. Hollinger p1399
UV assisted growth of 100 Å thick SiO_2 at 550°C. A. Kazor and I.W. Boyd p909
Ultralow specific on resistance UMOSFET with trench contacts for source and body regions realised by selfaligned process. S. Matsumoto, T. Ohno and K. Izumi p1640

MICROSCOPES AND MICROSCOPY

Dry etching process for fabrication of optoelectronic gratings in III-V substrates. A.S. Gozdz, J.A. Shelburne III, R.S. Robinson and C.C. Chang p2270
Scanning fibre-optic microscope. L. Giniūnas, R. Juškaitis and S.V. Shatalin p724

MICROSTRIP

35 GHZ integrated circuit rectifying antenna with 33% efficiency. T.-W. Yoo and K. Chang p2117
Active quarter-wavelength dielectric radiator with circularly polarised radiation pattern. T.-B. Ng, Y.-O. Yam and M.-L. Lam p1758
Alternative computation of attenuation in microstrip. J. Svačina p847
Analysis of cylindrical arrays of microstrip rectangular patches. C.M. da Silva, F. Lumini, J.C. da S Lacava and F.P. Richards p778
Broadband active microstrip array elements. H. An, B. Nauwelaers and A. Van de Capelle p2379
Broadband branchline coupler for S band. D.K. Paul, P. Gardner and B.Y. Prasetyo p1318
Characteristics of sandwich-slotlines in front of a parallel metallic strip. M. Himdi and J.P. Daniel p455
Edge effects for resonance frequency of covered rectangular microstrip patch antenna. S.M. Vaitheeswaran Iyer and R.N. Karekar p1509
Effect of dielectric protecting superstrate on radiation pattern of microstrip patch antenna. R. Afzalzadeh and R.N. Karekar p1218
Experimental investigation of three-layer electromagnetically coupled circular microstrip antennas. U.K. Revankar and A. Kumar p1187
Hybrid approach to compute radiation pattern of finite microstrip antennas. S.A. Bokhari, J.R. Mosig and F.E. Gardiol p2091
Improved coupling for aperture coupled microstrip antennas. D.M. Pozar and S.D. Targonski p1129
Magnetic field probe for measuring surface current distributions on millimetre wave microstrip antennas. R.R. Grzybowski and R. Bansal p71
Matching network design of microstrip antennas with simplified real frequency technique. H. An, B. Nauwelaers and A. Van de Capelle p2295
Microwave performance of nonlinear optoelectronic microstrip ring resonator. G.K. Gopalakrishnan, B.W. Fairchild, C.L. Yeh, C.S. Park, K. Chang, M.H. Weichold and H.F. Taylor p121
Modelling of coaxial-fed microstrip patch antenna by finite difference time domain method. C. Wu, K.-L. Wu, Z. Bi and J. Litva p1691
Modified Wolff model for resonance frequency of covered rectangular microstrip patch antenna. A.K. Verma and Z. Rostamy p1850
Pipe enclosed microstrip transmission line. K.D. Patil, S.K. Maiti and S. Mahapatra p1291
Propagation characteristics of thin film superconducting microstrip line for terahertz applications. C.Y.E. Tong and K. Wu p2299
Radiation from transistor in microstrip line. P.S. Hall and P.M. Haskins p986 e1310
Reduction of surface waves in chirostrip antennas. N. Engheta and P. Pelet p5
Rigorous modelling of receiving active microstrip antenna. R. Gillard, H. Legay, J.M. Floc'h and J. Citerne p2357
Simple high-frequency diffraction analysis of microstrip antenna on large cylinder. C.-F. Huang p1161
Three-probe microstrip measuring system for *S*-parameter measurements. M.Y. Li and K. Chang p836

MICROWAVE AMPLIFIERS

Design and performances of 20 dB gain two-tier matrix distributed amplifier. S. D'Agostino, G. D'Inzeo, G. Grifoni, P. Marietti and G. Panariello p506
Gallium arsenide solid state travelling wave amplifier at 8 GHz. J.J. Thompson, M.R.S. Taylor, A.M. Thompson, S.P. Beaumont and N. Apsley p516
High voltage distributed amplifier. D. Willems, I. Bahl and K. Wirsing p2369
High-efficiency Ku-band HBT amplifier with 1 W CW output power. P. Bartusiak, T. Henderson, T. Kim, A. Khatibzadeh and B. Bayraktaroglu p2189
Low noise tuned optical receivers using commercial 50 Ω modular microwave amplifiers. M. Marin, D.F. Hewitt, P.K. Lee and R.S. Tucker p1378

MICROWAVE ANTENNAS

Optical beam former for phased arrays with independent control of radiated frequency and phase. R. Benjamin, C.D. Zaglanikis and A.J. Seeds e1393

MICROWAVE CIRCUITS AND SYSTEMS

Calculating nonlinear microwave circuits with undersampled time signals. C. Ciotti, U. Fritsch and H.J. Schmitt p568
GaAS monolithic microwave floating active inductor. G.F. Zhang, C.S. Ripoll and M.L. Villegas p1860
Ka-band monolithic amplifier using 0·5 μm gate length ion-implanted GaAs/AlGaAs heterojunction FET technology. T. Hwang, M. Feng and C.L. Lau p2121
Microwave oscillator design with power prediction. V.M.T. Lam, P.C.L. Yip and C.R. Poole p1574
Negative differential conductance in GaAs/AlAs superlattices. M. Hadjazi, A. Sibille, J.F. Palmier and F. Mollot p1101
Resonant-tunnelling diode oscillator using a slot-coupled quasioptical open resonator. K.D. Stephan, E.R. Brown, C.D. Parker, W.D. Goodhue, C.L. Chen and T.C.L.G. Sollner p647
Tunable quasilumped element quadrature hybrid. V.F. Fusco p2246
Ultrawideband biasing of MMIC distributed amplifiers using improved active load. I.D. Robertson and A.H. Aghvami p1907
X-band GaAs MESFET oscillator for cryogenic application at 4·2 K. E. Vollmer and P. Gutmann p2210

MICROWAVE DEVICES AND COMPONENTS

15 GHz f_{max} microwave silicon *pnp* transistors with single-crystal emitters fabricated with simple four mask process. F. Hébert, D. Millicker, J. Wholey, C. Snapp and A. Garcia p1886
Accurate determination of resonance frequency and intrinsic Q factor for optically-controlled dielectric resonators. A.S. Rong, Y. Cao and Z.L. Sun p1466
$Al_{0.25}Ga_{0.75}As/In_{0.25}Ga_{0.75}As$ pseudomorphic MODFET with high DC and RF performance. J. Dickmann, A. Geyer, H. Daembkes, H. Nickel, R. Lösch and W. Schlapp p501
Antenna-coupled microwave phase shifters using GaAs varactors. P.M. Backhouse, N. Apsley, C. Rogers and S. Jones p491
Broadband branchline coupler for S band. D.K. Paul, P. Gardner and B.Y. Prasetyo p1318
CAD technique for designing microwave transistor active filters. S. Udomchokpaiboon and J.C. Mollier p1694
Calculation of resonances of microwave resonator loaded with inhomogeneous dielectric layer. M.P. Mladenovic, A.S. Marincic and B.D. Milovanovic p2215
Cellular telemetry by microwaves. A. Benlarbi, D. Matton and Y. Leroy p509
Characteristics of sandwich-slotlines in front of a parallel metallic strip. M. Himdi and J.P. Daniel p455
Chiroshield: A Salisbury/Dallenbach shield alternative. D.L. Jaggard, N. Engheta and J. Liu e547
DC and RF characteristics of InAlAs/InGaAs dual-gate TEGFETs. F. Gueissaz, R. Houdré and M. Ilegems p631
Design of high-performance sum-frequency upconvertor. Deng Shaofan, Wu

Qun and Qiu Jinghui p2064
Determining mixer diode positions of microwave Doppler with-sense module. B.D. Milovanović, V.D. Stanković and S.T. Djordjević p1163
Development of planar microwave filters from double sided YBCO thin films on MgO substrates. S.J. Hedges, R.G. Humphreys, N.G. Chew and S.W. Goodyear p2312
Electronically tunable ring resonator microstrip and suspended-substrate filters. S. Kumar p521
First microwave characterisation of LP-MOCVD grown GaInP/GaAs self-aligned HBT. S.L. Delage, M.A. di Forte-Poisson, H. Blanck, C. Brylinski, E. Chartier and P. Collot p253
GaAs planar doped barrier diodes for millimetre-wave detector applications. M.J. Kearney, A. Condie and I. Dale p721
High dynamic range microwave FET. P.K. Ikalainen and L.C. Witkowski p345
High power density pulsed X-band heterojunction bipolar transistors. M.G. Adlerstein, M.P. Zaitlin, G. Flynn, W. Hoke, J. Huang, G. Jackson, P. Lemonias, R. Majarone and E. Tong p148
High-efficiency Ku-band HBT amplifier with 1 W CW output power. P. Bartusiak, T. Henderson, T. Kim, A. Khatibzadeh and B. Bayraktaroglu p2189
Ka-band monolithic amplifier using 0·5 μm gate length ion-implanted GaAs/AlGaAs heterojunction FET technology. T. Hwang, M. Feng and C.L. Lau p2121
Ku-band high efficiency high gain pseudomorphic HEMT. P.M. Smith, W.F. Kopp, P. Ho, P.C. Chao, R.P. Smith, K. Nordheden and J.M. Ballingall p270
Low-loss Ka-band frequency selective subreflector. K. Ueno, H. Kumazawa and I. Ohtomo p1155
Millimetre wave quasioptical power combiner. J.X. Ge, S.F. Li and Y.Y. Chen p880
New method for tapered transmission line design. Y. Wang p2396
New type of microwave power monitoring device using grids of optical-fibre sensors. L.J. Auchterlonie, A.J. Harris and P.D. Dagoulis p2023
New uniplanar balun. V. Trifunović and B. Jokanović p813
Novel T-gate fabrication and high frequency performance for 0·1 μm-gate InAlAs/InGaAs HEMT. T. Enoki, K. Arai, Y. Ishii and T. Tamamura p115
Planar broadband image rejection mixer. B. Mayer p2128
Resonant tunnelling microwave detector diode for power levelling and limiting applications. R.T. Syme, M.J. Kelly, A. Condie and I. Dale p2025
Rigorous analysis of circular disc resonators/radiators with imperfect conductors and substrates. K. Araki and M. Nagashima p2061
Selectivity-improved *E*-plane filter for millimetre-wave applications. J. Bornemann p1891
Silicon Mach–Zehnder waveguide interferometers operating at 1·3 μm. G.V. Treyz p118
Simulation of the RF performance of AlGaAs/GaAs heterojunction bipolar transistors: application of fast Fourier transform. L.L. Liou, A. Ezis, K. Ikossi-Anastasiou and C.I. Huang p523
Spherical chiroshield. D.L. Jaggard, J.C. Liu and X. Sun e392
Stimulated Brillouin scattering ring resonator laser for SBS gain studies and microwave generation. D. Culverhouse, K. Kalli and D.A. Jackson p2033
Tunable quasilumped element quadrature hybrid. V.F. Fusco p2246
X-band GaAs MESFET oscillator for cryogenic application at 4·2 K. E. Vollmer and P. Gutmann p2210

MICROWAVE FILTERS

CAD technique for designing microwave transistor active filters. S. Udomchokpaiboon and J.C. Mollier p1694
Development of planar microwave filters from double sided YBCO thin films on MgO substrates. S.J. Hedges, R.G. Humphreys, N.G. Chew and S.W. Goodyear p2312
Electronically tunable ring resonator microstrip and suspended-substrate filters. S. Kumar p521
K-band suspended substrate stripline tapped combline filter. W.-T. Lo and C.-K.C. Tzuang p1389
Selectivity-improved *E*-plane filter for millimetre-wave applications. J. Bornemann p1891

MICROWAVE LINKS

Error rate prediction for PSK and QAM when affected by terrain multipath. E.J. Dutton p795
Fading reduction in LOS microwave links due to path inclination. M.V.S.N. Prasad, S.K. Sarkar, H.N. Dutta and B.M. Reddy p259
Measured scattered signals at 4 GHz confirm strong specular reflections off buildings. A.R. Noerpel, M.J. Krain and A. Ranade p869

MICROWAVE MEASUREMENT

Broadband microwave dielectric properties of lithium niobate. W.M. Robertson, G. Arjavalingam and G.V. Kopcsay p175
Comparison between free space and in-waveguide power measurement standards at 94 GHz. D.G. Moss, J.R. Birch, D.B. Adamson, B. Lunt, T. Hodgetts and A. Wallace p1134
Depolarisation and field transmittances in indoor communications. E. Vilar p732
Measurement of complex permittivity and permeability of dielectric materials placed on a substrate. M. Kamarei, N. Daoud, R. Salazar and M. Bouthinon p68
Reflectometer calibration using load, short and offset shorts with unknown phase. W. Sigg and J. Simon p1650
Three-probe microstrip measuring system for *S*-parameter measurements. M.Y. Li and K. Chang p836
Using cold FET to check accuracy of microwave noise parameter test set. L. Escotte, R. Plana, J. Rayssac, O. Llopis and J. Graffeuil p833

MIXERS

Degenerate four wave mixing in polydiacetylene waveguides. D.J. Westland, V. Skarda, W. Blau and L. Costa p1327
Determining mixer diode positions of microwave Doppler with-sense module. B.D. Milovanović, V.D. Stanković and S.T. Djordjević p1163
Integrated optical mixer for RF applications. D. Uttamchandani and H.S. Al-Raweshidy p70 e392
Integrated uniplanar antenna mixer and local oscillator. A. Nešić p56
Planar broadband image rejection mixer. B. Mayer p2128

MOBILE RADIO SYSTEMS

Automatic adjustment of quadrature modulators. M. Faulkner, T. Mattsson and W. Yates p214 e392
BER performance owing to random FM noise for QDPSK mobile radio with diversity reception. F. Adachi and K. Ohno p629
Bit error probability for fading DPSK signals in microcellular land mobile radio systems. A. Kegel, H.J. Wesselman and R. Prasad p1647
Channel coding/diversity reception on packet mobile radio. M. Kitagawa, K. Ohno and F. Adachi p607
Correlation model for shadow fading in mobile radio systems. M. Gudmundson p2145
Dynamic load sharing for asymmetrical microcellular teletraffic conditions. S.S. Kuek and W.C. Wong p765
Efficiency of asynchronous CDMA systems. R. Giubilei p343
Errors in estimating local average power of multipath signals. A. Urie p315
Explicit multiple building diffraction attenuation function for mobile radio wave propagation. S.R. Saunders and F.R. Bonar p1276 e1599
Field trial evaluation of linear modulation single sideband. C. Baden, A.P. Jenkins and J.G. Gardiner p1250
Forward link capacity limit of coded FFH/CDMA multiuser mobile radios. T. Kawahara and T. Matsumoto p1918
High selectivity occurrence of 900 MHz urban mobile radio channel. A.J. Levy, J.C. Bic and J.P. Rossi p2256
Optimum rate Reed Solomon codes for FFH/CDMA mobile radios. T. Kawahara and T. Matsumoto p2066
Postdetection MRC diversity for π/4-shift QDPSK mobile radio. F. Adachi and K. Ohno p1642
Postdetection selection diversity with unequal branch signal power compensation. F. Adachi p1588
Simple method of multipath delay difference detection for π/4-shift QPSK. S. Yoshida, G.L. Tan, H. Zhou, A. Hirai and T. Takeuchi p1027
Simplified evaluation of outage probability for cellular mobile radio systems. G. Immovilli and M.L. Merani p1365 e1496
Spectrum efficiency analysis for microcellular mobile radio systems. R. Prasad, A. Kegel and J. Olsthoorn p423
Throughput performance of noisy ICMA/CD packet mobile radio network. K.C. Chua p1854

MODEL ANALYSIS

Accurate charge control model for MODFET including subthreshold region. K.Y. Tong p668
New technique for estimation of farfield from near-zone phaseless data. T. Isernia, R. Pierri and G. Leone p652

MODELLING

Accurate determination of resonance frequency and intrinsic Q factor for optically-controlled dielectric resonators. A.S. Rong, Y. Cao and Z.L. Sun p1466
Accurate equivalent circuit model of resonant tunnelling diodes. R.E. Miles, G. Millington, R.D. Pollard, D.P. Steenson, J.M. Chamberlain and M. Henini p427
Accurate simulation of nonlinear switched capacitors and sampled circuits by harmonic balance and related techniques. J.C. Nallatamby, M. Bridier, M. Prigent and J. Obregon p2364
Amplitude and phase modulation of a laser amplifier using travelling wave model. D. Bakewell p329
Analysis of effects of quantisation in multilayer neural networks using statistical model. Y. Xie and M.A. Jabri p1196
Analysis of nonlinear circuits with distributed elements using PSPICE. J. Borja, J.I. Alonso and F. Pérez p1651
Analytical expressions for subthreshold charges and currents in thin-film SOI MOSFETs. C. Mallikarjun and K.N. Bhat p431
Analytical modelling of two-dimensional effects on current gain in small-geometry bipolar transistors. N. Rinaldi, A.G.M. Strollo and P. Spirito p1744
Characteristic impulse-response Grammians. V. Sreeram and F.K. Yap p1285
Class of constrained ARMA models for line enhancement using real-time QR implementation. W.J. Fitzgerald and R. Geere p2230
Closed-loop balancing and singular perturbation: a new result. L. Fortuna, G. Muscato and G. Nunnari p1193
Determining intrinsic noise parameters of 0·25 μm gate pseudomorphic HEMT. R.I. Taylor, D.M. Brookbanks and A.J. Holden p1923
Developing experimental models for propagation and scattering of EM waves in electrically large ducts. R. Bansal, E. DiCarlo and D. Jordan p1951
Dielectric-loaded elliptical waveguide. S.P. Yeo p2185
Distortion analysis of semiconductor lasers: A caution. J.J. O'Reilly and H.M. Salgado p946
Equivalence of approximation techniques for solution of multidimensional Markov chains in network modelling. M.E. Woodward p1019
Estimation of phase differential of signals transmitted over fading channels. M. Fattouche and H. Zaghloul p1823
Explicit multiple building diffraction attenuation function for mobile radio wave propagation. S.R. Saunders and F.R. Bonar p1276 e1599
Fast method for accurate prediction of fibre laser oscillation wavelength. A.O. Nielsen, J.H. Povlsen, A. Bjarklev, O. Lumholt, T.P. Rasmussen and K. Rottwitt p1644
Finite well-thickness effects on nonlinear optical response of quantum well structures. G.P. Bava and P. Debernardi p603
I_{dd_q} secondary components in CMOS logic circuits preceded by defective stages affected by analogue type faults. A. Rubio, J. Figueras, V. Champac, R. Rodriguez and J. Segura p1656
Importance sampling techniques for efficient simulation of stack decoders. K. Ben Letaief and J.S. Sadowsky p593
Improved large-signal quasistatic MESFET model. B.A. Kramer and R.J. Weber p906
Infinite series for logarithm of matrix, applied to identification of linear continuous-time multivariable systems from discrete-time models. G.J. Lastman and N.K. Sinha p1468
LMSS propagation model based on a European experiment using MARECS satellite. A. Benarroch and L. Mercader p298
Laser linewidth with gain compression. J. Arnaud p2354
Lateral variance of implanted ions. D.G. Ashworth, R. Oven and M.D.J. Bowyer p1402
Mathematical approach to large-signal modelling of electron devices. F. Filicori and G. Vannini p357
Measured scattered signals at 4 GHz confirm strong specular reflections off buildings. A.R. Noerpel, M.J. Krain and A. Ranade p869
Method of determining differential gain coefficient for bistable semiconductor laser diodes. J. Chen, P.E. Barnsley and H.J. Wickes p1745
Microchannel plate image intensifier electron dynamics in magnetic field. P.A. Ramos, S.W. Allison, G.T. Gillies and R.C. Ritter p1636
Minimal state space realisation of product factorable 2-D systems. G.E. Antoniou e100

Minimisation of total harmonic distortion in active-loaded differential BJT amplifiers. H. Kuntman and S. Özcan p2381
Modal analysis of annular couplers. S. Day, T. Bricheno and A. Fielding p106
Model reduction by generalised least-squares method. T.N. Lucas and A.R. Munro p1383
Modelling degeneracy for Monte-Carlo simulation of electron transport in GaAs. Y. Yamada p679
Modelling low bit rate video traffic as switched-fractal source. D.L. McLaren and D. Thong Nguyen p745
Modelling of coaxial-fed microstrip patch antenna by finite difference time domain method. C. Wu, K.-L. Wu, Z. Bi and J. Litva p1691
Modelling of sinusoidal function for nonlinear signal processing applications. S. Osowski p642
Models of round-off noise in second-order sigma–delta modulators. J.H. Blythe p673
Modified Wolff model for determination of resonance frequency of dielectric covered circular microstrip patch antenna. A.K. Verma and Z. Rostamy p2234
Modified Wolff model for resonance frequency of covered rectangular microstrip patch antenna. A.K. Verma and Z. Rostamy p1850
Modified intraconnected bidirectional associative memory. Y.-J. Jeng and C.-C. Yeh p1818
Modular FET model with distributed source configuration for single and double side source grounded MESFET. G. Baumann and R. Hierl p1128
Multigrid transmission-line modelling method for solving electromagnetic field problems. J.L. Herring and C. Christopoulos p1794
New collision-channel model for packet-switched CDMA networks. X.H. Chen and J. Oksman p1792
New results in spectral estimation of decimated processes. A. Ouahabi and J.L. Lacoume p1430
New technique for low-angle radar tracking. T. Lo, T. Wong and J. Litva p529
Noise model for double barrier resonant tunnel diodes. T.G. Van de Roer, H.C. Heyker, J.J.M. Kwaspen, H.P. Joosten and M. Henini p2158
Optimum synchronisation preamble design. M. Grayson and M. Darnell p36
Phase noise in coherent systems: basic model for simulations. A. Schönfelder p1725 e2094
Postprocessor using fuzzy vector quantiser in HMM-based speech recognition. H.R. Kim and H.S. Lee p1998
Procedure for inverse modelling of GaAs/AlGaAs HEMT structures from DC I/V characteristic curves. S.J. Mahon and D.J. Skellern p81
Rectifying effects on TiPtAu/*p*-InGaAsP contacts induced by plasma processes. R. Audino, G. Autore, E. Dovio and A. Piccirillo p2359
Rigorous modelling of receiving active microstrip antenna. R. Gillard, H. Legay, J.M. Floc'h and J. Citerne p2357
Scaling rules for glass based planar optical waveguides made by field assisted ion diffusion. M.C. Page, R. Oven and D.G. Ashworth p2073 e2300
Segmental corrective training for hidden Markov model parameter estimation in speech recognition. H.R. Kim and H.S. Lee p1633
Sixth-order generalised propagation techniques. M. Glasner, D. Yevick and B. Hermansson p475
Statistical modelling of polarisation induced fading in interferometric fibre sensors. A.D. Kersey, M.J. Marrone and M.A. Davis p481
Thermal parameter extraction for bipolar circuit modelling. R.M. Fox and S.-G. Lee p1719
Using 2-D series TLM for modelling TE modes in dielectric and lossy environments. P. Naylor p1499
Validity of TLM modelling of diffusion. R. Ait-Sadi and P. Naylor p2216

MODEMS

Digital frequency error detectors for OQPSK satellite modems. J. Ahmad, T.G. Jeans and B.G. Evans p1821

MODULATION

1 Gbit/s injection-locked DPSK communication experiments for space applications. J.C. Livas, S.B. Alexander, R.S. Bondurant, J.E. Kaufmann and M.L. Stevens p1042
ARQ scheme with combined channel coding and modulation using noncoherent detection. G. Benelli p15
Amplitude and phase modulation of a laser amplifier using travelling wave model. D. Bakewell p329
Applications of trellis coding to coherent optical communications employing polarisation shift keying modulation. S. Benedetto, A. Milanesi, G. Olmo and P. Poggiolini p1061
Bandpass ΔΣ A/D convertor using two-path multibit structure. Z.X. Zhang, G.C. Temes and Z. Czarnul p2008
Bidirectional transmission scheme using intensity modulation of 1·48 μm pump laser diode for erbium-doped fibre amplifier. M. Suyama, S. Watanabe, I. Yokota and H. Kuwahara p89
Dynamic spectral broadening in digitally modulated lasers. J. O'Gorman, A.F.J. Levi, T. Tanbuk-Ek, D.L. Coblentz and R.A. Logan p1239
Effects of photoexcited carriers on dynamic response of quantum-well optical modulators. S. Nojima, P.D. Larsen, A.-D. Larsen, O. Mitomi, K. Wakita and M. Naganuma p1387
Error rate prediction for PSK and QAM when affected by terrain multipath. E.J. Dutton p795
Estimation of phase differential of signals transmitted over fading channels. M. Fattouche and H. Zaghloul p1823
Experimental results on suboptimal filtering for optical digital pulse-position modulation. A.J. Massarella and M.J.N. Sibley p1953
Four-quadrant multiplier combining sigma–delta and multirate processing techniques. J. Grilo and J.E. Franca p2146
Hybrid ARQ scheme using TCM and code combining. R.H. Deng p866
New 16-QAM trellis codes for fading channels. J. Du and B. Vucetic p1009
Performance of phase-invariant trellis coding for differentially-encoded coherent M-PSK signals on Rayleigh fading channels. L.H.C. Lee and P.G. Farrell p1051
Pseudo-natural pulse width modulation for high accuracy digital-to-analogue conversion. J.M. Goldberg and M.B. Sandler p1491
QAM signal synthesis by time division multiplexing. N. Boutin p1113
Reduction of distortion in analogue modulated semiconductor lasers by feedforward compensation. L.S. Fock and R.S. Tucker p669
Spectral predictions for pulse interval and width modulation. B. Wilson, Z. Ghassemlooy and J.C.S. Cheung p580
Spectral structure of multitone pulse width modulation. B. Wilson, Z. Ghassemlooy and A. Lok p702

MODULATORS

Automatic adjustment of quadrature modulators. M. Faulkner, T. Mattsson and W. Yates p214 e392
Design of differential QPSK modulator. R.S. Bokulic p1185
Effects of photoexcited carriers on dynamic response of quantum-well optical modulators. S. Nojima, P.D. Larsen, A.-D. Larsen, O. Mitomi, K. Wakita and M. Naganuma p1387
Fibre optic modulators using active multimode waveguide overlays. W. Johnstone, S. Murray, G. Thursby, M. Gill, A. McDonach, D. Moodie and B. Culshaw p894
High-efficiency reflection modulators using lifted-off GaAs/AlGaAs layers bonded to gold on silicon. G.W. Yoffe p1579
High-speed and low-driving-voltage InGaAs/InAlAs multiquantum well optical modulators. I. Kotaka, K. Wakita, K. Kawano, M. Asai and M. Naganuma p2162
High-speed, InGaAsP/InP multiple quantum well, 1·55 μm singlemode modulator. F. Devaux, E. Bigan, B. Rose, M. McKee, F. Huet and M. Carré p1926
Increased optical saturation intensities in GaInAs multiple quantum wells by the use of AlGaInAs barriers. T.H. Wood, T.Y. Chang, J.Z. Pastalan, C.A. Burrus, Jun, N.J. Sauer and B.C. Johnson p257
Large modulation depth, single-moded quantum well waveguide modulator operating around 1·57 μm. A.C. Bryce, J.H. Marsh, L.L. Taylor, S.J. Bass and D.R.P. Guy p304
Low voltage GaAs on Si reflection modulators with 51% reflection change. P.B. Barnes, A.A. Stride, G. Parry, J.S. Roberts and C. Button p2283
Models of round-off noise in second-order sigma–delta modulators. J.H. Blythe p673
Multibit sigma–delta modulator with reduced sensitivity to DAC nonlinearity. A. Hairapetian, G.C. Temes and Z.X. Zhang p990
Multiplexed noise shaping structures for delta–sigma modulators. Z. Czarnul, A.G. Yesilyurt and G.C. Temes p2342
Novel structure MQW electroabsorption modulator/DFB-laser integrated device fabricated by selective area MOCVD growth. M. Aoki, H. Sano, M. Suzuki, M. Takahashi, K. Uomi and A. Takai p2138
Oversampling-based balanced modulator. P. O'Leary and F. Maloberti p66
Simultaneous achievement of low insertion loss, high contrast and low operating voltage in asymmetric Fabry–Perot reflection modulator. K.-K. Law, M. Whitehead, J.L. Merz and L.A. Coldren p1863 e1989

MONTE CARLO METHODS

Modelling degeneracy for Monte-Carlo simulation of electron transport in GaAs. Y. Yamada p679

MULTIPLEXERS AND MULTIPLEXING

11·6 Gbps 1 : 4 demultiplexer using double pulse doped quantum well GaAs/AlGaAs transistors. M. Lang, U. Nowotny and M. Berroth p459
16 Gbit/s all-optical demultiplexing using four-wave mixing. P.A. Andrekson, N.A. Olsson, J.R. Simpson, T. Tanbun-Ek, R.A. Logan and M. Haner p922
1 : 4 demultiplexer architecture for Gbit/s lightwave systems. K. Runge p753
20 Gbit/s AlGaAs/GaAs-HBT 2 : 1 selector and decision ICs. H. Hamano, T. Ihara, I. Amemiya, T. Futatsugi, K. Ishii and H. Endoh p662
23 Gbit/s Si bipolar decision circuit consisting of 24 Gbit/s MUX and DEMUX ICs. H.-M. Rein, J. Hauenschild, W. McFarland and D. Pettengill p974
24 Gbit/s regenerating demultiplexer IC in silicon bipolar technology. J. Hauenschild, H.-M. Rein, W. McFarland and D. Pettengill p502 e787
27 Gbit/s AlGaAs/GaAs HBT 1 : 2 regenerating demultiplexer IC. K. Runge, J.L. Gimlett, R.B. Nubling, K.C. Wang, M.F. Chang, R.L. Pierson and P.M. Asbeck p2389
28 Gbit/s selector IC using AlGaAs/GaAs HBTs. H. Ichino, Y. Yamauchi, T. Nittono, K. Nagata and O. Nakajima p636
32 channel WDM multiplexer with 1 nm channel spacing and 0·7 nm bandwidth. D.R. Wisely p520
Analysis of simultaneous digital and analogue signal transmissions in a coherent optical subcarrier multiplexed system. J. Wu, H.-W. Tsao, K.-P. Ho and Y.-H. Lee p632
Broadband surface emitting multilayers for visible lasers and wavelength division demultiplexers. R. Normandin, S. Létourneau, R.L. Williams and F. Chatenoud p125
Coding to alleviate intermodulation distortion in coherent optical FSK single-octave SCM systems. J.-H. Wu, J. Wu and Y.-H. Lee p438
Congestion control for multipoint packet voice. Y.W. Leung p1392
Coupler type multi/demultiplexer composed of different parameter fibres. Y. Takeuchi and J. Noda p575
Demonstration of a hybrid time/wavelength division multiplexed interferometric fibre sensor array. A.D. Kersey p554
Demonstration of retiming capability of silicon bipolar time-division multiplexer operating up to 24 Gbit/s. J. Hauenschild, H.-M. Rein, W. McFarland, J. Doernberg and D. Pettengill p978 e1311
Electro-optically tunable wavelength demultiplexer using depressed index waveguides. M. López-Amo, R. Subías, J.M. López-Higuera and M.A. Muriel p195
Frequency division multiplexing in analogue neural network. M.P. Craven, K.M. Curtis and B.R. Hayes-Gill p918
High performance hybrid circuit modules for lightwave systems operating at data rates of 10 Gbit/s and higher. K. Runge, M. Bagheri and J. Young p267
Impact of local oscillator intensity noise on performance of coherent subcarrier multiplexing system using common local oscillator (CLO). Y.-H. Lee and H.-W. Tsao p2133
Multiplexing optical sensors using spatial light modulator. J.C. Walker, R. Holmes and G.R. Jones p2022
New concept of asynchronous multiplexing of digital signals. M.N. Smiljanić and M.R. Temerinac p1376
Polarisation-insensitive optical coherent SCM system using mixed lightwave transmission of signal and local laser light. S. Watanabe, I. Yokota, T. Naito, T. Chikama, H. Kuwahara and T. Touge p361
QAM signal synthesis by time division multiplexing. N. Boutin p1113
Scalable one-hop wavelength-division multiplexed crossconnect. K.W. Cheung p367
Simultaneous two wave oscillation LD using biperiodic binary grating. T. Hidaka and H. Hatano p1075
Switching speed of integrated acoustically-tunable optical filter. D.A. Smith and J.J. Johnson p2102
Ultimate limits of subcarrier multiplexed lightwave transmission. K. Alameh and R.A. Minasian p1260
Uniform CNR design rules for coherent subcarrier multiplexed system with multioctave frequency allocation. Y.-H. Lee, J. Wu and H.-W. Tsao p600
Wide rejection band multidemultiplexer at 1·3–1·55 μm by cascading high-silica three-waveguide couplers on Si. G. Barbarossa and P.J.R. Laybourn p2085

MULTIVARIABLE SYSTEMS

Identification of linear continuous-time multivariable systems using linear multistep methods. G.J. Lastman and N.K. Sinha p127

Simplification of system model in time domain using continued fraction expansion in third Cauer form. K.J. Khatwani p396

NEGATIVE RESISTANCE

Subnanosecond 32 bit multiplier using negative differential resistance devices. S. Mohan, P. Mazumder and G.I. Haddad p1929

NETWORKS AND NETWORK THEORY

450 Mbit/s BPSK and 1 Gbit/s QPSK throughput subcarrier multiple-access networks using 790 nm selfpulsating laser transmitter network for computer applications. R.J.S. Bates and S.D. Walker p1014
Analogue CMOS Hebbian synapses. C. Schneider and H. Card p785 e1311
Analogue noise-enhanced learning in neural network circuits. A.F. Murray p1546
Analysis of effects of quantisation in multilayer neural networks using statistical model. Y. Xie and M.A. Jabri p1196
Applications of moment invariants to neurocomputing for pattern recognition. Y. Li p587
Banyan network nonblocking with respect to cyclic shifts. T.H. Lee and S.J. Liu p1474
BiCMOS edge detector with correlated-double-sampling readout circuit for pattern recognition neural network. J.B. Kuo, T.L. Chou and E.J. Wong p1248
CMOS mean field learning. C.R. Schneider and H.C. Card p1702
Characteristics of floating gate device as analogue memory for neural networks. O. Fujita, Y. Amemiya and A. Iwata p924
Decoding scheme for constant weight codes for optical and spread spectrum applications. M. Hussain and J.S. Bedi p839
Design of wormhole router for distributed memory multiprocessors. C.-Y. Chang, T.-W. Hou and C.-K. Shieh p2385
Dichroic tap for optical multiple access systems with distributed amplification. F. MacKenzie, S.A. Cassidy, S.T. Davey, T.K. White and D.L. Williams p181
Effect of self-feedback in dynamic neural networks. R. Perfetti p1367 e1888
Equivalence of approximation techniques for solution of multidimensional Markov chains in network modelling. M.E. Woodward p1019
Fast approximate analysis for token passing LAN protocol with asymmetrically distributed traffic loads. J.M. Senior, D.S. Rehal and A.N. Wiseman p1921
Four quadrant multiplier for neural networks. A. Mekkaoui and P. Jespers p320
Frequency division multiplexing in analogue neural network. M.P. Craven, K.M. Curtis and B.R. Hayes-Gill p918
G-Net: implicit token-passing bus LAN. E.G. Economou and S. Bolis p1449
General neural unit: retrieval performance. I. Aleksander and H.B. Morton p1776
High-speed analogue neural-network LSI employing super-selfaligned Si bipolar process technology. M. Koga, T. Matsumoto, Y. Amemiya, A. Iwata and H. Miyao p1678
Highly integrated ATM/SONET user–network interface. G.R. Lalk, L. Gluck, T.C. Banwell, C.A. Johnston, T.J. Robe, K.A. Walsh and K.C. Young, Jun p2174
Implementing nonlinear activation functions in neural network emulators. K.M. Sammut and S.R. Jones p1037
Improved block truncation coding using Hopfield neural network. G. Qiu, M.R. Varley and T.J. Terrell p1924
Improving decision feedback equaliser performance using neural networks. K. Raivio, O. Simula and J. Henriksson p2151
MOS implementation of winner-take-all network with application to content-addressable memory. L.G. Johnson and S.M.S. Jalaleddine p957
Modified intraconnected bidirectional associative memory. Y.-J. Jeng and C.-C. Yeh p1818
Multichannel slot reservation protocol for use on WDM optical fibre LAN. J.M. Senior, J.M. McVeigh and S.D. Cusworth p1875
Neural net nonlinear prediction for speech data. R.M. Dillon and C.N. Manikopoulos p824
Neural network architecture for circular features extraction in binary patterns. J.R. Kroh, T.S. Durrani and R. Chapman p1879
New collision-channel model for packet-switched CDMA networks. X.H. Chen and J. Oksman p1792
New message based priority buffer insertion ring protocol. P.A. Pietrzyk and A. Shaout p2106
New neural network for pattern recognition. Y.H. Shi and Z.Y. He p1353
New traffic model for performance analysis of processor–memory multistage interconnection networks. S. Edirisooriya and G. Edirisooriya p1813
Novel algorithm for Clos-type networks. J. Gordon and S. Srikanthan d526
Opening the 1·5 μm window in 1·3 μm regenerated systems. J.M. Boggis, A. Lord, W.A. Stallard and P. Cochrane p129
Perfect auto-associators using RAM-type nodes. J. Lucy p799
Performance characteristics of CSMA/CD for fibre optic networks. J.-T. Lim p247
Performance of Manhattan street network (MSN) architecture under zonal traffic distribution (ZTD) patterns. B. Khasnabish, M. Ahmadi and M. Shridhar p2165
Performance of common bank rate control throttle in ATM networks. K.C. Chua p1905
Performance of multichannel CSMA/CD network with channels susceptible to random noise. K.C. Chua and K.M. Lye p52
Protocol for token ring local computer networks and its performance. M.S. Obaidat and M.A. Al-Rousan p2393
Protocols for multichannel optical fibre LAN using passive star topology. H.W. Lee p1506
Reduced broadcast algorithm for source routing. R. Ahmad and F. Halsall p2288
SYMFONET: interconnect technology for multinode computing. R.J. Westmore p697
Selfrefreshing analogue memory cell for variable synaptic weights. R. Castello, D.D. Caviglia, M. Franciotta and F. Montecchi p1871
Sideband-difference multiple access (SDMA) lightwave network. W.C. Kwong and P.R. Prucnal p173
Tandem banyan switching fabric with dilation. I. Widjaja p1770
Training binary node feedforward neural networks by back propagation of error. D.J. Toms e101
Tuning capability of binary perceptron. N.N. Biswas and S.K. Bhattacharyya p1206
Universal network realising basic piecewise-linear I/V characteristics. J. Brzobohatý and J. Pospíšil p402 e1393
Using Reed–Muller coefficients to synthesise optimal prediction modules for concurrent testing. J. Ortega, A. Lloris, A. Prieto and F.J. Pelayo p1243
Winner-take-all neural network and its application to minimax optimisation problems. A. Cichocki and R. Unbehauen p2026

NOISE

Accuracy and dynamic range improvement of bandpass impulse response measurements using pseudorandom noise. P.C. Fannin and A. Molina p1755
BER performance owing to random FM noise for QDPSK mobile radio with diversity reception. F. Adachi and K. Ohno p629
Broadband measurements of frequency noise spectrum in two section DBR laser. E. Goobar and R. Schatz p289
Coherent and limiter-discriminator detection of GMSK in interference limited conditions. L.B. Lopes p2313
Composite events: Computationally efficient method for generating $1/f$ noise. N.J. Arnold and G. Wade p1169
Determining intrinsic noise parameters of 0·25 μm gate pseudomorphic HEMT. R.I. Taylor, D.M. Brookbanks and A.J. Holden p1923
Direct observation of shot noise in linewidth broadening of DBR lasers. H. Sundaresan and N.C. Fletcher e478
Effect of nonlinear gain on intensity noise in single-mode semiconductor lasers. G.P. Agrawal p232
Frequency assignment with minimum intermodulation noise for satellite SCPC systems. Y.-H. Lau and D.J. Skellern p79
Impact of local oscillator intensity noise on performance of coherent subcarrier multiplexing system using common local oscillator (CLO). Y.-H. Lee and H.-W. Tsao p2133
Improved median filter for restoration of image corrupted with Gaussian noise. H. Tang and L.W. Cahill p1016
Iterative autoregressive parameter estimation in presence of additive white noise. W.G. Chung and C.K. Un p1800
Laser torquemeter: immunity to memory quantisation noise. T.H. Wilmshurst, S.J. Rothberg and N.A. Halliwell p2037
Low noise tuned optical receivers using commercial 50 Ω modular microwave amplifiers. M. Marin, D.F. Hewitt, P.K. Lee and R.S. Tucker p1378
Measurements of low frequency and high frequency relative intensity noise in DBR lasers. H. Sundaresan and N.C. Fletcher p1524
Median and mean filters produce similar shifts on curved boundaries. E.R. Davies p826
Microwave noise of DBRT diode over full bias voltage range. J.I.M. Demarteau, H.C. Keyker, J.J.M. Kwaspen, T.G. van de Roer and L.M.F. Kaufmann p7
Noise figure characteristics of Er^{3+}-doped fibre amplifier pumped in 0·8 μm band. Y. Kimura, K. Suzuki and M. Nakazawa p146
Noise model for double barrier resonant tunnel diodes. T.G. Van de Roer, H.C. Heyker, J.J.M. Kwaspen, H.P. Joosten and M. Henini p2158
Noise performance of distributed fibre amplifiers. G.R. Walker, D.M. Spirit, D.L. Williams and S.T. Davey p1390
Noise-shaped PCM for video processing and transmission. A.J.R.M. Coenen p712
Phase noise in coherent systems: basic model for simulations. A. Schönfelder p1725 e2094
Photonic noise with nonlinear gain. J. Arnaud p1756
Reduction of FM threshold effect by inband noise cancelling. A.M. Pettigrew and T.J. Moir p1082
Reliability of code density test for high resolution ADCs. B. Ginetti and P. Jespers p2231
Simplified $1/f$ noise calculations. R.R. Spencer and J. Grishaw p312
Simultaneous reduction of intensity noise and distortion in semiconductor lasers by feedforward compensation. L.S. Fock and R.S. Tucker p1297
Solution of generalised multivariable noise cancelling problem. T.J. Moir and H.S. Dabis p1060
Spatio-temporal visibility function for image sequences. J.H. Ahn and J.-K. Kim p585
Throughput performance of noisy ICMA/CD packet mobile radio network. K.C. Chua p1854
Tracking a manoeuvring target with correlated measurement noises by manoeuvre detection method. J.-A. Guu and C.-H. Wei p265
Tracking moving objects in noisy environments using Walsh transform. Y.-S. Huang and C.-Y. Hsu p2079
Using cold FET to check accuracy of microwave noise parameter test set. L. Escotte, R. Plana, J. Rayssac, O. Llopis and J. Graffeuil p833

NONLINEAR NETWORKS

Calculating nonlinear microwave circuits with undersampled time signals. C. Ciotti, U. Fritsch and H.J. Schmitt p568
Four quadrant multiplier for neural networks. A. Mekkaoui and P. Jespers p320
Generation of learning neighbourhood in Kohonen feature maps by means of simple nonlinear network. P. Heim, B. Hochet and E. Vittoz p275
Time-domain analysis of nonlinear circuits with periodic excitation. A. Buonomo p65

NONLINEAR OPTICS

All-optical Gbit/s switching using nonlinear optical loop mirror. B.P. Nelson, K.J. Blow, P.D. Constantine, N.J. Doran, J.K. Lucek, I.W. Marshall and K. Smith p704
All-optical polarisation switch with long low-birefringence fibre. P. Ferro, M. Haelterman, S. Trillo, S. Wabnitz and B. Daino p1407
Broadband surface emitting multilayers for visible lasers and wavelength division demultiplexers. R. Normandin, S. Létourneau, R.L. Williams and F. Chatenoud p125
Cross-phase modulation in semiconductor optical amplifier. R.S. Grant, G.T. Kennedy and W. Sibbett p801
Defects in optical fibres in regions of high stress gradients. G.R. Atkins, S.B. Poole, M.G. Sceats, H.W. Simmons and C.E. Nockolds p1432
Excitation characteristics of fundamental mode in tapered slab waveguides with nonlinear cladding. K. Ono and H. Osawa p664
Explicit formulas for cutoff values of TE modes on symmetric dielectric slab waveguide with Kerr-like permittivity. Z. Chen, H. Lai and X. Chen p21
Fabrication of periodic domain grating in $LiNbO_3$ by electron beam writing for application of nonlinear optical processes. H. Ito, C. Takyu and H. Inaba p1221
Ferroelectric-domain inversion induced by SiO_2 cladding for $LiNbO_3$ waveguide SHG. M. Fujimura, T. Suhara and H. Nishihara p1207
Influence of field shape change in nonlinear fibre couplers. A. Ankiewicz and G.-D. Peng p1880
New application for nonlinear directional coupler: intensity controlled tunable optical filter. F. Farjady and M.G.F. Wilson p2218
Nonlinear, dispersion-free 10 GHz optical pulse train transmission in distributed erbium-doped fibre. D.M. Spirit, I.W. Marshall, P.D. Constantine, D.L. Williams, S.T. Davey and B.J. Ainslie p222
Novel photonic device using nonlinear corner-bend structure. W.-C. Chang, S.-F. Liu and W.-S. Wang p2190
Optical differential amplification in nonlinear fibre ring resonator. J. Capmany,

M.A. Muriel and F.J. Fraile-Pelaez p1810
Optical heterodyne carrier generation using stimulated Brillouin scattering in birefringent optical fibre. C.J. Duffy and R.P. Tatam p2004
Optical sampling oscilloscope using nonlinear fibre loop mirror. B.P. Nelson and N.J. Doran p204
Picosecond optical sampling using four-wave mixing in fibre. P.A. Andrekson p1440
Repression and speed improvement of photogenerated carrier induced refractive nonlinearity in InGaAs/InGaAsP quantum well waveguide. R.V. Penty, H.K. Tsang, I.H. White, R.S. Grant, W. Sibbett and J.E.A. Whiteaway p1447
Selfguided beam interaction: method of invariants. D.J. Mitchell, A.W. Snyder and L. Poladian p848
Selfstarting, passively modelocked erbium fibre ring laser based on the amplifying Sagnac switch. D.J. Richardson, R.I. Laming, D.N. Payne, V. Matsas and M.W. Phillips p542
Solitary waves in nonlinear media with gain and loss. Y. Chen p1985 e2300
Square pulse amplification using nonlinear loop mirror incorporating saturable gain. K. Smith, E.J. Greer and N.J. Doran p2046
Subpicosecond all-fibre erbium laser. I.N. Duling, III p544
Ultrafast all-optical switching in $Al_{0.18}Ga_{0.82}As$ directional coupler in 1·55 μm spectral region. J.S. Aitchison, A.H. Kean, C.N. Ironside, A. Villeneuve and G.I. Stegeman p1709
Vector dark spatial solitons. Y. Chen p1346

NONLINEAR SYSTEMS

Design of multivariable variable structure system for nonlinear time-varying systems using nonlinear switching surfaces. J.-J. Lee p2111
Harmonic characterisation of feedback systems incorporating saturation nonlinearities. P. Bowron, M.R.J. Motlagh and A.A. Muhieddine p1865
Modelling of sinusoidal function for nonlinear signal processing applications. S. Osowski p642
New technique for estimation of farfield from near-zone phaseless data. T. Isernia, R. Pierri and G. Leone p652
Scalar saddle point principle for optoelectronics. P.C. Kendall and M.N. Jones p735
Variable structure observer of mismatched uncertain dynamical systems. H.B. Shin, K.Y. Cho and M.J. Youn p1798

NUMERICAL METHODS AND NUMBER THEORY

Application of OSRC oscillator operator of third order to electromagnetic scattering from conducting or dielectric cylinder. Z.-N. Cheng and W.-X. Zhang p806
Extension of method of lines to unbounded regions by using co-ordinate transformation. X.H. Yang and L. Shafai p2108
Numerical analysis of collinear monopole antennas with coils. H. Nakano, N. Chiba and J. Yamauchi p1103 e1781
Numerical technique to calculate eigenenergies and eigenstates of quantum wells with arbitrary potential profile. D.P. Davé p1735 e2300
Origin of error in calculation of dispersion of optical singlemode fibres using numerical approach. L.-P. Yuan p1489
Point-matching method for reduction of anomalous radiation of log-periodic dipole array. M.A. Hassan, A. Al Jabri and K. Al-Hakbani p1315
Radix-2 SRT division algorithm with simple quotient digit selection. N. Burgess p1910

OPERATIONAL AMPLIFIERS

Constant-bandwidth current mode operational amplifier. E. Bruun p1673
Novel tunable GaAs MESFET OTA-C integrator suitable for high precision filtering applications. P. Visocchi, J. Taylor, A. Betts and D. Haigh p1671
Speed optimisation of class AB CMOS opamp using doublets. D.-D. Shulman p1795

OPTICAL COMMUNICATION

1064 nm, 565 Mbit/s PSK transmission experiment with homodyne receiver using synchronisation bits. B. Wandernoth p1692
10 Gbit/s bipolar laser driver. M. Banu, B. Jalali, R. Nottenburg, D.A. Humphrey, R.K. Montgomery, R.A. Hamm and M.B. Panish p278
10 Gbit/s single-pass soliton transmission over 1000 km. E. Yamada, K. Suzuki and M. Nakazawa p1289
10 Gbit/s soliton data transmission over one million kilometres. M. Nakazawa, E. Yamada, H. Kubota and K. Suzuki p1270
16 Gbit/s all-optical demultiplexing using four-wave mixing. P.A. Andrekson, N.A. Olsson, J.R. Simpson, T. Tanbun-Ek, R.A. Logan and M. Haner p922
1·244 Gbit/s 32 channel 121 km transmission experiment using shelf-mounted continuous-phase FSK optical heterodyne system. H. Tsushima, S. Sasaki, K. Kuboki, S. Kitajima, R. Takeyari and M. Okai p2336
1·5 Gbit/s FSK transmission system using two-electrode Fabry–Perot buried heterostructure laser. M.J. Chawki, R. Auffret, L. Berthou and L. Demeure p417
1 × 16 lithium niobate optical switch matrix with integral TTL compatible drive electronics. A.C. O'Donnell and N.J. Parsons p2367
1 : 4 demultiplexer architecture for Gbit/s lightwave systems. K. Runge p753
1 Gbit/s injection-locked DPSK communication experiments for space applications. J.C. Livas, S.B. Alexander, R.S. Bondurant, J.E. Kaufmann and M.L. Stevens p1042
20 Gbit/ AlGaAs/GaAs HBT decision circuit IC. K. Runge, J.L. Gimlett, R.B. Nubling, K.C. Wang, M.F. Chang, R.L. Pierson and P.M. Asbeck p2376
20 Gbit/s AlGaAs/GaAs-HBT 2 : 1 selector and decision ICs. H. Hamano, T. Ihara, I. Amemiya, T. Futatsugi, K. Ishii and H. Endoh p662
20 Gbit/s, 205 km optical time division multiplexed transmission system. G.E. Wickens, D.M. Spirit and L.C. Blank p973
28 Gbit/s selector IC using AlGaAs/GaAs HBTs. H. Ichino, Y. Yamauchi, T. Nittono, K. Nagata and O. Nakajima p636
39·81 Gbit/s, 43·8 million-way WDM broadcast network with 527 km range. D.S. Forrester, A.M. Hill, R.A. Lobbett, R. Wyatt and S.F. Carter p2051
450 Mbit/s BPSK and 1 Gbit/s QPSK throughput subcarrier multiple-access networks using 790 nm selfpulsating laser transmitter network for computer applications. R.J.S. Bates and S.D. Walker p1014
5 Gbit/s soliton propagation over 350 km with large periodic dispersion coefficient perturbations using erbium doped fibre amplifier repeaters. A.D. Ellis, J.D. Cox, D. Bird, J. Regnault, J.V. Wright and W.A. Stallard p878
8·2 GHz bandwidth monolithic integrated optoelectronic receiver using MSM photodiode and 0·5 µm recessed-gate AlGaAs/GaAs HEMTs. V. Hurm, J. Rosenzweig, M. Ludwig, W. Benz, M. Berroth, A. Huelsmann, G. Kaufel, K. Koehler, B. Raynor and J. Schneider p734
Analysis of simultaneous digital and analogue signal transmissions in a coherent optical subcarrier multiplexed system. J. Wu, H.-W. Tsao, K.-P. Ho and Y.-H. Lee p632
Ancillary channel of optical fibre communication systems based on 1B2B code redundancy. N. Stojanović and B.V. Vasić p1457
Applications of trellis coding to coherent optical communications employing polarisation shift keying modulation. S. Benedetto, A. Milanesi, G. Olmo and P. Poggiolini p1061
Automatic frequency control for 636 Mbit/s SF-FSK coherent optical field trial. B. Hoffmann, B. Christensen, E. Bødtker, N.G. Jensen and H. Thomsen p1975
Balanced polarisation diversity receiver using hybrid assembly techniques for optical coherent multichannel systems. J. Hankey, J. Urquhart, A.J. Moseley, C. Edge, M.J. Wale, M. Owen and S.J. Pike p1935
Bidirectional transmission scheme using intensity modulation of 1·48 µm pump laser diode for erbium-doped fibre amplifier. M. Suyama, S. Watanabe, I. Yokota and H. Kuwahara p89
Bit error rate measurements of 14 000 km 5 Gbit/s fibre-amplifier transmission system using circulating loop. N.S. Bergano, J. Aspell, C.R. Davidson, P.R. Trischitta, B.M. Nyman and F.W. Kerfoot p1889
Bit rate-distance product limitations due to fibre nonlinearities in multichannel coherent optical communication systems. E. Lichtman p757
Bit-error rate for a lightwave communication system incorporating an erbium-doped fibre amplifier. T. Li and M.C. Teich p598
Bit-error-rate investigation of two-channel soliton propagation over more than 10 000 km. N.A. Olsson, P.A. Andrekson, J.R. Simpson, T. Tanbun-Ek, R.A. Logan and K.W. Wecht p695
Broadband reset-free automatic polarisation controller. F. Heismann and M.S. Whalen p377
Carrier-induced group-velocity dispersion and pulse compression in semiconductor laser amplifiers. G.P. Agrawal p620
Coding to alleviate intermodulation distortion in coherent optical FSK single-octave SCM systems. J.-H. Wu, J. Wu and Y.-H. Lee p438
Coherent operation of 2-D monolithically integrated master oscillator power amplifier. R. Parke, D.F. Welch and D. Mehuys p2097
Concatenated soliton fibre link. Sien Chi and Min-Chuan Lin p237
Demonstration of broadband-ISDN upgrade of fibre-in-loop system. T.H. Wood, G.E. Bodeep, T.E. Darcie, G. Raybon and P.P. Bohn p2275
Demonstration of error-free soliton transmission at 2·5 Gbit/s over more than 14 000 km. L.F. Mollenauer, M.J. Neubelt, M. Haner and E. Lichtman p2055
Demonstration of optical pulse propagation over 10 000 km of fibre using recirculating loop. D.J. Malyon, T. Widdowson, E.G. Bryant, S.F. Carter, J.V. Wright and W.A. Stallard p120
Demonstration of photonic fast packet switching at 700 Mbit/s data rate. W.L. Ha, R.M. Fortenberry and R.S. Tucker p789
Design and fabrication of monolithically integrated DFB laser-wavelength duplexer transceivers for TPON/BPON access links. P.J. Williams, R.G. Walker, P.M. Charles, R. Ogden, A.K. Wood, N. Carr and A.C. Carter p809
Design and test of novel integrate and dump filter (I&D) for optical Gbit/s system applications. B. Enning, E. Bødtker, G. Jacobsen and B. Jensen p2286
Design of fibre-matched InP waveguides by scalar transverse field formulation. B. Sauer, R. Kunesch and G. Müller p643
Digital polarisation modulation with multiquantum well asymmetric Fabry–Perot structures. P.J. Bradley, R. Calvani, B. Costa and M. Whitehead p983
Discretely-tuned *N*-frequency laser for packet switching applications based on WDM. B. Glance, U. Koren, C.A. Burrus and J.D. Evankow p1381
Effect of amplifier spacing on four-wave mixing in multichannel coherent communications. D.G. Schadt p1805
Electrical predistortion to compensate for combined effect of laser chirp and fibre dispersion. H. Gysel and M. Ramachandran p421
Error probability of optical heterodyne MSK communication system with limiter–discriminator–integrator detector. X. Zhang and P. Jiang e100
Error ratio measurements over transoceanic distances using recirculating loop. T. Widdowson and D.J. Malyon p2201
Experimental results on suboptimal filtering for optical digital pulse-position modulation. A.J. Massarella and M.J.N. Sibley p1953
Experimental study of InGaAs transferred-electron device as fast laser driver. D. Hahn, K. Hansen and A. Schlachetzki p2070
Extinction ratio degradation in Raman amplified optical communication system. M.-S. Kao and S. Chi p1234
Fabrication of InP/InGaAs photodiodes for high bit rate communication by reactive ion etching. M. Seto, R.J. Deri, L.M. Schiavone, R. Bhat, J.B.D. Soole, H. Schumacher, N.C. Andreadakis and M. Koza p911
Femtosecond soliton transmission in 18 km-long dispersion-shifted, distributed erbium-doped fibre amplifier. M. Nakazawa and K. Kurokawa p1369
Field demonstration of coherent FSK system with 60 dB optical power budget. C.A. Park, S.J. Borley, J. Hankey, B.T. Debney, S.R. Ascham, S.J. Marsh and A.M. Thorley p689
Formation of moiré grating in core of germanosilicate fibre by transverse holographic double exposure method. S. Legoubin, E. Fertein, M. Douay, P. Bernage, P. Niay, F. Bayon and T. Georges p1945
Frequency halving in harmonically-driven mode-locked semiconductor lasers. N. Onodera, A.J. Lowery and R.S. Tucker p1053
Gain and noise performance of fibre amplifiers operating in new pump configurations. V. Lauridsen, R. Tadayoni, A. Bjarklev, J.H. Povlsen and B. Pedersen p327
Heterodyne detection at 4 Gbit/s using a simple *pin*-HEMT receiver. M.A.R. Violas, D.J.T. Heatley, Xuan Ye Gu, D.A. Cleland and W.A. Stallard p59
High performance 10 Gbit/s optical transmission system using erbium-doped fibre preamplifier. B.L. Patel, E.M. Kimber, M.G. Taylor, A.N. Robinson, I. Hardcastle, A. Hadjifotiou, S.J. Wilson, R. Keys and J.E. Righton p2179
High performance hybrid circuit modules for lightwave systems operating at data rates of 10 Gbit/s and higher. K. Runge, M. Bagheri and J. Young p267
High speed and high density wavelength multichannel butt-jointed DBR lasers. F. Delorme, S. Slempkes, D. Mathoorasing and J.C. Bouley p1969
Highly sensitive frequency discriminator for wide IF linewidth FSK demodulation. E. Bødtker, R. Welter, W.B. Sessa and R.E. Wagner p767
Impact of laser linewidth on performance of heterodyne single filter FSK system with optical preamplifier. R. Gangopadhyay and S.P. Majumder p1927
Impact of local oscillator intensity noise on performance of coherent subcarrier multiplexing system using common local oscillator (CLO). Y.-H. Lee and H.-W. Tsao p2133
Influence of residual facet reflectivity on nonlinearities in semiconductor optical amplifiers. T. Durhuus, B. Mikkelsen and K.E. Stubkjaer p310
Large signal analysis of FM–AM conversion in dispersive optical fibres and its application to PCM systems. K. Petermann and J. Wang p2347
Linewidth rebroadening in DFB lasers due to bias dependent dispersion of feedback. G. Morthier, K. David and R. Baets p375
Linewidth reduction in wavelength tunable laser diodes by voltage control. M.-C. Amann, S. Illek and H. Lang p531
Low-threshold and high-speed 1·5 µm compressive-strained multiquantum well four-wavelength distributed-feedback laser arrays. C.E. Zah, K.W. Cheung, S.G. Menocal, R. Bhat, M.Z. Iqbal, F. Favire, N.C. Andreadakis, P.S.D. Lin,

A.S. Gozdz, M.A. Koza and T.P. Lee p1040
Mode-locked erbium fibre laser with wavelength selection by means of fibre Bragg grating reflector. R.P. Davey, R.P.E. Fleming, K. Smith, R. Kashyap and J.R. Armitage p2087
Monolithic InP-based grating spectrometer for wavelength-division multiplexed systems at 1·5 μm. J.B.D. Soole, A. Scherer, H.P. LeBlanc, N.C. Andreadakis, R. Bhat and M.A. Koza p132
Multichannel ASK system design influenced by significant laser phase noise. G. Jacobsen p1741
Multichannel slot reservation protocol for use on WDM optical fibre LAN. J.M. Senior, J.M. McVeigh and S.D. Cusworth p1875
Multigigabit per second subcarrier multiplexed optical fibre ring network. R. Olshansky p2098
Narrow line semiconductor laser using fibre grating. D.M. Bird, J.R. Armitage, R. Kashyap, R.M.A. Fatah and K.H. Cameron p1115
New configuration of polarisation-independent isolator using a polarisation-independent one. K. Shiraishi p302
New polarisation-insensitive direct detection scheme based on fibre polarisation scrambling. M.W. Maeda and D.A. Smith p10 e614 e191
New reflective type star couplers for full duplex channels. T. Hermes p2136
Novel automatic bias voltage control for travelling-wave electrode optical modulators. T. Kataoka and K. Hagimoto p943
Novel free-space optical interconnection architecture employing array devices. T. Sakano, K. Noguchi and T. Matsumoto p515
Novel structure for monolithic fused-fibre 1 × 4 couplers. J.W. Arkwright p1767
Novel wideband 2–18 GHz clock extraction circuit for optical transmission systems. C.D. O'Shea p2324
Observation of nonlinear interactions in 20 Gbit/s soliton transmission over 500 km using erbium-doped fibre amplifiers. M. Nakazawa, K. Suzuki, E. Yamada and H. Kubota p1662
Optical QPSK transmission system with novel digital receiver concept. F. Derr p2177
Optical feedback receiver with sensitivity of −55·2 dBm at 8 Mbit/s. C.A. Hunter, R.L. Calton, P.R. Sadd and S.D. Walker p886 e1219
Packaged double-pass travelling-wave semiconductor laser amplifiers. D. Huang, D. Liu, S. Yu, M. Zhou, X. Liu and J. Huang p571
Parallel interconnection of two 64 × 32 symmetric self-electro-optic effect device arrays. F.B. McCormick, F.A.P. Tooley, J.M. Sasian, J.L. Brubaker, A.L. Lentine, T.J. Cloonan, R.L. Morrison, S.L. Walker and R.J. Crisci p1869
Passive coupling of InGaAsP/InP laser array and singlemode fibres using silicon waferboard. C.A. Armiento, M. Tabasky, C. Jagannath, T.W. Fitzgerald, C.L. Shieh, V. Barry, M. Rothman, A. Negri, P.O. Haugsjaa and H.F. Lockwood p1109
Performance characteristics of CSMA/CD for fibre optic networks. J.-T. Lim p247
Performance evaluation of coherent optical code division multiple access. S. Benedetto and G. Olmo p2000
Phase noise insensitive coherent optical heterodyne CPFSK receiver with limiter discriminator detector. X. Zhang and P. Jiang p684
Photonic packet switch using semiconductor optical amplifier gates. R. Fortenberry, A.J. Lowery, W.L. Ha and R.S. Tucker p1305
Polarisation-independent semiconductor optical amplifier module using twin GRIN rod lenses. T. Toyonaka, S. Tsuji, M. Haneda and Y. Ono p941
Polarisation-insensitive optical coherent SCM system using mixed lightwave transmission of signal and local laser light. S. Watanabe, I. Yokota, T. Naito, T. Chikama, H. Kuwahara and T. Touge p361
Practical low voltage 2 × 2 polarisation independent $LiNbO_3$ digital optical switch. A. McGuire, M. Scott, A.P. Thomas and R.C. Booth p1025
Preservation of polarisation orthogonality of counterpropagating waves through dichroic birefringent optical media: proof and application. M.O. van Deventer p1538
Protocols for multichannel optical fibre LAN using passive star topology. H.W. Lee p1506
Reduction of soliton interaction forces by bandwidth limited amplification. Y. Kodama and S. Wabnitz p1931
SYMFONET: interconnect technology for multinode computing. R.J. Westmore p697
Shifts in resonance wavelengths of Bragg gratings during writing or bleaching experiments by UV illumination within germanosilicate optical fibre. E. Fertein, S. Legoubin, M. Douay, S. Canon, P. Bernage, P. Niay, F. Bayon and T. Georges p1838
Sideband-difference multiple access (SDMA) lightwave network. W.C. Kwong and P.R. Prucnal p173
Signal linewidth broadening due to fibre nonlinearities in long-haul coherent optical fibre communication systems. S. Ryu p1527
Silicon bipolar chipset with maximum data rates from 10 to 23 Gbit/s for optical communications. J. Hauenschild, E. Bertagnolli, A. Felder, H.-M. Rein, H. Klose, L. Schmidt, L. Treitinger and P. Weger p2383
Simple method to improve dynamic range of optical amplifiers in coherent optical communication systems with heterodyne receivers. B.F. Jørgensen, B. Mikkelsen, C.J. Mahon and S. Saito p611
Simulation of optical heterodyne single-filter FSK system with line coding. S.P. Majumder and R. Gangopadhyay p563
Simultaneous bidirectional signalling using multiquantum well reflective modulator/detector. C.J.G. Kirkby, R.M. Ash, A.J. Moseley and A.C. Carter p2373
Simultaneous two wave oscillation LD using biperiodic binary grating. T. Hidaka and H. Hatano p1075
Square pulse amplification using nonlinear loop mirror incorporating saturable gain. K. Smith, E.J. Greer and N.J. Doran p2046
Strained multiquantum well double heterostructure optoelectronic switch and associated heterojunction FET. P.W. Cooke, P.A. Evaldsson, G.W. Taylor and B. Tell p1095
Subvolt operation of electroabsorption modulator integrated with λ/4-shifted DFB laser for 2·4 Gbit/s 135 km transmission. H. Tanaka, M. Suzuki, H. Taga, S. Yamamoto and Y. Matsushima p390
Suppression of SBS by discontinuous Brillouin frequency shifted fibre in CPFSK coherent lightwave system with booster amplifier. T. Sugie p1231
Synchronous CDMA for optical subscriber systems using 'block interleave'. T. Onoda and N. Miki p2219
Thermally-diffused expanded core fibres for low-loss and inexpensive photonic components. H. Hanafusa, M. Horiguchi and J. Noda p1968
Totally integrated erbium fibre soliton laser pumped by laser diode. K. Smith, E.J. Greer, R. Wyatt, P. Wheatley, N.J. Doran and M. Lawrence p244
Ultimate limits of subcarrier multiplexed lightwave transmission. K. Alameh and R.A. Minasian p1260
Ultrafast multibeatlength all-optical fibre switch. N. Finlayson, B.K. Nayar and N.J. Doran p1209
Ultrahigh-speed 1·5 μm narrow-contact planar BH-DFB lasers with 16·5 GHz cutoff frequency. T. Matsuyama, H. Kobayashi, A. Makuta, K. Ohtsuka and J. Kinoshita p2262
Wide rejection band multidemultiplexer at 1·3–1·55 μm by cascading high-silica three-waveguide couplers on Si. G. Barbarossa and P.J.R. Laybourn p2085
Y laser with 38 nm tuning range. W. Idler, M. Schilling, D. Baums, G. Laube, K. Wünstel and O. Hildebrand p2268

OPTICAL CONNECTORS & COUPLERS

2 × 2 multiplexing couplers for all-fibre 1·55 μm amplifiers and lasers. F. Gonthier, D. Ricard, S. Lacroix and J. Bures p42
8 × 8 flipchip assembled InGaAs detector arrays for optical interconnect. A.J. Moseley, M.Q. Kearley, R.C. Morris, J. Urquhart, M.J. Goodwin and G. Harris p1566
All-silica package for tapered couplers. C.M. Fitzgerald, C.V. Cryan, K.P. Oakley and C.D. Hussey p2329
Dichroic tap for optical multiple access systems with distributed amplification. F. MacKenzie, S.A. Cassidy, S.T. Davey, T.K. White and D.L. Williams p181
Fabrication and assessment of a D-fibre polarisation splitter. F.A. Burton and T.K. White p657
Influence of field shape change in nonlinear fibre couplers. A. Ankiewicz and G.-D. Peng p1880
Low-cost fibre optic tree couplers with applications to communication and sensing distribution networks. B. Moslehi, W. Parkyn and K. Shirk p851
Miniature high performance fibre loop reflector. K.P. Oakley, N.M. O'Sullivan, C.D. Hussey and T.A. Birks p2334
Modal analysis of annular couplers. S. Day, T. Bricheno and A. Fielding p106
Monolithic 1 × 19 single-mode fused fibre couplers. J.W. Arkwright, D.B. Mortimore and R.M. Adnams p737
Monolithic wavelength-flattened 1 × 4 singlemode fused fibre coupler. D.B. Mortimore, J.W. Arkwright and R.M. Adnams p2252
New method for centring optical connectors and splices by single mode excitation. J.M. Blondy, D. Pagnoux, J.F. Seignole and P. Facq p123
New method for low cost and efficient optical connections between singlemode fibres and silica guides. G. Grand, H. Denis and S. Valette p16
New reflective type star couplers for full duplex channels. T. Hermes p2136
Novel free-space optical interconnection architecture employing array devices. T. Sakano, K. Noguchi and T. Matsumoto p515
Novel structure for monolithic fused-fibre 1 × 4 couplers. J.W. Arkwright p1767
Passive coupling of InGaAsP/InP laser array and singlemode fibres using silicon waferboard. C.A. Armiento, M. Tabasky, C. Jagannath, T.W. Fitzgerald, C.L. Shieh, V. Barry, M. Rothman, A. Negri, P.O. Haugsjaa and H.F. Lockwood p1109
Power equalisation in 3 × 3 fibre couplers by twist tuning. T.A. Birks p1087
Practical prepolished wavelength flat couplers for telecommunications applications. N. O'Sullivan, M. Ó Donnchadha and C.D. Hussey p971
Single-core fibre to twin-core fibre connector. S.B. Poole and J.D. Love p1559
Variable-ratio, polarisation-insensitive, 3 × 3 fused biconical tapered couplers. K.A. Murphy, M.F. Gunther and A.M. Vengsarkar p1336
Wavelength-insensitive couplers in form of all-fibre Mach–Zehnder interferometer. K. Morishita and T. Tahara p1200

OPTICAL DETECTORS

180 photons/bit in 140 Mbit/s, 305 km direct-detection optical transmission experiment. L. Pophillat and A. Levasseur p535
50 GHz InGaAs edge-coupled *pin* photodetector. D. Wake, T.P. Spooner, S.D. Perrin and L.D. Henning p1073
Error probability of optical heterodyne MSK communication system with limiter–discriminator–integrator detector. X. Zhang and P. Jiang e100

OPTICAL DISPERSION

Experimental comparison between two different methods for measuring polarisation mode dispersion in singlemode fibres. N. Gisin, R. Passy, B. Perny, A. Galtarossa, C. Someda, F. Bergamin, M. Schiano and F. Matera p2292
Optical equalisation with linearly tapered two-dissimilar-core fibre. F. Ouellette and Y. Duval p1668

OPTICAL FIBRES

-Fibre optic pH sensors prepared by sol-gel immobilisation technique. J.Y. Ding, M.R. Shahriari and G.H. Sigel, Jun p1560
10 Gbit/s single-pass soliton transmission over 1000 km. E. Yamada, K. Suzuki and M. Nakazawa p1289
10 Gbit/s, 50 km dispersive fibre transmission experiment using strained multiquantum-well DFB laser diode. Y. Miyamoto, K. Hagimoto, F. Ichikawa, M. Yamamoto and T. Kagawa p853
1·2 ps pulses from passively mode-locked laser diode pumped Er-doped fibre ring laser. M. Zirngibl, L.W. Stulz, J. Stone, J. Hugi, D. DiGiovanni and P.B. Hansen p1734
200 Mbit/s DPSK heterodyne transmission experiment using colour centre lasers at 2·55 μm. T. Komukai and Y. Miyajima p572
20 dB gain thulium-doped fluorozirconate fibre amplifier operating at around 0·8 μm. R.G. Smart, J.N. Carter, A.C. Tropper, D.C. Hanna, S.F. Carter and D. Szebesta p1123
23 dB gain upconversion pumped erbium doped fibre amplifier operating at 850 nm. T.J. Whitley, C.A. Millar, M.C. Brierley and S.F. Carter p184
2 × 2 multiplexing couplers for all-fibre 1·55 μm amplifiers and lasers. F. Gonthier, D. Ricard, S. Lacroix and J. Bures p42
30 dB optical net gain at 1·543 μm in Er^{3+} doped fluoride fibre pumped around 1·48 μm. D. Ronarc'h, M. Guibert, H. Ibrahim, M. Monerie, H. Poignant and A. Tromeur p908
320 fs soliton generation with passively mode-locked erbium fibre laser. D.J. Richardson, R.I. Laming, D.N. Payne, M.W. Phillips and V.J. Matsas p730
35 dB optical gain at 2·716 μm in erbium doped ZBLAN fibre pumped at 0·642 μm. D. Ronarc'h, M. Guibert, F. Auzel, D. Mechenin, J.Y. Allain and H. Poignant p511
38·2 dB amplification at 1·31 μm and possibility of 0·98 μm pumping in Pr^{3+}-doped fluoride fibre. Y. Miyajima, T. Sugawa and Y. Fukasaku p1706
5 Gbit/s soliton propagation over 350 km with large periodic dispersion coefficient perturbations using erbium doped fibre amplifier repeaters. A.D. Ellis, J.D. Cox, D. Bird, J. Regnault, J.V. Wright and W.A. Stallard p878
9 dB gain improvement of 1300 nm optical amplifier by amplified spontaneous emission suppressing fibre design. A. Bjarklev, T. Rasmussen, J.H. Povlsen, O. Lumholt, K. Rottwitt, S.D. Petersen and C.C. Larsen p1701
AlF_3-based glass fibres with enhanced optical transmission. T. Iqbal, M.R. Shahriari, P. Foy, R. Ulbrich and G.H. Sigel, Jun p110
All-fibre frequency shifters using multiple acoustic transducers. A.P. Foord, P.A. Greenhalgh and P.A. Davies p1141
All-optical inverter with one picojoule switching energy. M.N. Islam, C.E. Soccolich, C.-J. Chen, K.S. Kim, J.R. Simpson and U.C. Paek p130

All-optical polarisation switch with long low-birefringence fibre. P. Ferro, M. Haelterman, S. Trillo, S. Wabnitz and B. Daino p1407
All-optical pulse compression using amplifying Sagnac loop. R.A. Betts, S.J. Frisken, C.A. Telford and P.S. Atherton p858
All-silica package for tapered couplers. C.M. Fitzgerald, C.V. Cryan, K.P. Oakley and C.D. Hussey p2329
Amplification and lasing at 1·3 μm in praseodymium-doped fluorozirconate fibres. Y. Durteste, M. Monerie, J.Y. Allain and H. Poignant p626
Amplification at 1·3 μm in a Pr^{3+}-doped single-mode fluorozirconate fibre. S.F. Carter, D. Szebesta, S.T. Davey, R. Wyatt, M.C. Brierley and P.W. France p628
Application of rare-earth doped fibres as lowpass filters in passive optical networks. I.J. Wilkinson, T. Finegan and B.J. Ainslie p230
Automatic gain control in cascaded erbium doped fibre amplifier systems. A.D. Ellis, R.M. Percival, A. Lord and W.A. Stallard p193
Automatic optical-loss compensation with Er-doped fibre amplifier. H. Okamura p2155
BER measurements in random access fibre loop optical memory. E. Dietrich, G. Großkopf, L. Küller, R. Ludwig, W. Pieper and H.G. Weber p1585
Beam-propagation analysis of optical fibres by alternating direction implicit method. J. Yamauchi, T. Ando and H. Nakano p1663
Birefringent photosensitivity in monomode optical fibre: application to external writing of rocking filters. K.O. Hill, F. Bilodeau, B. Malo and D.C.. Johnson p1548
Bit error rate measurements of 14 000 km 5 Gbit/s fibre-amplifier transmission system using circulating loop. N.S. Bergano, J. Aspell, C.R. Davidson, P.R. Trischitta, B.M. Nyman and F.W. Kerfoot p1889
Bit-error-rate investigation of two-channel soliton propagation over more than 10 000 km. N.A. Olsson, P.A. Andrekson, J.R. Simpson, T. Tanbun-Ek, R.A. Logan and K.W. Wecht p695
CW room temperature upconversion lasing at blue, green and red wavelengths in infrared-pumped Pr^{3+}-doped fluoride fibre. R.G. Smart, D.C. Hanna, A.C. Tropper, S.T. Davey, S.F. Carter and D. Szebesta p1307
Calculation of optimum fibre lengths for EDFAs at arbitrary pump wavelengths. F.F. Rühl p1443 e1989
Characterisation of frequency doubling in Eu^{2+} doped aluminosilicate fibres. T.J. Driscoll, N.M. Lawandy, A. Killian, L. Rienhart and T.F. Morse p1729
Characterisation of surface plasmon wave polarising devices. S. Carey and W. Johnstone p988
Characteristics of laser-diode modules using thermally-diffused expanded core fibres. K. Yoshino, K. Kato, I. Nishi, H. Hanafusa and M. Horiguchi p796
Compensation for temperature dependence of Faraday effect in diamagnetic materials: application to optical fibre sensors. P.A. Williams, G.W. Day and A.H. Rose p1131
Continuously stable selfoscillation of silicon cantilever microresonators. Y.J. Rao and B. Culshaw p1697
Control of optical fibre taper shape. R.P. Kenny, T.A. Birks and K.P. Oakley p1654
Coupler type multi/demultiplexer composed of different parameter fibres. Y. Takeuchi and J. Noda p575
Current sensing by mode coupling in fibre via the Faraday effect. W. Chu, D. McStay and A.J. Rogers p207
Defects in optical fibres in regions of high stress gradients. G.R. Atkins, S.B. Poole, M.G. Sceats, H.W. Simmons and C.E. Nockolds p1432
Demodulation techniques for two-mode elliptical-core fibre sensors. A.B. Wang, K.A. Murphy, A.M. Vengsarkar and R.O. Claus p1454
Demonstration of a hybrid time/wavelength division multiplexed interferometric fibre sensor array. A.D. Kersey p554
Demonstration of birefringent optical fibre frequency shifter employing torsional acoustic waves. M. Berwick, C.N. Pannell, P. St. J. Russell and D.A. Jackson p713 e1219
Demonstration of optical pulse propagation over 10 000 km of fibre using recirculating loop. D.J. Malyon, T. Widdowson, E.G. Bryant, S.F. Carter, J.V. Wright and W.A. Stallard p120
Demonstration of soliton transmission at 2·4 Gbit/s over 12 000 km. L.F. Mollenauer, B.M. Nyman, M.J. Neubelt, G. Raybon and S.G. Evangelides p178
Design of erbium doped fibre amplifiers for 980 nm or 1480 nm pumping. B. Pedersen, A. Bjarklev and J.H. Povlsen p255
Differential measurement technique for optical fibre sensors. R.I. MacDonald and R. Nychka p2194
Distortion-free amplification of high-speed test patterns up to 100 Gbit/s with erbium-doped fibre amplifiers. H. Izadpanah, D. Chen, Chinlon Lin, M.A. Saifi, W.I. Way, A. Yi-Yan and J.L. Gimlett p196
Dual wavelength pulse generation using mode-locked erbium-doped fibre ring laser. J.B. Schlager, S. Kawanishi and M. Saruwatari p2072
Effect of amplifier spacing on four-wave mixing in multichannel coherent communications. D.G. Schadt p1805
Effects of Bragg diffraction on stimulated backward Brillouin scattering. C.A.S. de Oliveira and C.K. Jen p780
Efficient, narrowband $LP_{01} \leftrightarrow LP_{02}$ mode convertors fabricated in photosensitive fibre: spectral response. F. Bilodeau, K.O. Hill, B. Malo, D.C. Johnson and I.M. Skinner p682
Electrical predistortion to compensate for combined effect of laser chirp and fibre dispersion. H. Gysel and M. Ramachandran p421
Electrically tunable, diode-pumped erbium-doped fibre ring laser with fibre Fabry–Perot etalon. J.L. Zyskind, J.W. Sulhoff, J. Stone, D.J. DiGiovanni, L.W. Stulz, H.M. Presby, A. Piccirilli and P.E. Pramayon p1950
Elliptical-core, two-mode optical fibre sensors as vibration-mode filters. A.M. Vengsarkar, B.R. Fogg, W.V. Miller, K.A. Murphy and R.O. Claus p931
Energy transfer in Er^{3+}/Pr^{3+}-doped fluoride glass fibres and application to lasing at 2·7 μm. J.Y. Allain, M. Monerie and H. Poignant p445
Energy transfer in Pr^{3+}/Yb^{3+}-doped fluorozirconate fibres. J.Y. Allain, M. Monerie and H. Poignant p1012
Er-doped fibre ring resonator applied to optical spectrum analyser with less than 100 kHz resolution. H. Okamura and K. Iwatsuki p1047
Er^{3+}-doped multicomponent glass core fibre amplifier pumped at 1·48 μm. M. Ohashi and K. Shiraki p2143
Erasure of frequency doubling gratings in optical fibres by ultraviolet light excitation. I.C.S. Carvalho, W. Margulis and B. Lesche p1497
Erbium-doped fibre amplifier with constant gain for pump wavelengths between 966 AND 1004 nm. R.M. Percival, S. Cole, D.M. Cooper, S.P. Craig-Ryan, A.D. Ellis, C.J. Rowe and W.A. Stallard p1266
Erbium-doped fibres pumped in 800 nm band. B. Pedersen, S. Zemon and W.J. Miniscalco p1295
Evaluation of chromatic dispersion in erbium doped fibre amplifiers. F. Matera, M. Romagnoli, M. Settembre, M. Tamburrini and M. Peroni p1867 e2197
Exact acoustic leaky wave solutions for single-mode fibres. K. Tajima p251
Experimental comparison between two different methods for measuring polarisation mode dispersion in singlemode fibres. N. Gisin, R. Passy, B. Perny, A. Galtarossa, C. Someda, F. Bergamin, M. Schiano and F. Matera p2292
Extinction ratio degradation in Raman amplified optical communication system. M.-S. Kao and S. Chi p1234
Fast method for accurate prediction of fibre laser oscillation wavelength. A.O. Nielsen, J.H. Povlsen, A. Bjarklev, O. Lumholt, T.P. Rasmussen and K. Rottwitt p1644
Femtosecond soliton transmission in 18 km erbium-doped fibre amplifier with different pumping configurations. K. Kurokawa and M. Nakazawa p1765
Femtosecond soliton transmission in 18 km-long dispersion-shifted, distributed erbium-doped fibre amplifier. M. Nakazawa and K. Kurokawa p1369
Fibre compression of chirped optical pulses from tunable DBR laser diode. A. Galvanauskas, A. Krotkus, J.A. Tellefsen, Jun, M. Öberg and B. Broberg p2394
Fibre optic modulators using active multimode waveguide overlays. W. Johnstone, S. Murray, G. Thursby, M. Gill, A. McDonach, D. Moodie and B. Culshaw p894
Figures of merit for doped fibre amplifiers in 1300 nm and 1550 nm windows. F.F. Rühl p1605
Fluorescence lifetime studies of MeV erbium implanted silica glass. A. Lidgard, A. Polman, D.C. Jacobsen, G.E. Blonder, R. Kistler, J.M. Poate and P.C. Becker p993
Formation of moiré grating in core of germanosilicate fibre by transverse holographic double exposure method. S. Legoubin, E. Fertein, M. Douay, P. Bernage, P. Niay, F. Bayon and T. Georges p1945
Four-wave mixing in semiconductor optical amplifier under CW operation and with FSK modulation at 155 Mbit/s. H. Inoue, W.B. Sessa, R.E. Wagner and S. Tsuji p462
Frequency-derived distributed optical fibre sensing: signal-frequency downshifting. F. Parvaneh, V.A. Handerek and A.J. Rogers p394
Gain and noise characterisation of erbium doped fibre amplifiers. G.R. Walker p744
Gain and noise performance of fibre amplifiers operating in new pump configurations. V. Lauridsen, R. Tadayoni, A. Bjarklev, J.H. Povlsen and B. Pedersen p327
Gain control in erbium-doped fibre amplifiers by an all-optical feedback loop. M. Zirngibl p560
Generation of transform limited gain-switched DFB-LD pulses < 6 ps with linear fibre compression and spectral window. K. Iwatsuki, K. Suzuki and S. Nishi p1981
High gain (21 dB) packaged semiconductor optical amplifiers. R. Boudreau, R. Morrison, R. Sargent, R. Holmstrom, W. Powazinik, E. Meland, E. Wilmot and J. LaCourse p1845
High gain limiting erbium-doped fibre amplifier with over 30 dB dynamic range. W.I. Way, D. Chen, M.A. Saifi, M.J. Andrejco, A. Yi-Yan, A. Von Lehman and C. Lin p211
High performance 10 Gbit/s optical transmission system using erbium-doped fibre preamplifier. B.L. Patel, E.M. Kimber, M.G. Taylor, A.N. Robinson, I. Hardcastle, A. Hadjifotiou, S.J. Wilson, R. Keys and J.E. Righton p2179
High performance balanced heterodyne front end using special fibre coupling scheme. H. Rodler, C. Wahl, G. Gaukel and F. Auracher p249
High power, compact 1·48 μm diode-pumped broadband superfluorescent fibre source at 1·55 μm. H. Février, J.F. Marcerou, P. Bousselet, J. Auge and M. Jurczyszyn p261
High sensitivity fibre preamplifier receiver for multichannel applications. C.G. Joergensen, B. Mikkelsen, T. Durhuus, K.E. Stubkjaer, J.A. van den Berk, C.F. Pedersen and C.C. Larsen p2153
High speed synchronously pumped Raman fibre amplification. K.C. Byron, D. Burns, R.S. Grant, G.T. Kennedy, C.I. Johnston and W. Sibbett p597
High-efficiency CW thulium-sensitised holmium-doped fluoride fibre laser operating at 2·04 μm. J.Y. Allain, M. Monerie and H. Poignant p1513
Highly efficient Er-doped fibre amplifiers pumped in 660 nm band. M. Horiguchi, M. Shimizu, M. Yamada, K. Yoshino and H. Hanafusa p2319
Highly efficient optical fibre amplifier pumped by a 0·8 μm band laser diode. M. Horiguchi, M. Shimizu, M. Yamada, K. Yoshino and H. Hanafusa e478
Highly improved fibre amplifier for operation around 1300 nm. M. Øbro, B. Pedersen, A. Bjarklev, J.H. Povlsen and J.E. Pedersen p470
Impact of stimulated Brillouin scattering on fibre Raman amplifiers. M.F. Ferreira, J.F. Rocha and J.L. Pinto p1576
Interacting solitons in erbium fibre laser. R.P. Davey, N. Langford and A.I. Ferguson p1257
Investigations on forward pumped two-step Raman amplification in optical fibre. K.C. Byron p756
Lanthanum codoped erbium fibre amplifier. M. Nakazawa and Y. Kimura p1065
Large signal analysis of FM–AM conversion in dispersive optical fibres and its application to PCM systems. K. Petermann and J. Wang p2347
Laser diode pumped Pr^{3+}-doped and Pr^{3+}-Yb^{3+}-codoped fluoride fibre amplifiers operating at 1·3 μm. Y. Ohishi, T. Kanamori, J. Temmyo, M. Wada, M. Yamada, M. Shimizu, K. Yoshino, H. Hanafusa, M. Horiguchi and S. Takahashi p1995
Long-term bias stability of all-PANDA fibre gyroscope with Er-doped superfluorescent fibre laser. K. Iwatsuki p1092
Low-cost fibre optic tree couplers with applications to communication and sensing distribution networks. B. Moslehi, W. Parkyn and K. Shirk p851
Measurement of pump induced refractive index change in erbium doped fibre amplifier. S.C. Fleming and T.J. Whitley p1959 e2197
Microlens arrays for interconnection of singlemode fibre arrays. J.S. Leggatt and M.C. Hutley p238
Miniature high performance fibre loop reflector. K.P. Oakley, N.M. O'Sullivan, C.D. Hussey and T.A. Birks p2334
Modal analysis of annular couplers. S. Day, T. Bricheno and A. Fielding p106
Mode-locked erbium fibre laser with wavelength selection by means of fibre Bragg grating reflector. R.P. Davey, R.P.E. Fleming, K. Smith, R. Kashyap and J.R. Armitage p2087
Monolithic 1 × 19 single-mode fused fibre couplers. J.W. Arkwright, D.B. Mortimore and R.M. Adnams p737
Monolithic wavelength-flattened 1 × 4 singlemode fused fibre coupler. D.B. Mortimore, J.W. Arkwright and R.M. Adnams p2252
Multiplexing optical sensors using spatial light modulator. J.C. Walker, R. Holmes and G.R. Jones p2022
New method for centring optical connectors and splices by single mode excitation. J.M. Blondy, D. Pagnoux, J.F. Seignole and P. Facq p123
New method for low cost and efficient optical connections between singlemode fibres and silica guides. G. Grand, H. Denis and S. Valette p16
New polarisation-insensitive direct detection scheme based on fibre polarisation scrambling. M.W. Maeda and D.A. Smith p10 e614 e191
New type of microwave power monitoring device using grids of optical-fibre sensors. L.J. Auchterlonie, A.J. Harris and P.D. Dagoulis p2023
Noise figure characteristics of Er^{3+}-doped fibre amplifier pumped in 0·8 μm band. Y. Kimura, K. Suzuki and M. Nakazawa p146
Noise performance of distributed fibre amplifiers. G.R. Walker, D.M. Spirit, D.L. Williams and S.T. Davey p1390
Novel structure for monolithic fused-fibre 1 × 4 couplers. J.W. Arkwright p1767
Observation of frequency doubling in tantalum doped silica fibres. T.J. Driscoll,

N.M. Lawandy, A. Killian, L. Rienhart and T.F. Morse p2088
Observation of nonlinear interactions in 20 Gbit/s soliton transmission over 500 km using erbium-doped fibre amplifiers. M. Nakazawa, K. Suzuki, E. Yamada and H. Kubota p1662
Optical amplification in a nonlinear fibre interferometer. M.E. Marhic, C.H. Hsia and J.-M. Jeong p210
Optical differential amplification in nonlinear fibre ring resonator. J. Capmany, M.A. Muriel and F.J. Fraile-Pelaez p1810
Optical equalisation with linearly tapered two-dissimilar-core fibre. F. Ouellette and Y. Duval p1668
Optical fibre dispersion measurement using colour centre laser. A. Benner p1748
Optical fibre modulator using electro-optic polymer overlay. M. Wilkinson, J.R. Hill and S.A. Cassidy p979
Optical heterodyne carrier generation using stimulated Brillouin scattering in birefringent optical fibre. C.J. Duffy and R.P. Tatam p2004
Optical loss features due to fibre fracturing at splice. T. Kuwabara, H. Koga, Y. Mistunaga and S. Isobe p1774
Optical-intensity dependent switching using soliton self-frequency shift. J.K. Lucek and K.J. Blow p882
Optoelectronic transversal filter. B.E. Swekla and R.I. MacDonald p1769
Origin of error in calculation of dispersion of optical singlemode fibres using numerical approach. L.-P. Yuan p1489
Passive coupling of InGaAsP/InP laser array and singlemode fibres using silicon waferboard. C.A. Armiento, M. Tabasky, C. Jagannath, T.W. Fitzgerald, C.L. Shieh, V. Barry, M. Rothman, A. Negri, P.O. Haugsjaa and H.F. Lockwood p1109
Performance characteristics of GaInAs/GaAs large optical cavity quantum well lasers. N.K. Dutta, J. Lopata, P.R. Berger, D.L. Sivco and A.Y. Cho p680
Photoelectric instability in optical fibre resulting in spontaneous second harmonic generation. M.I. Dyakonov and A.S. Furman p1429
Picosecond optical fibre sampling oscilloscope. D.U. Noske and J.R. Taylor p1739
Polarisation-induced visibility limits in interferometric fibre-optic sensor arrays. Y.S. Boger and M. Tur p622
Power equalisation in 3 × 3 fibre couplers by twist tuning. T.A. Birks p1087
Practical prepolished wavelength flat couplers for telecommunications applications. N. O'Sullivan, M. Ó Donnchadha and C.D. Hussey p971
Prediction of optimum fibre lengths for erbium doped fibre amplifiers. F.F. Rühl p769
Proposal for stimulated Brillouin scattering suppression by fibre cabling. N. Yoshizawa, T. Horiguchi and T. Kurashima p1100
Protocols for multichannel optical fibre LAN using passive star topology. H.W. Lee p1506
Pulse repetition rates in passive, selfstarting, femtosecond soliton fibre laser. D.J. Richardson, R.I. Laming, D.N. Payne, V.J. Matsas and M.W. Phillips p1451
Pump wavelength optimisation of erbium-doped fibre amplifier in 800 nm band. E. Delevaque, T. Georges and J.-F. Bayon p1421
Red upconversion Yb-sensitised Pr fluoride fibre laser pumped in 0·8 μm region. J.Y. Allain, M. Monerie and H. Poignant p1156
Reduction of soliton interaction forces by bandwidth limited amplification. Y. Kodama and S. Wabnitz p1931
Reduction of spatial hole burning by singlephase modulator in linear Nd^{3+} fibre laser. H. Sabert, A. Koch and R. Ulrich p2176
Relationship between polarisation dispersion measurements before and after installation of optical cables. A. Galtarossa, M. Schiano, C.G. Someda, B. Daino, F. Matera, R. Zaninello and F. Bergamin p595
Selfguided beam interaction: method of invariants. D.J. Mitchell, A.W. Snyder and L. Poladian p848
Selfstarting, passively modelocked erbium fibre ring laser based on the amplifying Sagnac switch. D.J. Richardson, R.I. Laming, D.N. Payne, V. Matsas and M.W. Phillips p542
Shifts in resonance wavelengths of Bragg gratings during writing or bleaching experiments by UV illumination within germanosilicate optical fibre. E. Fertein, S. Legoubin, M. Douay, S. Canon, P. Bernage, P. Niay, F. Bayon and T. Georges p1838
Signal linewidth broadening due to fibre nonlinearities in long-haul coherent optical fibre communication systems. S. Ryu p1527
Simple fusion splicing technique for reducing splicing loss between standard singlemode fibres and erbium-doped fibre. H.Y. Tam p1597
Single-core fibre to twin-core fibre connector. S.B. Poole and J.D. Love p1559
Single-frequency travelling-wave erbium-doped fibre loop laser. G.J. Cowle, D.N. Payne and D. Reid p229
Singlemode diode-pumped tunable erbium-doped fibre laser with linewidth less than 5·5 kHz. J.L. Zyskind, J.W. Sulhoff, Y. Sun, J. Stone, L.W. Stulz, G.T. Harvey, D.J. DiGiovanni, H.M. Presby, A. Piccirilli, U. Koren and R.M. Jopson p2148
Spectral predictions for pulse interval and width modulation. B. Wilson, Z. Ghassemlooy and J.C.S. Cheung p580
Statistical modelling of polarisation induced fading in interferometric fibre sensors. A.D. Kersey, M.J. Marrone and M.A. Davis p481
Study of electronically-scanned optical-fibre white-light Fizeau interferometer. S. Chen, A.W. Palmer, K.T.V. Grattan, B.T. Meggitt and S. Martin p1032
Subpicosecond all-fibre erbium laser. I.N. Duling, III p544
Subpicosecond pulse generation from erbium doped fibre laser. R.P. Davey, N. Langford and A.I. Ferguson p726
Suppression of SBS by discontinuous Brillouin frequency shifted fibre in CPFSK coherent lightwave system with booster amplifier. T. Sugie p1231
Synchronous pumping of picosecond dye laser using high efficiency sound harmonic generation from optical fibres. N.M. Lawandy, J.P. Bernardin, G. Demouchy and R.L. MacDonald p1264
System characterisation of high gain and high saturated output power, Pr^{3+}-doped fluorozirconate fibre amplifier at 1·3 μm. R. Lobbett, R. Wyatt, P. Eardley, T.J. Whitley, P. Smyth, D. Szebesta, S.F. Carter, S.T. Davey, C.A. Millar and M.C. Brierley p1472
Taper coupling of laser diode to singlemode fibre: influence of fibre field shape. Li Tong-Ning and W. Freude p1202 e1599
Temperature dependence of resonant frequency in all-fibre optically addressed silicon microresonator sensors. Y.J. Rao, D. Walsh, D. Uttamchandani and B. Culshaw p934
Tensor properties of optically encoded second-harmonic generation in semiconductor-microcrystallite-doped glasses. R.L. MacDonald and N.M. Lawandy p2331
Thermally-diffused expanded core fibres for low-loss and inexpensive photonic components. H. Hanafusa, M. Horiguchi and J. Noda p1968
Thulium-doped monomode fluoride fibre laser broadly tunable from 2·25 to 2·5 μm. R.M. Percival, S.F. Carter, D. Szebesta, S.T. Davey and W.A. Stallard p1912
Time domain measurements of launching-condition-dependent bandwidth of all-plastic optical fibres. S. Takahashi and K. Ichimura p217
Totally integrated erbium fibre soliton laser pumped by laser diode. K. Smith, E.J. Greer, R. Wyatt, P. Wheatley, N.J. Doran and M. Lawrence p244
Transmission and saturation performance of dispersion-shifted distributed erbium fibre. D.L. Williams, S.T. Davey, D.M. Spirit, G.R. Walker and B.J. Ainslie p812
Transmission length improvement in 2·5 Gbit/s direct detection system with Er-doped fibre amplifiers by efficient remote pumping. T. Rasmussen, A. Bjarklev, J. Hedegaard Povlsen, O. Lumholt and K. Rottwitt p1537
Tunable CW lasing around 610, 635, 695, 715, 885 and 910 nm in praseodymium-doped fluorozirconate fibre. J.Y. Allain, M. Monerie and H. Poignant p189
Tuneable multiwavelength semiconductor laser with single fibre output. M.C. Farries, A.C. Carter, G.G. Jones and I. Bennion p1498
Unique laser diode module using short tapered hemispherical-end fibre for optical hybrid integration. Y. Tachikawa and S. Kobayashi p884
Upconversion pumped green lasing in erbium doped fluorozirconate fibre. T.J. Whitley, C.A. Millar, R. Wyatt, M.C. Brierley and D. Szebesta p1785
Wavelength dependences of Brillouin frequency shifts of optical fibres in 1·55 μm wavelength region. T.-O. Tsun, A. Wada and R. Yamauchi p1764
Wavelength-insensitive couplers in form of all-fibre Mach–Zehnder interferometer. K. Morishita and T. Tahara p1200
Wide-angle fibre optic imaging arrays for vision and display system applications. B. Moslehi, W. Parkyn, P. Harvey, D. Zaleta and P. Soltan p1022
Widely tunable narrow linewidth erbium doped fibre ring laser. H. Schmuck, Th. Pfeiffer and G. Veith p2117
Yb^{3+} sensitised Er^{3+} doped silica optical fibre with ultrahigh transfer efficiency and gain. J.E. Townsend, W.L. Barnes, K.P. Jedrzejewski and S.G. Grubb p1958

OPTICAL FILTERS

Application of rare-earth doped fibres as lowpass filters in passive optical networks. I.J. Wilkinson, T. Finegan and B.J. Ainslie p230
Birefringent photosensitivity in monomode optical fibre: application to external writing of rocking filters. K.O. Hill, F. Bilodeau, B. Malo and D.C. Johnson p1548
Dielectric multilayered interference filters deposited on polyimide films. T. Oguchi, J. Noda, H. Hanafusa and S. Nishi p706
Formation of moiré grating in core of germanosilicate fibre by transverse holographic double exposure method. S. Legoubin, E. Fertein, M. Douay, P. Bernage, P. Niay, F. Bayon and T. Georges p1945
GaAlAs/GaAs active filter based on vertical cavity surface emitting laser. F. Koyama, S. Kubota and K. Iga p1093
High-performance fibre Fabry–Perot filters. J. Stone and L.W. Stulz p2239
Inline optical filter using lifted-off GaAs/AlGaAs multilayer. J.M. Dell and G.W. Yoffe p26
New application for nonlinear directional coupler: intensity controlled tunable optical filter. F. Farjady and M.G.F. Wilson p2218
Switching speed of integrated acoustically-tunable optical filter. D.A. Smith and J.J. Johnson p2102
Two-channel optical filtering of 1 Gbit/s signal with DBR filter. O. Sahlén, M. Öberg and S. Nilsson p578

OPTICAL LOGIC

Cascadable laser logic devices: discrete integration of phototransistors with surface-emitting laser diodes. G.R. Olbright, R.P. Bryan, K. Lear, T.M. Brennan, G. Poirier, Y.H. Lee and J.L. Jewell p216

OPTICAL MEASUREMENT

BER measurements in random access fibre loop optical memory. E. Dietrich, G. Großkopf, L. Küller, R. Ludwig, W. Pieper and H.G. Weber p1585
Determining $Si_{1-x}Ge_x$ layer thickness and composition by ellipsometry. T.I. Kamins p451
Electro-optic sampling of optoelectronically phase-locked 10·0 GHz microwave signals using semiconductor laser diodes. H.-H. Wu, C.-S. Chang and C.-L. Pan p1622
Error ratio measurements over transoceanic distances using recirculating loop. T. Widdowson and D.J. Malyon p2201
OTDR calibration device based on recirculating optical delay line. D.J. Ives, R.L. Palmer and B. Walker p342
Picosecond optical fibre sampling oscilloscope. D.U. Noske and J.R. Taylor p1739

OPTICAL MODULATION

AlGaAs/AlAs QW modulator for 6328 Å operation. B. Pezeshki, S.M. Lord, T.B. Boykin, B.L. Shoop and J.S. Harris Jun p1971
Analysis of receiver using injection-locked semiconductor laser for direct demodulation of PSK optical signals. O. Lidoyne and P. Gallion p995
Digital polarisation modulation with multiquantum well asymmetric Fabry–Perot structures. P.J. Bradley, R. Calvani, B. Costa and M. Whitehead p983
Effects of photoexcited carriers on dynamic response of quantum-well optical modulators. S. Nojima, P.D. Larsen, A.-D. Larsen, O. Mitomi, K. Wakita and M. Naganuma p1387
Fibre optic modulators using active multimode waveguide overlays. W. Johnstone, S. Murray, G. Thursby, M. Gill, A. McDonach, D. Moodie and B. Culshaw p894
Frequency locking of semiconductor laser using PSK modulated signal. M. Levesque, N. Cyr, M. Têtu and P. Tremblay p2238
High frequency modulation of strained layer multiple quantum well optical amplifiers. U. Koren, B.I. Miller, M.G. Young, T.L. Koch, R.M. Jopson, A.H. Gnauck, J.D. Evankow and M. Chien p62
High-speed and low-driving-voltage InGaAs/InAlAs multiquantum well optical modulators. I. Kotaka, K. Wakita, K. Kawano, M. Asai and M. Naganuma p2162
Increased optical saturation intensities in GaInAs multiple quantum wells by the use of AlGaInAs barriers. T.H. Wood, T.Y. Chang, J.Z. Pastalan, C.A. Burrus, Jun, N.J. Sauer and B.C. Johnson p257
Integrated optical mixer for RF applications. D. Uttamchandani and H.S. Al-Raweshidy p70 e392
Large signal analysis of FM–AM conversion in dispersive optical fibres and its application to PCM systems. K. Petermann and J. Wang p2347
Measurement of field-induced refractive index variation in GaAs/AlGaAs superlattice using monolithic Fabry–Perot etalon. K.-K. Law, R.H. Yan, L.A. Coldren and J.L. Merz p105
Millimetre wave phase reversal integrated optical modulator in fin line. C.D. Watson and M.G.F. Wilson p2059
Multiple-quantum-well reflection modulator using a lifted-off GaAs/AlGaAs film bonded to gold on silicon. G.W. Yoffe and J.M. Dell p557
Multiplexing optical sensors using spatial light modulator. J.C. Walker, R. Holmes and G.R. Jones p2022
New method for generation of coherent ultrashort optical pulses. C. Liao, H.-Y.

Zhang and Y.-Z. Gao p550
Novel automatic bias voltage control for travelling-wave electrode optical modulators. T. Kataoka and K. Hagimoto p943
Optical FM and heterodyne detection of two-channel 560 Mbit/s subcarrier multiplexed ASK signal using 3-electrode DFB-LDs. S. Watanabe, I. Yokota, T. Naito, T. Chikama and H. Kuwahara p44
Optical fibre modulator using electro-optic polymer overlay. M. Wilkinson, J.R. Hill and S.A. Cassidy p979
Performance characteristics of surface plasmon liquid crystal light valve. M.E. Caldwell and E.M. Yeatman p1471
Performance evaluation of coherent optical code division multiple access. S. Benedetto and G. Olmo p2000
Picosecond pulses (2 ps) from hybrid mode-locked AlGaAs QW lasers with integrated active waveguide cavities. L.R. Brovelli and H. Jäckel p1104
Self configuring optical fibre-tap/photodetector modulator with very high photodetection efficiency and high extinction ratio. R.J. Grindle and J.E. Midwinter p2170
Simultaneous achievement of low insertion loss, high contrast and low operating voltage in asymmetric Fabry–Perot reflection modulator. K.-K. Law, M. Whitehead, J.L. Merz and L.A. Coldren p1863 e1989
Simultaneous bidirectional signalling using multiquantum well reflective modulator/detector. C.J.G. Kirkby, R.M. Ash, A.J. Moseley and A.C. Carter p2373
Subvolt operation of electroabsorption modulator integrated with $\lambda/4$-shifted DFB laser for 2·4 Gbit/s 135 km transmission. H. Tanaka, M. Suzuki, H. Taga, S. Yamamoto and Y. Matsushima p390

OPTICAL MULTIDEMULTIPLEXERS

32 channel WDM multiplexer with 1 nm channel spacing and 0·7 nm bandwidth. D.R. Wisely p520
Wide rejection band multidemultiplexer at 1·3–1·55 μm by cascading high-silica three-waveguide couplers on Si. G. Barbarossa and P.J.R. Laybourn p2085

OPTICAL PROPERTIES OF SUBSTANCES

Resistance to 515 nm Ar laser damage in rare-earth doped MgO : $LiNbO_3$ crystals. X.-Q. Feng, Q.-B. Zhu, P.J. Chandler, L. Zhang and P.D. Townsend p1504
Static scattering in filled nematic: new liquid crystal display technique. R. Eidenschink and W.H. de Jeu p1195

OPTICAL RECEIVERS

1064 nm, 565 Mbit/s PSK transmission experiment with homodyne receiver using synchronisation bits. B. Wandernoth p1692
10 Gbit/s optical front end using Si-bipolar preamplifier IC, flipchip APD, and slant-end fibre. H. Hamano, T. Yamamoto, Y. Nishizawa, Y. Oikawa, H. Kuwatsuka, A. Tahara, K. Suzuki and A. Nishimura p1602
Analysis of receiver using injection-locked semiconductor laser for direct demodulation of PSK optical signals. O. Lidoyne and P. Gallion p995
Balanced polarisation diversity receiver using hybrid assembly techniques for optical coherent multichannel systems. J. Hankey, J. Urquhart, A.J. Moseley, C. Edge, M.J. Wale, M. Owen and S.J. Pike p1935
Balanced tuned receiver front end with low noise and high common mode rejection ratio. N.G. Jensen, E. Bødtker, G. Jacobsen and S. Sørensen p234
Broadband receiver module for 10 Gbit/s optical transmission. K. Kitamura, K. Ito, H. Matsuda, T. Kaneko and M. Haneda p1435
Error probability of optical heterodyne MSK communication system with limiter–discriminator–integrator detector. X. Zhang and P. Jiang e100
Heterodyne detection at 4 Gbit/s using a simple *pin*-HEMT receiver. M.A.R. Violas, D.J.T. Heatley, Xuan Ye Gu, D.A. Cleland and W.A. Stallard p59
High performance balanced heterodyne front end using special fibre coupling scheme. H. Rodler, C. Wahl, G. Gaukel and F. Auracher p249
High sensitivity 10 Gbit/s optical receiver using two cascaded EDFA preamplifiers. L.T. Blair and H. Nakano p835
High sensitivity fibre preamplifier receiver for multichannel applications. C.G. Joergensen, B. Mikkelsen, T. Durhuus, K.E. Stubkjaer, J.A. van den Berk, C.F. Pedersen and C.C. Larsen p2153
High-speed monolithic coherent optical receiver integrated on InP substrate. N. Yasuoka, T. Sanada, H. Hamaguchi, M. Makiuchi, T. Mikawa, A. Kuramata, O. Wada and R.J. Deri p2020
Highly integrated 20 Mbit/s GaAs optical receiver for use in TPON network termination equipment. N.R. Back, B.R. White and S.C. Thorp p566
Impact of laser linewidth on performance of heterodyne single filter FSK system with optical preamplifier. R. Gangopadhyay and S.P. Majumder p1927
Low noise tuned optical receivers using commercial 50 Ω modular microwave amplifiers. M. Marin, D.F. Hewitt, P.K. Lee and R.S. Tucker p1378
Multichannel ASK system design influenced by significant laser phase noise. G. Jacobsen p1741
New polarisation-insensitive direct detection scheme based on fibre polarisation scrambling. M.W. Maeda and D.A. Smith p10 e614 e191
Optical QPSK transmission system with novel digital receiver concept. F. Derr p2177
Optical feedback receiver with sensitivity of −55·2 dBm at 8 Mbit/s. C.A. Hunter, R.L. Calton, P.R. Sadd and S.D. Walker p886 e1219
Optical receiver array in silicon bipolar technology with selfaligned, low parasitic III/V detectors for DC–1 Gbit/s parallel links. J. Wieland, H. Melchior, M.Q. Kearley, C.R. Morris, A.M. Moseley, M.J. Goodwin and R.C. Goodfellow p2211
Phase noise in coherent systems: basic model for simulations. A. Schönfelder p1725 e2094
Phase noise insensitive coherent optical heterodyne CPFSK receiver with limiter discriminator detector. X. Zhang and P. Jiang p684

OPTICAL ROTATION

Chiroshield: A Salisbury/Dallenbach shield alternative. D.L. Jaggard, N. Engheta and J. Liu e547

OPTICAL SENSORS

Continuously stable selfoscillation of silicon cantilever microresonators. Y.J. Rao and B. Culshaw p1697
Demodulation techniques for two-mode elliptical-core fibre sensors. A.B. Wang, K.A. Murphy, A.M. Vengsarkar and R.O. Claus p1454
Demonstration of a hybrid time/wavelength division multiplexed interferometric fibre sensor array. A.D. Kersey p554
Differential measurement technique for optical fibre sensors. R.I. MacDonald and R. Nychka p2194
Elliptical-core, two-mode optical fibre sensors as vibration-mode filters. A.M. Vengsarkar, B.R. Fogg, W.V. Miller, K.A. Murphy and R.O. Claus p931
Experimental investigation of polarisation-induced fading in interferometric fibre sensor arrays. A.D. Kersey, M.J. Marrone and A. Dandridge p562
Fibre-tip displacement sensor using sinusoidal FM-based technique. S. Venkatesh and W.V. Sorin p1652
Multiplexing optical sensors using spatial light modulator. J.C. Walker, R. Holmes and G.R. Jones p2022
New type of microwave power monitoring device using grids of optical-fibre sensors. L.J. Auchterlonie, A.J. Harris and P.D. Dagoulis p2023
Optical heterodyne carrier generation using stimulated Brillouin scattering in birefringent optical fibre. C.J. Duffy and R.P. Tatam p2004
Optical magnetic and electric field sensors based on surface plasmon polariton resonant coupling. B. Moslehi, M.W. Foster and P. Harvey p951
Optical waveguide sensor using evanescent wave excitation of fluorescent dye in sol–gel glass. B.D. MacCraith, V. Ruddy, C. Potter, B. O'Kelly and J.F. McGilp p1247
Temperature dependence of resonant frequency in all-fibre optically addressed silicon microresonator sensors. Y.J. Rao, D. Walsh, D. Uttamchandani and B. Culshaw p934
Two-mode Fabry–Perot optical fibre sensors for strain and temperature measurement. G.Z. Wang, A.B. Wang, K.A. Murphy and A.M. Vengsarkar p1843

OPTICAL STORES

Analysis of higher information density pregroove model by boundary element method. H. Ito and T. Kojima p1511
BER measurements in random access fibre loop optical memory. E. Dietrich, G. Großkopf, L. Küller, R. Ludwig, W. Pieper and H.G. Weber p1585
Storage of optical pulse data sequences in loop memory using multistable oscillations. T. Aida and P. Davis p1544

OPTICAL SWITCHING

16 × 16 single chip optical switch array in lithium niobate. P.J. Duthie and M.J. Wale p1265
1 × 16 lithium niobate optical switch matrix with integral TTL compatible drive electronics. A.C. O'Donnell and N.J. Parsons p2367
1 × 2 lossless semiconductor optical switch. D.A.H. Mace, M.J. Adams, J. Singh, M.A. Fisher and I.D. Henning p198
All-optical Gbit/s switching using nonlinear optical loop mirror. B.P. Nelson, K.J. Blow, P.D. Constantine, N.J. Doran, J.K. Lucek, I.W. Marshall and K. Smith p704
All-optical polarisation switch with long low-birefringence fibre. P. Ferro, M. Haelterman, S. Trillo, S. Wabnitz and B. Daino p1407
All-optical pulse compression using amplifying Sagnac loop. R.A. Betts, S.J. Frisken, C.A. Telford and P.S. Atherton p858
All-optical remote gain switching in Er-doped fibre amplifiers. M. Zirngibl p1164
Comparison of bulk buried heterostructure and multiple quantum well laser amplifier switches. B.P. Cavanagh, I.W. Marshall, G. Sherlock and H. Wickes p263
Demonstration of laser-diode-pumped ultrafast all-optical switching in nonlinear Sagnac interferometer. M. Jinno and T. Matsumoto p75
Demonstration of photonic fast packet switching at 700 Mbit/s data rate. W.L. Ha, R.M. Fortenberry and R.S. Tucker p789
First digital optical switch based on InP/GaInAsP double heterostructure waveguides. J.A. Cavaillès, M. Renaud, J.F. Vinchant, M. Erman, P. Svensson and L. Thylén p699
GaAs/GaAlAs multiquantum well waveguides for all-optical switching at 1·55 μm. H.K. Tsang, R.S. Grant, R.V. Penty, I.H. White, J.B.D. Soole, E. Colas, H.P. LeBlanc, N.C. Andreadakis and W. Sibbett p1993
Guided wave switch array using electro-optic and carrier depletion effects in indium phosphite. P.J. Duthie, N. Shaw, M.J. Wale and I. Bennion p1747
High frequency modulation of strained layer multiple quantum well optical amplifiers. U. Koren, B.I. Miller, M.G. Young, T.L. Koch, R.M. Jopson, A.H. Gnauck, J.D. Evankow and M. Chien p62
Integrated optical inverter using light amplifying optical switch (LAOS). F.R. Beyette Jun, S.A. Feld, X. An, K.M. Geib, M.J. Hafich, G.Y. Robinson and C.W. Wilmsen p497
Low drive voltage Y-branch digital optical switch. H. Okayama, T. Ushikubo and M. Kawahara p24
Monolithic integration of GaAs MESFET and InP/InGaAsP 2 × 2 optical switch. I. Pollentier, L. Buydens, P. Demeester, P. Van Daele, A. Enard, E. Lallier, G. Glastre and D. Rondi p2339
Novel photonic device using nonlinear corner-bend structure. W.-C. Chang, S.-F. Liu and W.-S. Wang p2190
Optical self-routing switch using vertical to surface transmission electrophotonic devices with transmission light amplification function. T. Numai, I. Ogura, H. Kosaka, M. Sugimoto, Y. Tashiro and K. Kasahara p605
Optical switching in an asymmetric Fabry–Perot with high contrast ratio and very low insertion loss. J.F. Heffernan, M.H. Moloney, J. Hegarty and J.S. Roberts p659
Optical-intensity dependent switching using soliton self-frequency shift. J.K. Lucek and K.J. Blow p882
Optically-controlled grating switch (OG-SW). Y. Shibata, M. Ikeda, K. Nakashima, T. Tamamura and T. Nishida p246
Optimisation of $LiNbO_3$ BOA waveguide switches operating at 1·3 μm. A. McGuire, A.P. Thomas and R.C. Booth e547
Passively mode-locked erbium-doped fibre laser with nonlinear fibre mirror. S.J. Frisken, C.A. Telford, R.A. Betts and P.S. Atherton p887
Photonic packet switch using semiconductor optical amplifier gates. R. Fortenberry, A.J. Lowery, W.L. Ha and R.S. Tucker p1305
Polarisation independent 1 × 16 and 1 × 32 lithium niobate optical switch matrices. A.C. O'Donnell p2349
Polarisation insensitive $LiNbO_3$ optical devices with power splitting and switching functions. N. Kuzuta and K. Takakura p157
Practical low voltage 2 × 2 polarisation independent $LiNbO_3$ digital optical switch. A. McGuire, M. Scott, A.P. Thomas and R.C. Booth p1025
Strained multiquantum well double heterostructure optoelectronic switch and associated heterojunction FET. P.W. Cooke, P.A. Evaldsson, G.W. Taylor and B. Tell p1095
Three-guide directional coupler as polarisation independent optical switch. H. Okayama, T. Ushikubo and M. Kawahara p810
Two-mode-interference Ti : $LiNbO_3$ electro-optic polarisation-independent switch or polarisation splitter. J. Čtyroký, J. Janta, J. Prokš and J. Schröfel p965
Ultrafast all-optical switching in $Al_{0.18}Ga_{0.82}As$ directional coupler in 1·55 μm spectral region. J.S. Aitchison, A.H. Kean, C.N. Ironside, A. Villeneuve and G.I. Stegeman p1709
Ultrafast multibeatlength all-optical fibre switch. N. Finlayson, B.K. Nayar and N.J. Doran p1209
Ultrafast polarisation switching in ridge-waveguide laser diodes. A. Klehr, A.

Bärwolff, R. Müller, M. Voß, J. Sacher, W. Elsässer and E.O. Göbel p1680
Y-fed directional coupler with weighted coupling. H. Okayama and M. Kawahara p1947

OPTICAL TRANSMISSION

10 Gbit/s optical front end using Si-bipolar preamplifier IC, flipchip APD, and slant-end fibre. H. Hamano, T. Yamamoto, Y. Nishizawa, Y. Oikawa, H. Kuwatsuka, A. Tahara, K. Suzuki and A. Nishimura p1602
10 Gbit/s single-pass soliton transmission over 1000 km. E. Yamada, K. Suzuki and M. Nakazawa p1289
10 Gbit/s soliton data transmission over one million kilometres. M. Nakazawa, E. Yamada, H. Kubota and K. Suzuki p1270
10 Gbit/s, 50 km dispersive fibre transmission experiment using strained multiquantum-well DFB laser diode. Y. Miyamoto, K. Hagimoto, F. Ichikawa, M. Yamamoto and T. Kagawa p853
180 photons/bit in 140 Mbit/s, 305 km direct-detection optical transmission experiment. L. Pophillat and A. Levasseur p535
1·244 Gbit/s 32 channel 121 km transmission experiment using shelf-mounted continuous-phase FSK optical heterodyne system. H. Tsushima, S. Sasaki, K. Kuboki, S. Kitajima, R. Takeyari and M. Okai p2336
20 Gbit/s exclusive OR/NOR IC using AlGaAs/GaAs HBTs. H. Ichino, Y. Yamauchi and T. Nittono p180
20 Gbit/s, 205 km optical time division multiplexed transmission system. G.E. Wickens, D.M. Spirit and L.C. Blank p973
Bidirectional transmission scheme using intensity modulation of 1·48 μm pump laser diode for erbium-doped fibre amplifier. M. Suyama, S. Watanabe, I. Yokota and H. Kuwahara p89
Bit-error-rate investigation of two-channel soliton propagation over more than 10 000 km. N.A. Olsson, P.A. Andrekson, J.R. Simpson, T. Tanbun-Ek, R.A. Logan and K.W. Wecht p695
Broadband receiver module for 10 Gbit/s optical transmission. K. Kitamura, K. Ito, H. Matsuda, T. Kaneko and M. Haneda p1435
DFB active filter/detector for multichannel FSK optical transmission. R. Hui, N. Caponio, P. Gambini, M. Puleo and E. Vezzoni p2016
Demonstration of error-free soliton transmission at 2·5 Gbit/s over more than 14 000 km. L.F. Mollenauer, M.J. Neubelt, M. Haner and E. Lichtman p2055
Demonstration of soliton transmission at 2·4 Gbit/s over 12 000 km. L.F. Mollenauer, B.M. Nyman, M.J. Neubelt, G. Raybon and S.G. Evangelides p178
Femtosecond soliton transmission in 18 km erbium-doped fibre amplifier with different pumping configurations. K. Kurokawa and M. Nakazawa p1765
Femtosecond soliton transmission in 18 km-long dispersion-shifted, distributed erbium-doped fibre amplifier. M. Nakazawa and K. Kurokawa p1369
High performance 10 Gbit/s optical transmission system using erbium-doped fibre preamplifier. B.L. Patel, E.M. Kimber, M.G. Taylor, A.N. Robinson, I. Hardcastle, A. Hadjifotiou, S.J. Wilson, R. Keys and J.E. Righton p2179
Nonlinear, dispersion-free 10 GHz optical pulse train transmission in distributed erbium-doped fibre. D.M. Spirit, I.W. Marshall, P.D. Constantine, D.L. Williams, S.T. Davey and B.J. Ainslie p222
Observation of nonlinear interactions in 20 Gbit/s soliton transmission over 500 km using erbium-doped fibre amplifiers. M. Nakazawa, K. Suzuki, E. Yamada and H. Kubota p1662
Opening the 1·5 μm window in 1·3 μm regenerated systems. J.M. Boggis, A. Lord, W.A. Stallard and P. Cochrane p129
Optical QPSK transmission system with novel digital receiver concept. F. Derr p2177
Transmission and saturation performance of dispersion-shifted distributed erbium fibre. D.L. Williams, S.T. Davey, D.M. Spirit, G.R. Walker and B.J. Ainslie p812
Ultimate limits of subcarrier multiplexed lightwave transmission. K. Alameh and R.A. Minasian p1260

OPTICAL WAVEGUIDE COMPONENTS

Design and fabrication of integrated-optic 8 × 8 star coupler. K. Okamoto, H. Takahashi, S. Suzuki, A. Sugita and Y. Ohmori p774
Design and fabrication of silica-based integrated-optic 1 × 128 power splitter. H. Takahashi, Y. Ohmori and M. Kawachi p2131
Nd^{3+}-doped glass waveguide amplifier at 1·054 μm. H. Aoki, E. Ishikawa and Y. Asahara p2351
Optimisation of $LiNbO_3$ BOA waveguide switches operating at 1·3 μm. A. McGuire, A.P. Thomas and R.C. Booth e547

OPTICAL WAVEGUIDES

0·5 W CW diffraction-limited-beam operation from high-efficiency resonant-optical-waveguide diode-laser arrays. L.J. Mawst, D. Botez, M. Jansen, T.J. Roth, C. Tu and C. Zmudzinksi p1586
1·5 W diffraction-limited-beam operation from resonant-optical-waveguide (ROW) array. L.J. Mawst, D. Botez, M. Jansen, T.J. Roth and J. Rozenbergs p369
Birefringence control and dispersion characteristics of silicon oxynitride optical waveguides. J. Aarnio, P. Heimala, M. Del Giudice and F. Bruno p2317
Channel optical waveguides directly written in glass with an electron beam. J. Bell and C.N. Ironside p448
Effective index method for generalised waveguide dispersion characteristics analysis of optical channel waveguides. T.K. Lim and H. Melchior p917
Efficient electroabsorption in InGaAsP/InGaAsP MQW optical waveguide. E. Bigan, A. Ougazzaden, F. Huet, M. Carré, A. Carenco and A. Mircea p1607
Explicit formulas for cutoff values of TE modes on symmetric dielectric slab waveguide with Kerr-like permittivity. Z. Chen, H. Lai and X. Chen p21
Ferroelectric-domain inversion induced by SiO_2 cladding for $LiNbO_3$ waveguide SHG. M. Fujimura, T. Suhara and H. Nishihara p1207
Index profile of proton-exchanged waveguides in lithium niobate using cinnamic acid. E.Y.B. Pun, K.K. Loi and P.S. Chung p1282
Influence of field shape change in nonlinear fibre couplers. A. Ankiewicz and G.-D. Peng p1880
Low loss singlemode optical waveguides with large cross-section in silicon-on-insulator. J. Schmidtchen, A. Splett, B. Schüppert, K. Petermann and G. Burbach p1486
Monolithic integration of singlemode AlGaAs optical waveguides at 830 nm with GaAs E/D-MESFETs using planar multifunctional epistructure (PME) approach. S.D. Mukherjee, J.D. Skogen, M.K. Hibbs-Brenner, C.T. Sullivan, E.L. Kalweit and R.A. Walterson p2281
Optical waveguide sensor using evanescent wave excitation of fluorescent dye in sol–gel glass. B.D. MacCraith, V. Ruddy, C. Potter, B. O'Kelly and J.F. McGilp p1247
Photoinduced refractive-index changes in TiO_2-doped silica optical waveguides on silicon substrate. Y. Hibino, M. Abe, T. Kominato and Y. Ohmori p2294
Planar 1/8 splitter in glass by photoresist masked silver film ion exchange. P. Pöyhönen, S. Honkanen, A. Tervonen, M. Tahkokorpi and J. Albert p1319
Polymer channel waveguides with low loss at 1·3 μm. S. Imamura, R. Yoshimura and T. Izawa p1342
Proton-exchanged waveguides in MgO : $LiNbO_3$ using phosphoric acid. E.Y.B. Pun, K.K. Loi and P.S. Chung p168
S-bends using offsets in fibre-compatible K^+–Na^+ ion-exchanged glass waveguides. J.J.G.M. van der Tol, J.W. Verhoof, M.B.J. Diemeer and E.C.M. Pennings p379
Scaling rules for glass based planar optical waveguides made by field assisted ion diffusion. M.C. Page, R. Oven and D.G. Ashworth p2073 e2300
Scattering losses in single and double heterostructure semiconductor optical rib waveguides. R.J. Deri, R.N. Thurston and R.J. Hawkins p483
Silver-film ion-exchanged singlemode waveguides in Er doped phosphate glass. S. Honkanen, S.I. Najafi, P. Poyhonen, G. Orcel, W.J. Wang and J. Chrostowski p2167
TM-type self-guided beams with circular cross-section. Y. Chen and A.W. Snyder p565
Tapered InP/InGaAsP waveguide structure for efficient fibre-chip coupling. G. Müller, B. Stegmüller, H. Westermeier and G. Wenger p1836
Vector spatial soliton: Trapped TM light pattern in planar geometry. Y. Chen p380

OPTICS

1·2 ps pulses from passively mode-locked laser diode pumped Er-doped fibre ring laser. M. Zirngibl, L.W. Stulz, J. Stone, J. Hugi, D. DiGiovanni and P.B. Hansen p1734
38·2 dB amplification at 1·31 μm and possibility of 0·98 μm pumping in Pr^{3+}-doped fluoride fibre. Y. Miyajima, T. Sugawa and Y. Fukasaku p1706
9 dB gain improvement of 1300 nm optical amplifier by amplified spontaneous emission suppressing fibre design. A. Bjarklev, T. Rasmussen, J.H. Povlsen, O. Lumholt, K. Rottwitt, S.D. Petersen and C.C. Larsen p1701
All-optical polarisation switch with long low-birefringence fibre. P. Ferro, M. Haelterman, S. Trillo, S. Wabnitz and B. Daino p1407
Automatic optical-loss compensation with Er-doped fibre amplifier. H. Okamura p2155
Continuously stable selfoscillation of silicon cantilever microresonators. Y.J. Rao and B. Culshaw p1697
Control of optical fibre taper shape. R.P. Kenny, T.A. Birks and K.P. Oakley p1654
Dual wavelength pulse generation using mode-locked erbium-doped fibre ring laser. J.B. Schlager, S. Kawanishi and M. Saruwatari p2072
Effect of amplifier spacing on four-wave mixing in multichannel coherent communications. D.G. Schadt p1805
Electrically tunable, diode-pumped erbium-doped fibre ring laser with fibre Fabry–Perot etalon. J.L. Zyskind, J.W. Sulhoff, J. Stone, D.J. DiGiovanni, L.W. Stulz, H.M. Presby, A. Piccirilli and P.E. Pramayon p1950
Er^{3+}-doped multicomponent glass core fibre amplifier pumped at 1·48 μm. M. Ohashi and K. Shiraki p2143
Explicit finite difference vectorial beam propagation method. Y. Chung, N. Dagli and L. Thylén p2119
Generation of transform limited gain-switched DFB-LD pulses < 6 ps with linear fibre compression and spectral window. K. Iwatsuki, K. Suzuki and S. Nishi p1981
High gain (21 dB) packaged semiconductor optical amplifiers. R. Boudreau, R. Morrison, R. Sargent, R. Holmstrom, W. Powazinik, E. Meland, E. Wilmot and J. LaCourse p1845
High speed and high density wavelength multichannel butt-jointed DBR lasers. F. Delorme, S. Slempkes, D. Mathoorasing and J.C. Bouley p1969
High-performance fibre Fabry–Perot filters. J. Stone and L.W. Stulz p2239
Highly efficient Er-doped fibre amplifiers pumped in 660 nm band. M. Horiguchi, M. Shimizu, M. Yamada, K. Yoshino and H. Hanafusa p2319
Laser diode pumped Pr^{3+}-doped and Pr^{3+}-Yb^{3+}-codoped fluoride fibre amplifiers operating at 1·3 μm. Y. Ohishi, T. Kanamori, J. Temmyo, M. Wada, M. Yamada, M. Shimizu, K. Yoshino, H. Hanafusa, M. Horiguchi and S. Takahashi p1995
Laser torquemeter: immunity to memory quantisation noise. T.H. Wilmshurst, S.J. Rothberg and N.A. Halliwell p2037
Measurements on competition between carrier-induced and thermally-induced wavelength tuning in ridge waveguide DBR lasers. H. Sundaresan and I.D. Henning p1897
Millimetre wave phase reversal integrated optical modulator in fin line. C.D. Watson and M.G.F. Wilson p2059
Miniature high performance fibre loop reflector. K.P. Oakley, N.M. O'Sullivan, C.D. Hussey and T.A. Birks p2334
Mode-locked erbium fibre laser with wavelength selection by means of fibre Bragg grating reflector. R.P. Davey, R.P.E. Fleming, K. Smith, R. Kashyap and J.R. Armitage p2087
Modelocked Cr^{3+} : $LiSr_{0.8}Ca_{0.2}AlF_6$ laser producing 150 fs pulses. P. Li Kam Wa, B.H.T. Chai and A. Miller p2350
Nd^{3+}-doped glass waveguide amplifier at 1·054 μm. H. Aoki, E. Ishikawa and Y. Asahara p2351
Novel photonic device using nonlinear corner-bend structure. W.-C. Chang, S.-F. Liu and W.-S. Wang p2190
Optically pumped surface-emitting DFB GaInAsP/InP lasers with circular grating. C. Wu, M. Svilans, M. Fallahi, T. Makino, J. Glinski, C. Maritan and C. Blaauw p1819
Photoelectric instability in optical fibre resulting in spontaneous second harmonic generation. M.I. Dyakonov and A.S. Furman p1429
Preservation of polarisation orthogonality of counterpropagating waves through dichroic birefringent optical media: proof and application. M.O. van Deventer p1538
Reduction of spatial hole burning by singlephase modulator in linear Nd^{3+} fibre laser. H. Sabert, A. Koch and R. Ulrich p2176
Simple method for producing quasiderivative signal of Fabry–Perot resonance. A. Yoshizawa, H. Tsuchida and T. Iwasaki p2222
Simultaneous achievement of low insertion loss, high contrast and low operating voltage in asymmetric Fabry–Perot reflection modulator. K.-K. Law, M. Whitehead, J.L. Merz and L.A. Coldren p1863 e1989
Singlemode diode-pumped tunable erbium-doped fibre laser with linewidth less than 5·5 kHz. J.L. Zyskind, J.W. Sulhoff, Y. Sun, J. Stone, L.W. Stulz, G.T. Harvey, D.J. DiGiovanni, H.M. Presby, A. Piccirilli, U. Koren and R.M. Jopson p2148
Solitary waves in nonlinear media with gain and loss. Y. Chen p1985 e2300
Steering operation of optical beam scanner with semiconductor waveguides. K. Moriki, Y. Ohnishi, T. Hattori and K. Iga p450
Tapered InP/InGaAsP waveguide structure for efficient fibre-chip coupling. G. Müller, B. Stegmüller, H. Westermeier and G. Wenger p1836
Thulium-doped monomode fluoride fibre laser broadly tunable from 2·25 to 2·5 μm. R.M. Percival, S.F. Carter, D. Szebesta, S.T. Davey and W.A. Stallard p1912
Ultrafast all-optical switching in $Al_{0.18}Ga_{0.82}As$ directional coupler in 1·55 μm spectral region. J.S. Aitchison, A.H. Kean, C.N. Ironside, A. Villeneuve and

G.I. Stegeman p1709
Upconversion pumped green lasing in erbium doped fluorozirconate fibre. T.J. Whitley, C.A. Millar, R. Wyatt, M.C. Brierley and D. Szebesta p1785
Wide-angle fibre optic imaging arrays for vision and display system applications. B. Moslehi, W. Parkyn, P. Harvey, D. Zaleta and P. Soltan p1022
Widely tunable narrow linewidth erbium doped fibre ring laser. H. Schmuck, Th. Pfeiffer and G. Veith p2117

OPTOELECTRONICS

10 Gbit/s optical front end using Si-bipolar preamplifier IC, flipchip APD, and slant-end fibre. H. Hamano, T. Yamamoto, Y. Nishizawa, Y. Oikawa, H. Kuwatsuka, A. Tahara, K. Suzuki and A. Nishimura p1602
1 × 16 lithium niobate optical switch matrix with integral TTL compatible drive electronics. A.C. O'Donnell and N.J. Parsons p2367
50 GHz InGaAs edge-coupled *pin* photodetector. D. Wake, T.P. Spooner, S.D. Perrin and L.D. Henning p1073
8·2 GHz bandwidth monolithic integrated optoelectronic receiver using MSM photodiode and 0·5 μm recessed-gate AlGaAs/GaAs HEMTs. V. Hurm, J. Rosenzweig, M. Ludwig, W. Benz, M. Berroth, A. Huelsmann, G. Kaufel, K. Koehler, B. Raynor and J. Schneider p734
AlGaAs/AlAs QW modulator for 6328 Å operation. B. Pezeshki, S.M. Lord, T.B. Boykin, B.L. Shoop and J.S. Harris Jun p1971
All-optical remote gain switching in Er-doped fibre amplifiers. M. Zirngibl p1164
Balanced polarisation diversity receiver using hybrid assembly techniques for optical coherent multichannel systems. J. Hankey, J. Urquhart, A.J. Moseley, C. Edge, M.J. Wale, M. Owen and S.J. Pike p1935
Bit-error rate for a lightwave communication system incorporating an erbium-doped fibre amplifier. T. Li and M.C. Teich p598
Correlation between impact ionisation, recombination and visible light emission in GaAs MESFETs. E. Zanoni, S. Bigliardi, M. Manfredi, A. Paccagnella, P. Pisoni, P. Telaroli, C. Tedesco and C. Canali p770
Design and fabrication of monolithically integrated DFB laser-wavelength duplexer transceivers for TPON/BPON access links. P.J. Williams, R.G. Walker, P.M. Charles, R. Ogden, A.K. Wood, N. Carr and A.C. Carter p809
Dry etching process for fabrication of optoelectronic gratings in III-V substrates. A.S. Gozdz, J.A. Shelburne III, R.S. Robinson and C.C. Chang p2270
Experimental gain and saturation performance of GaAs/AlGaAs SCH quantum well travelling wave optical amplifier. C. Tombling, T. Saitoh, Y. Suzuki and H. Tanaka p1374
Frequency locking of semiconductor laser using PSK modulated signal. M. Levesque, N. Cyr, M. Têtu and P. Tremblay p2238
Generation of transform limited gain-switched DFB-LD pulses < 6 ps with linear fibre compression and spectral window. K. Iwatsuki, K. Suzuki and S. Nishi p1981
High contrast, low-voltage, symmetric-selfelectro-optic effect device (S-SEED). R.J. Grindle, J.E. Midwinter and J.S. Roberts p2327
High sensitivity fibre preamplifier receiver for multichannel applications. C.G. Joergensen, B. Mikkelsen, T. Durhuus, K.E. Stubkjaer, J.A. van den Berk, C.F. Pedersen and C.C. Larsen p2153
High-performance fibre Fabry–Perot filters. J. Stone and L.W. Stulz p2239
High-speed and low-driving-voltage InGaAs/InAlAs multiquantum well optical modulators. I. Kotaka, K. Wakita, K. Kawano, M. Asai and M. Naganuma p2162
High-speed monolithic coherent optical receiver integrated on InP substrate. N. Yasuoka, T. Sanada, H. Hamaguchi, M. Makiuchi, T. Mikawa, A. Kuramata, O. Wada and R.J. Deri p2020
Integratable, high speed buried ridge DFB lasers fabricated on semi-insulating substrates. P.M. Charles, G.G. Jones, P.J. Williams, R.M. Ash, P.H. Fell and A.C. Carter p700
Integrated Nd:MgO:$LiNbO_3$ FM mode-locked waveguide laser. E. Lallier, J-P. Pocholle, M. Papuchon, Q. He, M.De Micheli, D.B. Ostrowsky, C. Grezes-Besset and E. Pelletier p936
Low threshold current lateral injection lasers on semi-insulating substrates fabricated using Si impurity-induced disordering. C.A. Beyler, S.G. Hummel, Q. Chen, J.S. Osinski and P.D. Dapkus p1372
Low voltage GaAs on Si reflection modulators with 51% reflection change. P.B. Barnes, A.A. Stride, G. Parry, J.S. Roberts and C. Button p2283
Microwave performance of nonlinear optoelectronic microstrip ring resonator. G.K. Gopalakrishnan, B.W. Fairchild, C.L. Yeh, C.S. Park, K. Chang, M.H. Weichold and H.F. Taylor p121
Monolithically integrated four-channel receiver array using diffused InGaAs JFET technology. C. Mansfield, D.J. Newson, P. Birdsall, J.A. Quayle, R. Young, M.D.A. MacBean and R.P. Merrett p1632
Optical method for detecting biphase coded signals. C.D. Reeve and A.W. Houghton p1379
Optical self-routing switch using vertical to surface transmission electrophotonic devices with transmission light amplification function. T. Numai, I. Ogura, H. Kosaka, M. Sugimoto, Y. Tashiro and K. Kasahara p605
Optoelectronic transversal filter. B.E. Swekla and R.I. MacDonald p1769
Organic patch sensor for electro-optic measurement of electrical signals in integrated circuits. T. Nagatsuma, M. Yaita, M. Shinagawa, M. Amano and Y. Shuto p932
Picosecond electro-optic probing of high-speed integrated circuits using external GaAs tip. T. Nagatsuma and M. Shinagawa p1904
Picosecond lifetime measurement in semiconductor by optoelectronic autocorrelation. K. Grigoras, A. Krotkus and A. Deringas p1024
Picosecond pulses (2 ps) from hybrid mode-locked AlGaAs QW lasers with integrated active waveguide cavities. L.R. Brovelli and H. Jäckel p1104
Planar integration of joint transform correlators. A.K. Ghosh, M.B. Lapis and D. Aossey p871
Polarisation independent 1 × 16 and 1 × 32 lithium niobate optical switch matrices. A.C. O'Donnell p2349
Polarisation-independent semiconductor optical amplifier module using twin GRIN rod lenses. T. Toyonaka, S. Tsuji, M. Haneda and Y. Ono p941
Scalar saddle point principle for optoelectronics. P.C. Kendall and M.N. Jones p735
Self configuring optical fibre-tap/photodetector modulator with very high photodetection efficiency and high extinction ratio. R.J. Grindle and J.E. Midwinter p2170
Simple measurement of carrier induced refractive-index change in InGaAsP ridge waveguide structures. G. Schraud, G. Müller, L. Stoll and U. Wolff p297
Simple method for producing quasiderivative signal of Fabry–Perot resonance. A. Yoshizawa, H. Tsuchida and T. Iwasaki p2222
Stable-locking bandwidth in sidemode injection locked semiconductor lasers. J.-M. Luo and M. Osiński p1737
Strained multiquantum well double heterostructure optoelectronic switch and associated heterojunction FET. P.W. Cooke, P.A. Evaldsson, G.W. Taylor and B. Tell p1095
Tapered InP/InGaAsP waveguide structure for efficient fibre-chip coupling. G. Müller, B. Stegmüller, H. Westermeier and G. Wenger p1836
Y laser with 38 nm tuning range. W. Idler, M. Schilling, D. Baums, G. Laube, K. Wünstel and O. Hildebrand p2268
Y-fed directional coupler with weighted coupling. H. Okayama and M. Kawahara p1947

OSCILLATION

Fast method for accurate prediction of fibre laser oscillation wavelength. A.O. Nielsen, J.H. Povlsen, A. Bjarklev, O. Lumholt, T.P. Rasmussen and K. Rottwitt p1644
Storage of optical pulse data sequences in loop memory using multistable oscillations. T. Aida and P. Davis p1544

OSCILLATORS

-Simulations for improved heterostructure Gunn oscillator based on transit region doping variations. R. Vaidyanathan and R.P. Joshi p1555
Active patch antenna element with diode tuning. P.M. Haskins, P.S. Hall and J.S. Dahele p1846
AlGaAs/GaAs based HEMTs, inverters and ring oscillators with InGaAs and AlGaAs etch-stop layers. F. Ren, S.J. Pearton, R.F. Kopf, S.N.G. Chu and S.S. Pei p1175
Automatic gain controlled oscillating amplifier. P.M. Smith, P.J. Edmonson and C.K. Campbell p1919
Coherent operation of 2-D monolithically integrated master oscillator power amplifier. R. Parke, D.F. Welch and D. Mehuys p2097
Current-mode oscillators using single current follower. J.-J. Chen, C.-C. Chen, H.-W. Tsao and S.-I. Liu p2056
Fully monolithic 22 GHz-band AlGaAs/GaAs HBT oscillator. N. Hayama, J. Shimizu and K. Honjo p1862
High power, diffraction-limited emission from monolithically integrated active grating master oscillator power amplifier. D. Mehuys, D.F. Welch, R. Parke, R.G. Waarts, A. Hardy and D. Scifres p492
High-speed voltage-controlled oscillator with quadrature outputs. A.W. Buchwald and K.W. Martin p309
Impact of local oscillator intensity noise on performance of coherent subcarrier multiplexing system using common local oscillator (CLO). Y.-H. Lee and H.-W. Tsao p2133
Integrated uniplanar antenna mixer and local oscillator. A. Nešić p56
Low noise, tunable GaAs bipolar oscillator. A. Dearn, G. Parkinson and P.J. Topham p1300
Optical tuning of monolithic $In_{0.53}Ga_{0.47}As/In_{0.52}Al_{0.48}As/InP$ modulation-doped field-effect transistor oscillators at X and R band. R. Lai, P.K. Bhattacharya and T. Brock p1056
Resonant-tunnelling diode oscillator using a slot-coupled quasioptical open resonator. K.D. Stephan, E.R. Brown, C.D. Parker, W.D. Goodhue, C.L. Chen and T.C.L.G. Sollner p647
State variable sinusoidal switched-current oscillator. A. Kobayashi, Y. Horio and S. Nakamura p489
Switched-capacitor broadband noise generator for CMOS VLSI. A. Rodriguez-Vázquez, M. Delgado, S. Espejo and J.L. Huertas p1913
Synthesis of first-order active-R allpass networks and their application in sinusoidal oscillator design. J.V. Vosper p53
Systematic generation of OTA-C sinusoidal oscillators. R. Senani, M.P. Tripathi, D.R. Bhaskar and B.A. Kumar e100
Wide-range oscillator with digital control for digital waveform generation. G.M. Brown and B. Szabados p1780
X-band GaAs MESFET oscillator for cryogenic application at 4·2 K. E. Vollmer and P. Gutmann p2210

PN JUNCTIONS

Measurement method of *pn* junction depth using light spectrum response. H. Yie p2196

PARALLEL PROCESSING

Capacitive-access CAM cell and its read/write circuit implementation. S.M.S. Jalaleddine and L.G. Johnson p876
High performance VLSI architecture for division and square root. S.E. McQuillan, J.V. McCanny and R.F. Woods p19
Inexact match associative memory cell. W.R. Daasch p1623
New bit-serial systolic multiplier for GF(2^m) using irreducible trinomials. M. Diab and A. Poli p1183
O(n) matrix multiplication algorithm for hypercube machines. C.H. Chang p2398
SYMFONET: interconnect technology for multinode computing. R.J. Westmore p697
Variable sensitivity photodetector for dynamic optical neurochip. Y. Koshiba, K. Hara, K. Mitsunaga and K. Kyuma p1216

PATTERN RECOGNITION

Applications of moment invariants to neurocomputing for pattern recognition. Y. Li p587
Facial feature estimation for model-based coding. V. Seferidis p2226
MOS implementation of winner-take-all network with application to content-addressable memory. L.G. Johnson and S.M.S. Jalaleddine p957
Neural network architecture for circular features extraction in binary patterns. J.R. Kroh, T.S. Durrani and R. Chapman p1879
New neural network for pattern recognition. Y.H. Shi and Z.Y. He p1353
Syntactic pattern recognition of sampled data signals. R.J. Hamilton, R.D. Pringle and P.M. Grant p2213

PHASE MODULATION

Optical method for detecting biphase coded signals. C.D. Reeve and A.W. Houghton p1379
Uniform CNR design rules for coherent subcarrier multiplexed system with multioctave frequency allocation. Y.-H. Lee, J. Wu and H.-W. Tsao p600

PHASE SHIFTERS

Antenna-coupled microwave phase shifters using GaAs varactors. P.M. Backhouse, N. Apsley, C. Rogers and S. Jones p491

PHASE-LOCKED LOOPS

1064 nm, 565 Mbit/s PSK transmission experiment with homodyne receiver using synchronisation bits. B. Wandernoth p1692

Chaos in phase-locked loops. J.H. Chou, Y.H. Chu and S. Chang p750
Electro-optic sampling of optoelectronically phase-locked 10·0 GHz microwave signals using semiconductor laser diodes. H.-H. Wu, C.-S. Chang and C.-L. Pan p1622

PHASE-SHIFT KEYING

Bit error probability for fading DPSK signals in microcellular land mobile radio systems. A. Kegel, H.J. Wesselman and R. Prasad p1647
Design of differential QPSK modulator. R.S. Bokulic p1185
Differential encoder for QPSK systems. R. Gross p1256
Error probability of coherent PSK and FSK systems with multiple cochannel interferences. Chen Jinguang and Lin Sheng p640

PHOTOCONDUCTING DEVICES

Electro-optic sampling of optoelectronically phase-locked 10·0 GHz microwave signals using semiconductor laser diodes. H.-H. Wu, C.-S. Chang and C.-L. Pan p1622

PHOTODETECTORS

50 GHz InGaAs edge-coupled *pin* photodetector. D. Wake, T.P. Spooner, S.D. Perrin and L.D. Henning p1073
GaAs/$Al_xGa_{1-x}As$ quantum well infra-red photodetectors with cutoff wavelength $\lambda_c = 14{\cdot}9\,\mu m$. A. Zussman, B.F. Levine, M. Hong and J.P. Mannaerts p1512
GaInAs/InP *pin* photodetectors integrated with glass waveguides. A. Yi-Yan, W.K. Chan, C.K. Nguyen, T.J. Gmitter, R. Bhat and J.L. Jackel p87
High performance planar GaAs/$Al_{0.3}Ga_{0.7}As$ Schottky barrier photodetector grown on Si substrates by molecular beam epitaxy. Y.C. Tzeng, S.S. Li, C.K. Peng and Y.C. Kao p2379
Monolithic integration of photodetector with vertical cavity surface emitting laser. G. Hasnain, K. Tai, Y.H. Wang, J.D. Wynn, K.D. Choquette, B.E. Weir, N.K. Dutta and A.Y. Cho p1630
Planar InP/InGaAs avalanche photodetector with gain-bandwidth product in excess of 100 GHz. L.E. Tarof p34 e478
Self configuring optical fibre-tap/photodetector modulator with very high photodetection efficiency and high extinction ratio. R.J. Grindle and J.E. Midwinter p2170
Ultralow dark current GaAlAs/GaAs MSM photodetector. A. Aboudou, J.P. Vilcot, D. Decoster, A. Chenoufi, E. Delhaye, P. Boissenot, C. Varin, F. Deschamps and I. Lecuru p793
Variable sensitivity photodetector for dynamic optical neurochip. Y. Koshiba, K. Hara, K. Mitsunaga and K. Kyuma p1216

PHOTODIODES

Broadband receiver module for 10 Gbit/s optical transmission. K. Kitamura, K. Ito, H. Matsuda, T. Kaneko and M. Haneda p1435
Double junction AlInAs/GaInAs multiquantum well avalanche photodiodes. Y. Le Bellégo, J.P. Praseuth and A. Scavennec p2228
Excitonic absorption in InGaP/GaAs multiquantum wells. G.A. Patrizi, H.Y. Lee, M.J. Hafich, P. Silvestre and G.Y. Robinson p2363
Fabrication of InP/InGaAs photodiodes for high bit rate communication by reactive ion etching. M. Seto, R.J. Deri, L.M. Schiavone, R. Bhat, J.B.D. Soole, H. Schumacher, N.C. Andreadakis and M. Koza p911
GaInAsSb/GaSb *pn* photodiodes for detection up to 2·4 μm. E. Tournié, J.-L. Lazzari, E. Villemain, A. Joullié, L. Gouskov, M. Karim and I. Salesse p1237
High performance planar GaAs/$Al_{0.3}Ga_{0.7}As$ Schottky barrier photodetector grown on Si substrates by molecular beam epitaxy. Y.C. Tzeng, S.S. Li, C.K. Peng and Y.C. Kao p2379
High quantum efficiency, long wavelength InP/InGaAs microcavity photodiode. A.G. Dentai, R. Kuchibhotla, J.C. Campbell, C. Tsai and C. Lei p2125
High-speed monolithic InP/InGaAs *pin*-photodiode array with small pitch. N. Emeis, W. Kunkel, L. Hoffmann and G. Ebbinghaus p1550
InGaAs/InP-photodiodes with dark current limited by generation-recombination. F. Buchali, R. Behrendt and G. Heymann p235
InP/InGaAsP/InGaAs SAGM avalanche photodiode with delta-doped multiplication region. R. Kuchibhotla, J.C. Campbell, C. Tsai, W.T. Tsang and F.S. Choa p1361
Planar InP/InGaAs avalanche photodetector with gain-bandwidth product in excess of 100 GHz. L.E. Tarof p34 e478
Wavelength dependence of temporal response of high-speed GaInAs/AlInAs superlattice photodiodes. C. Minot, H. Le Person, J.F. Palmier, M. Allovon and J.C. Esnault p96

PHOTOELECTRIC DEVICES

Monolithically integrated planar front-end photoreceivers with 0·25 μm gate pseudomorphic $In_{0.60}Ga_{0.40}As/In_{0.52}Al_{0.48}As/InP$ modulation-doped field-effect transistors. R. Lai, P.K. Bhattacharya, D. Pavlidis and T. Brock p364

PHOTOLUMINESCENCE

New measurement technique for waveguide losses based on photoluminescence. M.R. Amersfoort, D. Grützmacher, M.K. Smit and Y.S. Oei p1152

PHOTOMULTIPLIERS

Microchannel plate image intensifier electron dynamics in magnetic field. P.A. Ramos, S.W. Allison, G.T. Gillies and R.C. Ritter p1636

PHOTOVOLTAIC CELLS

Enhanced spectral response in laser diffused *pn* junction solar cells. S.I. Salih and T.M. McGinnity p354

PIEZOELECTRIC DEVICES AND MATERIALS

Distributed-period structures for suppression of spurious modes in 1–3 piezocomposites. B.A. Auld and J.A. Hossack p1284

PIEZOELECTRIC TRANSDUCERS

Distributed-period structures for suppression of spurious modes in 1–3 piezocomposites. B.A. Auld and J.A. Hossack p1284

PLASMAS

Enhanced oxygen plasma stripping of P^+-implanted negative resist by hydrogen plasma pretreatment: temperature effects. W-A. Loong and M.-S. Yen p1079
Enhancement of CF_4 and O_2 reactive ion etching resistance of poly(butene-1 sulfone) by N_2 plasma pretreatment. W.-A. Loong and H.-W. Chang p541
Rectifying effects on TiPtAu/*p*-InGaAsP contacts induced by plasma processes. R. Audino, G. Autore, E. Dovio and A. Piccirillo p2359

POLARISATION

Broadband reset-free automatic polarisation controller. F. Heismann and M.S. Whalen p377
Characterisation of surface plasmon wave polarising devices. S. Carey and W. Johnstone p988
Chiroshield: A Salisbury/Dallenbach shield alternative. D.L. Jaggard, N. Engheta and J. Liu e547
Computation of susceptance for thick meander-line polariser. S. Uckun and T. Ege p2076
Digital polarisation modulation with multiquantum well asymmetric Fabry–Perot structures. P.J. Bradley, R. Calvani, B. Costa and M. Whitehead p983
Distinction between rain and ice depolarisation by calculation of differential attenuation and phase shift. R.A. Hogers, M.H.A.J. Herben and G. Brussaard p1752
Efficient TM-pass multilayer planar optical waveguide polariser. A. Yu Agapov, A.P. Gorobetz, V.M. Shevtsov and P.M. Zhitkov p1804
Experimental investigation of polarisation-induced fading in interferometric fibre sensor arrays. A.D. Kersey, M.J. Marrone and A. Dandridge p562
Novel frequency-selective twist polariser. W.M. Shi, W.X. Zhang and M.G. Zhao p2110
Polarisation characteristics of quantum well vertical cavity surface emitting lasers. C.J. Chang-Hasnain, J.P. Harbison, L.T. Florez and N.G. Stoffel p163
Polarisation control for surface emitting lasers. M. Shimizu, T. Mukaihara, F. Koyama and K. Iga p1067
Polarisation-independent semiconductor optical amplifier module using twin GRIN rod lenses. T. Toyonaka, S. Tsuji, M. Haneda and Y. Ono p941
Polarisation-induced visibility limits in interferometric fibre-optic sensor arrays. Y.S. Boger and M. Tur p622
Polarisation-insensitive fibre optic Michelson interferometer. A.D. Kersey, M.J. Marrone and M.A. Davis p518
Possible mechanism for increase of extraordinary refractive index in proton-exchanged $LiNbO_3$ waveguides. W. Hou, W. Hua, Y. Zhang and H. Tan p755
Preservation of polarisation orthogonality of counterpropagating waves through dichroic birefringent optical media: proof and application. M.O. van Deventer p1538
Rain attenuation statistics on 30 GHz terrestrial link. A. Aresu, F. Barbaliscia, A. Martellucci and P. Migliorini p2168
Relationship between polarisation dispersion measurements before and after installation of optical cables. A. Galtarossa, M. Schiano, C.G. Someda, B. Daino, F. Matera, R. Zaninello and F. Bergamin p595
Ultrafast polarisation switching in ridge-waveguide laser diodes. A. Klehr, A. Bärwolff, R. Müller, M. Voß, J. Sacher, W. Elsässer and E.O. Göbel p1680
Visibility limits in fibre-optic Michelson interferometer with birefringence compensation. M.J. Marrone and A.D. Kersey p1422

POWER-SUPPLY CIRCUITS

New optimal predictive current mode control technique for bilevel quantum series resonant convertors. J.H. Ko, S.S. Hong and M.J. Youn p412
New output voltage control technique using dynamic model for quantum series resonant convertor. S.S. Hong, J.H. Ko, K.Y. Cho, D.S. Oh and M.J. Yoon p545
Switched optimal predictive current control technique for improved quantum boost SRC. H.B. Shin, J.H. Ko and M.J. Youn p2322

PRINTED CIRCUITS

Electrolytic processes for etching and metal deposition towards nanometre quantum structures. A. Grüb, R. Richter and H.L. Hartnagel p306

PULSE GENERATION

500 MHz programmable pulse-train generator. O. Saether, B.E. Flaten and O. Aaserud p1227
All-electronic free-space picosecond pulse generation and detection. D.W. Van Der Weide, J.S. Bostak, B.A. Auld and D.M. Bloom p1412
Anomalous temporal response of gain guided surface emitting lasers. N.K. Dutta, L.W. Tu, G. Hasnain, G. Zydzik, Y.H. Wang and A.Y. Cho p208
Dual wavelength pulse generation using mode-locked erbium-doped fibre ring laser. J.B. Schlager, S. Kawanishi and M. Saruwatari p2072
Fibre compression of chirped optical pulses from tunable DBR laser diode. A. Galvanauskas, A. Krotkus, J.A. Tellefsen, Jun, M. Öberg and B. Broberg p2394
Gain-switched laser-amplifier photonic integrated circuit generating 590 mW peak power optical pulses. P.B. Hansen, G. Raybon, U. Koren, B.I. Miller, M.G. Young, R.M. Jopson, J.D. Evankow and C.A. Burrus p1778
Generation of transform limited gain-switched DFB-LD pulses < 6 ps with linear fibre compression and spectral window. K. Iwatsuki, K. Suzuki and S. Nishi p1981
Modelocked $Cr^{3+}:LiSr_{0.8}Ca_{0.2}AlF_6$ laser producing 150 fs pulses. P. Li Kam Wa, B.H.T. Chai and A. Miller p2350
New method for generation of coherent ultrashort optical pulses. C. Liao, H.-Y. Zhang and Y.-Z. Gao p550
Optical fibre dispersion measurement using colour centre laser. A. Benner p1748
Passively mode-locked erbium-doped fibre laser with nonlinear fibre mirror. S.J. Frisken, C.A. Telford, R.A. Betts and P.S. Atherton p887
Short pulse generation by electrical gain switching of vertical cavity surface emitting laser. J. Lin, J.K. Gamelin, S. Wang, M. Hong and J.P. Mannaerts p1956

PULSE-CODE MODULATION

Neural net nonlinear prediction for speech data. R.M. Dillon and C.N. Manikopoulos p824

QUANTISATION

Directionally classified image vector quantisation using Walsh Hadamard subspace distortion. L.M. Po and C.K. Chan p1964
Fast weight-ordered search algorithm for image vector quantisation. S.-W. Ra and J.-K. Kim p2081
In-loop quantisation of reflection coefficients. C.-F. Chan and K.-W. Law

p2015
Laser torquemeter: immunity to memory quantisation noise. T.H. Wilmshurst, S.J. Rothberg and N.A. Halliwell p2037
Maximum descent method for image vector quantisation. C.-K. Ma and C.-K. Chan p1772
Predictive partial search algorithm for vector quantisation. J. Ngwa-Ndifor and T. Ellis p1722

QUANTUM OPTICS

Finite well-thickness effects on nonlinear optical response of quantum well structures. G.P. Bava and P. Debernardi p603
Increased optical saturation intensities in GaInAs multiple quantum wells by the use of AlGaInAs barriers. T.H. Wood, T.Y. Chang, J.Z. Pastalan, C.A. Burrus, Jun, N.J. Sauer and B.C. Johnson p257
Low threshold current laser emitting at 637 nm. D.F. Welch, T. Wang and D.R. Scifres p693
Narrow-linewidth strained-layer 1·5 μm multiquantum well distributed feedback lasers. S.J. Wang, Y. Twu, T. Tanbun-Ek, R.A. Logan, N.K. Dutta and A.B. Piccirilli p625
Optical switching in an asymmetric Fabry–Perot with high contrast ratio and very low insertion loss. J.F. Heffernan, M.H. Moloney, J. Hegarty and J.S. Roberts p659

QUARTZ OSCILLATORS

Experimental study of SAW quartz cuts with low sensitivity to dynamical thermal effects. E. Bigler and S. Ballandras p1343

QUEUING THEORY

New policy for multiqueue systems with finite queue size. Y.H. Fan p1434
Optimum architecture for input queuing ATM switches. H. Obara p555

RADAR

Asymptotic average radar cross-section of flat plate. T. Tenoux p742
Complementary sets of chirp-like polyphase sequences. B.M. Popović p254
Determining mixer diode positions of microwave Doppler with-sense module. B.D. Milovanović, V.D. Stanković and S.T. Djordjević p1163
Direction-of-arrival estimation by using generalised minimum-norm approach. A.B. Gershman p1485
Doppler optimised mismatched filters. A.J. Zejak, E. Zentner and P.B. Rapajić p558
Estimation of number of natural resonances of transient signal using E-pulse technique. A. Gallego, A. Medouri and M. Carmen Carrión p2253
Experimental characterisation of diffuse multipath at 10·2 GHz using method of multiple windows. A. Drosopoulos and S. Haykin p798 e1311
Extracting real samples from complex sampled data. D. Iverson p1976
High-resolution direction finding using eigendecomposition based estimators and joint estimation strategy. A.B. Gershman p2308
Merit factor of Chu and Frank sequences. M. Antweiler and L. Bömer d777
Modelling spatially correlated K-distributed clutter. B.C. Armstrong and H.D. Griffiths p1355
New technique for low-angle radar tracking. T. Lo, T. Wong and J. Litva p529
Scattering by thin wire mesh using finite-difference time-domain method. J.J. Boonzaaier and C.W.I. Pistorius p1583
Single frequency efficient estimator. A. Ferrari, J. Menez and G. Alengrin p1939
Stepped chirp phase errors in spaceborne altimeters. T. Bucciarelli and G. Fedele p46
Tracking a manoeuvring target with correlated measurement noises by manoeuvre detection method. J.-A. Guu and C.-H. Wei p265
Tracking multiple targets in 2-D angular space using sensor array. K.W. Lo p1478

RADAR CROSS-SECTIONS

Asymptotic average radar cross-section of flat plate. T. Tenoux p742
Chiroshield: A Salisbury/Dallenbach shield alternative. D.L. Jaggard, N. Engheta and J. Liu e547
Reflections in anechoic chambers in 100–200 GHz range. A. Lehto, J. Tuovinen and A. Räisänen p1708
Spherical chiroshield. D.L. Jaggard, J.C. Liu and X. Sun e392

RADAR EQUIPMENT

Stepped chirp phase errors in spaceborne altimeters. T. Bucciarelli and G. Fedele p46

RADIATION AND RADIATION EFFECTS

Backfire/endfire radiation performance of quadrifilar helical antennas. N. Terada and K. Kagoshima p1108
Radiation from transistor in microstrip line. P.S. Hall and P.M. Haskins p986 e1310

RADIO LINKS

Throughput analysis of CDMA with DPSK modulation and diversity in indoor Rician fading radio channels. H.S. Misser, C.A.F.J. Wijffels and R. Prasad p601
Throughput analysis of channel load sense multiple access with overload detection protocol in spread spectrum packet radio networks. D.M. Lim and H.S. Lee p1809
Wideband radio channel characteristics in Alpine regions. B. Nemsic, J.-P. de Weck, H. Bühler and T. Ergoth p717

RADIOCOMMUNICATION

Asynchronous CT2/CAI telepoint separation requirements. J.E. Button p48
Field trial evaluation of linear modulation single sideband. C. Baden, A.P. Jenkins and J.G. Gardiner p1250
LINC transmitter. S.A. Hetzel, A. Bateman and J.P. McGeehan p844
Simulation of CDMA system performance with feedback power control. S. Ariyavisitakul and L.F. Chang p2127

RADIOMETERS

High resolution imaging by supersynthesis radiometer (SSR) for the passive microwave remote sensing of the earth. K. Komiyama p389

RADIOWAVE PROPAGATION

Angle-of-arrival estimation in presence of multipath. A. Drosopoulos and S. Haykin p2273
Comparison of indoor propagation channel characteristics at different frequencies. H. Zaghloul, M. Fattouche, G. Morrison and D. Tholl p2077
Diffraction of VLF radio waves by polar ice caps. J.R. Wait e1496
Diffraction of VLF radio waves by polar ice caps. J.R. Wait p1030 e1496
Effects of incoherent scattering on microwave and millimetre wave communications through rain. T. Oguchi p759
Estimation of phase differential of signals transmitted over fading channels. M. Fattouche and H. Zaghloul p1823
Explicit multiple building diffraction attenuation function for mobile radio wave propagation. S.R. Saunders and F.R. Bonar p1276 e1599
Frequency response and path loss measurements of indoor channel. H. Zaghloul, G. Morrison and M. Fattouche p1021
High selectivity occurrence of 900 MHz urban mobile radio channel. A.J. Levy, J.C. Bic and J.P. Rossi p2256
Indoor wideband radiowave propagation measurements at 1·3 GHz and 4·0 GHz. D.A. Hawbaker and T.S. Rappaport e191
New prediction method of cloud attenuation. E. Salonen and S. Uppala p1106
Observed negative correlation between an interfering signal on a transhorizon path and wanted signals on terrestrial line-of-sight paths. R.L. Olsen and C. Bilodeau p332
Path loss prediction in multifloored buildings at 914 MHz. S.Y. Seidel and T.S. Rappaport p1384
Rain attenuation statistics on 30 GHz terrestrial link. A. Aresu, F. Barbaliscia, A. Martellucci and P. Migliorini p2168
Simple method of multipath delay difference detection for $\pi/4$-shift QPSK. S. Yoshida, G.L. Tan, H. Zhou, A. Hirai and T. Takeuchi p1027
Year-to-year variability and worst-month statistics of long-term rain rate measurements in Germany. F. Dintelmann and H. Trommer p617

RECEIVERS

10 Gbit/s optical front end using Si-bipolar preamplifier IC, flipchip APD, and slant-end fibre. H. Hamano, T. Yamamoto, Y. Nishizawa, Y. Oikawa, H. Kuwatsuka, A. Tahara, K. Suzuki and A. Nishimura p1602
8·2 GHz bandwidth monolithic integrated optoelectronic receiver using MSM photodiode and 0·5 μm recessed-gate AlGaAs/GaAs HEMTs. V. Hurm, J. Rosenzweig, M. Ludwig, W. Benz, M. Berroth, A. Huelsmann, G. Kaufel, K. Koehler, B. Raynor and J. Schneider p734
Balanced polarisation diversity receiver using hybrid assembly techniques for optical coherent multichannel systems. J. Hankey, J. Urquhart, A.J. Moseley, C. Edge, M.J. Wale, M. Owen and S.J. Pike p1935
Balanced tuned receiver front end with low noise and high common mode rejection ratio. N.G. Jensen, E. Bødtker, G. Jacobsen and S. Sørensen p234
Bandwidth efficient operation of phase diversity reception compared with heterodyne reception. R. Langenhorst, W. Pieper, M. Eiselt, D. Rohde and H.G. Weber p1601
High performance balanced heterodyne front end using special fibre coupling scheme. H. Rodler, C. Wahl, G. Gaukel and F. Auracher p249
Impact of laser linewidth on performance of heterodyne single filter FSK system with optical preamplifier. R. Gangopadhyay and S.P. Majumder p1927
Monolithically integrated four-channel receiver array using diffused InGaAs JFET technology. C. Mansfield, D.J. Newson, P. Birdsall, J.A. Quayle, R. Young, M.D.A. MacBean and R.P. Merrett p1632
Monolithically integrated planar front-end photoreceivers with 0·25 μm gate pseudomorphic $In_{0.60}Ga_{0.40}As/In_{0.52}Al_{0.48}As/InP$ modulation-doped field-effect transistors. R. Lai, P.K. Bhattacharya, D. Pavlidis and T. Brock p364
Performance of selfsynchronising direct conversion DECT receiver. G. Schultes, E. Bonek, A.L. Scholtz and W. Herzog p1715

RECURSIVE FILTERS

Improved systolic realisation of second-order recursive digital filter. J. Huang p1299

REFLECTOR ANTENNAS

Efficient design of shaped reflectors using successive projections. G.T. Poulton and S.G. Hay p2156
Experimental verification of electronically controlled reconfigurable reflector antenna. Zhou Hai, P.J.B. Clarricoats and A. Monk p64
High efficiency and low sidelobe shaped Cassegrain twist reflector antenna with four-horn triple-mode monopulse feed. D.C. Chang, Y.C. Chen and M.S. Yuan p284
Minimisation of reflection coefficient at feed of radome-covered reflector antenna by chiral device. H. Cory and I. Rosenhouse p2345
Null synthesis for shaped reflector antennas. A.D. Monk, P.J.B. Clarricoats and Zhou Hai p291

REFRACTION

Explicit expression for Brewster angles of isotropic-bi-isotropic interface. I.V. Lindell, A.-H. Sihvola and A.J. Viitanen p2163

REFRACTIVE INDEX PROFILES

Broadband microwave dielectric properties of lithium niobate. W.M. Robertson, G. Arjavalingam and G.V. Kopcsay p175
Measurement of pump induced refractive index change in erbium doped fibre amplifier. S.C. Fleming and T.J. Whitley p1959 e2197
Simple measurement of carrier induced refractive-index change in InGaAsP ridge waveguide structures. G. Schraud, G. Müller, L. Stoll and U. Wolff p297

RELIABILITY

Reliable InGaAs quantum well lasers at 1·1 μm. S.L. Yellen, R.G. Waters, P.K. York, K.J. Beernink and J.J. Coleman p552

REMOTE SENSING

High resolution imaging by supersynthesis radiometer (SSR) for the passive microwave remote sensing of the earth. K. Komiyama p389

REPEATERS

Novel wideband 2–18 GHz clock extraction circuit for optical transmission systems. C.D. O'Shea p2324

RESISTANCE (ELECTRIC)

Current–voltage characteristics of bend in mesoscopic wire. T.J. Thornton, S. Yamada, M. Yamamoto and K. Aihara p1177
Linear tunable resistance circuit using gallium arsenide MESFETs. C. Toumazou and D.G. Haigh p655

RESISTORS

Novel electronically-controlled floating resistors using MOS transistors operating in saturation. Z. Wang p188

RESONANCE

Accurate and simple design of cylindrical dielectric resonators for microwave integrated circuits. A.E. Centeno and G.B. Morgan p1753
Estimation of number of natural resonances of transient signal using E-pulse technique. A. Gallego, A. Medouri and M. Carmen Carrión p2253

RESONATORS

1 GHz low loss coupled resonator filter using surface skimming bulk waves and Bleustein-Gulyaev waves. I.D. Avramov p414
Accurate and simple design of cylindrical dielectric resonators for microwave integrated circuits. A.E. Centeno and G.B. Morgan p1753
Accurate determination of resonance frequency and intrinsic Q factor for optically-controlled dielectric resonators. A.S. Rong, Y. Cao and Z.L. Sun p1466
Calculation of resonances of microwave resonator loaded with inhomogeneous dielectric layer. M.P. Mladenovic, A.S. Marincic and B.D. Milovanovic p2215
Continuously stable selfoscillation of silicon cantilever microresonators. Y.J. Rao and B. Culshaw p1697
Electrostatic activation of micromechanical resonators. R.M.A. Fatah p166
Er-doped fibre ring resonator applied to optical spectrum analyser with less than 100 kHz resolution. H. Okamura and K. Iwatsuki p1047
Extended spectral domain approach for analysis of lossy cylindrical dielectric resonators. Ao Sheng Rong and Cao Yang p486
Formation of moiré grating in core of germanosilicate fibre by transverse holographic double exposure method. S. Legoubin, E. Fertein, M. Douay, P. Bernage, P. Niay, F. Bayon and T. Georges p1945
Higher order modes in dielectric resonators. N. Loechel p1340
Low-loss ring resonators fabricated from silicon based integrated optics technologies. J. Bismuth, P. Gidon, F. Revol and S. Valette p722
Microwave performance of nonlinear optoelectronic microstrip ring resonator. G.K. Gopalakrishnan, B.W. Fairchild, C.L. Yeh, C.S. Park, K. Chang, M.H. Weichold and H.F. Taylor p121
Oliner models for quasioptical resonator to rectangular waveguide coupling elements. V.N. Rodionova, A.Ya. Slepyan and G.Ya. Slepyan p1427
Optical differential amplification in nonlinear fibre ring resonator. J. Capmany, M.A. Muriel and F.J. Fraile-Pelaez p1810
Reduction of spatial hole burning by singlephase modulator in linear Nd^{3+} fibre laser. H. Sabert, A. Koch and R. Ulrich p2176
Rigorous analysis of circular disc resonators/radiators with imperfect conductors and substrates. K. Araki and M. Nagashima p2061
Search for intrinsic three-phase resonator. B.Z. Kaplan, R. Rabinovici and D. Yardeni p822
Surface emitting second harmonic generation in vertical resonator. R. Lodenkamper, M.M. Fejer and J.S. Harris p1882
Temperature dependence of resonant frequency in all-fibre optically addressed silicon microresonator sensors. Y.J. Rao, D. Walsh, D. Uttamchandani and B. Culshaw p934

SAMPLED-DATA SYSTEMS

Class AB switched-current memory for analogue sampled data systems. N.C. Battersby and C. Toumazou p873
Picosecond optical sampling using four-wave mixing in fibre. P.A. Andrekson p1440
Syntactic pattern recognition of sampled data signals. R.J. Hamilton, R.D. Pringle and P.M. Grant p2213
Wave analogue filters using switched-current techniques. A. Rueda, A. Yúfera and J.L. Huertas p1482

SATELLITE LINKS

Digital frequency error detectors for OQPSK satellite modems. J. Ahmad, T.G. Jeans and B.G. Evans p1821
Distinction between rain and ice depolarisation by calculation of differential attenuation and phase shift. R.A. Hogers, M.H.A.J. Herben and G. Brussaard p1752
Experimental verification of electronically controlled reconfigurable reflector antenna. Zhou Hai, P.J.B. Clarricoats and A. Monk p64
Frequency assignment for satellite multilevel SCPC systems. Yuk-Hong Lau and D.J. Skellern p294
Frequency assignment with minimum intermodulation noise for satellite SCPC systems. Y.-H. Lau and D.J. Skellern p79
New prediction method of cloud attenuation. E. Salonen and S. Uppala p1106

SATELLITE RELAY SYSTEMS

LMSS propagation model based on a European experiment using MARECS satellite. A. Benarroch and L. Mercader p298

SCATTERING

Application of OSRC oscillator operator of third order to electromagnetic scattering from conducting or dielectric cylinder. Z.-N. Cheng and W.-X. Zhang p806
Developing experimental models for propagation and scattering of EM waves in electrically large ducts. R. Bansal, E. DiCarlo and D. Jordan p1951
Effects of Bragg diffraction on stimulated backward Brillouin scattering. C.A.S. de Oliveira and C.K. Jen p780
Effects of incoherent scattering on microwave and millimetre wave communications through rain. T. Oguchi p759
Experimental characterisation of diffuse multipath at 10·2 GHz using method of multiple windows. A. Drosopoulos and S. Haykin p798 e1311
Impact of stimulated Brillouin scattering on fibre Raman amplifiers. M.F. Ferreira, J.F. Rocha and J.L. Pinto p1576
Iterative determination of complex permittivity and SAR distribution of two-dimensional biological body. J. Wang and T. Takagi p112
New method for scattering of electromagnetic waves from embedded conductive cylinder. J. Yang and Z. Wang p420
Novel frequency-selective twist polariser. W.M. Shi, W.X. Zhang and M.G. Zhao p2110
Proposal for stimulated Brillouin scattering suppression by fibre cabling. N. Yoshizawa, T. Horiguchi and T. Kurashima p1100
Scattering by thin wire mesh using finite-difference time-domain method. J.J. Boonzaaier and C.W.I. Pistorius p1583
Static scattering in filled nematic: new liquid crystal display technique. R. Eidenschink and W.H. de Jeu p1195
Stimulated Brillouin scattering ring resonator laser for SBS gain studies and microwave generation. D. Culverhouse, K. Kalli and D.A. Jackson p2033
Wavelength dependences of Brillouin frequency shifts of optical fibres in 1·55 μm wavelength region. T.-O. Tsun, A. Wada and R. Yamauchi p1764

SEMICONDUCTOR DEVICES AND MATERIALS

-Simulations for improved heterostructure Gunn oscillator based on transit region doping variations. R. Vaidyanathan and R.P. Joshi p1555
0·23 μm gate length MODFETs on InAlAs/InGaAs/InP heterostructure grown by MOVPE. M. Tong, A. Ketterson, K. Nummila, I. Adesida, L. Aina and M. Mattingly p1426
10 Gbit/s AlGaAs/GaAs HBT driver IC for lasers or lightwave modulators. R.K. Montgomery, F. Ren, C.R. Abernathy, T.R. Fullowan, R.F. Kopf, P.R. Smith, S.J. Pearton, P. Wisk, J. Lothian, R.N. Nottenburg, T.V. Nguyen and F. Bosch p1827
10 Gbit/s D flipflop using AlInAs/InGaAs HBTs. B. Jalali, P.R. Smith, R.N. Nottenburg, M. Banu, D.A. Humphrey, R.K. Montgomery, D. Sivco and A.Y. Cho p1314
10 Gbit/s high sensitivity-low error rate decision circuit implemented with C-doped AlGaAs/GaAs HBTs. R.K. Montgomery, P.R. Smith, F. Ren, T.R. Fullowan, C.R. Abernathy, R.F. Kopf, S.J. Pearton, J. Lothian, P. Wisk and R.N. Nottenburg p976
121 GHz resonant-tunnelling hot electron transistors having new collector barrier structure. T. Mori, T. Adachihara, M. Takatsu, H. Ohnishi, K. Imamura, S. Muto and N. Yokoyama p1523
14 GHz low-power highly sensitive static frequency divider using quantum well AlGaAs/GaAs/AlGaAs FET technology. P. Wennekers, A. Heulsmann, G. Kaufel, K. Koehler, B. Raynor and J. Schneider p1173
15 GHz f_{max} microwave silicon *pnp* transistors with single-crystal emitters fabricated with simple four mask process. F. Hébert, D. Millicker, J. Wholey, C. Snapp and A. Garcia p1886
1·3 μm MQW semiconductor optical amplifiers with high gain and output power. G. Sherlock, C.P. Seltzer, D.J. Elton, S.D. Perrin, M.J. Robertson and D.M. Cooper p165
1·5 μm lithography Si- and Si/SiGe-bipolar transistors for ICs operating at 15 Gbit/s and above. H.-U. Schreiber and J.N. Albers p1465 e1888
20 Gbit/s AlGaAs/GaAs-HBT 2 : 1 selector and decision ICs. H. Hamano, T. Ihara, I. Amemiya, T. Futatsugi, K. Ishii and H. Endoh p662
25 GHz f_t/27 GHz f_{max} transistors for C-bipolar technology. S. Ratanaphanyarat, J.B. Kuang, S.F. Chu, W. Rausch, M.J. Saccamango and M. Smadi p1224
28 Gbit/s selector IC using AlGaAs/GaAs HBTs. H. Ichino, Y. Yamauchi, T. Nittono, K. Nagata and O. Nakajima p636
Accurate measurement technique for base transit time in heterojunction bipolar transistors. S. Lee, A. Gopinath and S.J. Pachuta p1551
AlGaAs/GaAs *pnp* heterojunction bipolar transistor with carbon-doped collector and emitter grown by atomic layer epitaxy. T. Henderson, B. Bayraktaroglu, S. Hussien, A. Dip, P. Colter and S.M. Bedair p692
AlGaAs/GaAs based HEMTs, inverters and ring oscillators with InGaAs and AlGaAs etch-stop layers. F. Ren, S.J. Pearton, R.F. Kopf, S.N.G. Chu and S.S. Pei p1175
$Al_{0.25}Ga_{0.75}As/In_{0.25}Ga_{0.75}As$ pseudomorphic MODFET with high DC and RF performance. J. Dickmann, A. Geyer, H. Daembkes, H. Nickel, R. Lösch and W. Schlapp p501
Amorphous carbon/crystalline silicon high voltage heterojunction diode prepared by photochemical vapour deposition. S.B. Hwang, Y.K. Fang, K.H. Chen, C.R. Liu and L.C. Kuo p2043
Analytical modelling of two-dimensional effects on current gain in small-geometry bipolar transistors. N. Rinaldi, A.G.M. Strollo and P. Spirito p1744
Application of Nicollian–Reisman model to negative point-to-plane corona oxidation of silicon. M.R. Madani and P.K. Ajmera p1352
AuBe ohmic contacts to *p*-InGaAlAs formed by rapid thermal annealing. T.C. Shen, J. Reed, Z.F. Fan, G.B. Gao and H. Morkoç p2187
Barrier height enhancement of *n*-$In_{0.53}Ga_{0.47}As$ Schottky diodes grown by MOCVD technique. P. Kordoš, M. Marso, R. Meyer and H. Lüth p1759
Base transit time for SiGe-base heterojunction bipolar transistors. G.-B. Gao and H. Morkoç p1408
Calculation of lateral distribution of interface traps along MIS channel. A.K. Henning and J.A. Dimauro p1445
Carbon and tin doped *npn* and *pnp* AlGaAs/GaAs HBTs grown by MOMBE. F. Ren, C.R. Abernathy, S.J. Pearton, T.R. Fullowan, J.R. Lothian, P.W. Wisk, Y.K. Chen, W.S. Hobson and P.R. Smith p2391
Carrier screening of electric field and electroabsorption saturation in InGaAs–GaAs quantum well structure. M.K. Chin, S. Niki, H.H. Wieder and W.S.C. Chang p2310
Colliding pulse phase detector for picosecond resolution timing measurement. A. Black, E. Ozbay, B.A. Auld and D.M. Bloom p1620
Comparison of theoretical and experimental 60 GHz silicon IMPATT diode performance. J.P. Banerjee, J.F. Luy and F. Schäffler p1049
Complementary vertical bipolar transistor process using high-energy ion implantation. F.W. Ragay, A.A.I. Aarnink and H. Wallinga p2141
Conduction type control of Si-doped GaAs on (311)A oriented substrate by V/III flux ratio in MBE. T. Takamori, K. Watanabe and T. Fukunaga p729
Control of gate leakage in InAlAs/InGaAs HEMTs. D.J. Newson, R.P. Merrett and B.K. Ridley p1592
Cryogenic operation of GaAs bipolar transistors with inverted base doping. P.E. Dodd, M.L. Lovejoy, M.R. Melloch and M.S. Lundstrom p860 e1219
Crystalline *p*MOS inverter using amorphous thin film transistor as active load. H.-C. Lin, W.J. Sah and S.-C. Lee p2180
Current–voltage characteristics of bend in mesoscopic wire. T.J. Thornton, S. Yamada, M. Yamamoto and K. Aihara p1177
DC and RF characteristics of InAlAs/InGaAs dual-gate TEGFETs. F. Gueissaz, R. Houdré and M. Ilegems p631
Delineation of junctions using secco and periodic etches. J.C. Carter and A.G.R. Evans p2135
Demonstration of high performance heterojunction field effect transistor in InAlAs/InGaAs/InAlGaAs/InP material system. R.S. Mand and J.G. Simmons p1453
Dependence of base crowding effect on base doping and thickness for *Npn* AlGaAs/GaAs HBTs. W. Liu and J.S. Harris Jr p2048
Determining intrinsic noise parameters of 0·25 μm gate pseudomorphic HEMT.

R.I. Taylor, D.M. Brookbanks and A.J. Holden p1923
Direct interferometric measurements of quantum-confined Stark effect in InAs/GaAs short period strained-layer superlattice MQWs. S.D. Koehler, E.M. Garmire, M.H. Jupina, T.C. Hasenberg and A.R. Kost p2303
Double junction AlInAs/GaInAs multiquantum well avalanche photodiodes. Y. Le Bellégo, J.P. Praseuth and A. Scavennec p2228
Effect of photodecomposed-PH_3 treatment on PN/InP metal–insulator–semiconductor diodes. A. Uda, T. Sugino, H. Ito and J. Shirafuji p2315
Electrolytic processes for etching and metal deposition towards nanometre quantum structures. A. Grüb, R. Richter and H.L. Hartnagel p306
Epitaxial liftoff of AlAs/GaAs double barrier resonant tunnelling diodes. A.J. Tsao, V.K. Reddy and D.P. Neikirk p484
Exact resolution of coupled Schrödinger–Poisson equation: application to accurate determination of potential profile in HEMTs. M. Benabbas, B. Marir, D. Bajon and H. Baudrand p1848
Excitonic absorption in InGaP/GaAs multiquantum wells. G.A. Patrizi, H.Y. Lee, M.J. Hafich, P. Silvestre and G.Y. Robinson p2363
Experimental comparison of base recombination currents in abrupt and graded AlGaAs/GaAs heterojunction bipolar transistors. W. Liu p2115
Experimental determination of magnitude of selfheating and its influence on breakdown in silicon-on-insulator transistors. L.J. McDaid, S. Hall, W. Eccleston and J.C. Alderman p2006
Experimental gain and saturation performance of GaAs/AlGaAs SCH quantum well travelling wave optical amplifier. C. Tombling, T. Saitoh, Y. Suzuki and H. Tanaka p1374
First digital optical switch based on InP/GaInAsP double heterostructure waveguides. J.A. Cavaillès, M. Renaud, J.F. Vinchant, M. Erman, P. Svensson and L. Thylén p699
First microwave characterisation of LP-MOCVD grown GaInP/GaAs self-aligned HBT. S.L. Delage, M.A. di Forte-Poisson, H. Blanck, C. Brylinski, E. Chartier and P. Collot p253
GaAs vertical JFET operated in bipolar mode (GaAs BiMFET). G. Schweeger, G. Cocorullo, F.G. Della Corte, H.L. Hartnagel, G. Vitale and P. Spirito p1097
GaAs vertical *pin* diode using MeV implantation. M.V. Rao, W. Kruppa, H.B. Dietrich, S.C. Binari and J.B. Boos p2265
GaAs/AlGaAs HEMT structures with multiquantum well channels. T. Hunter-Hager, W. Klein, R. Kempter, G. Böhm, G. Tränkle and G. Weimann p1035
GaAs/$Al_xGa_{1-x}As$ quantum well infra-red photodetectors with cutoff wavelength $\lambda_c = 14{\cdot}9\,\mu m$. A. Zussman, B.F. Levine, M. Hong and J.P. Mannaerts p1512
GaAs/GaAlAs multiquantum well waveguides for all-optical switching at $1{\cdot}55\,\mu m$. H.K. Tsang, R.S. Grant, R.V. Penty, I.H. White, J.B.D. Soole, E. Colas, H.P. LeBlanc, N.C. Andreadakis and W. Sibbett p1993
GaInAsSb/GaSb *pn* photodiodes for detection up to $2{\cdot}4\,\mu m$. E. Tournié, J.-L. Lazzari, E. Villemain, A. Joullié, L. Gouskov, M. Karim and I. Salesse p1237
Gallium arsenide solid state travelling wave amplifier at 8 GHz. J.J. Thompson, M.R.S. Taylor, A.M. Thompson, S.P. Beaumont and N. Apsley p516
High contrast, low-voltage, symmetric-selfelectro-optic effect device (S-SEED). R.J. Grindle, J.E. Midwinter and J.S. Roberts p2327
High dynamic range microwave FET. P.K. Ikalainen and L.C. Witkowski p345
High performance W-band InAlAs-InGaAs-InP HEMTs. D.C. Streit, K.L. Tan, R.M. Dia, A.C. Han, P.H. Liu, H.C. Yen and P.D. Chow p1149
High performance W-band low-noise pseudomorphic InGaAs HEMT MMIC amplifiers. K.L. Tan, H. Wang, D.C. Streit, P.H. Liu, R.M. Dia, A.C. Han, D. Garske, S. Bui, J.K. Liu, T.S. Lin, G.S. Dow, P.D. Chow and J. Berenz p1166
High performance planar GaAs/$Al_{0{\cdot}3}Ga_{0{\cdot}7}As$ Schottky barrier photodetector grown on Si substrates by molecular beam epitaxy. Y.C. Tzeng, S.S. Li, C.K. Peng and Y.C. Kao p2379
High quantum efficiency, long wavelength InP/InGaAs microcavity photodiode. A.G. Dentai, R. Kuchibhotla, J.C. Campbell, C. Tsai and C. Lei p2125
High temperature operation of α-silicon carbide buried-gate junction field-effect transistors. G. Kelner, S. Binari, M. Shur and J. Palmour p1038
High-efficiency reflection modulators using lifted-off GaAs/AlGaAs layers bonded to gold on silicon. G.W. Yoffe p1579
High-speed monolithic InP/InGaAs *pin*-photodiode array with small pitch. N. Emeis, W. Kunkel, L. Hoffmann and G. Ebbinghaus p1550
High-speed, InGaAsP/InP multiple quantum well, $1{\cdot}55\,\mu m$ singlemode modulator. F. Devaux, E. Bigan, B. Rose, M. McKee, F. Huet and M. Carré p1926
Improved breakdown of AlInAs/InGaAs heterojunction bipolar transistors. T.R. Fullowan, S.J. Pearton, R.F. Kopf, Y.K. Chen and F. Ren p2340
InAlAs/InGaAs/InP HEMTs with high breakdown voltages using double-recess gate process. J.B. Boos and W. Kruppa p1909
InP/InGaAsP/InGaAs SAGM avalanche photodiode with delta-doped multiplication region. R. Kuchibhotla, J.C. Campbell, C. Tsai, W.T. Tsang and F.S. Choa p1361
$In_{0{\cdot}52}Al_{0{\cdot}48}As/In_{0{\cdot}53}Ga_{0{\cdot}47}As$ lateral resonant tunnelling transistor. A.C. Seabaugh, J.N. Randall, Y.-C. Kao, J.H. Luscombe and A.M. Bouchard p1832
Integrated *npn/pnp* GaAs/AlGaAs HBTs grown by selective MBE. D.K. Umemoto, J.R. Velebir, K.W. Kobayashi, A.K. Oki and D.C. Streit p1517
Investigation of indium doping and incorporation in AlGaAs/GaAs double-barrier resonant tunnelling structures. J.S. Wu, K.H. Chang, C.P. Lee, C.Y. Chang, D.G. Liu and D.C. Liou p428
Ion beam milling-induced damage in AlGaAs/GaAs/AlGaAs single quantum well. V. Swaminathan, G.J. Przybylek, G. Guth and M.T. Asom p2320
Latch up in physically merged bipolar-MOS BICMOS structures. S. Liang, L.Z. Hou, T. Gu and C.A.T. Salama p1124
Long incubation times for selective epitaxial growth of silicon using silane only. G.J. Parker, J.M. Bonar and C.M.K. Starbuck p1595
Low cost miniature thermoelectric generator. J.H. Kiely, D.V. Morgan, D.M. Rowe and J.M. Humphrey p2332
Low noise, tunable GaAs bipolar oscillator. A. Dearn, G. Parkinson and P.J. Topham p1300
Low voltage GaAs on Si reflection modulators with 51% reflection change. P.B. Barnes, A.A. Stride, G. Parry, J.S. Roberts and C. Button p2283
MBE grown *Npn* AlGaAs/GaAs bipolar transistors with C *p* doping by electron cyclotron resonance source activated methane. G. Liu, D. Mui, S. Fang, G. Gao and H. Morkoç p465
MQW amplifier optical bistability. D.A.H. Mace, M.J. Adams and C. Seltzer p1363
Measurement and analysis of small-signal drain admittance in SOS MOSFETs. R. Howes and W. Redman-White p2290
Measurement of negative differential conductance to 40 GHz for vertically integrated resonant tunnelling diodes. P. Mounaix, P. Bedu, D. Lippens and E. Barbier p1358
Millimetre wave performance of carbon-doped-base AlGaAs/GaAs HBTs. L.W. Yang, P.D. Wright, P.R. Brusenback, S.K. Ko and A. Kaleta p1145 e1311
Monolithic integration of singlemode AlGaAs optical waveguides at 830 nm with GaAs E/D-MESFETs using planar multifunctional epistructure (PME) approach. S.D. Mukherjee, J.D. Skogen, M.K. Hibbs-Brenner, C.T. Sullivan, E.L. Kalweit and R.A. Walterson p2281
Monolithically integrated four-channel receiver array using diffused InGaAs JFET technology. C. Mansfield, D.J. Newson, P. Birdsall, J.A. Quayle, R. Young, M.D.A. MacBean and R.P. Merrett p1632
Multiply-graded InGaAlAs heterojunction bipolar transistors. J.C. Vlcek and C.G. Fonstad p1213
Nearly bird's beak-free local oxidation technology for controlled dielectric formation in deep silicon trenches. K. Shenai p637
Negative differential conductance in GaAs/AlAs superlattices. M. Hadjazi, A. Sibille, J.F. Palmier and F. Mollot p1101
New CMOS NIC-based MOSFET-C filters. S.-I. Liu, H.-W. Tsao, J. Wu, M.-O. Yang and J.-H. Tsay p772
New GaAs n^+-p-$\delta(n^+)$-i-$\delta(p^+)$-i-n^+ switching device grown by molecular beam epitaxy. W.-C. Liu and C.-Y. Sun p1704
New method for extraction of effective channel length in submicron MOSFETs. K. Iniewski and C.A.T. Salama p508
New pseudomorphic N^-/N^+ GaAs/InGaAs/GaAs power HEMT with high breakdown voltages. T. Sonoda, S. Sakamoto, N. Kasai, S. Tsuji, M. Yamanouchi, S. Takamiya and Y. Kashimoto p1303
New two-dimensional approach for determining depletion layer profile in field-effect transistors. B. Marir, M. Benabbas, D. Bajon and H. Baudrand p1765
Novel and accurate compact DC model of GaAs MESFET for large-signal computer calculations. S.A. Ibrahim, S. El-Rabaie and N.M. El-Rabaie p609
Novel pseudomorphic InGaAs/AlGaAs SISFET and HIGFET structures for direct coupled FET logic. R.T. Carline, C.G. Morton and D.W.E. Allsopp p1617
Numerical technique to calculate eigenenergies and eigenstates of quantum wells with arbitrary potential profile. D.P. Davé p1735 e2300
Observation of ballistic transport in hot-electron vertical FET spectrometer using ultrathin planar-doped barrier launcher. T. Daniels-Race, K. Yamasaki, W.J. Schaff and L.F. Eastman p1144
Observation of reversible collapse phenomena in GaAs MESFETs at cryogenic temperatures. D.V. Camin, G. Pessina and E. Previtali p2297
Operation of submicrometre lateral bipolar transistors down to 10 K. T.S. Jayadev, J.C.S. Woo, S. Verdonckt-Vandebroek and S.S. Wong p998
Optical switching in an asymmetric Fabry–Perot with high contrast ratio and very low insertion loss. J.F. Heffernan, M.H. Moloney, J. Hegarty and J.S. Roberts p659
Optical tuning of monolithic $In_{0{\cdot}53}Ga_{0{\cdot}47}As/In_{0{\cdot}52}Al_{0{\cdot}48}As/InP$ modulation-doped field-effect transistor oscillators at X and K band. R. Lai, P.K. Bhattacharya and T. Brock p1056
Periodically screened coplanar waveguides on semiconductors. Y.R. Kwon, M.C. Le and K.S. Champlin p1665
Photo/EB hybrid exposure process for T-shaped gate superlow-noise HEMTs. K. Hosogi, N. Nakano, H. Minami, T. Katoh, K. Nishitani, M. Otsubo, M. Katsumata and K. Nagahama p2011
Photovoltaic gate biasing edge effect in GaAs MESFETs. D. Abbott, S. Cui, K. Eshraghian and E. McCabe p1900
Platinum silicide fusion bonding. M.S. Ismail and R.W. Bower p1153
Polarised modes of semiconductor rib waveguides. T.M. Benson, P.C. Kendall, M.A. Matin and M.S. Stern p1488
Problems in designing thin-film accumulation-mode *p*-channel SOI MOSFETs for CMOS digital circuit environment. D. Flandre p1280 e1599
Properties of Si_3N_4/Si_xGe_{1-x} metal–insulator–semiconductor capacitors. J. Reed, D.S.L. Mui, W. Jiang and H. Morkoç p1826
Q and V band power InGaAs MESFETs. G.W. Wang and Y. Chang p488
Reactive ion etching of II-VI semiconductors using a mixture of methane and hydrogen. M.A. Foad, A.P. Smart, W. Watt, C.M. Sotomayor Torres and C.D.W. Wilkinson p73
Rectifying effects on TiPtAu/*p*-InGaAsP contacts induced by plasma processes. R. Audino, G. Autore, E. Dovio and A. Piccirillo p2359
Repression and speed improvement of photogenerated carrier induced refractive nonlinearity in InGaAs/InGaAsP quantum well waveguide. R.V. Penty, H.K. Tsang, I.H. White, R.S. Grant, W. Sibbett and J.E.A. Whiteaway p1447
Resonant tunnelling diode in MBE-grown delta-doped GaAs. Y.H. Wang, M.P. Houng, H.H. Chen and H.C. Wei p1667
Resonant tunnelling microwave detector diode for power levelling and limiting applications. R.T. Syme, M.J. Kelly, A. Condie and I. Dale p2025
Second harmonic generation in ion-exchanged waveguides of semiconductor microcrystallite-doped glasses. R.L. MacDonald, T.J. Driscoll and N.M. Lawandy p1717
Selective photochemical dry etching of GaAs/AlGaAs and InGaAs/InAlAs heterostructures. M. Kosugi, S. Kuroda, N. Harada and T. Katakami p2113
Self configuring optical fibre-tap/photodetector modulator with very high photodetection efficiency and high extinction ratio. R.J. Grindle and J.E. Midwinter p2170
Selfaligned AlGaAs/GaAs HBT grown by MOMBE. F. Ren, T.R. Fullowan, C.R. Abernathy, S.J. Pearton, P.R. Smith, R.F. Kopf, E.J. Laskowski and J.R. Lothian p1054
Selfaligned InGaAs/InP heterostructure bipolar transistors. A. Feygenson, H. Temkin, W.T. Tsang, L. Yang, R.D. Yadvish and P.F. Scortino, Jun p1116
Short channel effect in thin-film accumulation-mode *p*-channel SOI MOSFETs. P. Smeys, A. Clerix and J.-P. Colinge p970
Short-channels in sub-100 nm GaAs MESFETs. K. Nummila, A.A. Ketterson, S. Caracci, J. Kolodzey and I. Adesida p1519
Si/SiGe modulation doped field-effect transistor with two electron channels. U. König and F. Schäffler p1405
Simple determination of BJT extrinsic base resistance. T. Zimmer, A. Meresse, Ph. Cazenave and J.P. Dom p1895
Steering operation of optical beam scanner with semiconductor waveguides. K. Moriki, Y. Ohnishi, T. Hattori and K. Iga p450
Superluminescent diodes with angled facet etched by chemically assisted ion beam etching. C.-F. Lin p968
Suppression of latch in SOI MOSFETs by silicidation of source. L.J. McDaid, S. Hall, W. Eccleston and J.C. Alderman p1003
Temperature dependence of ionisation coefficients in silicon derived from physical model. J.S. Marsland ?1997 e2399
Thermal characteristics of semiconductor laser phase-locked arrays with diamond film heatsink. Y. Lin and Z. Fang p18
Thermal parameter extraction for bipolar circuit modelling. R.M. Fox and S.-G. Lee p1719
Thermal stress and defect reduction in undercut GaAs on Si substrate. S. Sakai, K. Kawasaki, M. Okada, N. Wada and Y. Shintani p1371
Threshold voltage adjustable GaAs FET for VLSI. C.G. Diskus, K. Lübke, H.W. Lettenmayr, L. Palmetshofer and H.W. Thim p418
Titanium silicide contacts on semiconducting diamond substrates. T.P. Humphreys, J.V. LaBrasca, R.J. Nemanich, K. Das and J.B. Posthill p1515
Tunnel diode with asymmetric spacer-layers for use as microwave detector. R.T. Syme, M.J. Kelly, R.S. Smith, A. Condie and I. Dale p2192
UV assisted growth of 100 Å thick SiO_2 at 550°C. A. Kazor and I.W. Boyd p909

Ultralow specific on resistance UMOSFET with trench contacts for source and body regions realised by selfaligned process. S. Matsumoto, T. Ohno and K. Izumi p1640
Uniform high power nine and 18 element individually addressable laser diode arrays. D.W. Nam, R.R. Craig, D.G. Mehuys and D.F. Welch p464
Upside down silicon camel diodes fabricated by low pressure CVD. G. Schmidt and H. Beneking p1086
Void elimination by lateral gap diffusion in silicon direct bonding (SDB) technology. Q.-Y. Tong, H.-Z. Zhang and M. Qing p288

SEMICONDUCTOR DEVICES AND MATERIALS TESTING

Determining $Si_{1-x}Ge_x$ layer thickness and composition by ellipsometry. T.I. Kamins p451
Direct interferometric measurements of quantum-confined Stark effect in InAs/GaAs short period strained-layer superlattice MQWs. S.D. Koehler, E.M. Garmire, M.H. Jupina, T.C. Hasenberg and A.R. Kost p2303
Measurement method of *pn* junction depth using light spectrum response. H. Yie p2196
Picosecond lifetime measurement in semiconductor by optoelectronic autocorrelation. K. Grigoras, A. Krotkus and A. Deringas p1024

SEMICONDUCTOR DOPING

Enhancement of CF_4 and O_2 reactive ion etching resistance of poly(butene-1 sulfone) by N_2 plasma pretreatment. W.-A. Loong and H.-W. Chang p541
Optimum germanium profile for SiGe base HBTs. S.S. Winterton, B.M. Manning, D.J. Walkey and N.G. Tarr p1337 e1781

SEMICONDUCTOR GROWTH

AlGaInAs/AlGaAs SSQW GRINSCH lasers for the wavelength region between 800 and 870 nm. L. Buydens, P. Demeester, M. Van Ackere and P. Van Daele p618
Carbon and tin doped *npn* and *pnp* AlGaAs/GaAs HBTs grown by MOMBE. F. Ren, C.R. Abernathy, S.J. Pearton, T.R. Fullowan, J.R. Lothian, P.W. Wisk, Y.K. Chen, W.S. Hobson and P.R. Smith p2391
Enhancement of CF_4 and O_2 reactive ion etching resistance of poly(butene-1 sulfone) by N_2 plasma pretreatment. W.-A. Loong and H.-W. Chang p541
Photo/EB hybrid exposure process for T-shaped gate superlow-noise HEMTs. K. Hosogi, N. Nakano, H. Minami, T. Katoh, K. Nishitani, M. Otsubo, M. Katsumata and K. Nagahama p2011
Thermal stress and defect reduction in undercut GaAs on Si substrate. S. Sakai, K. Kawasaki, M. Okada, N. Wada and Y. Shintani p1371

SEMICONDUCTORS

Picosecond lifetime measurement in semiconductor by optoelectronic autocorrelation. K. Grigoras, A. Krotkus and A. Deringas p1024

SEMICONDUCTORS (II-VI)

Reactive ion etching of II-VI semiconductors using a mixture of methane and hydrogen. M.A. Foad, A.P. Smart, W. Watt, C.M. Sotomayor Torres and C.D.W. Wilkinson p73

SEMICONDUCTORS (III-V)

Dry etching process for fabrication of optoelectronic gratings in III-V substrates. A.S. Gozdz, J.A. Shelburne III, R.S. Robinson and C.C. Chang p2270
High quantum efficiency, long wavelength InP/InGaAs microcavity photodiode. A.G. Dentai, R. Kuchibhotla, J.C. Campbell, C. Tsai and C. Lei p2125
Selective photochemical dry etching of GaAs/AlGaAs and InGaAs/InAlAs heterostructures. M. Kosugi, S. Kuroda, N. Harada and T. Katakami p2113

SENSITIVITY

Sensitivity to external feedback for gain-coupled DFB semiconductor lasers. F. Favre p433

SIGNAL GENERATORS

Stimulated Brillouin scattering ring resonator laser for SBS gain studies and microwave generation. D. Culverhouse, K. Kalli and D.A. Jackson p2033
Wide-range oscillator with digital control for digital waveform generation. G.M. Brown and B. Szabados p1780

SIGNAL PROCESSING

-SVD perturbation approach to estimation of bandlimited signal in presence of sample jitter. A.J. Willis p2204
1·5 Gbit/s transmission system using all optical wavelength convertor based on tunable two-electrode DFB laser. P. Pottier, M.J. Chawki, R. Auffret, G. Claveau and A. Tromeur p2183
2-D DCT systolic array implementation. W. Ma p201
Adaptive chirplet representation of signals on time–frequency plane. D. Mihovilovic and R.N. Bracewell p1159
Analysis of samples of wideband signals taken at irregular, sub-Nyquist, intervals. P.C. Bagshaw and M. Sarhadi p1288
Analysis of voiced speech by means of bispectrum. B. Boyanov, S. Hadjitodorov and T. Ivanov p2267
Application of Markov chains to speech recognition. J. Dai, J.E. Tyler and I.G. MacKenzie p2360
Clamping circuit for D or D2-MAC/packet systems using signal digital component. J. Veillard p1790
Class of constrained ARMA models for line enhancement using real-time QR implementation. W.J. Fitzgerald and R. Geere p2230
Comparative analysis between noncanonical LMS and LMS adaptive filtering. W.S. Gan, J.J. Soraghan, R.W. Stewart and T.S. Durrani p947
Computation of LSP parameters from reflection coefficients. C-F. Chan p1773
Direction finding in a multipath environment. D. Madurasinghe p61
Direction-of-arrival estimation by using generalised minimum-norm approach. A.B. Gershman p1485
Directionally classified image vector quantisation using Walsh Hadamard subspace distortion. L.M. Po and C.K. Chan p1964
Doppler optimised mismatched filters. A.J. Zejak, E. Zentner and P.B. Rapajić p558
Efficient input-reordering algorithms for fast DCT. A.N. Skodras and A.G. Constantinides p1973
Efficient pulse compressor for Golay complementary sequences. S.Z. Budišin p219
Efficient realisation of alternating projection algorithm for maximum likelihood direction finding. S.K. Oh and C.K. Un p2290
Estimation of number of natural resonances of transient signal using E-pulse technique. A. Gallego, A. Medouri and M. Carmen Carrión p2253
Extracting real samples from complex sampled data. D. Iverson p1976
Fast algorithm for modulated lapped transform. H.S. Malvar p775
Fast algorithms for computing symmetric/Hermitian matrix–vector products. Z.-J. Mou p1272
Fast calculation of Kalman signal smoother gains. S. Hausman and J. Dunlop p2240
Fast weight-ordered search algorithm for image vector quantisation. S.-W. Ra and J.-K. Kim p2081
Flexible modulus residue number system for complex digital signal processing. N.M. Wigley and G.A. Jullien p1436
Hierarchical image coding via MSE-minimising bilinear approximation. F.G.B. Denatale, G.S. Desoli and D.D. Giusto p2035
High-resolution direction finding using eigendecomposition based estimators and joint estimation strategy. A.B. Gershman p2308
In-loop quantisation of reflection coefficients. C.-F. Chan and K.-W. Law p2015
Iterative autoregressive parameter estimation in presence of additive white noise. W.G. Chung and C.K. Un p1800
Low coherence, interferometric fibre optic vibrometer using novel optical signal processing scheme. K. Weir, W.J.O. Boyle, A.W. Palmer, K.T.V. Grattan and B.T. Meggitt p1658
Median approximating algorithm. S. Fotopoulos and G. Economou p1441
Modelling of sinusoidal function for nonlinear signal processing applications. S. Osowski p642
Moving object extraction from unregistered image sequence. L.L. Le Roux and J.J.D. Van Schalkwyk p2225
Multiplicative complexity of discrete cosine and sine transform. W. Ma p962
Multiplicative complexity of length-2^m two-dimensional discrete cosine transform. W. Ma p966
New frequency transformations for complex digital filters. H. Iwakura p2083
New performance function and variable step size LMS algorithm derived by Karni and Zeng. D.J. Park p2182
Nonlinear filtering of delta modulated signals. S.L. Horianopoulos, V. Anastassopoulos and T. Deliyannis p1078
Optical method for detecting biphase coded signals. C.D. Reeve and A.W. Houghton p1379
Optoelectronic transversal filter. B.E. Swekla and R.I. MacDonald p1769
Postprocessor using fuzzy vector quantiser in HMM-based speech recognition. H.R. Kim and H.S. Lee p1998
Recursive computation of polynomial transform coefficients. W. Philips p2337
Relation of CLSS algorithm to KT and MUSIC methods. X. Yang and M.H. Er p1348
Single frequency efficient estimator. A. Ferrari, J. Menez and G. Alengrin p1939
Solution of generalised multivariable noise cancelling problem. T.J. Moir and H.S. Dabis p1060
Speech scrambling employing adaptive rate sampling. M. Darnell, B. Honary and W. He p1076
Two-dimensional addressing scheme for digital signal processors. S. Srinivasan, A. Singh and S.S. Gill p677
Using quadratic residue arithmetic for computing skew cyclic convolutions. A. Skavantzos p2140
Vector median deblurring filter for colour image restoration. F. Argenti, M. Barni, V. Cappellini and A. Mecocci p1899

SILICON

Application of Nicollian–Reisman model to negative point-to-plane corona oxidation of silicon. M.R. Madani and P.K. Ajmera p1352
Boron redistribution during RTP formation of tungsten disilicide. A. Essaadani, J.C. Dupuy and M. Marjan p1916
High-resolution pressure sensors fabricated by silicon wafer direct bonding. G.S. Chung, S. Kawahito, M. Ishida and T. Nakamura p1098
Microcavities with field emitters sealed by silicon wafer bonding. R. Stengl, H.W. Meul and W. Hönlein p2209
Platinum silicide fusion bonding. M.S. Ismail and R.W. Bower p1153
Si/SiGe modulation doped field-effect transistor with two electron channels. U. König and F. Schäffler p1405
Temperature dependence of ionisation coefficients in silicon derived from physical model. J.S. Marsland p1997 e2399

SIMULATION

-Simulations for improved heterostructure Gunn oscillator based on transit region doping variations. R. Vaidyanathan and R.P. Joshi p1555
Accurate simulation of nonlinear switched capacitors and sampled circuits by harmonic balance and related techniques. J.C. Nallatamby, M. Bridier, M. Prigent and J. Obregon p2364
Analysis of nonlinear circuits with distributed elements using PSPICE. J. Borja, J.I. Alonso and F. Pérez p1651
Equivalent circuit modelling of lossy coupled lines using SPICE software. T. Vu Dinh, B. Cabon and J. Chilo p710
Importance sampling techniques for efficient simulation of stack decoders. K. Ben Letaief and J.S. Sadowsky p593
Novel and accurate compact DC model of GaAs MESFET for large-signal computer calculations. S.A. Ibrahim, S. El-Rabaie and N.M. El-Rabaie p609
Simulation of optical heterodyne single-filter FSK system with line coding. S.P. Majumder and R. Gangopadhyay p563
Simulation of substrate current characteristics of submicron MOSFETs. M. Takeda, J. Frey, Z. Peng and N. Goldsman p144
Tracking multiple targets in 2-D angular space using sensor array. K.W. Lo p1478

SLAB WAVEGUIDES

Exact multilayer waveguide design including absorbing or metal layers. E.K. Sharma, P. Singh and P.C. Kendall p408
Hybrid integration of laser diode and monomode high contrast slab waveguide on silicon. J.L. Joppe, A.J.T. de Krijger and O.F.J. Noordman p162

SOLAR CELLS

Enhanced spectral response in laser diffused *pn* junction solar cells. S.I. Salih and T.M. McGinnity p354

SPECKLE

Adaptive Marple spectrum estimation. P.-Y. Zhao and D.-R. Yu p91

SPECTRAL ANALYSIS

-SVD perturbation approach to estimation of bandlimited signal in presence of sample jitter. A.J. Willis p2204
Efficient realisation of alternating projection algorithm for maximum likelihood direction finding. S.K. Oh and C.K. Un p2290
Er-doped fibre ring resonator applied to optical spectrum analyser with less than 100 kHz resolution. H. Okamura and K. Iwatsuki p1047
Iterative autoregressive parameter estimation in presence of additive white noise. W.G. Chung and C.K. Un p1800
New formulation of discrete Wigner–Ville distribution. N. Bergmann p111
New results in spectral estimation of decimated processes. A. Ouahabi and J.L. Lacoume p1430
Spectral analysis of coded digital signals by means of difference equation systems. B. Vasić and M. Stefanović p2272

SPECTROMETRY

Monolithic InP-based grating spectrometer for wavelength-division multiplexed systems at 1·5 μm. J.B.D. Soole, A. Scherer, H.P. LeBlanc, N.C. Andreadakis, R. Bhat and M.A. Koza p132
Observation of ballistic transport in hot-electron vertical FET spectrometer using ultrathin planar-doped barrier launcher. T. Daniels-Race, K. Yamasaki, W.J. Schaff and L.F. Eastman p1144
Time of flight spectrometer for scanning electron microscope. A. Khursheed, A.R. Dinnis and P.D. Smart p1507

SPECTROSCOPY

Noncontact AE measurement system using acoustic microscope. N. Chubachi and H. Kanai p2104
Submillimetre wave response of superconducting $YBa_2Cu_3O_{7-x}$ using coherent time-domain spectroscopy. J.M. Chwalek, J.F. Whitaker and G.A. Mourou p447

SPEECH PROCESSING

Analysis of voiced speech by means of bispectrum. B. Boyanov, S. Hadjitodorov and T. Ivanov p2267
Computation of LSP parameters from reflection coefficients. C-F. Chan p1773
Design of a discrete cosine transform based speech scrambler. B. Goldburg, S. Sridharan and E. Dawson p613 e1006
Fast algorithm for modulated lapped transform. H.S. Malvar p775
High quality multiband LPC coding of speech at 2·4 kbit/s. S. Yeldener, A.M. Kondoz and B.G. Evans p1287
In-loop quantisation of reflection coefficients. C.-F. Chan and K.-W. Law p2015
Neural net nonlinear prediction for speech data. R.M. Dillon and C.N. Manikopoulos p824
Speech scrambling employing adaptive rate sampling. M. Darnell, B. Honary and W. He p1076

SPEECH RECOGNITION

Application of Markov chains to speech recognition. J. Dai, J.E. Tyler and I.G. MacKenzie p2360
Hidden Markov models with duration-dependent state transition probabilities. S.V. Vaseghi p625
Postprocessor using fuzzy vector quantiser in HMM-based speech recognition. H.R. Kim and H.S. Lee p1998
Segmental corrective training for hidden Markov model parameter estimation in speech recognition. H.R. Kim and H.S. Lee p1633

STABILITY

200 kHz absolute frequency stability in 1·5 μm external-cavity semiconductor laser. O. Ishida and H. Toba p1018
Chaotic behaviour in current-mode controlled DC–DC convertor. J.H.B. Deane and D.C. Hamill p1172
Easy and effective stabilisation measure for fast recursive least squares algorithms for adaptive transversal filters. H. Schütze and Z. Ren p1397
High-power operation of 630 nm-band transverse-mode stabilised AlGaInP laser diodes with current-blocking region near facets. H. Hamada, M. Shono, S. Honda, R. Hiroyama, K. Matsukawa, K. Yodoshi and T. Yamaguchi p661
Reducing unstable linear control systems via real Schur transformation. C.S. Hu and D. Hou p984
Stabilisation of closed loop systems by time delays. J.-T. Lim p800
Thermal stability of Pd–In ohmic contacts to *n*-GaAs formed by scanned electron beam and rapid thermal annealing. K. Prasad, L. Faraone and A.G. Nassibian p149

STRIPLINES AND STRIPLINE COMPONENTS

New coplanar waveguide/stripline feed network for seven patch hexagonal CP subarray. R.N. Simons, R.Q. Lee and G.R. Lindamood p533

SUPERCONDUCTING DEVICES

Development of planar microwave filters from double sided YBCO thin films on MgO substrates. S.J. Hedges, R.G. Humphreys, N.G. Chew and S.W. Goodyear p2312
Preparation and growth of thin film $Pb_2Sr_2Ca_{0.5}Y_{0.5}Cu_3O_{8+\delta}$ superconductors by laser ablation. S.H.H. Naqvi, F. Beech and I.W. Boyd p430
Propagation characteristics of thin film superconducting microstrip line for terahertz applications. C.Y.E. Tong and K. Wu p2299

SUPERCONDUCTORS

Bolometric $YBa_2Cu_3O_{7-x}$ infra-red detector. T.Y. Tseng, C.Y. Chang, C.J. Haung and M.C. Chen p1724
Growth of CeO_2 thin films by laser ablation. S. Amirhaghi, F. Beech, M. Vickers, P. Barnes, S. Tarling and I.W. Boyd p2304
Measurement of surface resistance of high-T_c superconductor by use of dielectric resonator. C.J. Edgcombe p815 e1219
Preparation and growth of thin film $Pb_2Sr_2Ca_{0.5}Y_{0.5}Cu_3O_{8+\delta}$ superconductors by laser ablation. S.H.H. Naqvi, F. Beech and I.W. Boyd p430
Propagation characteristics of thin film superconducting microstrip line for terahertz applications. C.Y.E. Tong and K. Wu p2299
Reactance anisotropy in superconducting $YBa_2Cu_3O_{7-x}$ films. M.S. Raven, E.E. Inameti, B.G. Murray and Y.M. Wan p1309
Submillimetre wave response of superconducting $YBa_2Cu_3O_{7-x}$ using coherent time-domain spectroscopy. J.M. Chwalek, J.F. Whitaker and G.A. Mourou p447
Thin film superconductors grown by laser ablation of PbO and BiPbSrCaCuO. A. Sajjadi, S. Kilgallon, F. Beech, F. Saba and I.W. Boyd p345

SURFACE ACOUSTIC WAVES

1 GHz low loss coupled resonator filter using surface skimming bulk waves and Bleustein-Gulyaev waves. I.D. Avramov p414
Excitation of surface acoustic waves in Rb : KTP. K.S. Buritskii, E.M. Dianov, A.B. Kiselev, V.A. Maslov and E.A. Shcherbakov p1896
Experimental study of SAW quartz cuts with low sensitivity to dynamical thermal effects. E. Bigler and S. Ballandras p1343

SURFACE-ACOUSTIC-WAVE DEVICES

Integrated acousto-optic collinear *TE–TM* mode convertors for 0·8 μm optical wavelength range. I. Hinkov and V. Hinkov p1211
Tunable SAW comb filter. V. Ermolov and M. Luukkala p1670

SWITCHED CAPACITOR FILTERS

High frequency GaAs switched capacitor filter implemented with GaAs insulated gate FET switches. J.L. Luck, J.T. Taylor, J.G. Swanson and D.G. Haigh p1619
Pseudo-N-path switched capacitor filters with out-of-band noise peaks. Z. Czarnul, G.C. Temes and A.G. Yesilyurt p1137

SWITCHED CAPACITOR NETWORKS

Bandpass $\Delta\Sigma$ A/D convertor using two-path multibit structure. Z.X. Zhang, G.C. Temes and Z. Czarnul p2008
BiCMOS operational amplifier with precise and stable DC gain for high-frequency switched capacitor circuits. A. Baschirotto, R. Alini and R. Castello p1338
Criteria for low-noise switched capacitor circuit design. R.M. Fox, C.M. Stillo and D.J. Ferris p1203
Novel amplifier gain insensitive switched capacitor integrator with same sample correction properties. H. Shafeeu, A.K. Betts and J.T. Taylor p2277
Realisation of switched capacitor delay lines and Hilbert transformers. S. Eriksson p2042
Stray-insensitive switched-capacitor sample-delay-hold buffers for video frequency applications. J.J.F. Rijns and H. Wallinga p639
Switched-capacitor broadband noise generator for CMOS VLSI. A. Rodríguez-Vázquez, M. Delgado, S. Espejo and J.L. Huertas p1913
Switched-capacitor polyphase decimating circuits with reduced capacitance spread. J.E. Franca p2356
Switched-capacitor realisations of artificial neural network learning schemes. B. Maundy and E.I. El-Masry p85

SWITCHES

1 × 2 lossless semiconductor optical switch. D.A.H. Mace, M.J. Adams, J. Singh, M.A. Fisher and I.D. Henning p198
Guided wave switch array using electro-optic and carrier depletion effects in indium phosphite. P.J. Duthie, N. Shaw, M.J. Wale and I. Bennion p1747
New GaAs n^+-p-$\delta(n^+)$-i-$\delta(p^+)$-i-n^+ switching device grown by molecular beam epitaxy. W.-C. Liu and C.-Y. Sun p1704
Optically-controlled grating switch (OG-SW). Y. Shibata, M. Ikeda, K. Nakashima, T. Tamamura and T. Nishida p246
Optimisation of $LiNbO_3$ BOA waveguide switches operating at 1·3 μm. A. McGuire, A.P. Thomas and R.C. Booth e547
Optimum architecture for input queuing ATM switches. H. Obara p555

SWITCHING AND SWITCHING CIRCUITS

Buffer requirements for ATM switches with multiserver output queues. H. Bruneel and B. Steyaert p671
Clock-feedthrough compensated switched-capacitor circuits. S. Ogawa and K. Watanabe p2045
Performance of delta networks using multiple channels and output buffers. D. Ghosh and J.C. Daly p761
Tandem banyan switching fabric with dilation. I. Widjaja p1770

SYNCHRONISATION

Digital frequency error detectors for OQPSK satellite modems. J. Ahmad, T.G. Jeans and B.G. Evans p1821
Merit factor of Chu and Frank sequences. M. Antweiler and L. Bömer d777
Optimum synchronisation preamble design. M. Grayson and M. Darnell p36
Performance of new zero-crossing type *n*-averaging symbol synchroniser for PAM signals. E. Polat and F.R. Ergul p1010

SYSTEM THEORY

Iterative learning controller for linear systems with a periodic disturbance. H.S. Ahn and C.H. Choi e191
Minimal state space realisation of product factorable 2-D systems. G.E. Antoniou e100
Vainberg method of construction of generalised energy functional in system theory. S.K. Krzeminski and M. Wasiluk p1089

TELECOMMUNICATION

30 dB optical net gain at 1·543 μm in Er^{3+} doped fluoride fibre pumped around 1·48 μm. D. Ronarc'h, M. Guibert, H. Ibrahim, M. Monerie, H. Poignant and A. Tromeur p908
Capacity of cordless telephone systems with discontinuous transmission. M. Kashorda and E.V. Jones p820
G-Net: implicit token-passing bus LAN. E.G. Economou and S. Bolis p1449
Highly integrated 20 Mbit/s GaAs optical receiver for use in TPON network termination equipment. N.R. Back, B.R. White and S.C. Thorp p566
Performance of Manhattan street network (MSN) architecture under zonal traffic distribution (ZTD) patterns. B. Khasnabish, M. Ahmadi and M. Shridhar p2165
Scalable one-hop wavelength-division multiplexed crossconnect. K.W. Cheung p367
Teletext reception in mobile Rician fading channel with maximal ratio combin-

ing. R. Prasad, J.H. Bons and P.A.D. Spaargaren p1645
Traffic mixes on broadband ATM link. J.M. Pitts and L.G. Cuthbert p1350
Trial results of novel bit error rate monitor scheme over skywave HF link. J.B. Scholz p1730
Waiting time jitter reduction by fill locking. R. Nawrocki and W. Ehrlich e100

TELEPHONY

Capacity of cordless telephone systems with discontinuous transmission. M. Kashorda and E.V. Jones p820

TELEVISION

Clamping circuit for D or D2-MAC/packet systems using signal digital component. J. Veillard p1790
Experimental HDTV CODEC with ATM cell loss compensation for B-ISDN. T. Kinoshita and T. Nakahashi p1830
Spectral predictions for pulse interval and width modulation. B. Wilson, Z. Ghassemlooy and J.C.S. Cheung p580

THICK-FILM DEVICES

Cold field-emission from CVD diamond films observed in emission electron microscopy. C. Wang, A. Garcia, D.C. Ingram, M. Lake and M.E. Kordesch p1459

THIN-FILM DEVICES

Bolometric $YBa_2Cu_3O_{7-x}$ infra-red detector. T.Y. Tseng, C.Y. Chang, C.J. Haung and M.C. Chen p1724
Electrical properties of thin oxynitrided SiO_2 films formed by rapid thermal processing in an N_2O ambient. H. Fukuda, M. Yasuda and S. Ohno p440
Fabrication of periodic domain grating in $LiNbO_3$ by electron beam writing for application of nonlinear optical processes. H. Ito, C. Takyu and H. Inaba p1221
Growth of CeO_2 thin films by laser ablation. S. Amirhaghi, F. Beech, M. Vickers, P. Barnes, S. Tarling and I.W. Boyd p2304
Reactance anisotropy in superconducting $YBa_2Cu_3O_{7-x}$ films. M.S. Raven, E.E. Inameti, B.G. Murray and Y.M. Wan p1309
Thin film superconductors grown by laser ablation of PbO and BiPbSrCaCuO. A. Sajjadi, S. Kilgallon, F. Beech, F. Saba and I.W. Boyd p345

TIME-DOMAIN ANALYSIS

Submillimetre wave response of superconducting $YBa_2Cu_3O_{7-x}$ using coherent time-domain spectroscopy. J.M. Chwalek, J.F. Whitaker and G.A. Mourou p447
Time domain measurements of launching-condition-dependent bandwidth of all-plastic optical fibres. S. Takahashi and K. Ichimura p217
Time-domain analysis of nonlinear circuits with periodic excitation. A. Buonomo p65

TIME-DOMAIN REFLECTOMETRY

Frequency-derived distributed optical fibre sensing: signal-frequency down-shifting. F. Parvaneh, V.A. Handerek and A.J. Rogers p394

TIME-VARYING SYSTEMS

Fast tracking RLS algorithm using novel variable forgetting factor with unity zone. D.-J. Park, B.-E. Jun and J.-H. Kim p2150

TIMING CIRCUITS

10 Gbit/s low-power bit synchroniser with automatic retiming phase alignment. P. Wennekers, U. Nowotny, A. Huelsmann, G. Kaufel, K. Koehler, B. Raynor and J. Schneider p1529

TRANSDUCERS

All-fibre frequency shifters using multiple acoustic transducers. A.P. Foord, P.A. Greenhalgh and P.A. Davies p1141

TRANSFER FUNCTIONS

Allpass expansions of digital transfer functions. X. Nie, D. Raghuramireddy and R. Unbehauen p1438
Modelling distributed parameter systems using Hermite polynomials. P.D. Olivier p352
Orthonormal expansion of stable rational transfer functions. X. Nie, D. Raghuramireddy and R. Unbehauen p1492
Realistion of voltage-mode biquads using CCIIs. M. Higashimura p1345

TRANSFORMS

2-D DCT systolic array implementation. W. Ma p201
Adaptive filtering using modified Fermat number transform. A.O. Ogunfunmi p282
Analysis of time response of nonuniformly coupled multiconductor transmission lines with frequency-dependent losses. J.-F. Mao and Z.-F. Li p1941
Convolution-based DCT algorithm. Y.-M. Chin and J.-L. Wu p1834
Efficient approximation of continuous wavelet transforms. D.L. Jones and R.G. Baraniuk p748
Efficient input-reordering algorithms for fast DCT. A.N. Skodras and A.G. Constantinides p1973
Estimation of phase differential of signals transmitted over fading channels. M. Fattouche and H. Zaghloul p1823
Extracting real samples from complex sampled data. D. Iverson p1976
Fast algorithm for modulated lapped transform. H.S. Malvar p775
Fast computation of two-dimensional discrete cosine transforms using fast discrete Radon transform. N. Ta, Y. Attikiouzel and G. Crebbin p82
Focusing criterion. M. Charfi, A. Nyeck and A. Tosser p1233
Hexagonal discrete cosine transform for image coding. H.-S. Wu p781
Multiplicative complexity of discrete cosine and sine transform. W. Ma p962
Multiplicative complexity of length-2^m two-dimensional discrete cosine transform. W. Ma p966
New fast discrete Hartley transform algorithm. Y.-H. Chan and W.-C. Siu p347
Optimal transverse mode control of waveguide array lasers by discrete transform techniques. E.M. Yeatman and R.R.A. Syms p1461
Performance of Manhattan street network (MSN) architecture under zonal traffic distribution (ZTD) patterns. B. Khasnabish, M. Ahmadi and M. Shridhar p2165
Prefolding in FHT algorithms. K.M.M. Prabhu and N. Anupindi p940
Relationship between two algorithms for discrete cosine transform. Z. Wang and G.A. Jullien p1114
Simulation of the RF performance of AlGaAs/GaAs heterojunction bipolar transistors: application of fast Fourier transform. L.L. Liou, A. Ezis, K. Ikossi-Anastasiou and C.I. Huang p523
Tracking moving objects in noisy environments using Walsh transform. Y.-S. Huang and C.-Y. Hsu p2079
VLSI architecture for 2-D Daubechies wavelet transform without multipliers. A.S. Lewis and G. Knowles p171

TRANSISTORS

0·23 μm gate length MODFETs on InAlAs/InGaAs/InP heterostructure grown by MOVPE. M. Tong, A. Ketterson, K. Nummila, I. Adesida, L. Aina and M. Mattingly p1426
121 GHz resonant-tunnelling hot electron transistors having new collector barrier structure. T. Mori, T. Adachihara, M. Takatsu, H. Ohnishi, K. Imamura, S. Muto and N. Yokoyama p1523
15 GHz f_{max} microwave silicon *pnp* transistors with single-crystal emitters fabricated with simple four mask process. F. Hébert, D. Millicker, J. Wholey, C. Snapp and A. Garcia p1886
1·5 μm lithography Si- and Si/SiGe-bipolar transistors for ICs operating at 15 Gbit/s and above. H.-U. Schreiber and J.N. Albers p1465 e1888
25 GHz f_t/27 GHz f_{max} transistors for C-bipolar technology. S. Ratanaphanyarat, J.B. Kuang, S.F. Chu, W. Rausch, M.J. Saccamango and M. Smadi p1224
Accurate measurement technique for base transit time in heterojunction bipolar transistors. S. Lee, A. Gopinath and S.J. Pachuta p1551
AlGaAs/GaAs *pnp* heterojunction bipolar transistor with carbon-doped collector and emitter grown by atomic layer epitaxy. T. Henderson, B. Bayraktaroglu, S. Hussien, A. Dip, P. Colter and S.M. Bedair p692
AlGaAs/GaAs based HEMTs, inverters and ring oscillators with InGaAs and AlGaAs etch-stop layers. F. Ren, S.J. Pearton, R.F. Kopf, S.N.G. Chu and S.S. Pei p1175
Analytical modelling of two-dimensional effects on current gain in small-geometry bipolar transistors. N. Rinaldi, A.G.M. Strollo and P. Spirito p1744
Base transit time for SiGe-base heterojunction bipolar transistors. G.-B. Gao and H. Morkoç p1408
Carbon and tin doped *npn* and *pnp* AlGaAs/GaAs HBTs grown by MOMBE. F. Ren, C.R. Abernathy, S.J. Pearton, T.R. Fullowan, J.R. Lothian, P.W. Wisk, Y.K. Chen, W.S. Hobson and P.R. Smith p2391
Complementary vertical bipolar transistor process using high-energy ion implantation. F.W. Ragay, A.A.I. Aarnink and H. Wallinga p2141
Control of gate leakage in InAlAs/InGaAs HEMTs. D.J. Newson, R.P. Merrett and B.K. Ridley p1592
Correlation between impact ionisation, recombination and visible light emission in GaAs MESFETs. E. Zanoni, S. Bigliardi, M. Manfredi, A. Paccagnella, P. Pisoni, P. Telaroli, C. Tedesco and C. Canali p770
Cryogenic operation of GaAs bipolar transistors with inverted base doping. P.E. Dodd, M.L. Lovejoy, M.R. Melloch and M.S. Lundstrom p860 e1219
Crystalline *p*MOS inverter using amorphous thin film transistor as active load. H.-C. Lin, W.J. Sah and S.-C. Lee p2180
Demonstration of high performance heterojunction field effect transistor in InAlAs/InGaAs/InAlGaAs/InP material system. R.S. Mand and J.G. Simmons p1453
Dependence of base crowding effect on base doping and thickness for *Npn* AlGaAs/GaAs HBTs. W. Liu and J.S. Harris Jr p2048
Determining intrinsic noise parameters of 0·25 μm gate pseudomorphic HEMT. R.I. Taylor, D.M. Brookbanks and A.J. Holden p1923
Double heterojunction bipolar transistor in $Al_xGa_{1-x}As/GaAs_{1-y}Sb_y$ system. K. Ikossi-Anastasiou, A. Ezis, K.R. Evans and C.E. Stutz p142
Exact resolution of coupled Schrödinger–Poisson equation: application to accurate determination of potential profile in HEMTs. M. Benabbas, B. Marir, D. Bajon and H. Baudrand p1848
Experimental comparison of base recombination currents in abrupt and graded AlGaAs/GaAs heterojunction bipolar transistors. W. Liu p2115
Experimental determination of magnitude of selfheating and its influence on breakdown in silicon-on-insulator transistors. L.J. McDaid, S. Hall, W. Eccleston and J.C. Alderman p2006
Extremely high gain 0·15 μm gate-length InAlAs/InGaAs/InP HEMTs. P. Ho, M.Y. Kao, P.C. Chao, K.H.G. Duh, J.M. Ballingall, S.T. Allen, A.J. Tessmer and P.M. Smith p325
First microwave characterisation of LP-MOCVD grown GaInP/GaAs self-aligned HBT. S.L. Delage, M.A. di Forte-Poisson, H. Blanck, C. Brylinski, E. Chartier and P. Collot p253
Fully monolithic 22 GHz-band AlGaAs/GaAs HBT oscillator. N. Hayama, J. Shimizu and K. Honjo p1862
GaAs/AlGaAs HEMT structures with multiquantum well channels. T. Humer-Hager, W. Klein, R. Kempter, G. Böhm, G. Tränkle and G. Weimann p1035
GaInAs camel transistors with current gain above 6 at room temperature. M. Marso, G. Zwinge, D. Grützmacher, J. Hergeth and H. Beneking p335
High performance W-band InAlAs-InGaAs-InP HEMTs. D.C. Streit, K.L. Tan, R.M. Dia, A.C. Han, P.H. Liu, H.C. Yen and P.D. Chow p1149
High performance W-band low-noise pseudomorphic InGaAs HEMT MMIC amplifiers. K.L. Tan, H. Wang, D.C. Streit, P.H. Liu, R.M. Dia, A.C. Han, D. Garske, S. Bui, J.K. Liu, T.S. Lin, G.S. Dow, P.D. Chow and J. Berenz p1166
High power density pulsed X-band heterojunction bipolar transistors. M.G. Adlerstein, M.P. Zaitlin, G. Flynn, W. Hoke, J. Huang, G. Jackson, P. Lemonias, R. Majarone and E. Tong p148
High temperature operation of α-silicon carbide buried-gate junction field-effect transistors. G. Kelner, S. Binari, M. Shur and J. Palmour p1038
High-performance carbon-doped base GaAs/AlGaAs heterojunction bipolar transistors grown by MOCVD. J.K. Twynam, H. Sato and T. Kinosada p141
Improved breakdown of AlInAs/InGaAs heterojunction bipolar transistors. T.R. Fullowan, S.J. Pearton, R.F. Kopf, Y.K. Chen and F. Ren p2340
Improved large-signal quasistatic MESFET model. B.A. Kramer and R.J. Weber p906
InAlAs/InGaAs/InP HEMTs with high breakdown voltages using double-recess gate process. J.B. Boos and W. Kruppa p1909
$In_{0.52}Al_{0.48}As/In_{0.53}Ga_{0.47}As$ lateral resonant tunnelling transistor. A.C. Seabaugh, J.N. Randall, Y.-C. Kao, J.H. Luscombe and A.M. Bouchard p1832
Integrated *npn*/*pnp* GaAs/AlGaAs HBTs grown by selective MBE. D.K. Umemoto, J.R. Velebir, K.W. Kobayashi, A.K. Oki and D.C. Streit p1517
Interelectrode capacitance nonlinearities in vertical power DMOSFETs. K. Shenai p280
Ku-band high efficiency high gain pseudomorphic HEMT. P.M. Smith, W.F. Kopp, P. Ho, P.C. Chao, R.P. Smith, K. Nordheden and J.M. Ballingall

p270
Low noise, tunable GaAs bipolar oscillator. A. Dearn, G. Parkinson and P.J. Topham p1300
MBE grown *Npn* AlGaAs/GaAs bipolar transistors with C *p* doping by electron cyclotron resonance source activated methane. G. Liu, D. Mui, S. Fang, G. Gao and H. Morkoç p465
Measurement and analysis of small-signal drain admittance in SOS MOSFETs. R. Howes and W. Redman-White p2290
Millimetre wave performance of carbon-doped-base AlGaAs/GaAs HBTs. L.W. Yang, P.D. Wright, P.R. Brusenback, S.K. Ko and A. Kaleta p1145 e1311
Minimisation of total harmonic distortion in active-loaded differential BJT amplifiers. H. Kuntman and S. Özcan p2381
Multiply-graded InGaAlAs heterojunction bipolar transistors. J.C. Vlcek and C.G. Fonstad p1213
New de-embedding method for millimetre-wave bipolar transistor *S*-parameter measurement. N.L. Wang, W.J. Ho and J.A. Higgins p1611
New method for assessment of depletion charge dependence of mobility in short-channel silicon MOS transistors. A. Emrani, G. Ghibaudo and F. Balestra p467
New method for extraction of effective channel length in submicron MOSFETs. K. Iniewski and C.A.T. Salama p508
New pseudomorphic N^-/N^+ GaAs/InGaAs/GaAs power HEMT with high breakdown voltages. T. Sonoda, S. Sakamoto, N. Kasai, S. Tsuji, M. Yamanouchi, S. Takamiya and Y. Kashimoto p1303
New two-dimensional approach for determining depletion layer profile in field-effect transistors. B. Marir, M. Benabbas, D. Bajon and H. Baudrand p1765
Observation of reversible collapse phenomena in GaAs MESFETs at cryogenic temperatures. D.V. Camin, G. Pessina and E. Previtali p2297
Operation of submicrometre lateral bipolar transistors down to 10 K. T.S. Jayadev, J.C.S. Woo, S. Verdonckt-Vandebroek and S.S. Wong p998
Optical tuning of monolithic $In_{0.53}Ga_{0.47}As/In_{0.52}Al_{0.48}As/InP$ modulation-doped field-effect transistor oscillators at X and K band. R. Lai, P.K. Bhattacharya and T. Brock p1056
Optimum germanium profile for SiGe base HBTs. S.S. Winterton, B.M. Manning, D.J. Walkey and N.G. Tarr p1337 e1781
Photo/EB hybrid exposure process for T-shaped gate superlow-noise HEMTs. K. Hosogi, N. Nakano, H. Minami, T. Katoh, K. Nishitani, M. Otsubo, M. Katsumata and K. Nagahama p2011
Procedure for inverse modelling of GaAs/AlGaAs HEMT structures from DC I/V characteristic curves. S.J. Mahon and D.J. Skellern p81
Q and V band power InGaAs MESFETs. G.W. Wang and Y. Chang p488
Radiation from transistor in microstrip line. P.S. Hall and P.M. Haskins p986 e1310
Selfaligned AlGaAs/GaAs HBT grown by MOMBE. F. Ren, T.R. Fullowan, C.R. Abernathy, S.J. Pearton, P.R. Smith, R.F. Kopf, E.J. Laskowski and J.R. Lothian p1054
Selfaligned InGaAs/InP heterostructure bipolar transistors. A. Feygenson, H. Temkin, W.T. Tsang, L. Yang, R.D. Yadvish and P.F. Scortino, Jun p1116
Simple determination of BJT extrinsic base resistance. T. Zimmer, A. Meresse, Ph. Cazenave and J.P. Dom p1895
Suppression of latch in SOI MOSFETs by silicidation of source. L.J. McDaid, S. Hall, W. Eccleston and J.C. Alderman p1003
Thermal parameter extraction for bipolar circuit modelling. R.M. Fox and S.-G. Lee p1719
Travelling Gunn domains in submicron GaAs MESFETs. P. Lugli, M. Grimm, M. Pabst and H. Lüth p398
Ultrafast pipelined adders using RTTs. S. Mohan, P. Mazumder, R.K. Mains, J.P. Sun and G.I. Haddad p830
Ultralow specific on resistance UMOSFET with trench contacts for source and body regions realised by selfaligned process. S. Matsumoto, T. Ohno and K. Izumi p1640
Very high current gain InGaAs/InP heterojunction bipolar transistors grown by metalorganic chemical vapour deposition. C.S. Kyono, N.D. Gerrard, C.J. Pinzone, C.M. Maziar and R.D. Dupuis p40
p-channel modulation-doped GaSb field-effect transistors. L.F. Luo, K.F. Longenbach and W.I. Wang p472

TRANSMISSION LINES

Alternative computation of attenuation in microstrip. J. Svačina p847
Analysis of nonlinear circuits with distributed elements using PSPICE. J. Borja, J.I. Alonso and F. Pérez p1651
Analysis of time response of nonuniformly coupled multiconductor transmission lines with frequency-dependent losses. J.-F. Mao and Z.-F. Li p1941
Equivalent circuit modelling of lossy coupled lines using SPICE software. T. Vu Dinh, B. Cabon and J. Chilo p710
New method for tapered transmission line design. Y. Wang p2396
Pipe enclosed microstrip transmission line. K.D. Patil, S.K. Maiti and S. Mahapatra p1291
Propagation characteristics of thin film superconducting microstrip line for terahertz applications. C.Y.E. Tong and K. Wu p2299
Transmission line transformer. M.C.R. Carvalho and W. Margulis p138
Using 2-D series TLM for modelling TE modes in dielectric and lossy environments. P. Naylor p1499

TRANSPORT PROCESSES

Current–voltage characteristics of bend in mesoscopic wire. T.J. Thornton, S. Yamada, M. Yamamoto and K. Aihara p1177
Electron mobilities in MOS channels formed along anisotropically dry etched ⟨110⟩ silicon trench sidewalls. K. Shenai p715
Electron mobility and deep level trap profiles of MBE GaAs on Si MESFETs. J. Goostray, H. Thomas, J.M. Dumas, Z. Hatzopolos and D. Warner p84

TRIGGER CIRCUITS

Gated resonant tunnelling devices. M.W. Dellow, P.H. Beton, M. Henini, P.C. Main, L. Eaves, S.P. Beaumont and C.D.W. Wilkinson p134

TUNING

200 kHz absolute frequency stability in 1·5 μm external-cavity semiconductor laser. O. Ishida and H. Toba p1018
Continuous wavelength tuning of Brewster angled semiconductor lasers. S.S. Rehman and J.I. Vukusic p23

TUNNEL DIODES

Accurate equivalent circuit model of resonant tunnelling diodes. R.E. Miles, G. Millington, R.D. Pollard, D.P. Steenson, J.M. Chamberlain and M. Henini p427
Epitaxial liftoff of AlAs/GaAs double barrier resonant tunnelling diodes. A.J. Tsao, V.K. Reddy and D.P. Neikirk p484
Measurement of negative differential conductance to 40 GHz for vertically integrated resonant tunnelling diodes. P. Mounaix, P. Bedu, D. Lippens and E. Barbier p1358
Microwave noise of DBRT diode over full bias voltage range. J.I.M. Demarteau, H.C. Keyker, J.J.M. Kwaspen, T.G. van de Roer and L.M.F. Kaufmann p7
Noise model for double barrier resonant tunnel diodes. T.G. Van de Roer, H.C. Heyker, J.J.M. Kwaspen, H.P. Joosten and M. Henini p2158
Resonant tunnelling diode in MBE-grown delta-doped GaAs. Y.H. Wang, M.P. Houng, H.H. Chen and H.C. Wei p1667
Resonant-tunnelling diode oscillator using a slot-coupled quasioptical open resonator. K.D. Stephan, E.R. Brown, C.D. Parker, W.D. Goodhue, C.L. Chen and T.C.L.G. Sollner p647
Tunnel diode with asymmetric spacer-layers for use as microwave detector. R.T. Syme, M.J. Kelly, R.S. Smith, A. Condie and I. Dale p2192

TUNNELLING

Investigation of indium doping and incorporation in AlGaAs/GaAs double-barrier resonant tunnelling structures. J.S. Wu, K.H. Chang, C.P. Lee, C.Y. Chang, D.G. Liu and D.C. Liou p428

ULTRASONIC DEVICES

Ultrasonic powder-transformation using a pair of phase-shifted bending vibrators. K. Yamada, T. Nakagawa and K. Nakamura p846

ULTRASONICS

Acoustic microscopy skimming mode generation using small aperture lenses. Z. Hadjoub, K. Alami, A. Doghmane, J.M. Saurel and J. Attal p981
Excitation of surface acoustic waves in Rb : KTP. K.S. Buritskii, E.M. Dianov, A.B. Kiselev, V.A. Maslov and E.A. Shcherbakov p1896
Grating lobe reduction in ultrasonic synthetic focusing. M.H. Bae, I.H. Sohn and S.B. Park p1225
Noncontact AE measurement system using acoustic microscope. N. Chubachi and H. Kanai p2104
Tapered acoustic buffer rods. C.K. Jen, Z. Wang, C. Neron, A. Miri and K. Abe p1877
Tunable SAW comb filter. V. Ermolov and M. Luukkala p1670
Ultrasonic powder-transformation using a pair of phase-shifted bending vibrators. K. Yamada, T. Nakagawa and K. Nakamura p846

VAPOUR DEPOSITION

Very high current gain InGaAs/InP heterojunction bipolar transistors grown by metalorganic chemical vapour deposition. C.S. Kyono, N.D. Gerrard, C.J. Pinzone, C.M. Maziar and R.D. Dupuis p40

VIDEO

Backward predictive block matching algorithm for low bit rate video coding. S.-H. Jang and S.-D. Kim p1674
Clamping circuit for D or D2-MAC/packet systems using signal digital component. J. Veillard p1790
Experimental HDTV CODEC with ATM cell loss compensation for B-ISDN. T. Kinoshita and T. Nakahashi p1830
Frequency planning for nonlinear distortion reduction in wideband transmission. L.K. Chen, K.Y. Lau and Y. Trisno p1293
Modelling low bit rate video traffic as switched-fractal source. D.L. McLaren and D. Thong Nguyen p745
Noise-shaped PCM for video processing and transmission. A.J.R.M. Coenen p712
Video distribution system with 40 AM-VSB channels and 22 dB link budget. G.R. Joyce, R. Olshansky, R. Childs and T. Wei p1613

WAVE PROPAGATION

Correlation model for shadow fading in mobile radio systems. M. Gudmundson p2145
Developing experimental models for propagation and scattering of EM waves in electrically large ducts. R. Bansal, E. DiCarlo and D. Jordan p1951
Explicit expression for Brewster angles of isotropic-bi-isotropic interface. I.V. Lindell, A.-H. Sihvola and A.J. Viitanen p2163
Explicit finite difference vectorial beam propagation method. Y. Chung, N. Dagli and L. Thylén p2119
Scalar saddle point principle for optoelectronics. P.C. Kendall and M.N. Jones p735
Sixth-order generalised propagation techniques. M. Glasner, D. Yevick and B. Hermansson p475
Solitary waves in nonlinear media with gain and loss. Y. Chen p1985 e2300

WAVEGUIDE COMPONENTS

1·3 μm InGaAsP ridge waveguide laser on GaAs and silicon substrates by thin-film transfer. C.L. Shieh, J.Y. Chi, C.A. Armiento, P.O. Haugsjaa, A. Negri and W.I. Wang p850
1·5 μm compressive-strained multiple-quantum-well waveguide detectors for coherent polarisation-diversified receivers. C.E. Zah, K.W. Cheung, R. Bhat, N.C. Andreadakis, T.C. Wu, F.J. Favire, S.G. Menocal, M.A. Koza and T.P. Lee p838
Excitation characteristics of fundamental mode in tapered slab waveguides with nonlinear cladding. K. Ono and H. Osawa p664
First digital optical switch based on InP/GaInAsP double heterostructure waveguides. J.A. Cavaillès, M. Renaud, J.F. Vinchant, M. Erman, P. Svensson and L. Thylén p699
High-speed, InGaAsP/InP multiple quantum well, 1·55 μm singlemode modulator. F. Devaux, E. Bigan, B. Rose, M. McKee, F. Huet and M. Carré p1926
Large modulation depth, single-moded quantum well waveguide modulator operating around 1·57 μm. A.C. Bryce, J.H. Marsh, L.L. Taylor, S.J. Bass and D.R.P. Guy p304
New channelised coplanar waveguide to rectangular waveguide post and slot couplers. R.N. Simons p856
Quality and performance of tunable waveguide backshorts. B.N. Ellison, L.T. Little, C.M. Mann and D.N. Matheson p139
Waveguide optical polarisation splitter with Langmuir–Blodgett cladding layer. T. Mizumoto, N. Iwakiri, T. Kaneko and Y. Naito p271
Wide rejection band multidemultiplexer at 1·3–1·55 μm by cascading high-silica three-waveguide couplers on Si. G. Barbarossa and P.J.R. Laybourn p2085

WAVEGUIDES

0·5 W CW diffraction-limited-beam operation from high-efficiency resonant-optical-waveguide diode-laser arrays. L.J. Mawst, D. Botez, M. Jansen, T.J. Roth, C. Tu and C. Zmudzinksi p1586

Analysis of arbitrarily shaped multiple-dielectric posts in rectangular waveguide by method of lines. X.-H. Jiang and S.F. Li p29

Autocorrelation measurements of picosecond laser-diode pulses by means of quasiphase-matching $LiNbO_3$ channel waveguides. A. Galvanauskas, J. Webjörn, A. Krotkus and G. Arvidsson p738

Channel glass waveguide detectors with grafted GaAs film in embedded configuration. W.K. Chan, A. Yi-Yan, T.J. Gmitter, L.T. Florez, N. Andreadakis and C.K. Nguyen p410

Channel optical waveguides directly written in glass with an electron beam. J. Bell and C.N. Ironside p448

Continuous-wave erbium-diffused $LiNbO_3$ waveguide laser. R. Brinkmann, W. Sohler and H. Suche p415

Degenerate four wave mixing in polydiacetylene waveguides. D.J. Westland, V. Skarda, W. Blau and L. Costa p1327

Design of high-performance sum-frequency upconvertor. Deng Shaofan, Wu Qun and Qiu Jinghui p2064

Dielectric-loaded elliptical waveguide. S.P. Yeo p2185

Direct comparison of hydrogen depth distributions and refractive index profiles in annealed proton-exchanged z-cut $LiNbO_3$ waveguides. A. Loni, R.M. De La Rue, J.M. Zavada, R.G. Wilson and S.W. Novak p1245

E-mode cutoff wave number of circular waveguide loaded with dielectric sector. T.S. Yeo p1071

Effective index method for generalised waveguide dispersion characteristics analysis of optical channel waveguides. T.K. Lim and H. Melchior p917

Efficient electroabsorption in InGaAsP/InGaAsP MQW optical waveguide. E. Bigan, A. Ougazzaden, F. Huet, M. Carré, A. Carenco and A. Mircea p1607

Electro-optically tunable wavelength demultiplexer using depressed index waveguides. M. López-Amo, R. Subías, J.M. López-Higuera and M.A. Muriel p195

Exact multilayer waveguide design including absorbing or metal layers. E.K. Sharma, P. Singh and P.C. Kendall p408

Excitation characteristics of fundamental mode in tapered slab waveguides with nonlinear cladding. K. Ono and H. Osawa p664

Extension of method of lines to unbounded regions by using co-ordinate transformation. X.H. Yang and L. Shafai p2108

GaAs/GaAlAs multiquantum well waveguides for all-optical switching at 1·55 μm. H.K. Tsang, R.S. Grant, R.V. Penty, I.H. White, J.B.D. Soole, E. Colas, H.P. LeBlanc, N.C. Andreadakis and W. Sibbett p1993

GaInAs/InP *pin* photodetectors integrated with glass waveguides. A. Yi-Yan, W.K. Chan, C.K. Nguyen, T.J. Gmitter, R. Bhat and J.L. Jackel p87

Guided-wave directional couplers with polarisation maintaining fibre arrays. S. Sato, H. Wada, H. Hashizume, S. Kobayashi, M. Seki and K. Nakama p303

Guided-wave laser based on erbium-doped silica planar lightwave circuit. T. Kitagawa, K. Hattori, M. Shimizu, Y. Ohmori and M. Kobayashi p334

High power 980 nm ridge waveguide lasers with etch-stop layer. B. Elman, W.F. Sharfin, F.D. Crawford, W.C. Rideout, J. LaCourse and R.B. Lauer p2032

Hollow sapphire waveguides for remote radiometric temperature measurements. S.J. Saggese, J.A. Harrington and G.H. Sigel, Jun p707

Integrated uniplanar antenna mixer and local oscillator. A. Nešić p56

Longitudinal slots in broad wall of rectangular waveguide inhomogeneously loaded with dielectric slab. J. Joubert and D.A. McNamara p1480

Low drive voltage Y-branch digital optical switch. H. Okayama, T. Ushikubo and M. Kawahara p24

Low loss singlemode optical waveguides with large cross-section in silicon-on-insulator. J. Schmidtchen, A. Splett, B. Schüppert, K. Petermann and G. Burbach p1486

Low loss waveguide four-port crossover circuit and its application for cross-slot antenna feed. K. Chang, M. Li, K.A. Hummer and R.A. Speciale p997

Low threshold ion-implanted Nd : YAG channel waveguide laser. S.J. Field, D.C. Hanna, A.C. Large, D.P. Shepherd, A.C. Tropper, P.J. Chandler, P.D. Townsend and L. Zhang p2375

Low-loss lead fluoride-coated square waveguides for CO_2 laser light transmission. H. Machida, H. Ishikawa and M. Miyagi p2068

Measurements on competition between carrier-induced and thermally-induced wavelength tuning in ridge waveguide DBR lasers. H. Sundaresan and I.D. Henning p1897

New channelised coplanar waveguide to rectangular waveguide post and slot couplers. R.N. Simons p856

New coplanar waveguide/stripline feed network for seven patch hexagonal CP subarray. R.N. Simons, R.Q. Lee and G.R. Lindamood p533

New measurement technique for waveguide losses based on photoluminescence. M.R. Amersfoort, D. Grützmacher, M.K. Smit and Y.S. Oei p1152

Novel leaky-wave antenna for millimetre waves based on V-groove guide. Z.-X. Shen p1573

Oliner models for quasioptical resonator to rectangular waveguide coupling elements. V.N. Rodionova, A.Ya. Slepyan and G.Ya. Slepyan p1427

Optimal transverse mode control of waveguide array lasers by discrete transform techniques. E.M. Yeatman and R.R.A. Syms p1461

Periodically screened coplanar waveguides on semiconductors. Y.R. Kwon, M.C. Le and K.S. Champlin p1665

Polarised modes of semiconductor rib waveguides. T.M. Benson, P.C. Kendall, M.A. Matin and M.S. Stern p1488

Possible mechanism for increase of extraordinary refractive index in proton-exchanged $LiNbO_3$ waveguides. W. Hou, W. Hua, Y. Zhang and H. Tan p755

Quality and performance of tunable waveguide backshorts. B.N. Ellison, L.T. Little, C.M. Mann and D.N. Matheson p139

Quasi-phase-matched frequency doubling over 5 mm in periodically poled polymer waveguide. R.A. Norwood and G. Khanarian e100

Quasiphase-matched second harmonic generation of blue light in electrically periodically-poled lithium tantalate waveguides. S. Matsumoto, E.J. Lim, H.M. Hertz and M.M. Fejer p2040

Reflectometer calibration using load, short and offset shorts with unknown phase. W. Sigg and J. Simon p1650

Repression and speed improvement of photogenerated carrier induced refractive nonlinearity in InGaAs/InGaAsP quantum well waveguide. R.V. Penty, H.K. Tsang, I.H. White, R.S. Grant, W. Sibbett and J.E.A. Whiteaway p1447

Reverse exchange method for burying proton exchanged waveguides. J.L. Jackel and J.J. Johnson p1360

S-bends using offsets in fibre-compatible K^+–Na^+ ion-exchanged glass waveguides. J.J.G.M. van der Tol, J.W. Verhoof, M.B.J. Diemeer and E.C.M. Pennings p379

Scaling rules for glass based planar optical waveguides made by field assisted ion diffusion. M.C. Page, R. Oven and D.G. Ashworth p2073 e2300

Scattering losses in single and double heterostructure semiconductor optical rib waveguides. R.J. Deri, R.N. Thurston and R.J. Hawkins p483

Second harmonic generation in ion-exchanged waveguides of semiconductor microcrystallite-doped glasses. R.L. MacDonald, T.J. Driscoll and N.M. Lawandy p1717

Silver-film ion-exchanged singlemode waveguides in Er doped phosphate glass. S. Honkanen, S.I. Najafi, P. Poyhonen, G. Orcel, W.J. Wang and J. Chrostowski p2167

Simple approach for monolithic integration of DFB laser and passive waveguide. V. Hornung, D. Remiens, D. Robein, A. Gloukhian and M. Carré p1683

Simple method for estimating useable bend radii of deeply etched optical rib waveguides. E.C.M. Pennings, R.J. Deri and R.J. Hawkins p1532

Sparse matrix eigenvalue solver for finite element solution of dielectric waveguides. F.A. Fernandez, J.B. Davies, S. Zhu and Y. Lu p1824

Steering operation of optical beam scanner with semiconductor waveguides. K. Moriki, Y. Ohnishi, T. Hattori and K. Iga p450

Stimulated emission in Er : Ti : $LiNbO_3$ channel waveguides close to 1·53 μm transition. S. Helmfrid, G. Arvidsson, J. Webjörn, M. Linnarsson and T. Pihl p913

Surface emitting second harmonic generation in vertical resonator. R. Lodenkamper, M.M. Fejer and J.S. Harris p1882

Three-dimensional analysis of arbitrarily shaped multiple-inductive posts in rectangular waveguide. X.-H. Jiang and S.-F. Li p960

Variable grid finite difference methods for study of longitudinally varying planar waveguides. M. Artiglia, P. Di Vita, M. Potenza, G. Coppa, G. Lapenta and P. Ravetto p474

Vector spatial soliton: Trapped TM light pattern in planar geometry. Y. Chen p380

Vectorial beam-propagation method for integrated optics. R. Clauberg and P. Von Allmen p654

Waveguide optical polarisation splitter with Langmuir–Blodgett cladding layer. T. Mizumoto, N. Iwakiri, T. Kaneko and Y. Naito p271

YTTRIUM COMPOUNDS

Bolometric $YBa_2Cu_3O_{7-x}$ infra-red detector. T.Y. Tseng, C.Y. Chang, C.J. Haung and M.C. Chen p1724
